

**Office of Regulatory Staff
New Nuclear Development Update Report
V.C. Summer Units 2 & 3**

During the week of March 12, 2018, Office of Regulatory Staff – New Nuclear Development personnel (NND Personnel) worked at the VC Summer site on Monday.

On Monday March 12, NND Personnel attended the Plan of the Day meeting which focused on safety, SCE&G security and demobilization/abandonment of the site. The following activities were discussed:

- Westinghouse continues to prepare the concrete batch plant for auction
- Demobilization of large storage containers continues
- Craft working on Loading concrete forms

After the meeting, NND Personnel met with the SCE&G Abandonment Manager. The SCE&G Abandonment Manager stated that SCE&G and Santee Cooper signed a “Transfer Option Agreement” to allow Santee Cooper to start performing preventative maintenance of plant equipment, but the actual contract for the transfer of all plant equipment has not been signed. Santee Cooper has a “Right of Entry to Site” agreement with SCE&G which allows Santee Cooper contractor access to the site to perform preventative maintenance.

Additionally, SCE&G NND and VCS-Unit 1 staff are developing a “Sharing of Resources Agreement” to address future staffing of the site. Dominion Energy is planning to visit the site to view the equipment and the Simulator area.
