9. Do you have documentation and/or evidence to submit to the SC Broadband Office which supports your position?	yes

## 10. Application Comments

In the mapping data for project A, the layer marked OBB Proposed Served Structure Project A includes the served structures for both project B and project Tex McClure. Those additional data points from the other two projects were included in error. If you look at the mapping data for project B and project Tex McClure we did not make that same error, those two projects only contain proposed served structures for those areas. If needed we can remedy the error in project A's proposed served structure layer we can do that.
