

RIGHTS OF WAY INSPECTION

Please check each item and visually observe conditions sufficiently to make out this report. Also, answer the questions below as applicable.

Visual inspection of areas surround pipeline rights-of-way were observed in various locations across portions of the following areas:

- 1.
- 2.
- 3.
- 4.
- 5.

Items observed to identify any deficiencies included but were not limited to the following:

Y / N

1. *Foliage, grass, and other undergrowth.*
2. *Access to and from highways or roads.*
3. *Pipeline Markers in locations where required.*
4. *Pipeline Markers in good condition.*
5. *Ownership and contact information clearly visible on markers.*
6. *Other correct information on markers.*
7. *Obstructions or other impingements situated on pipeline rights-of-way.*
8. *Any gas facilities easily accessible.*
9. *Gas facilities in good general condition.*

All rights-of-way were:

1. *Clear from obstruction.*
2. *Easily accessible.*
3. *Readily marked.*
4. *ROW's in good general condition.*

All gas facilities observed were also generally in good condition and presented no issues or concerns regarding compliance with the state and/or federal pipeline safety regulations:
