

SC BBO
SC BROADBAND OFFICE

South Carolina Broadband Office

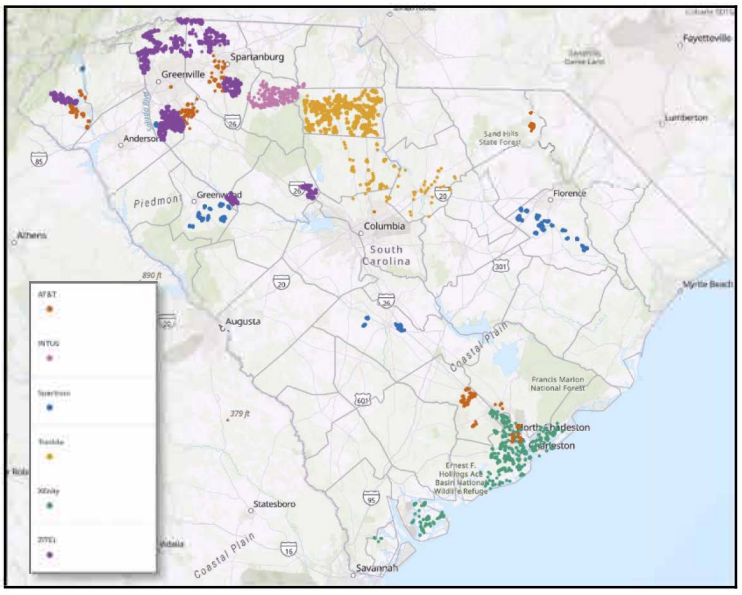

Annual Report 2026

Executive Summary 2025-2026

The South Carolina Broadband Office (SCBBO or the Office), part of the Office of Regulatory Staff (ORS), presents its annual report to the South Carolina General Assembly. This report summarizes activities and work completed by the Office in the State Fiscal Year of 2026 (July 1, 2025 - June 30, 2026).

Over the past fiscal year, the SCBBO made significant strategic investments to advance broadband access across the state. The Office focused on developing new broadband grant programs and monitoring existing initiatives to maximize the impact of investments and expand broadband infrastructure to South Carolinians. Project specifics are detailed in the appendix.

State Managed Investments

Broadband Equity, Access, and Deployment (BEAD) Program - The SCBBO continued to develop the grant program to manage BEAD federal funding. The BEAD program was established under the Infrastructure Investment and Jobs Act (IIJA) and is administered by the National Telecommunications and Information Administration (NTIA) within the U.S. Department of Commerce.

During the fiscal year, the SCBBO advanced the BEAD Program from planning and application development to project selection and implementation. Following changes to the federal BEAD program, the SCBBO updated South Carolina's program requirements and launched the Benefit of the Bargain application process in July 2025. The Office reviewed provider applications, completed additional eligibility and location data validation, and submitted South Carolina's BEAD Final Proposal to the NTIA in September 2025. These efforts resulted in 16 provisional projects to serve 20,480 locations. The NTIA approved South Carolina's Final Proposal in December 2025, which allowed the SCBBO to proceed with execution of subgrantee agreements and program implementation.

The SCBBO continued to coordinate BEAD with other broadband investments to ensure available funding was used efficiently. By June 30, 2026, 8 of the 16 projects identified in the Final Proposal were able to be addressed through other funding sources, creating seven Broadband Infrastructure Fund (BIF) projects and adding another to an existing ARPA project. This approach reduced the remaining BEAD portfolio to 19,022 locations requiring approximately $35.8 million in BEAD funding. Four of the eight remaining BEAD project agreements were executed by June 30, 2026. These efforts represent continued progress

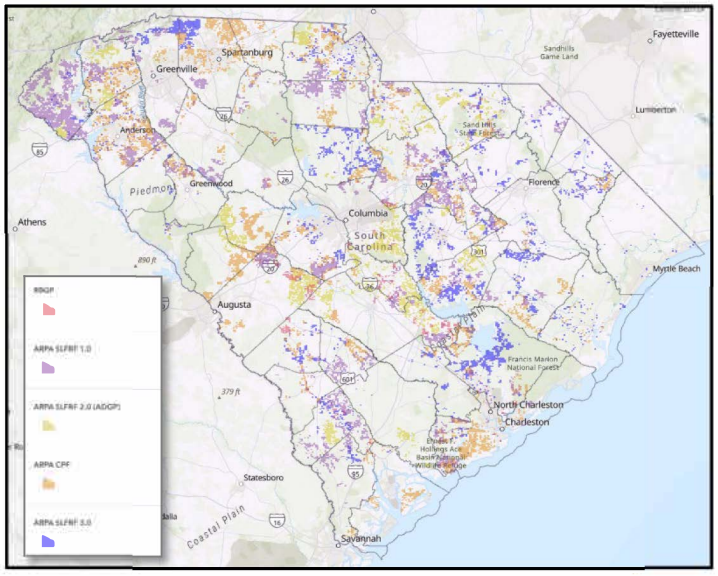

803.737.0800 | 1901 Main Street, Suite 1500, Columbia, SC 29201

toward expanding reliable broadband access to South Carolina's remaining unserved and underserved locations while accelerating construction timelines and maximizing the use of state and federal broadband resources.

The IIJA statute and the previously issued BEAD Notice of Funding Opportunity (NOFO) identified several eligible uses for over $500 million in BEAD non-deployment funds, including workforce development, cybersecurity improvements, network resiliency, and support for community anchor institutions. As of June 30, 2026, no guidance was issued on how these statutory and NOFO-defined categories will be interpreted or implemented in practice. The SCBBO will update its program materials and advise the General Assembly once federal guidance is reviewed and the practical application of these provisions becomes clear.

Additional SC BEAD program updates and information are available on the ORS website: https://ors.sc.gov/broadband/office/investments/state/bead.

Broadband Infrastructure Fund (BIF) - From July 1, 2025, through June 30, 2026, the South Carolina Broadband Infrastructure Fund (BIF) supported the deployment of broadband to BEAD-eligible locations through use of non-BEAD funding. As of June 30, 2026, BIF has supported seven new projects, representing approximately $4.75 million in broadband investment and reaching approximately 1,335 locations across South Carolina. All projects are scheduled for completion by June 30, 2028.

American Rescue Plan Act (ARPA) - The SCBBO funded 129 broadband projects using ARPA funds, awarding approximately $384 million (99.8%) for infrastructure and utilizing less than 1% for non-infrastructure expenses. Combined with $264 million in private-sector match, these projects resulted in an estimated $648 million in broadband infrastructure investment statewide. This reflects a 40.1% overall match rate from non-ARPA funds, including other federal and private investments.

The last ARPA agreement was signed on December 2, 2024. Throughout the program's lifespan, various amendments have been executed to adjust project scope. Reasons for the scope changes included accounting for the Federal Communications Commission's Broadband Data Collection fabric updates and redistributing unused or underbudget funds.

From July 1, 2025, to June 30, 2026, 30 ARPA-funded broadband projects were successfully closed. The fiscal year's completed projects have resulted in broadband access to 23,840 locations statewide. In total,

803.737.0800 | 1901 Main Street, Suite 1500, Columbia, SC 29201

89 of the 129 awarded ARPA projects have been formally closed and brought broadband access to 64,931 locations. All ARPA projects are scheduled for construction completion by December 31, 2026.

Rural Broadband Grant Program (RBGP) – All remaining RBGP projects were completed by April 2026. During its lifetime, RBGP provided $29,885,025 in funding to 32 projects, resulting in 21,753 locations gaining broadband access.

Coronavirus Aid, Relief, and Economic Security Act (CARES Act II) - All remaining CARES funds were expended this fiscal year. During its lifetime, the CARES Act II funded 17 projects, resulting in 6,191 locations gaining broadband access.

Strengthening Energy and Broadband Resilience

In addition to administering grant funds for broadband deployment, the SCBBO expanded its support for statewide resilience and emergency coordination through active engagement in ESF-12 (energy) and ESF-2 (communications). Working alongside utility providers, the South Carolina Emergency Management Division (SCEMD), federal, state, and local partners, the SCBBO contributed to multi-sector efforts that propose to strengthen response operations during disruptive events. Informed by the U.S. Department of Energy's report Advancing Resilience in South Carolina: Understanding Helene's Effects on Energy and Communications Resilience, the SCBBO has been coordinating the proposed use of an Entanglement Toolkit Application to better identify and address interdependencies between broadband infrastructure, energy systems, and county- and state-owned roadways. This initiative aims to reduce time-to-awareness for emergency managers and utility providers by establishing mechanisms that enable near-simultaneous recognition of utility entanglements across all sectors. To learn more, visit Untangling the Response, a proposed framework for managing and communicating road conditions and utility entanglements during emergency events.

State-Based Legislative Recommendations

The South Carolina Broadband Office appreciates the support it has received from the General Assembly. At this point, the SCBBO has no additional recommendations to present regarding legislative, regulatory, or governmental actions to promote broadband access. The SCBBO will continue to engage stakeholders and monitor implementation challenges as projects progress.

Conclusion

The near completion of South Carolina's ARPA broadband projects is an important milestone in the state's efforts to expand high-speed internet access. These investments have helped bring broadband to communities across the state and provided a strong foundation for the work ahead. With ARPA projects wrapping up, the SCBBO is now turning its focus to the implementation of the BEAD Program and reaching locations that still lack reliable internet access. The General Assembly's continued leadership ensures that South Carolina remains a national model for broadband expansion, transparency, and interagency coordination.

Data: Based on SCBBO Analysis of Grant Application Information for New/In-Process Projects, and Actual Close-Out Information for Completed Projects through June 30, 2026.
* Broadband Infrastructure Funds - other funding available from SCBBO.

Broadband Serviceable Locations
[1] Location BSLs - include all residential, non-residential and Community Anchor Institution structures, including structures that are (or contain) housing units or group quarters (as those terms are defined by the United States Census Bureau).

- Subsequent to June 30, 2026, payments were made to certain ISPs for completion of a Project. These payments are reflected in the Funding section shown above to reflect known completed Project amounts. Amendments to Agreements and new Agreements signed subsequent to June 30, 2026 are also reflected in the Funding amounts above to reflect the most accurate and up-to-date information at the time of finalizing this annual report.
