

Category	Question	ORS Response
General Bead Question	Will ORS be providing a shape file with the zip codes for the state? We don't currently have that as a layer on our map and would like to look at this while considering what we apply for under ARPA 3.0 and won't be sure we use the same file that ORS uses.	ORS will provide a fully-attributed shapefile of the Census-designated Zip Code Tabulation Areas (ZCTA) which contain BEAD-eligible unserved/underserved Broadband Serviceable Locations (BSLs) for South Carolina upon the approval of Volume 2.
General Bead Question	Will local governments receive funding to hire staff to assist their community with the BEAD Challenge? Many rural communities have limited staff, sometimes only a part-time Municipal Clerk.	No funds are available to financially support local government as part of the BEAD challenge process.
