

**2024**

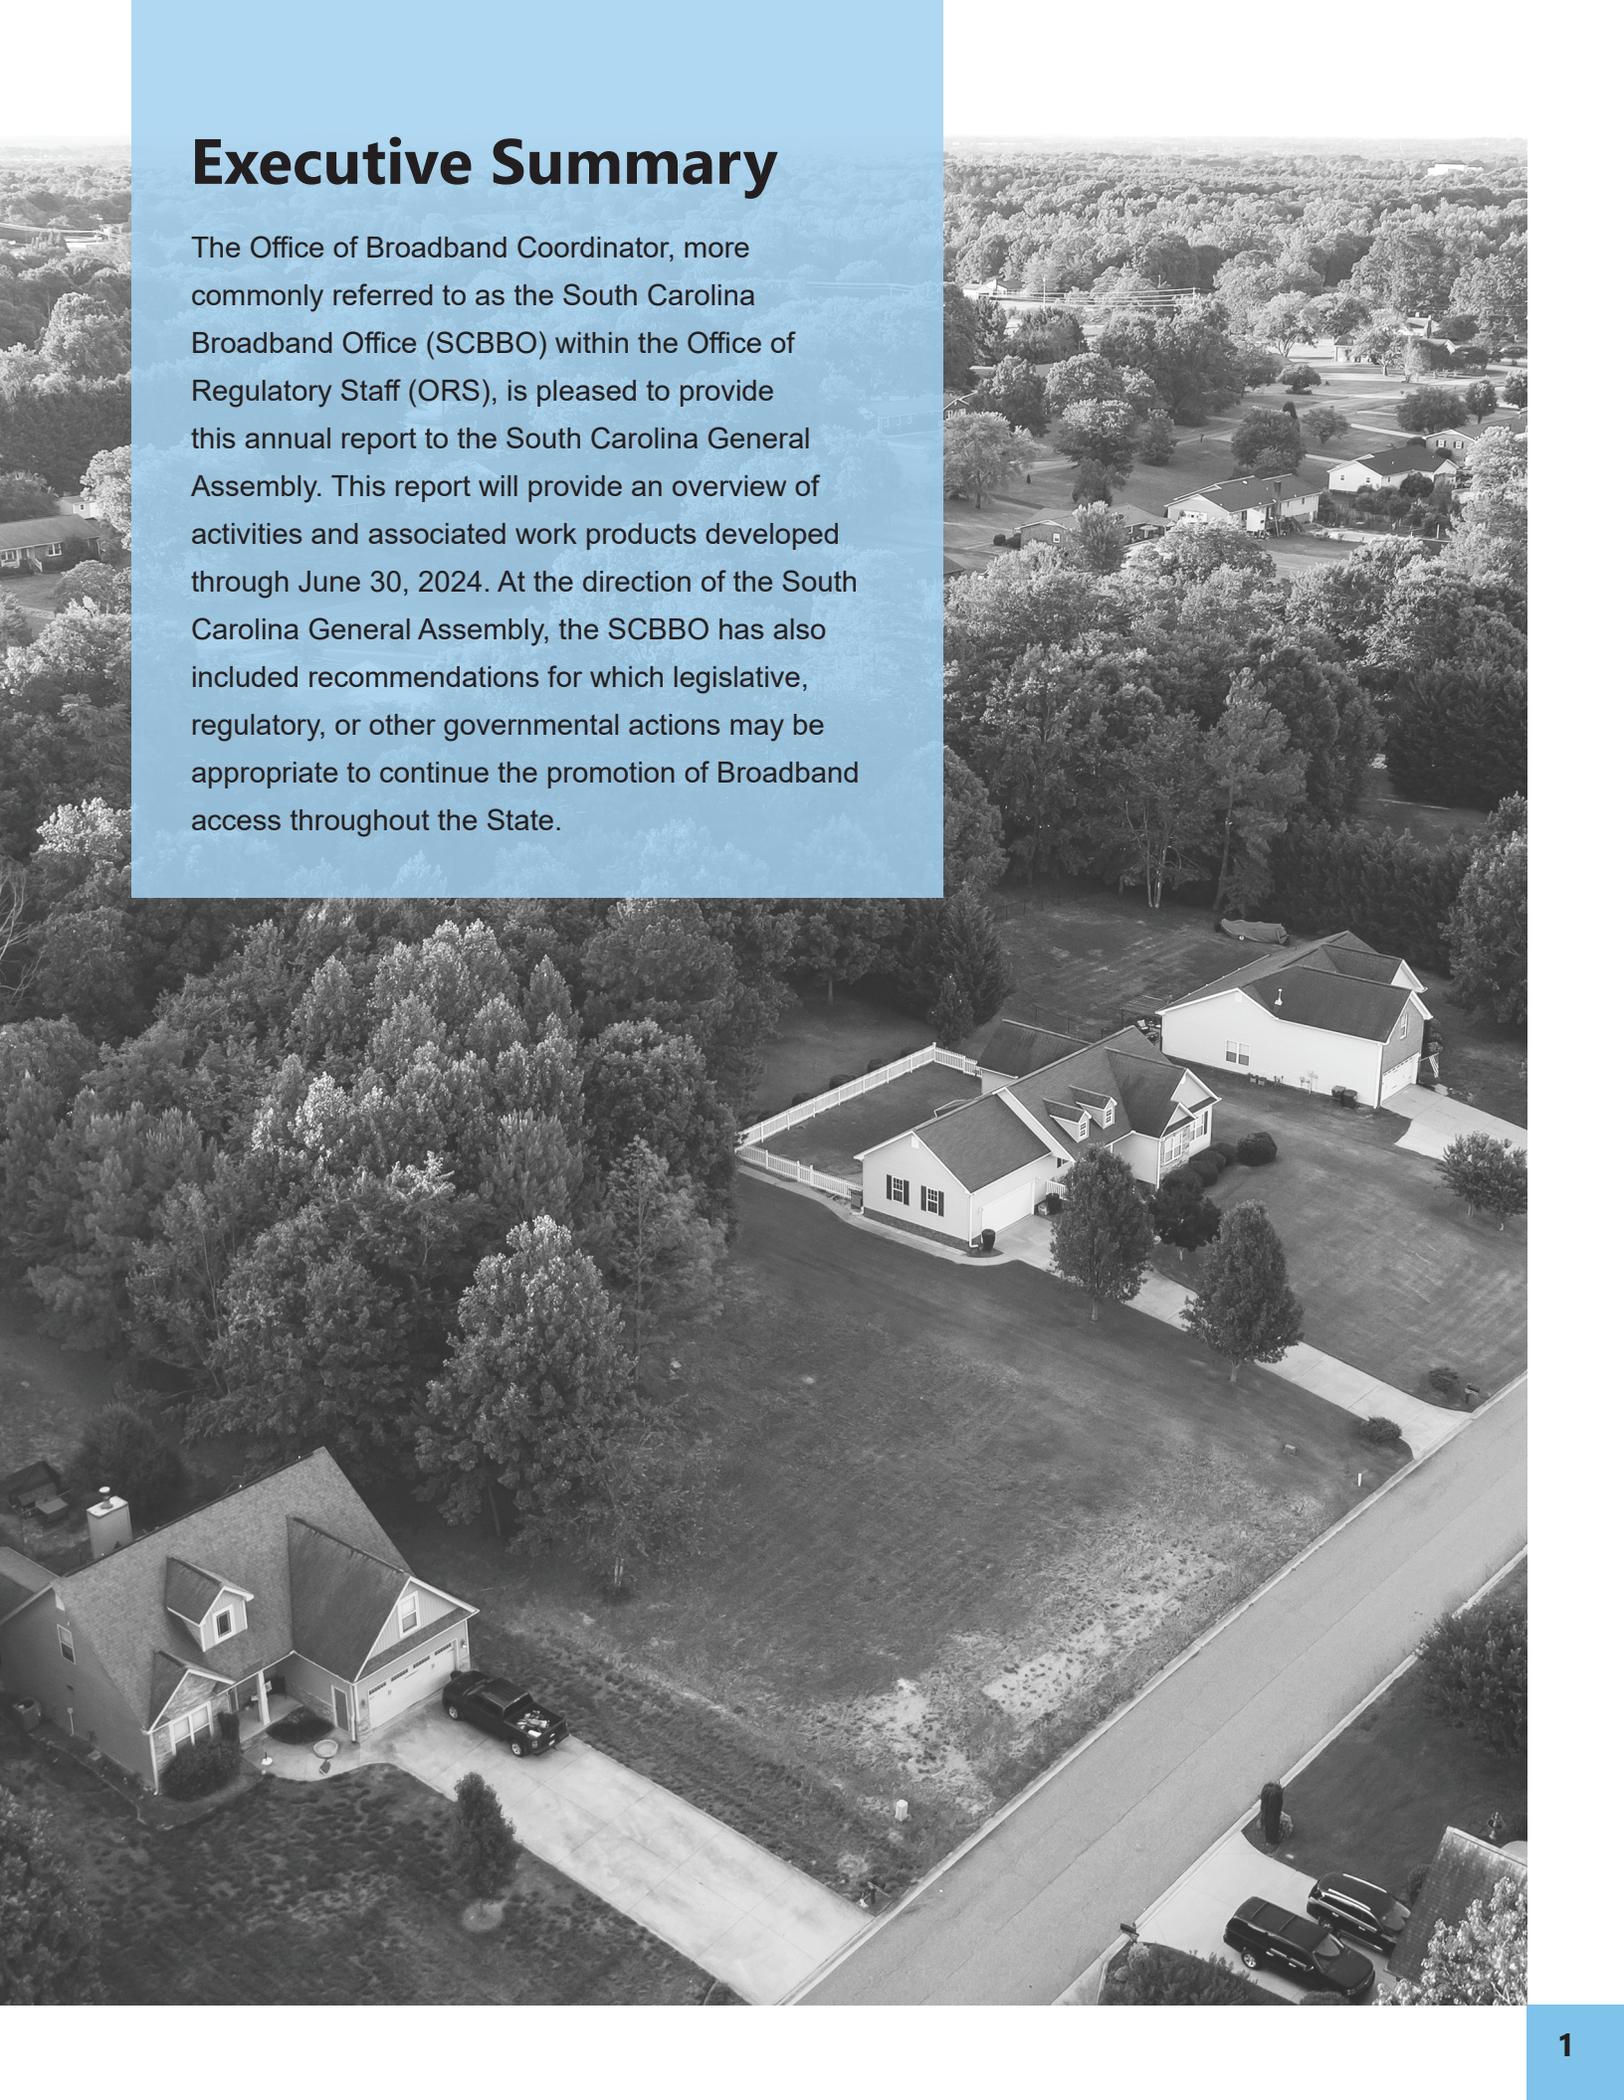

# Office of Broadband Coordinator

ANNUAL REPORT

# Executive Summary

The Office of Broadband Coordinator, more commonly referred to as the South Carolina Broadband Office (SCBBO) within the Office of Regulatory Staff (ORS), is pleased to provide this annual report to the South Carolina General Assembly. This report will provide an overview of activities and associated work products developed through June 30, 2024. At the direction of the South Carolina General Assembly, the SCBBO has also included recommendations for which legislative, regulatory, or other governmental actions may be appropriate to continue the promotion of Broadband access throughout the State.

# BROADBAND STATUS

Significant investments have been made over the course of the last State fiscal year with the SCBBO having brought to completion a historic \$400 Million American Rescue Plan Act (ARPA) financial commitment to connect over 112,000 locations by no later than December 2026. Internet Service Providers (ISPs) have worked tirelessly alongside the SCBBO to connect those who lack adequate service. As a result, this investment will bring either fiber-to-the-premise (FTTP) or hybrid fiber coaxial (HFC) deployment of quality Internet that will span over 13,000 miles of buried and aerial line Broadband construction and will connect homes, businesses, and community anchor institutions.

Overall, it took four grant rounds to achieve this objective, which commenced in the Summer of 2022 and is scheduled to conclude by the Summer of 2026. All projects have a two-year build cycle with the first grant round (ARPA SLFRF 1.0) concluding in December of this year. Just prior to the close of the State Fiscal Year, the SCBBO signed the final agreement of its ARPA SLFRF 3.0 competitive grant program obligating the remaining state-managed funds available for Broadband deployment from the US Treasury.

Summary By ARPA Grant Round

Grant Round	Project Count	ISP Count	Program		Funding				Statistics					
			Start	End	ARPA	Match	In-Kind	Total	Fiber Miles	Locations <sup>1</sup>	Complete			
CPF 1.0	34	14	12/2023	12/2025	\$185,121,661	46.3%	\$105,067,810	\$57,400	\$290,246,871	4,273	31,590	0		
SLFRF 1.0*	61	15	12/2022	12/2024	\$146,813,476	36.7%	\$94,686,922	0	\$241,500,398	5,200	40,403	12		
SLFRF 2.0	10	10	3/2021	6/2022	\$24,063,567	6.0%	\$24,075,613	0	\$48,139,180	2,092	19,137	10		
SLFRF 3.0	23	12	6/2024	6/2026	\$43,333,179	10.8%	\$39,171,378	0	\$82,504,557	1,684	21,253	0		
Non-Infrastructure					\$668,116	0.2%			\$668,116					
	<b>128</b>				<b>TOTAL</b>		<b>\$400,000,000</b>	<b>100.0%</b>	<b>\$263,001,723</b>	<b>\$57,400</b>	<b>\$663,059,122</b>	<b>13,249</b>	<b>112,383</b>	<b>22</b>

Data: Based on SCBBO Analysis of Grant Application Information for New/In-Process Projects, and Actual Close-Out Information for Completed Projects through June 28, 2024.

\* Updated 9/4/2024

The SCBBO funded 128 total projects using ARPA funds since inception, awarded \$399,331,884 (99.8%) for infrastructure, and utilized less than 1% for non-infrastructure expenses. When combined with \$263,059,123 in private-sector match, the SCBBO's ARPA programs resulted in an estimated \$663,059,112 in Broadband infrastructure investment for South Carolina. This amount reflects an overall match rate of 39.7% non-ARPA funds (other federal and/or private investment match). All ARPA-funded state-managed projects have been published in an online GIS web application available at: <https://scors.maps.arcgis.com/apps/webappviewer/index.html?id=687f2e99306042c6bb3e261ead8b7d80>

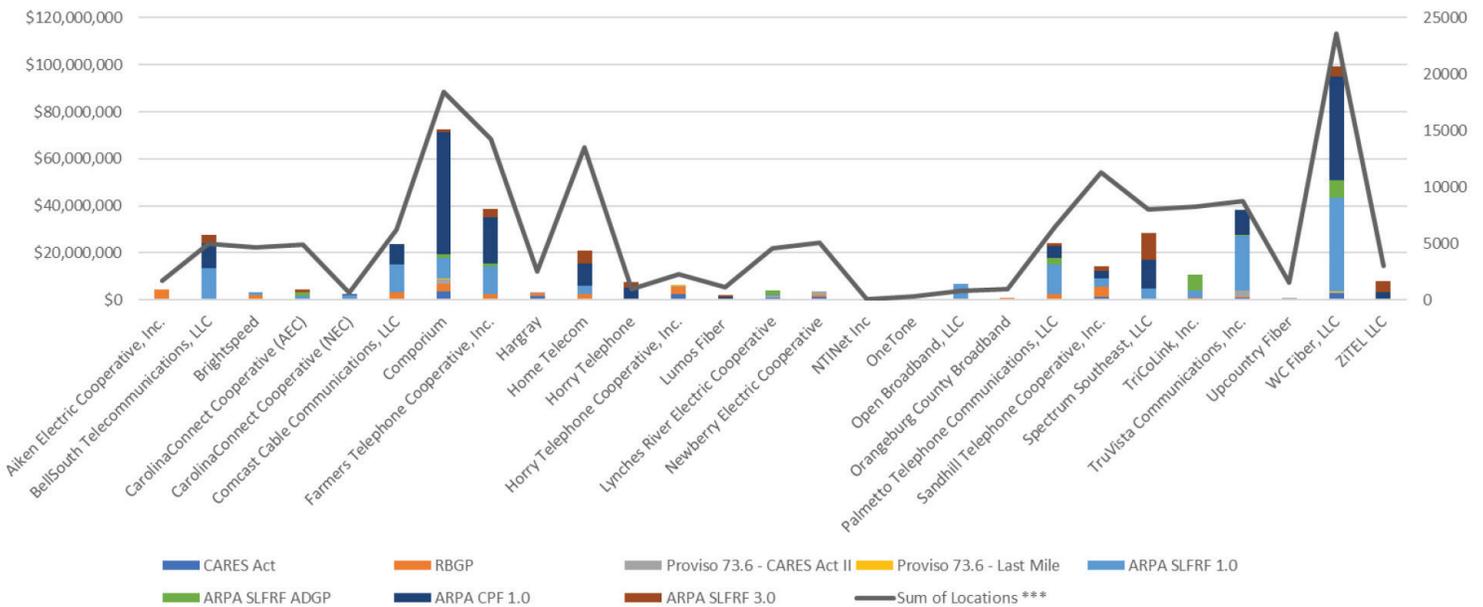

Over 193,000 Broadband Serviceable Locations (BSLs) have been funded through other federal grant programs. Remaining is approximately 31,000 Federal Communications Commission (FCC) BSLs that are designated as either unserved (lacks access to service greater than 25/3 Mbps) or underserved (lacks access to service greater than 100/20 Mbps). These BSLs will be eligible for funding through a separate competitive grant program known as Broadband Equity, Access, and Deployment (BEAD).

The BEAD program has been authorized through the Infrastructure Investment and Jobs Act (IIJA) administered by the National Telecommunications and Information Administration (NTIA) within the US Department of Commerce. As of June 30, 2024, the SCBBO continues to work through final curing to solidify its Initial Proposal and BEAD-eligible BSLs through the NTIA. More information about BEAD program requirements can be found through the Notice of Funding Opportunity (NOFO) available at: <https://Broadbandusa.ntia.doc.gov/sites/default/files/2022-05/BEAD%20NOFO.pdf>. Approval of the State's BEAD Initial Proposal is projected to secure an additional \$546 million for Broadband investment and provide necessary funding to connect all remaining homes, businesses, and community anchor institutions in the State. Additional details regarding active state-managed grant programs and BEAD eligible BSLs are provided in the sections that follow.

# STATE MANAGED INVESTMENTS

## Pre-ARPA State Managed Investments

- CARES Act II** – Remaining funds from the Coronavirus Aid, Relief, and Economic Security Act were used to award an additional Broadband deployment project under the ARPA SLFRF 3.0 grant program to provide access to 2,300 unserved and underserved BSLs near the town of Chesnee in Spartanburg and Cherokee counties, respectively. This project is scheduled for completion by June 30, 2026.
- Rural Broadband Grant Program (RBGP)** – The SCBBO expanded two projects with portions of funds remaining provided by the SC Department of Commerce to connect more locations in the town of Eutawville located in Orangeburg County as well as additional locations in Aiken and Barnwell counties. These two expanded projects will provide access to 1,200 locations. These projects are scheduled for completion by December 31, 2024.

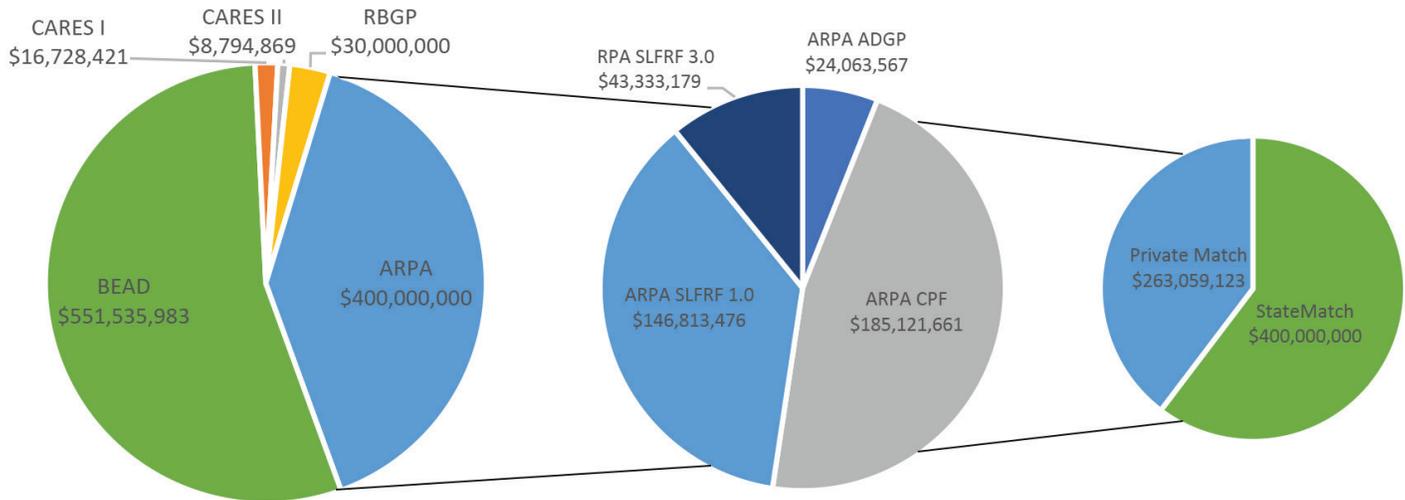

## ARPA State Managed Investments

- ARPA SLFRF 1.0** - State Local Fiscal Recovery Funds (SLFRF) – The SCBBO awarded \$146.8 million to 15 ISPs for 61 projects, covering 36 counties, and building over 5,200 miles of infrastructure to connect over 40,000 locations. Twelve (12) out of 61 projects have been completed, with all remaining projects scheduled for completion by December 31, 2024.
- ARPA ADGP [SLFRF funds source] 2.0** - Accelerated Deployment Grant Program (ADGP) – The SCBBO awarded \$24 million to 10 ISPs to offset construction costs from March 15, 2021, to June 30, 2022 in accordance with guidance from the SC General Assembly. This program enhanced Broadband connectivity in 24 counties, with over 2,000 eligible miles of infrastructure built to connect over 19,000 locations. Work has been completed across all projects. The ADGP Grant program is now closed.
- ARPA CPF 1.0 - Capital Project Fund Plan (CPF)** – The SCBBO completed executing agreements for this program in February of 2024, awarding \$185.1 million to 14 ISPs for 34 projects, covering 41 counties and building over 4,200 miles of infrastructure to connect over 31,000 locations. This program includes two main street projects located in the Towns of Norway and Ridge Spring, SC. Completion of all projects is scheduled by December 31, 2025.

# STATE MANAGED INVESTMENTS

- **ARPA SLFRF 3.0** – State Local Fiscal Recovery Funds (SLFRF) – The SCBBO completed executing agreements for this program in June of 2024, awarding \$43.3 million to 12 ISPs for 23 projects, covering 32 counties, and building over 1,600 miles of infrastructure to connect over 21,000 locations. Completion of all projects is scheduled by June 30, 2026.

## Federal Broadband Grant Awards

The table illustrated below shows all awarded federal Broadband grant programs in South Carolina and their corresponding number of BSLs that will have access to high-speed Internet at the completion of the project. These programs are not administered by the SCBBO. Information was sourced from the NTIA National Broadband and Map program.

Federal Investments			
Grant Program	ISP	# of BSLs	Total # of BSLs
FCC Rural Digital Opportunity Fund	Carolina Connect Cooperative	1,898	82,588
	Charter	79,902	
	Horry Telephone Cooperative	353	
	Palmetto Rural Telephone Cooperative	231	
	Tri-County Electric Cooperative	69	
	Windstream	135	
FCC Enhanced ACAM	Cable One, Inc.	55,620	84,863
	Palmetto Rural Telephone Cooperative	14,230	
	Telephone and Data Systems, Inc.	15,013	
FCC Telephone Loan Program	Palmetto Rural Telephone Cooperative	8,249	8,249
USDA ReConnect Loan and Grant Program	Home Telecom	4,836	17,304
	Horry Telephone Cooperative	2,117	
	Orangeburg County Broadband	7,994	
	Tru-Vista	2,357	
		<b>Total</b>	<b>193,004</b>

# Broadband, Equity, Access, and Deployment (BEAD)

Following the completion of the State's Five-Year Broadband Action Plan, the SCBBO was required to develop an Initial Proposal comprised of two separate volumes.

Volume I focused on implementing a map-challenge process to determine all remaining BSLs that will be designated as eligible for funding represented as either unserved, underserved, or an eligible Community Anchor Institution (CAI), on a statewide Broadband eligibility map. Defining an FCC BSL as served, unserved, or underserved is more specifically outlined in the State's BEAD Initial Proposal Volume I, which is available on the ORS website: <https://ors.sc.gov/Broadband/office/investments/state/bead>.

The SCBBO successfully completed the BEAD Map Challenge process on schedule by July 15, 2024, concluding the final determination phase. The office is currently working through comments from the NTIA and, upon approval, will publish the final set of Broadband BSLs and associated Zip Code Tabulation Areas (ZCTAs), corresponding to those eligible point locations as areas eligible for BEAD funding to further support the close of the digital divide.

Additionally, the SCBBO submitted to the NTIA Volume II, which is focused on details specific to the administration of the BEAD grant program. The SCBBO received feedback from, and continues to coordinate with, the NTIA to finalize curing of Volume II. The SCBBO anticipates launching the BEAD grant program for the State during the fall/winter of 2024, which is predicated on obtaining approval of Volume II from the NTIA.

The SCBBO intends to award projects against all remaining eligible locations lacking access to

reliable Broadband identified during the BEAD Map-Challenge process. Connecting these remaining locations will serve as a basis for the SCBBO to certify all remaining BSLs in the State will have access to Broadband at the completion of the BEAD program. Any remaining funds may be used for other non-deployment related activities as outlined in Volume II of the State's Initial Proposal.

***“Our vision is for all South Carolinians to have access to affordable, reliable, high-speed internet, and to gain the necessary skills to benefit from this technology.” – SCBBO –***

## State-Based Legislative Recommendations

### *Streamline State and Federal Permitting Requirements*

The types of federal permits that may be required as part of a BEAD grant program by prospective applicants is expansive. It is a subgrantee's responsibility to obtain certain federal, state, and local governmental permits and approvals necessary for proposed work to be conducted. Additionally, obtaining permits and rights-of-way (ROW) for network deployment can often be a time-consuming and challenging process. Furthermore, the BEAD program may cause additional burden on agencies and utilities managing permits. As BEAD accelerates the number of projects, the number of permits will increase substantially, and agencies may not be prepared for the influx. As an eligible entity tasked with the administration of funds under the BEAD program, the SCBBO helps ensure compliance with all federal, state, and local permitting and is working to ensure policies are in place for the State to assist with streamlining permitting workflows respectively. To further support coordination, programmatic agreements could be developed between the SCBBO,

# State-Based Legislative Recommendations

permitting agencies, and associated utilities to better define certain processes. Finally, other agencies could support the SCBBO by detailing personnel to create and staff a new permitting and monitoring department focused on streamlining efforts for BEAD projects. The NTIA recommends consideration be made toward enacting new legislation and/or an executive order to streamline permitting if expedited workflow processes around Broadband permitting do not currently exist. States are encouraged to 1) standardize intake of permit applications through an online centralized process 2) identify a single point of contact for a given permitting agency pertaining to Broadband deployment projects 3) establish a 30-day 'shot clock' for the authorization or denial of permits 4) waive permit fees where applicable and 5) include screening data available for download along with online tools and resources to determine the types of permits that may be required for any given project.

## *Address South Carolina Municipal Broadband Limitations*

Under the BEAD program, municipal entities are eligible to apply for BEAD grants supporting Broadband deployment and service. SC State law (S.C. Code Ann. § 58-9-2600 et seq.) ensures that government resources are not used in an unfair, anticompetitive manner and requires various procedural requirements, limitations, and additional tax considerations that some may consider to be barriers to the provision of municipal retail Broadband service. With the exception of Orangeburg and Oconee Counties, local government-owned communications service providers or municipal Broadband networks have to first show that there is no ISP or internet service available in an area prior to offering retail Broadband services (service directly to residents). At the time of this annual report submission, no government entity has chosen to make a filing at the Public Service Commission of

South Carolina to declare an area is unserved and that the government entity seeks to provide retail internet service in that unserved area.

## *Promote and Adopt a Dig Once Policy for South Carolina*

ARPA SLFRF investments (non-Broadband related) in South Carolina have been allocated to multiple agencies focused on infrastructure projects, including the Rural Infrastructure Authority and the Department of Transportation. The ORS acknowledges the unique opportunity this funding provides to encourage "Dig Once" practices through grant programs administered by the State. The concept of Dig Once is focused on minimizing the number and scale of ground excavation projects when installing infrastructure.

As an example, the practice of Dig Once effectively eliminates the need to dig up recently paved roads to expand water and sewer lines going down a Main Street. The overall harmonization of construction activities can eliminate disruption to projects and overall operations, save time, and significantly reduce the cost of building out infrastructure. It is through this lens the SCBBO is encouraging grantees to consider any potential for implementing dig-once best practices tied to their grant award(s) through the SCBBO. Advocacy will continue through all ARPA grant programs. However, the BEAD Notice of Funding Opportunity (NOFO) requires states to "promote and adopt a dig-once policy." Preliminary discussions with partnering agencies reveal there is a value of a dig-once approach.

The ORS recommends that the South Carolina Utility Coordinating Committee, give consideration toward establishing best practices which can be adopted as a statewide or local policy.

## *SC811 Dig Locates*

As part of the management and oversight of ARPA SLFRF projects, the SCBBO has obtained feedback from grantees during regularly scheduled monthly status meetings that, when called upon as part of the SC811 locate process, all utility providers are not

# State-Based Legislative Recommendations

locating and marking their facilities. This error is resulting in cut lines and disruption to service for consumers. Local utility providers cite the increased volume in tickets as well as distances that are listed for locate tickets as barriers toward achieving compliance with the Underground Damage Prevention Act and SC811 locate policy. The SCBBO recommends reviewing best practices in other jurisdictions on ways to incentivize dig locates by utility providers.

## *Rail Permitting*

As part of the management and oversight of ARPA SLFRF projects, the SCBBO has obtained feedback from grantees during regularly scheduled monthly status meetings that delays in scheduling and cost associated with railway permits have proven challenging. Other states have legislation that has proved helpful with this issue. For instance, [Virginia](#) and [Wisconsin](#) streamline railway permits by, for example, setting a 30-day timeline to review a railroad-crossing notice, establish standardized crossing fees, and appoint an authority to facilitate adjudication when parties disagree. A similar approach in South Carolina may be beneficial.

## Conclusion

The SCBBO will continue to manage all ongoing projects to completion. Upon approval of its BEAD Initial Proposal, the SCBBO will initiate a final Broadband deployment grant program to provide access in remaining areas designated as unserved and underserved with reliable Internet.

With the support of State leadership, the SCBBO has made great strides towards closing the digital divide working in lockstep with ISPs across the State. The investments made today will serve South Carolinians by providing a world-class communications network designed and engineered to meet the needs of consumers and industry for generations.

# Statewide Broadband Access Statistics

## South Carolina

Statewide

### Statistics

June 30, 2024

#### Broadband Serviceable Locations

As defined by the Federal Communications Commission (FCC), a single broadband serviceable location (BSL) is a business or residential location in the United States at which mass-market fixed broadband Internet access service is, or can be, installed. The phrase BSL Fabric refers to a collection of BSLs.

#### Residential BSL

As defined by the FCC, Residential BSLs include all residential structures, including structures that are (or contain) housing units or group quarters (as those terms are defined by the United States Census Bureau). Note: One BSL may equate to multiple units.

#### Business BSL

Business BSLs include all non-residential (business, government, non-profit, etc.) structures that are on property without residential locations and that would be expected to demand mass-market, on-enterprise-grade Internet access service. Note: One BSL may equate to multiple units.

#### Population

Population data provided by SC Revenue and Fiscal Affairs as of Jun. 30, 2023.

#### Public K-12

K-12 student data reflects the subset of public-school students which have been geocoded as of Sep. 30, 2023. Student data was provided by the SC Department of Education.

#### Data Sources:

Based on SC Broadband Office (SCBBO) analysis of FCC Broadband Data Collection (fcc.gov), Jun. 30, 2023 (as of Mar. 19, 2024), submissions that were audited through the SC BEAD Challenge process which concluded on Jun. 30, 2024. The SC BEAD Challenge process relied upon FCC BSL Fabric Jun. 30, 2023, Version 3.2 (pub. Jul. 21, 2023). Satellite and mobile broadband services are excluded. Population and K-12 estimates are derived from residential unit level data based on the FCC BSL fabric.

Broadband investment data based on SCBBO actual BSL contract data in the case of state-managed funds (when available) and best-available federal data in the case of FCC and US Department of Agriculture (USDA) managed investments. County-level investments are based upon data provided to the SCBBO.

The SCBBO is neither responsible nor liable for damages or injuries caused by failure of performance, error, omission, inaccuracy, inaccessibility, incompleteness or any other errors of this information period or formatting on this slide. This data should be used for general reference purposes only.

Additional broadband information regarding South Carolina may be found at [www.scdigitaldrive.org](http://www.scdigitaldrive.org). Submit comments or questions to [broadband@ors.sc.gov](mailto:broadband@ors.sc.gov)
