SEE CREDITS DESCRIPTIONS ON THE FOLLOWING PAGES

Instructions for Part I Corporate Income Tax Credits

NOTE: For consolidated returns, attach a consolidated SC1120TC.

Line 13 - Total Columns A through E

The Total of **Column A, Previously Accrued** should be entered on Schedule C, Line 1 of the SC1120, SC1120U, SC990-T.

The Total of **Column B, Earned This Year** should be entered on Schedule C, Line 2 of the SC1120, SC1120U, SC990-T.

The Total of **Column C, Taken This Year** should be the amount shown on Schedule C, Line 5 of the SC1120, SC1120U, or SC990-T, as applicable. On the SC1120S this will be passed through to the shareholders and shown on their SC1120S-K1. Enter credits taken on SC 1101B and SC1104, as applicable.

The Total of **Column D, Lost due to Statute** should be the amount shown on Schedule C, Line 6 of the SC1120, SC1120U, or SC990-T, as applicable.

The Total of **Column E, Carried Forward** should be the amount shown on Schedule C, Line 7 of the SC1120, SC1120U, or SC990-T, as applicable. Do not include credits passed through to shareholders.

Instructions for Part II Corporate License Fee Credits

Line 7 - Total Columns A through E.

The Total of Column C, **Taken This Year** should be entered on Line 22 of the SC1120 or Line 16 of the SC1120S. The credits on this form cannot be used to offset license fees on the SC1120U or the CL-4 returns. For a credit against these license fees see Section 12-20-105 of the South Carolina Code of Laws.

DEFINITIONS:

PREVIOUSLY ACCRUED: Credits earned but not used in previous years and still available for use in current or future years.

LOST DUE TO STATUTE: Credits previously earned but lost due to expiration of the time period for claiming them during this tax year.

CARRIED FORWARD: Credits not used but still available for future use. Do not include credits passed through to shareholders.

PART III ROADS

A separate Sch. TC-6 must be prepared for each road project.

1.	Expenses of road project. (Project must be dedicated to public use. See instructions, paragraph B)	1.	
2.	Expenses allocated to taxpayer's benefit. (See instructions, paragraph C)	2.	$
3.	Subtract line 2 from line 1	3.	
4.	Contributions 2014 Expenditure (See instructions, paragraph D)	4.	100,000.00
5.	Combine lines 3 and 4	5.	100,000.00
6.	Multiply amount on line 5 by 50%	6.	50,000.00
7.	Maximum credit allowed per project	7.	$10,000
8.	Enter the lesser of lines 6 or 7. Credit amount on line 8 is combined with credit amounts from other qualifying infrastructure projects and entered on form SC1120-TC	8.	10,000.00

Recapture of Infrastructure Credit if a Road is removed from State Highway or Public Road System

1.	Expenses (or contributions) of road project	1.	
2.	Expenses allocated to road project removed from state or public system	2.	
3.	Divide amount on line 2 by amount on line 1	3.	%
4.	Credit allowed for roads project	4.	
5.	Multiply amount on line 4 by percentage on line 3. Amount on line 5 must be added to income tax due	5.	

Effective June 6, 2006, a taxpayer can claim the infrastructure credit against bank tax.

GENERAL INSTRUCTIONS FOR SC SCH. TC 6

Be sure to ATTACH any necessary documents. See item E below.

A. South Carolina Code § 12-6-3420 allows a corporate taxpayer a credit against income tax imposed on corporations an amount equal to 50%, not to exceed $10,000 annually, of expenses paid or accrued by the taxpayer in building or improving any one infrastructure project. Effective June 6, 2006, the credit can be claimed against bank tax. Any unused credit up to a total of $30,000 may be carried forward three years.

B. For purposes of this credit, an infrastructure project includes water lines, sewer lines, their related facilities and roads that:
(1) do not exclusively benefit the taxpayer;
(2) are built to applicable standards;
(3) are dedicated to public use or, in the case of water and sewer lines and their related facilities in areas served by a private water and sewer company, the water and sewer lines are deeded to a qualified private entity.

20 16

Name as Shown on Tax Return	County	SSN or FEIN
SOUTH CAROLINA GENERATING COMPANY, INC.		57-0784498

IMPORTANT: Use 2010 version of this form to claim credit for qualifying investments made in an Economic Impact Zone before January 1, 2011. Prior year forms are available at www.dor.sc.gov.

Purpose: Use this form to claim the capital investment credit **for qualified investments made in this State on or after January 1, 2011.** This schedule must be completed and filed with the income tax return in order to claim a capital investment credit for the cost basis of qualified manufacturing and productive equipment property.

Read the definitions on the reverse side carefully before completing this schedule.

Enter qualified manufacturing and productive equipment property on the schedule below.

NOTE: Qualified property is property used as an integral part of manufacturing or production or used as an integral part of extracting of or furnishing transportation, communications, electrical energy, gas, water or sewage disposal services in this State and meets other requirements of SC Code Section 12-14-60. **Credit cannot be taken on property transferred from somewhere else unless the original use of such property commences with the taxpayer inside the State on or after January 1, 2011 or in an Economic Impact Zone before January 1, 2011.** ***Recapture of the credit will be required if the taxpayer disposes of or removes the property from this State before the end of the applicable recovery period of the property.***

SOUTH CAROLINA ELECTRIC & GAS COMPANY		57-0248695

IMPORTANT: Use 2010 version of this form to claim credit for qualifying investments made in an Economic Impact Zone before January 1, 2011. Prior year forms are available at www.dor.sc.gov.

Purpose: Use this form to claim the capital investment credit for **qualified investments made in this State on or after January 1, 2011.** This schedule must be completed and filed with the income tax return in order to claim a capital investment credit for the cost basis of qualified manufacturing and productive equipment property.

Read the definitions on the reverse side carefully before completing this schedule.

Enter qualified manufacturing and productive equipment property on the schedule below.

NOTE: Qualified property is property used as an integral part of manufacturing or production or used as an integral part of extracting of or furnishing transportation, communications, electrical energy, gas, water or sewage disposal services in this State and meets other requirements of SC Code Section 12-14-60. **Credit cannot be taken on property transferred from somewhere else unless the original use of such property commences with the taxpayer inside the State on or after January 1, 2011 or in an Economic Impact Zone before January 1, 2011. Recapture of the credit will be required if the taxpayer disposes of or removes the property from this State before the end of the applicable recovery period of the property.**

		(1) Basis	(2) Credit Percentage		(3) Credit Amount (column 1 x column 2)
1.	Three-year Property		0.5%	1.	
2.	Five-year Property		1.0%	2.	
3.	Seven-year Property		1.5%	3.	
4.	Ten-year Property		2.0%	4.	
5.	Fifteen-year Property or greater	362,784,984	2.5%	5.	9,069,625
6.	Total of lines 1 through 5			6.	9,069,625
7.	Unused credits from 1997 and later that are available to carry forward.			7.	
8.	Credit - Total of lines 6 and 7. **Complete line 9 if subject to the license fee for utilities in SC Code Section 12-20-100.**			8.	9,069,625
9.	**Utilities only:** Enter amount from the Worksheet in the instructions.			9.	
10.	The lesser of lines 8 and 9. This is your total credit available for the current year.			10.	5,000,000

9. Enter the lesser of line 4 or line 8 (This is the amount of Research Expenses Credit you may use this year.)	9. $	8,135,367
10. Line 4 minus line 9. (Unused Research Expenses Credit may be carried forward for up to 10 years.)	10. $	13,428,781

GENERAL INSTRUCTIONS

Effective for tax years beginning after June 30, 2001, a taxpayer claiming a federal income tax credit for research expenses (under Internal Revenue Code Section 41) may claim a credit against individual or corporate income tax and corporate license fees. The credit is 5% of the qualified research expenses, as defined by Internal Revenue Code Section 41(b), made by the taxpayer in South Carolina during the tax year.

The credit taken in any tax year may not exceed 50% of the taxpayer's tax liability remaining after all other credits are applied. Any unused credit can be carried forward but must be used before a tax year beginning 10 years or after from the date of the qualified research expenses. Credit earned in tax years beginning in 2006 or before cannot be used against individual income tax. The credit is allowed under S.C. Code Section 12-6-3415.

Social Security Privacy Act Disclosure
It is mandatory that you provide your social security number on this tax form if you are an individual taxpayer. 42 U.S.C 405(c)(2)(C)(i) permits a state to use an individual's social security number as means of identification in administration of any tax. SC Regulation 117-201 mandates that any person required to make a return to the SC Department of Revenue shall provide identifying numbers, as prescribed, for securing proper identification. Your social security number is used for identification purposes.

The Family Privacy Protection Act
Under the Family Privacy Protection Act, the collection of personal information from citizens by the Department of Revenue is limited to the information necessary for the Department to fulfill its statutory duties. In most instances, once this information is collected by the Department, it is protected by law from public disclosure. In those situations where public disclosure is not prohibited, the Family Privacy Protection Act prevents such information from being used by third parties for commercial solicitation purposes.

SCANA Corporation & Subsidiaries
Sch TC 11
FEIN: 57-0784499
SC File # - 20119164-6
For the Year Ended December 31, 2016

SCANA Corporation is taking the capital investment credit in accordance with SC §12-14-60.

Accordingly, Sch TC 11 has been completed with a five million dollar maximum credit generated per year per entity applicable to utilities subject to SC Code §12-20-100.

FORM 8275 DISCLOSURE AND WAIVER STATEMENT

RE: CAPITAL INVESTMENT TAX CREDITS

SCANA Corporation and Subsidiaries
2016 South Carolina Income Tax Return

For tax year 2016, SCANA Corporation (Taxpayer) and subsidiaries of SCANA Corporation have generated tax credits pursuant to the operation of S.C. Code Section 12-14-60 (Investment Tax Credits).

In accordance with Section 12-14-60(C), SCANA Corporation and its applicable subsidiaries also expressly waive the application of any and all other tax credits with respect to the properties for which these investment tax credits are claimed.

Schedule J Tax Computation and Payment (see instructions)

Part I-Tax Computation

1	Check if the corporation is a member of a controlled group (attach Schedule O (Form 1120)). See instructions ▶				
2	Income tax. Check if a qualified personal service corporation. See instructions ▶			2	
3	Alternative minimum tax (attach Form 4626)			3	NONE
4	Add lines 2 and 3			4	NONE
5a	Foreign tax credit (attach Form 1118)	5a			
b	Credit from Form 8834 (see instructions)	5b			
c	General business credit (attach Form 3800)	5c			
d	Credit for prior year minimum tax (attach Form 8827)	5d			
e	Bond credits from Form 8912	5e			
6	**Total credits.** Add lines 5a through 5e			6	
7	Subtract line 6 from line 4			7	NONE
8	Personal holding company tax (attach Schedule PH (Form 1120))			8	
9a	Recapture of investment credit (attach Form 4255)	9a			
b	Recapture of low-income housing credit (attach Form 8611)	9b			
c	Interest due under the look-back method - completed long-term contracts (attach Form 8697)	9c			
d	Interest due under the look-back method - income forecast method (attach Form 8866)	9d			
e	Alternative tax on qualifying shipping activities (attach Form 8902)	9e			
f	Other (see instructions - attach statement)	9f			
10	**Total.** Add lines 9a through 9f			10	
11	**Total tax.** Add lines 7, 8, and 10. Enter here and on page 1, line 31			11	NONE

Part II-Payments and Refundable Credits

12	2015 overpayment credited to 2016			12	
13	2016 estimated tax payments			13	6,000,000.
14	2016 refund applied for on Form 4466			14	( )
15	Combine lines 12, 13, and 14			15	6,000,000.
16	Tax deposited with Form 7004			16	
17	Withholding (see instructions)			17	
18	**Total payments.** Add lines 15, 16, and 17			18	6,000,000.
19	Refundable credits from:				
a	Form 2439	19a			
b	Form 4136	19b	237,866.		
c	Form 8827, line 8c	19c			
d	Other (attach statement - see instructions)	19d			
20	**Total credits.** Add lines 19a through 19d			20	237,866.
21	**Total payments and credits.** Add lines 18 and 20. Enter here and on page 1, line 32			21	6,237,866.

Schedule K Other Information (see instructions)

		Yes	No
1	Check accounting method: a ☐ Cash b ☒ Accrual c ☐ Other (specify) ▶		
2	See the instructions and enter the:		
a	Business activity code no. ▶ 551112		
b	Business activity ▶ HOLDING COMPANY		
c	Product or service ▶ HOLDING COMPANY		
3	Is the corporation a subsidiary in an affiliated group or a parent-subsidiary controlled group?		X
	If "Yes," enter name and EIN of the parent corporation ▶		
4	At the end of the tax year:		
a	Did any foreign or domestic corporation, partnership (including any entity treated as a partnership), trust, or tax-exempt organization own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part I of Schedule G (Form 1120) (attach Schedule G)		X
b	Did any individual or estate own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part II of Schedule G (Form 1120) (attach Schedule G)		X

Form **1120** (2016)

SCANA CORPORATION 57-0784499

Form 1120 (2016) Page 4

Schedule K Other Information *(continued from page 3)*

	Yes	No
5 At the end of the tax year, did the corporation:		
a Own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of stock entitled to vote of any foreign or domestic corporation not included on **Form 851,** Affiliations Schedule? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below.		X

(i) Name of Corporation	(ii) Employer Identification Number (if any)	(iii) Country of Incorporation	(iv) Percentage Owned in Voting Stock

	Yes	No
b Own directly an interest of 20% or more, or own, directly or indirectly, an interest of 50% or more in any foreign or domestic partnership (including an entity treated as a partnership) or in the beneficial interest of a trust? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below. See Statement 14	X	

(i) Name of Entity	(ii) Employer Identification Number (if any)	(iii) Country of Organization	(iv) Maximum Percentage Owned in Profit, Loss, or Capital

	Yes	No
6 During this tax year, did the corporation pay dividends (other than stock dividends and distributions in exchange for stock) in excess of the corporation's current and accumulated earnings and profits? See sections 301 and 316.		X
If "Yes," file **Form 5452,** Corporate Report of Nondividend Distributions. If this is a consolidated return, answer here for the parent corporation and on Form 851 for each subsidiary.		
7 At any time during the tax year, did one foreign person own, directly or indirectly, at least 25% of (a) the total voting power of all classes of the corporation's stock entitled to vote or (b) the total value of all classes of the corporation's stock?		X
For rules of attribution, see section 318. If "Yes," enter: (i) Percentage owned ▶ ______ and (ii) Owner's country ▶ ______		
(c) The corporation may have to file **Form 5472,** Information Return of a 25% Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business. Enter the number of Forms 5472 attached ▶ ______		
8 Check this box if the corporation issued publicly offered debt instruments with original issue discount ▶ ☐ If checked, the corporation may have to file **Form 8281,** Information Return for Publicly Offered Original Issue Discount Instruments.		
9 Enter the amount of tax-exempt interest received or accrued during the tax year ▶ $ ______		
10 Enter the number of shareholders at the end of the tax year (if 100 or fewer) ▶ ______		
11 If the corporation has an NOL for the tax year and is electing to forego the carryback period, check here ▶ ☐ If the corporation is filing a consolidated return, the statement required by Regulations section 1.1502-21(b)(3) must be attached or the election won't be valid.		
12 Enter the available NOL carryover from prior tax years (don't reduce it by any deduction on line 29a.) ▶ $ ______		
13 Are the corporation's total receipts (page 1, line 1a, plus lines 4 through 10) for the tax year and its total assets at the end of the tax year less than $250,000?		X
If "Yes," the corporation isn't required to complete Schedules L, M-1, and M-2. Instead, enter the total amount of cash distributions and the book value of property distributions (other than cash) made during the tax year ▶ $ ______		
14 Is the corporation required to file Schedule UTP (Form 1120), Uncertain Tax Position Statement? See instructions		X
If "Yes," complete and attach Schedule UTP.		
15a Did the corporation make any payments in 2016 that would require it to file Form(s) 1099?	X	
b If "Yes," did or will the corporation file required Forms 1099?	X	
16 During this tax year, did the corporation have an 80% or more change in ownership, including a change due to redemption of its own stock?		X
17 During or subsequent to this tax year, but before the filing of this return, did the corporation dispose of more than 65% (by value) of its assets in a taxable, non-taxable, or tax deferred transaction?		X
18 Did the corporation receive assets in a section 351 transfer in which any of the transferred assets had a fair market basis or fair market value of more than $1 million?		X
19 During the corporation's tax year, did the corporation make any payments that would require it to file Forms 1042 and 1042-S under chapter 3 (sections 1441 through 1464) or chapter 4 (sections 1471 through 1474) of the Code?		X

Alternative Minimum Tax - Corporations

▶ Attach to the corporation's tax return.

▶ Information about Form 4626 and its separate instructions is at *www.irs.gov/form4626*.

OMB No. 1545-0123

2016

Name: SCANA CORPORATION

Employer identification number: 57-0784499

Note: *See the instructions to find out if the corporation is a small corporation exempt from the alternative minimum tax (AMT) under section 55(e).*

Line	Description	Ref	Amount
1	Taxable income or (loss) before net operating loss deduction	1	-62,862,156.
2	**Adjustments and preferences:**		
a	Depreciation of post-1986 property	2a	-22,088,571.
b	Amortization of certified pollution control facilities	2b	
c	Amortization of mining exploration and development costs	2c	
d	Amortization of circulation expenditures (personal holding companies only)	2d	
e	Adjusted gain or loss	2e	1,703,217.
f	Long-term contracts	2f	
g	Merchant marine capital construction funds	2g	
h	Section 833(b) deduction (Blue Cross, Blue Shield, and similar type organizations only)	2h	
i	Tax shelter farm activities (personal service corporations only)	2i	
j	Passive activities (closely held corporations and personal service corporations only)	2j	
k	Loss limitations	2k	
l	Depletion	2l	
m	Tax-exempt interest income from specified private activity bonds	2m	
n	Intangible drilling costs	2n	
o	Other adjustments and preferences . . . See Statement 40	2o	NONE
3	Pre-adjustment alternative minimum taxable income (AMTI). Combine lines 1 through 2o	3	-83,247,510.
4	**Adjusted current earnings (ACE) adjustment:**		
a	ACE from line 10 of the ACE worksheet in the instructions	4a	-50,692,428.
b	Subtract line 3 from line 4a. If line 3 exceeds line 4a, enter the difference as a negative amount. See instructions	4b	32,555,082.
c	Multiply line 4b by 75% (0.75). Enter the result as a positive amount	4c	24,416,312.
d	Enter the excess, if any, of the corporation's total increases in AMTI from prior year ACE adjustments over its total reductions in AMTI from prior year ACE adjustments. See instructions. **Note:** *You **must** enter an amount on line 4d (even if line 4b is positive)*	4d	
e	ACE adjustment. • If line 4b is zero or more, enter the amount from line 4c • If line 4b is less than zero, enter the **smaller** of line 4c or line 4d as a negative amount	4e	24,416,312.
5	Combine lines 3 and 4e. If zero or less, stop here; the corporation does not owe any AMT	5	-58,831,198.
6	Alternative tax net operating loss deduction. See instructions . . . . See Statement 42	6	
7	**Alternative minimum taxable income.** Subtract line 6 from line 5. If the corporation held a residual interest in a REMIC, see instructions	7	-58,831,198.
8	**Exemption phase-out** (if line 7 is $310,000 or more, skip lines 8a and 8b and enter -0- on line 8c):		
a	Subtract $150,000 from line 7 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-	8a	NONE
b	Multiply line 8a by 25% (0.25)	8b	NONE
c	Exemption. Subtract line 8b from $40,000 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-	8c	40,000.
9	Subtract line 8c from line 7. If zero or less, enter -0-	9	NONE
10	Multiply line 9 by 20% (0.20)	10	NONE
11	Alternative minimum tax foreign tax credit (AMTFTC). See instructions	11	
12	Tentative minimum tax. Subtract line 11 from line 10	12	NONE
13	Regular tax liability before applying all credits except the foreign tax credit	13	
14	**Alternative minimum tax.** Subtract line 13 from line 12. If zero or less, enter -0-. Enter here and on Form 1120, Schedule J, line 3, or the appropriate line of the corporation's income tax return	14	NONE

SCANA CORPORATION 57-0784499

Adjusted Current Earnings (ACE) Worksheet

Keep for Your Records

▶ See ACE Worksheet Instructions.

1 Pre-adjustment AMTI. Enter the amount from line 3 of Form 4626			1	-83,247,510.
2 ACE depreciation adjustment:				
a AMT depreciation		2a 696,995,092.		
b ACE depreciation:				
(1) Post-1993 property	2b(1) 244,608,251.			
(2) Post-1989, pre-1994 property	2b(2)			
(3) Pre-1990 MACRS property	2b(3)			
(4) Pre-1990 original ACRS property	2b(4)			
(5) Property described in sections 168(f)(1) through (4)	2b(5)			
(6) Other property	2b(6) 451,920,654.			
(7) Total ACE depreciation. Add lines 2b(1) through 2b(6)		2b(7) 696,528,905.		
c ACE depreciation adjustment. Subtract line 2b(7) from line 2a			2c	466,187.
3 Inclusion in ACE of items included in earnings and profits (E&P):				
a Tax-exempt interest income		3a		
b Death benefits from life insurance contracts		3b -268,623.		
c All other distributions from life insurance contracts (including surrenders)		3c		
d Inside buildup of undistributed income in life insurance contracts		3d 4,986,147.		
e Other items (see Regulations sections 1.56(g)-1(c)(6)(iii) through (ix) for a partial list)		3e		
f Total increase to ACE from inclusion in ACE of items included in E&P. Add lines 3a through 3e			3f	4,717,524.
4 Disallowance of items not deductible from E&P:				
a Certain dividends received		4a 212,200.		
b Dividends paid on certain preferred stock of public utilities that are deductible under section 247 (as affected by P.L. 113-295, Div. A, section 221(a)(41)(A), Dec. 19, 2014, 128 Stat. 4043)		4b		
c Dividends paid to an ESOP that are deductible under section 404(k)		4c 27,159,171.		
d Nonpatronage dividends that are paid and deductible under section 1382(c)		4d		
e Other items (see Regulations sections 1.56(g)-1(d)(3)(i) and (ii) for a partial list)		4e		
f Total increase to ACE because of disallowance of items not deductible from E&P. Add lines 4a through 4e			4f	27,371,371.
5 Other adjustments based on rules for figuring E&P:				
a Intangible drilling costs		5a		
b Circulation expenditures		5b		
c Organizational expenditures		5c		
d LIFO inventory adjustments		5d		
e Installment sales		5e		
f Total other E&P adjustments. Combine lines 5a through 5e			5f	
6 Disallowance of loss on exchange of debt pools			6	
7 Acquisition expenses of life insurance companies for qualified foreign contracts			7	
8 Depletion			8	
9 Basis adjustments in determining gain or loss from sale or exchange of pre-1994 property			9	NONE
10 Adjusted current earnings. Combine lines 1, 2c, 3f, 4f, and 5f through 9. Enter the result here and on line 4a of Form 4626			10	-50,692,428.

10 Biodiesel or Renewable Diesel Mixture Credit Registration No. ▶

Biodiesel mixtures. Claimant produced a mixture by mixing biodiesel with diesel fuel. The biodiesel used to produce the mixture met ASTM D6751 and met EPA's registration requirements for fuels and fuel additives. The mixture was sold by the claimant to any person for use as a fuel or was used as a fuel by the claimant. Claimant has attached the Certificate for Biodiesel and, if applicable, the Statement of Biodiesel Reseller. **Renewable diesel mixtures.** Claimant produced a mixture by mixing renewable diesel with liquid fuel (other than renewable diesel). The renewable diesel used to produce the renewable diesel mixture was derived from biomass process, met EPA's registration requirements for fuels and fuel additives, and met ASTM D975, D396, or other equivalent standard approved by the IRS. The mixture was sold by the claimant to any person for use as a fuel or was used as a fuel by the claimant. Claimant has attached the Certificate for Biodiesel and, if applicable, the Statement of Biodiesel Reseller, both of which have been edited as discussed in the Instructions for Form 4136. See the instructions for line 10 for information about renewable diesel used in aviation.

	(b) Rate	(c) Gallons of biodiesel or renewable diesel	(d) Amount of credit	(e) CRN
a Biodiesel (other than agri-biodiesel) mixtures	$1.00		$	388
b Agri-biodiesel mixtures	$1.00			390
c Renewable diesel mixtures	$1.00			307

11 Nontaxable Use of Alternative Fuel

Caution: There is a reduced credit rate for use in certain intercity and local buses (type of use 5) (see instructions).

	(a) Type of use	(b) Rate	(c) Gallons, or gasoline or diesel gallon equivalents	(d) Amount of credit	(e) CRN

(Rev. December 2014)
Department of the Treasury
Internal Revenue Service

Additional Information for Schedule M-3 Filers

▶ Attach to Form 1120.
▶ See instructions on page 2.

OMB No. 1545-0123

Name: SCANA CORPORATION
Employer identification number (EIN): 57-0784499

		Yes	No
1	Does any amount reported on Schedule M-3 (Form 1120), Part II, lines 9 or 10, column (d), reflect allocations to this corporation from a partnership of income, gain, loss, deduction, or credit that are disproportionate to this corporation's capital contribution to the partnership or its ratio for sharing other items of the partnership?		X
2	At any time during the tax year, did the corporation sell, exchange, or transfer any interest in an intangible asset to a related person as defined in section 267(b)?	X	
3	At any time during the tax year, did the corporation acquire any interest in an intangible asset from a related person as defined in section 267(b)?	X	
4a	During the tax year, did the corporation enter into a cost-sharing arrangement with any related foreign party on whose behalf the corporation did not file Form 5471, Information Return of U.S. Persons With Respect To Certain Foreign Corporations?		X
b	At any time during the tax year, was the corporation a participant in a cost-sharing arrangement with any related foreign party on whose behalf the corporation did not file Form 5471?		X
5	At any time during the tax year, did the corporation make any change in accounting principle for financial accounting purposes? See instructions for the definition of change in accounting principle		X
6	At any time during the tax year, did the corporation make any change in a method of accounting for U.S. income tax purposes?		X
7	At any time during the tax year, did the corporation own any voluntary employees' beneficiary association (VEBA) trusts that were used to hold funds designated for employee benefits?	X	
8	At any time during the tax year, did the corporation use an allocation method for indirect costs capitalized to self-constructed assets that varied from its financial method of accounting?		X
9	At any time during the tax year, did the corporation treat for tax purposes indirect costs, as defined in Regulations sections 1.263A-1(e)(3)(ii)(F), (G), and (H), as mixed-service costs, as defined in Regulations section 1.263A-1(e)(4)(ii)(C)?	X	
10	Did the corporation, under section 118 or 362(c) and the related regulations, take a return filing position characterizing any amount as a contribution to the capital of the corporation during the tax year by any non-shareholders? Amounts so characterized may include, without limitation, incentives, inducements, money, and property.	X

Sales and Other Dispositions of Capital Assets

▶ Information about Form 8949 and its separate instructions is at *www.irs.gov/form8949.*

▶ File with your Schedule D to list your transactions for lines 1b, 2, 3, 8b, 9, and 10 of Schedule D.

OMB No. 1545-0074

2016

Attachment Sequence No. 12A

Name(s) shown on return	Social security number or taxpayer identification number
SCANA CORPORATION	57-0784499

Before you check Box A, B, or C below, see whether you received any Form(s) 1099-B or substitute statement(s) from your broker. A substitute statement will have the same information as Form 1099-B. Either will show whether your basis (usually your cost) was reported to the IRS by your broker and may even tell you which box to check.

Part I **Short-Term.** Transactions involving capital assets you held 1 year or less are short term. For long-term transactions, see page 2.

Note: You may aggregate all short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS and for which no adjustments or codes are required. Enter the totals directly on Schedule D, line 1a; you aren't required to report these transactions on Form 8949 (see instructions).

You *must* check Box A, B, *or* C below. Check only one box. If more than one box applies for your short-term transactions, complete a separate Form 8949, page 1, for each applicable box. If you have more short-term transactions than will fit on this page for one or more of the boxes, complete as many forms with the same box checked as you need.

- [ ] (A) Short-term transactions reported on Form(s) 1099-B showing basis was reported to the IRS (see Note above)
- [ ] (B) Short-term transactions reported on Form(s) 1099-B showing basis wasn't reported to the IRS
- [x] (C) Short-term transactions not reported to you on Form 1099-B

1 (a) Description of property (Example: 100 sh. XYZ Co.)	(b) Date acquired (Mo., day, yr.)	(c) Date sold or disposed of (Mo., day, yr.)	(d) Proceeds (sales price) (see instructions)	(e) Cost or other basis. See the Note below and see Column (e) in the separate instructions	Adjustment, if any, to gain or loss. If you enter an amount in column (g), enter a code in column (f). See the separate instructions. (f) Code(s) from instructions	(g) Amount of adjustment	(h) Gain or (loss). Subtract column (e) from column (d) and combine the result with column (g)
EDCP SHORT TERM	04/20/2015	01/25/2016	28,933.	33,912.			-4,979.
2 Totals. Add the amounts in columns (d), (e), (g), and (h) (subtract negative amounts). Enter each total here and include on your Schedule D, line 1b (if Box A above is checked), line 2 (if Box B above is checked), or line 3 (if Box C above is checked) ▶			28,933.	33,912.			-4,979.

Note: If you checked Box A above but the basis reported to the IRS was incorrect, enter in column (e) the basis as reported to the IRS, and enter an adjustment in column (g) to correct the basis. See *Column (g)* in the separate instructions for how to figure the amount of the adjustment.

Form 8949 (2016) Attachment Sequence No. 12A Page 2

Name(s) shown on return. Name and SSN or taxpayer identification no. not required if shown on other side	Social security number or taxpayer identification number

SCHEDULE M-3 (Form 1120)
Department of the Treasury Internal Revenue Service

Net Income (Loss) Reconciliation for Corporations With Total Assets of $10 Million or More

▶ Attach to Form 1120 or 1120-C. ▶ Information about Schedule M-3 (Form 1120) and its separate instructions is available at *www.irs.gov/form1120.*

OMB No. 1545-0123
2016

Name of corporation (common parent, if consolidated return): SCANA CORPORATION
Employer identification number: 57-0784499

Check applicable box(es): (1) [ ] Non-consolidated return (2) [X] Consolidated return (Form 1120 only)
(3) [ ] Mixed 1120/L/PC group (4) [ ] Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
[X] **Yes.** Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
[ ] **No.** Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.

b Did the corporation prepare a certified audited non-tax-basis income statement for that period?
[ ] **Yes.** Skip line 1c and complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Go to line 1c.

c Did the corporation prepare a non-tax-basis income statement for that period?
[ ] **Yes.** Complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.

2 a Enter the income statement period: Beginning 01/01/2016 Ending 12/31/2016

b Has the corporation's income statement been restated for the income statement period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

c Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

3 a Is any of the corporation's voting common stock publicly traded?
[X] **Yes.**
[ ] **No.** If "No," go to line 4a.

b Enter the symbol of the corporation's primary U.S. publicly traded voting common stock: SCG

c Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock: 80589M102

Line	Description	Box	Amount
4 a	Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1	4a	591,551,110.
b	Indicate accounting standard used for line 4a (see instructions): (1) [X] GAAP (2) [ ] IFRS (3) [ ] Statutory (4) [ ] Tax-basis (5) [ ] Other (specify)		
5 a	Net income from nonincludible foreign entities (attach statement)	5a	( )
b	Net loss from nonincludible foreign entities (attach statement and enter as a positive amount)	5b	
6 a	Net income from nonincludible U.S. entities (attach statement)	6a	( )
b	Net loss from nonincludible U.S. entities (attach statement and enter as a positive amount)	6b	
7 a	Net income (loss) of other includible foreign disregarded entities (attach statement)	7a	
b	Net income (loss) of other includible U.S. disregarded entities (attach statement)	7b	
c	Net income (loss) of other includible entities (attach statement)	7c	
8	Adjustment to eliminations of transactions between includible entities and nonincludible entities (attach statement)	8	
9	Adjustment to reconcile income statement period to tax year (attach statement)	9	
10 a	Intercompany dividend adjustments to reconcile to line 11 (attach statement)	10a	
b	Other statutory accounting adjustments to reconcile to line 11 (attach statement)	10b	
c	Other adjustments to reconcile to amount on line 11 (attach statement)	10c	
11	**Net income (loss) per income statement of includible corporations.** Combine lines 4 through 10	11	591,551,110.

Note. *Part I, line 11, must equal Part II, line 30, column (a) or Schedule M-1, line 1 (see instructions).*

12 Enter the total amount (not just the corporation's share) of the assets and liabilities of all entities included or removed on the following lines.

		Total Assets	Total Liabilities
a	Included on Part I, line 4 ▶		
b	Removed on Part I, line 5 ▶		
c	Removed on Part I, line 6 ▶		
d	Included on Part I, line 7 ▶

Part III **Concise Descriptions of UTPs.** Indicate the corresponding UTP number from Part I, column (a) (for example, C1) or Part II column (a) (for example, P2). Use as many Part III pages as necessary. See instructions.

UTP No.	Concise Description of Uncertain Tax Position
C1	The taxpayer incurred costs that were characterized amongst various research activities concerning its nuclear facility based upon a methodology the taxpayer considers reasonable and claimed Sec 41 credits related to these costs. The issues are whether the taxpayer's method of characterizing these costs is acceptable and whether the activities were research. This position is based on the definition of increasing research and experimentation expenditures in Treasury Regulation Sec 1.174-2 including consideration of the nuclear facility as a pilot model.
C2	The taxpayer claimed deductions for research expenses related to its nuclear facility. The issues are whether adequate documentation has been retained to substantiate the deductions claimed and whether the expenses constitute research expenses. This position is based on the final regulations as issued under Treasury Regulation Sec 1.174-2.
P3	The taxpayer incurred costs that were characterized amongst various research activities concerning its nuclear facility based upon a methodology the taxpayer considers reasonable and claimed Sec 41 credits related to these costs. The issues are whether the taxpayer's method of characterizing these costs is acceptable and whether the activities were research. This position is based on the definition of increasing research and experimentation expenditures in Treasury Regulation Sec 1.174-2 including consideration of the nuclear facility as a pilot model.
P4	The taxpayer incurred costs that were characterized amongst various research activities concerning its nuclear facility based upon a methodology the taxpayer considers reasonable and claimed Sec 41 credits related to these costs. The issues are whether the taxpayer's method of characterizing these costs is acceptable and whether the activities were research. This position is based on the definition of increasing research and experimentation expenditures in Treasury Regulation Sec 1.174-2 including consideration of the nuclear facility as a pilot model.
P5	The taxpayer incurred costs that were characterized amongst various research activities concerning its nuclear facility based upon a methodology the taxpayer considers reasonable and claimed Sec 41 credits related to these costs. The issues are whether the taxpayer's method of characterizing these costs is acceptable and whether the activities were research. This position is based on the definition of increasing research and experimentation expenditures in Treasury Regulation Sec 1.174-2 including consideration of the nuclear facility as a pilot model.

▶ Signature of officer | CONTROLLER Title | Date

Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Who Must File

A corporation (or a farmer's cooperative) must file Form 966 if it adopts a resolution or plan to dissolve the corporation or liquidate any of its stock.

Exempt organizations and qualified subchapter S subsidiaries should *not* file Form 966. Exempt organizations should see the instructions for Form 990, Return of Organization Exempt From Income Tax, or Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation. Subchapter S subsidiaries should see Form 8869, Qualified Subchapter S Subsidiary Election.

! CAUTION *Do not file Form 966 for a deemed liquidation (such as a section 338 election or an election to be treated as a disregarded entity under Regulations section 301.7701-3).*

When To File

File Form 966 within 30 days after the resolution or plan is adopted to dissolve the corporation or liquidate any of its stock. If the resolution or plan is amended or supplemented after Form 966 is filed, file another Form 966 within 30 days after the amendment or supplement is adopted. The additional form will be sufficient if the date the earlier form was filed is entered on line 11 and a certified copy of the amendment or supplement is attached. Include all information required by Form 966 that was not given in the earlier form.

Where To File

File Form 966 with the Internal Revenue Service Center at the address where the corporation (or cooperative) files its income tax return.

Distribution of Property

A corporation must recognize gain or loss on the distribution of its assets in the complete liquidation of its stock. For purposes of determining gain or loss, the

9a Check all methods used for valuing closing inventory:
(i) ☐ Cost
(ii) ☐ Lower of cost or market
(iii) ☒ Other (Specify method used and attach explanation.) ▶

b Check if there was a writedown of subnormal goods ▶ ☐

c Check if the LIFO inventory method was adopted this tax year for any goods (if checked, attach Form 970) ▶ ☐

d If the LIFO inventory method was used for this tax year, enter amount of closing inventory computed under LIFO | 9d |

e If property is produced or acquired for resale, do the rules of section 263A apply to the entity? See instructions ☐ Yes ☒ No

f Was there any change in determining quantities, cost, or valuations between opening and closing inventory? If "Yes," attach explanation ☐ Yes ☒ No

Section references are to the Internal Revenue Code unless otherwise noted.

General Instructions

Purpose of Form

Use Form 1125-A to calculate and deduct cost of goods sold for certain entities.

Who Must File

Filers of Form 1120, 1120-C, 1120-F, 1120S, 1065, or 1065-B, must complete and attach Form 1125-A if the applicable entity reports a deduction for cost of goods sold.

Inventories

Generally, inventories are required at the beginning and end of each tax year if the production, purchase, or sale of merchandise is an income-producing factor. See Regulations section 1.471-1. If inventories are required, you generally must use an accrual method of accounting for sales and purchases of inventory items.

Exception for certain taxpayers. If you are a qualifying taxpayer or a qualifying small business taxpayer (defined below), you can adopt or change your accounting method to account for inventoriable items in the same manner as materials and supplies that are not incidental.

Under this accounting method, inventory costs for raw materials purchased for use in producing finished goods and merchandise purchased for resale are deductible in the year the finished goods or merchandise are sold (but not before the year you paid for the raw materials or merchandise, if you are also using the cash method).

If you account for inventoriable items in the same manner as materials and supplies that are not incidental, you can currently deduct expenditures for direct labor and all indirect costs that would otherwise be included in inventory costs. See the instructions for lines 2 and 7.

For additional guidance on this method of accounting, see Pub. 538, Accounting Periods and Methods. For guidance on adopting or changing to this method of accounting, see Form 3115, Application for Change in Accounting Method, and its instructions.

Qualifying taxpayer. A qualifying taxpayer is a taxpayer that, (a) for each prior tax year ending after December 16, 1998, has average annual gross receipts of $1 million or less for the 3 prior tax years, and (b) its business is not a tax shelter (as defined in section 448(d)(3)). See Rev. Proc. 2001-10, 2001-2 I.R.B. 272.

Qualifying small business taxpayer. A qualifying small business taxpayer is a taxpayer that, (a) for each prior tax year ending on or after December 31, 2000, has average annual gross receipts of $10 million or less for the 3 prior tax years, (b) whose principal business activity is not an ineligible activity, and (c) whose business is not a tax shelter (as defined in section 448 (d)(3)). See Rev. Proc. 2002-28, 2002-18 I.R.B. 815.

Uniform capitalization rules. The uniform capitalization rules of section 263A generally require you to capitalize, or include in inventory, certain costs incurred in connection with the following.

- The production of real property and tangible personal property held in inventory or held for sale in the ordinary course of business.
- Real property or personal property (tangible and intangible) acquired for resale.
- The production of real property and tangible personal property by a corporation for use in its trade or business or in an activity engaged in for profit.

See the discussion on section 263A uniform capitalization rules in the *instructions for your tax return* before completing Form 1125-A. Also see Regulations sections 1.263A-1 through 1.263A-3. See Regulations section 1.263A-4 for rules for property produced in a farming business.

Name(s) shown on return: SCANA CORPORATION | Identifying number: 57-0784499

Business or activity to which this form relates: General Depreciation & Amortization

Part I Election To Expense Certain Property Under Section 179

Note: If you have any listed property, complete Part V before you complete Part I.

1	Maximum amount (see instructions)	1	
2	Total cost of section 179 property placed in service (see instructions)	2	
3	Threshold cost of section 179 property before reduction in limitation (see instructions)	3	
4	Reduction in limitation. Subtract line 3 from line 2. If zero or less, enter -0-	4	
5	Dollar limitation for tax year. Subtract line 4 from line 1. If zero or less, enter -0-. If married filing separately, see instructions	5	

6 (a) Description of property	(b) Cost (business use only)	(c) Elected cost
7 Listed property. Enter the amount from line 29	7	

8	Total elected cost of section 179 property. Add amounts in column (c), lines 6 and 7	8	
9	Tentative deduction. Enter the smaller of line 5 or line 8	9	
10	Carryover of disallowed deduction from line 13 of your 2015 Form 4562	10	
11	Business income limitation. Enter the smaller of business income (not less than zero) or line 5 (see instructions)	11	
12	Section 179 expense deduction. Add lines 9 and 10, but don't enter more than line 11	12	
13	Carryover of disallowed deduction to 2017. Add lines 9 and 10, less line 12 ▶	13	

Note: Don't use Part II or Part III below for listed property. Instead, use Part V.

Part II Special Depreciation Allowance and Other Depreciation (Don't include listed property.) (See instructions.)

14	Special depreciation allowance for qualified property (other than listed property) placed in service during the tax year (see instructions)	14	309,573,587.
15	Property subject to section 168(f)(1) election	15	
16	Other depreciation (including ACRS)	16	2,616,055.

Part III MACRS Depreciation (Don't include listed property.) (See instructions.)

Section A

17	MACRS deductions for assets placed in service in tax years beginning before 2016	17	347,024,206.
18	If you are electing to group any assets placed in service during the tax year into one or more general asset accounts, check here ▶ ☐		

Section B - Assets Placed in Service During 2016 Tax Year Using the General Depreciation System

(a) Classification of property	(b) Month and year placed in service	(c) Basis for depreciation (business/investment use only - see instructions)	(d) Recovery period	(e) Convention	(f) Method	(g) Depreciation deduction
19a 3-year property						
b 5-year property		9,822,207.	5.000	HY	200 DB	1,964,443.
c 7-year property		13,156,047.	7.000	HY	200 DB	1,879,486.
d 10-year property						
e 15-year property		126,315,695.	15.000	HY	150 DB	6,315,785.
f 20-year property		147,377,601.	20.000	HY	150 DB	5,527,192.
g 25-year property			25 yrs.		S/L	
h Residential rental property			27.5 yrs.	MM	S/L	
			27.5 yrs.	MM	S/L	
i Nonresidential real property		450,159.	39 yrs.	MM	S/L	5,770.
				MM	S/L	

Section C - Assets Placed in Service During 2016 Tax Year Using the Alternative Depreciation System

(a) Classification of property	(b)	(c)	(d)	(e)	(f)	(g)
20a Class life					S/L	
b 12-year			12 yrs.		S/L	
c 40-year			40 yrs.	MM	S/L	

Part IV Summary (See instructions.)

21	Listed property. Enter amount from line 28	21	
22	Total. Add amounts from line 12, lines 14 through 17, lines 19 and 20 in column (g), and line 21. Enter here and on the appropriate lines of your return. Partnerships and S corporations - see instructions	22	674,906,524.
23	For assets shown above and placed in service during the current year, enter the portion of the basis attributable to section 263A costs	23	

SCANA CORPORATION 57-0784499
Form 4562 (2016) Page 2

Part V **Listed Property** (Include automobiles, certain other vehicles, certain aircraft, certain computers, and property used for entertainment, recreation, or amusement.)
Note: For any vehicle for which you are using the standard mileage rate or deducting lease expense, complete only 24a, 24b, columns (a) through (c) of Section A, all of Section B, and Section C if applicable.

Section A - Depreciation and Other Information (Caution: See the instructions for limits for passenger automobiles.)

24a Do you have evidence to support the business/investment use claimed? Yes No 24b If "Yes," is the evidence written? Yes No

(a) Type of property (list vehicles first)	(b) Date placed in service	(c) Business/investment use percentage	(d) Cost or other basis	(e) Basis for depreciation (business/investment use only)	(f) Recovery period	(g) Method/Convention	(h) Depreciation deduction	(i) Elected section 179 cost
25 Special depreciation allowance for qualified listed property placed in service during the tax year and used more than 50% in a qualified business use (see instructions)						25		
26 Property used more than 50% in a qualified business use:								
		%						
		%						
		%						
27 Property used 50% or less in a qualified business use:								
		%				S/L -		
		%				S/L -		
		%				S/L -		
28 Add amounts in column (h), lines 25 through 27. Enter here and on line 21, page 1						28		
29 Add amounts in column (i), line 26. Enter here and on line 7, page 1							29	

Section B - Information on Use of Vehicles

Complete this section for vehicles used by a sole proprietor, partner, or other "more than 5% owner," or related person. If you provided vehicles to your employees, first answer the questions in Section C to see if you meet an exception to completing this section for those vehicles.

	(a) Vehicle 1		(b) Vehicle 2		(c) Vehicle 3		(d) Vehicle 4		(e) Vehicle 5		(f) Vehicle 6	
30 Total business/investment miles driven during the year (don't include commuting miles)												
31 Total commuting miles driven during the year												
32 Total other personal (noncommuting) miles driven												
33 Total miles driven during the year. Add lines 30 through 32												
	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No
34 Was the vehicle available for personal use during off-duty hours?												
35 Was the vehicle used primarily by a more than 5% owner or related person?												
36 Is another vehicle available for personal use?												

Section C - Questions for Employers Who Provide Vehicles for Use by Their Employees

Answer these questions to determine if you meet an exception to completing Section B for vehicles used by employees who aren't more than 5% owners or related persons (see instructions).

	Yes	No
37 Do you maintain a written policy statement that prohibits all personal use of vehicles, including commuting, by your employees?		
38 Do you maintain a written policy statement that prohibits personal use of vehicles, except commuting, by your employees? See the instructions for vehicles used by corporate officers, directors, or 1% or more owners		
39 Do you treat all use of vehicles by employees as personal use?		
40 Do you provide more than five vehicles to your employees, obtain information from your employees about the use of the vehicles, and retain the information received?		
41 Do you meet the requirements concerning qualified automobile demonstration use? (See instructions.)		

Note: If your answer to 37, 38, 39, 40, or 41 is "Yes," don't complete Section B for the covered vehicles.

Part VI **Amortization**

(a) Description of costs	(b) Date amortization begins	(c) Amortizable amount	(d) Code section	(e) Amortization period or percentage	(f) Amortization for this year
42 Amortization of costs that begins during your 2016 tax year (see instructions):					
				Total	2,067,441.
43 Amortization of costs that began before your 2016 tax year				43	9,536,236.
44 Total. Add amounts in column (f). See the instructions for where to report				44	11,603,677.

Form **4797**

OMB No. 1545-0184

2016

Attachment Sequence No. 27

Name(s) shown on return	Identifying number
SCANA CORPORATION	57-0784499

1 Enter the gross proceeds from sales or exchanges reported to you for 2016 on Form(s) 1099-B or 1099-S (or substitute statement) that you are including on line 2, 10, or 20. See instructions **1**

Part I **Sales or Exchanges of Property Used in a Trade or Business and Involuntary Conversions From Other Than Casualty or Theft - Most Property Held More Than 1 Year** (see instructions)

2 (a) Description of property	(b) Date acquired (mo., day, yr.)	(c) Date sold (mo., day, yr.)	(d) Gross sales price	(e) Depreciation allowed or allowable since acquisition	(f) Cost or other basis, plus improvements and expense of sale	(g) Gain or (loss) Subtract (f) from the sum of (d) and (e)
Stmt 75						-53,778,949.

	Line	Amount
3 Gain, if any, from Form 4684, line 39	3	
4 Section 1231 gain from installment sales from Form 6252, line 26 or 37	4	
5 Section 1231 gain or (loss) from like-kind exchanges from Form 8824	5	
6 Gain, if any, from line 32, from other than casualty or theft	6	
7 Combine lines 2 through 6. Enter the gain or (loss) here and on the appropriate line as follows:	7	-53,778,949.

Partnerships (except electing large partnerships) and S corporations. Report the gain or (loss) following the instructions for Form 1065, Schedule K, line 10, or Form 1120S, Schedule K, line 9. Skip lines 8, 9, 11, and 12 below.

Individuals, partners, S corporation shareholders, and all others. If line 7 is zero or a loss, enter the amount from line 7 on line 11 below and skip lines 8 and 9. If line 7 is a gain and you didn't have any prior year section 1231 losses, or they were recaptured in an earlier year, enter the gain from line 7 as a long-term capital gain on the Schedule D filed with your return and skip lines 8, 9, 11, and 12 below.

	Line	Amount
8 Nonrecaptured net section 1231 losses from prior years. See instructions	8	
9 Subtract line 8 from line 7. If zero or less, enter -0-. If line 9 is zero, enter the gain from line 7 on line 12 below. If line 9 is more than zero, enter the amount from line 8 on line 12 below and enter the gain from line 9 as a long-term capital gain on the Schedule D filed with your return. See instructions	9	

Part II **Ordinary Gains and Losses** (see instructions)

10 Ordinary gains and losses not included on lines 11 through 16 (include property held 1 year or less):

Stmt 80						-1,782,435.

	Line	Amount
11 Loss, if any, from line 7	11	(53,778,949.)
12 Gain, if any, from line 7 or amount from line 8, if applicable	12	
13 Gain, if any, from line 31	13	3,789,467.
14 Net gain or (loss) from Form 4684, lines 31 and 38a	14	
15 Ordinary gain from installment sales from Form 6252, line 25 or 36	15	
16 Ordinary gain or (loss) from like-kind exchanges from Form 8824	16	
17 Combine lines 10 through 16	17	-51,771,917.
18 For all except individual returns, enter the amount from line 17 on the appropriate line of your return and skip lines a and b below. For individual returns, complete lines a and b below:		
a If the loss on line 11 includes a loss from Form 4684, line 35, column (b)(ii), enter that part of the loss here. Enter the part of the loss from income-producing property on Schedule A (Form 1040), line 28, and the part of the loss from property used as an employee on Schedule A (Form 1040), line 23. Identify as from "Form 4797, line 18a." See instructions	18a	
b Redetermine the gain or (loss) on line 17 excluding the loss, if any, on line 18a. Enter here and on Form 1040, line 14	18b	

For Paperwork Reduction Act Notice, see separate instructions.

Form 4797 (2016) Page 2

Part III **Gain From Disposition of Property Under Sections 1245, 1250, 1252, 1254, and 1255** (see instructions)

19 (a) Description of section 1245, 1250, 1252, 1254, or 1255 property:	(b) Date acquired (mo., day, yr.)	(c) Date sold (mo., day, yr.)
A VARIOUS		
B Various	VARIOUS	VARIOUS
C		
D		

These columns relate to the properties on lines 19A through 19D. ▶		Property A	Property B	Property C	Property D
20 Gross sales price (**Note:** *See line 1 before completing.*)	20	3,145,850.	819,826.		
21 Cost or other basis plus expense of sale	21	9,970,544.	1,713,829.		
22 Depreciation (or depletion) allowed or allowable	22	9,807,650.	1,700,514.		
23 Adjusted basis. Subtract line 22 from line 21	23	162,894.	13,315.		
24 Total gain. Subtract line 23 from line 20	24	2,982,956.	806,511.		
25 **If section 1245 property:**					
a Depreciation allowed or allowable from line 22	25a	9,807,650.	1,700,514.		
b Enter the smaller of line 24 or 25a	25b	2,982,956.	806,511.		
26 **If section 1250 property:** If straight line depreciation was used, enter -0- on line 26g, except for a corporation subject to section 291.					
a Additional depreciation after 1975. See instructions	26a				
b Applicable percentage multiplied by the smaller of line 24 or line 26a. See instructions	26b				
c Subtract line 26a from line 24. If residential rental property or line 24 isn't more than line 26a, skip lines 26d and 26e	26c				
d Additional depreciation after 1969 and before 1976	26d				
e Enter the smaller of line 26c or 26d	26e				
f Section 291 amount (corporations only)	26f				
g Add lines 26b, 26e, and 26f	26g				
27 **If section 1252 property:** Skip this section if you didn't dispose of farmland or if this form is being completed for a partnership (other than an electing large partnership).					
a Soil, water, and land clearing expenses	27a				
b Line 27a multiplied by applicable percentage. See instructions	27b				
c Enter the smaller of line 24 or 27b	27c				
28 **If section 1254 property:**					
a Intangible drilling and development costs, expenditures for development of mines and other natural deposits, mining exploration costs, and depletion. See instructions	28a				
b Enter the smaller of line 24 or 28a	28b				
29 **If section 1255 property:**					
a Applicable percentage of payments excluded from income under section 126. See instructions	29a				
b Enter the smaller of line 24 or 29a. See instructions	29b				

Summary of Part III Gains. Complete property columns A through D through line 29b before going to line 30.

30 Total gains for all properties. Add property columns A through D, line 24	30	3,789,467.
31 Add property columns A through D, lines 25b, 26g, 27c, 28b, and 29b. Enter here and on line 13	31	3,789,467.
32 Subtract line 31 from line 30. Enter the portion from casualty or theft on Form 4684, line 33. Enter the portion from other than casualty or theft on Form 4797, line 6	32	

Part IV **Recapture Amounts Under Sections 179 and 280F(b)(2) When Business Use Drops to 50% or Less** (see instructions)

		(a) Section 179	(b) Section 280F(b)(2)
33 Section 179 expense deduction or depreciation allowable in prior years	33		
34 Recomputed depreciation. See instructions	34		
35 Recapture amount. Subtract line 34 from line 33. See the instructions for where to report	35

Identifying number: 57-0784499

Section A - Regular Credit. Skip this section and go to Section B if you are electing or previously elected (and are not revoking) the alternative simplified credit.

Line	Description	Box	Amount	Box	Amount
1	Certain amounts paid or incurred to energy consortia (see instructions)			1	1,723,298.
2	Basic research payments to qualified organizations (see instructions)	2			
3	Qualified organization base period amount	3			
4	Subtract line 3 from line 2. If zero or less, enter -0-			4	
5	Wages for qualified services (do not include wages used in figuring the work opportunity credit)	5	2,585,567.		
6	Cost of supplies	6	9,839,450.		
7	Rental or lease costs of computers (see instructions)	7			
8	Enter the applicable percentage of contract research expenses (see instructions)	8	417,134,646.		
9	Total qualified research expenses. Add lines 5 through 8	9	429,559,663.		
10	Enter fixed-base percentage, but not more than 16% (0.16) (see instructions)	10	0.030 %		
11	Enter average annual gross receipts (see instructions)	11	5,039,022,108.		
12	Multiply line 11 by the percentage on line 10	12	1,511,707.		
13	Subtract line 12 from line 9. If zero or less, enter -0-	13	428,047,956.		
14	Multiply line 9 by 50% (0.50)	14	214,779,832.		
15	Enter the smaller of line 13 or line 14			15	214,779,832.
16	Add lines 1, 4, and 15			16	216,503,130.
17	Are you electing the reduced credit under section 280C? ▶ Yes ☐ No ☐ If "Yes," multiply line 16 by 13% (0.13). If "No," multiply line 16 by 20% (0.20) and see the instructions for the statement that must be attached. Members of controlled groups or businesses under common control: see instructions for the statement that must be attached . . . Stmt 83			17	28,145,407.

Section B - Alternative Simplified Credit. Skip this section if you are completing Section A.

Line	Description	Box	Amount	Box	Amount
18	Certain amounts paid or incurred to energy consortia (see the line 1 instructions)			18	
19	Basic research payments to qualified organizations (see the line 2 instructions)	19			
20	Qualified organization base period amount (see the line 3 instructions)	20			
21	Subtract line 20 from line 19. If zero or less, enter -0-			21	
22	Add lines 18 and 21			22	
23	Multiply line 22 by 20% (0.20)			23	
24	Wages for qualified services (do not include wages used in figuring the work opportunity credit)	24			
25	Cost of supplies	25			
26	Rental or lease costs of computers (see the line 7 instructions)	26			
27	Enter the applicable percentage of contract research expenses (see the line 8 instructions)	27			
28	Total qualified research expenses. Add lines 24 through 27	28			
29	Enter your total qualified research expenses for the prior 3 tax years. If you had no qualified research expenses in any one of those years, skip lines 30 and 31	29			
30	Divide line 29 by 6.0	30			
31	Subtract line 30 from line 28. If zero or less, enter -0-	31			
32	Multiply line 31 by 14% (0.14). If you skipped lines 30 and 31, multiply line 28 by 6% (0.06)			32	

SCANA CORPORATION 57-0784499

Section B - Alternative Simplified Credit *(continued)*

33	Add lines 23 and 32	33	
34	Are you electing the reduced credit under section 280C? ▶ Yes ☐ No ☐ If "Yes," multiply line 33 by 65% (0.65). If "No," enter the amount from line 33 and see the line 17 instructions for the statement that must be attached. Members of controlled groups or businesses under common control: see instructions for the statement that must be attached	34	

Section C - Current Year Credit

35	Enter the portion of the credit from Form 8932, line 2, that is attributable to wages that were also used to figure the credit on line 17 or line 34 (whichever applies)	35	
36	Subtract line 35 from line 17 or line 34 (whichever applies). If zero or less, enter -0-	36	28,145,407.
37	Credit for increasing research activities from partnerships, S corporations, estates, and trusts	37	
38	Add lines 36 and 37	38	28,145,407.
	• Estates and trusts, go to line 39. • Partnerships and S corporations not electing the payroll tax credit, stop here and report this amount on Schedule K. • Partnerships and S corporations electing the payroll tax credit, complete Section D and report on Schedule K the amount on this line reduced by the amount on line 44. • Eligible small businesses, stop here and report the credit on Form 3800, Part III, line 4i. See instructions for the definition of eligible small business. • Filers other than eligible small businesses, stop here and report the credit on Form 3800, Part III, line 1c. **Note:** Qualified small business filers, other than partnerships and S corporations, electing the payroll tax credit must complete Form 3800 before completing Section D.		
39	Amount allocated to beneficiaries of the estate or trust (see instructions)	39	
40	Estates and trusts, subtract line 39 from line 38. For eligible small businesses, report the credit on Form 3800, Part III, line 4i. See instructions. For filers other than eligible small businesses, report the credit on Form 3800, Part III, line 1c	40	

Section D - Qualified Small Business Payroll Tax Election and Payroll Tax Credit. Skip this section if the payroll tax election does not apply. See instructions.

41	Check this box if you are a qualified small business electing the payroll tax credit. See instructions ☐

Part II Partial Interests and Restricted Use Property - Complete lines 2a through 2e if you gave less than an entire interest in a property listed in Part I. Complete lines 3a through 3c if conditions were placed on a contribution listed in Part I; also attach the required statement (see instructions).

2a Enter the letter from Part I that identifies the property for which you gave less than an entire interest ▶ ______
If Part II applies to more than one property, attach a separate statement.

b Total amount claimed as a deduction for the property listed in Part I: (1) For this tax year ▶ ______
(2) For any prior tax years ▶ ______

c Name and address of each organization to which any such contribution was made in a prior year (complete only if different from the donee organization above):

Name of charitable organization (donee)

Address (number, street, and room or suite no.)

City or town, state, and ZIP code

d For tangible property, enter the place where the property is located or kept ▶ ______

e Name of any person, other than the donee organization, having actual possession of the property ▶ ______

		Yes	No
3a	Is there a restriction, either temporary or permanent, on the donee's right to use or dispose of the donated property?		
b	Did you give to anyone (other than the donee organization or another organization participating with the donee organization in cooperative fundraising) the right to the income from the donated property or to the possession of the property, including the right to vote donated securities, to acquire the property by purchase or otherwise, or to designate the person having such income, possession, or right to acquire?		
c	Is there a restriction limiting the donated property for a particular use?

Section B. Donated Property Over $5,000 (Except Publicly Traded Securities) - Complete this section for one item (or one group of similar items) for which you claimed a deduction of more than $5,000 per item or group (except contributions of publicly traded securities reported in Section A). Provide a separate form for each property donated unless it is part of a group of similar items. An appraisal is generally required for property listed in Section B. See instructions.

Part I Information on Donated Property - To be completed by the taxpayer and/or the appraiser.

4 Check the box that describes the type of property donated:

a ☐ Art* (contribution of $20,000 or more)
b ☐ Qualified Conservation Contribution
c ☐ Equipment
d ☐ Art* (contribution of less than $20,000)
e ☐ Other Real Estate
f ☐ Securities
g ☐ Collectibles**
h ☐ Intellectual Property
i ☐ Vehicles
j ☐ Other

*Art includes paintings, sculptures, watercolors, prints, drawings, ceramics, antiques, decorative arts, textiles, carpets, silver, rare manuscripts, historical memorabilia, and other similar objects.
**Collectibles include coins, stamps, books, gems, jewelry, sports memorabilia, dolls, etc., but not art as defined above.

Note. In certain cases, you must attach a qualified appraisal of the property. See instructions.

5	(a) Description of donated property (if you need more space, attach a separate statement)	(b) If tangible property was donated, give a brief summary of the overall physical condition of the property at the time of the gift	(c) Appraised fair market value

A						
B						
C						
D						

Part II Taxpayer (Donor) Statement - List each item included in Part I above that the appraisal identifies as having a value of $500 or less. See instructions.

I declare that the following item(s) included in Part I above has to the best of my knowledge and belief an appraised value of not more than $500 (per item). Enter identifying letter from Part I and describe the specific item. See instructions. ▶

Signature of taxpayer (donor) ▶ Date ▶

Part III Declaration of Appraiser

I declare that I am not the donor, the donee, a party to the transaction in which the donor acquired the property, employed by, or related to any of the foregoing persons, or married to any person who is related to any of the foregoing persons. And, if regularly used by the donor, donee, or party to the transaction, I performed the majority of my appraisals during my tax year for other persons.

Also, I declare that I perform appraisals on a regular basis; and that because of my qualifications as described in the appraisal, I am qualified to make appraisals of the type of property being valued. I certify that the appraisal fees were not based on a percentage of the appraised property value. Furthermore, I understand that a false or fraudulent overstatement of the property value as described in the qualified appraisal or this Form 8283 may subject me to the penalty under section 6701(a) (aiding and abetting the understatement of tax liability). In addition, I understand that I may be subject to a penalty under section 6695A if I know, or reasonably should know, that my appraisal is to be used in connection with a return or claim for refund and a substantial or gross valuation misstatement results from my appraisal. I affirm that I have not been barred from presenting evidence or testimony by the Office of Professional Responsibility.

City or town, state, and ZIP code
ST MATTHEWS, SC 29135

Part IV Donee Acknowledgment - To be completed by the charitable organization.

This charitable organization acknowledges that it is a qualified organization under section 170(c) and that it received the donated property as described in Section B, Part I, above on the following date ▶

Furthermore, this organization affirms that in the event it sells, exchanges, or otherwise disposes of the property described in Section B, Part I (or any portion thereof) within 3 years after the date of receipt, it will file Form 8282, Donee Information Return, with the IRS and give the donor a copy of that form. This acknowledgment does not represent agreement with the claimed fair market value.

Does the organization intend to use the property for an unrelated use? . . . . ▶ ☐ Yes ☐ No

Form **8903** (Rev. December 2010) Department of the Treasury Internal Revenue Service

Domestic Production Activities Deduction

▶ Attach to your tax return. ▶ See separate instructions.

OMB No. 1545-1984

Attachment Sequence No. **143**

Name(s) as shown on return: SCANA CORPORATION

Identifying number: 57-0784499

Note. Do not complete column (a), unless you have oil-related production activities. Enter amounts for all activities in column (b), including oil-related production activities.

Line	Description		(a) Oil-related production activities	(b) All activities
1	Domestic production gross receipts (DPGR)	1		4,497,365,433.
2	Allocable cost of goods sold. If you are using the small business *simplified overall method, skip lines 2 and 3*	2		4,338,581,720.
3	Enter deductions and losses allocable to DPGR (see instructions)	3		374,307,595.
4	If you are using the small business simplified overall method, enter the amount of cost of goods sold and other deductions or losses you ratably apportion to DPGR. All others, skip line 4	4		
5	Add lines 2 through 4	5		4,712,889,315.
6	Subtract line 5 from line 1	6		-215,523,882.
7	Qualified production activities income from estates, trusts, and certain partnerships and S corporations (see instructions)	7		
8	Add lines 6 and 7. Estates and trusts, go to line 9, all others, skip line 9 and go to line 10	8		
9	Amount allocated to beneficiaries of the estate or trust (see instructions)	9		
10a	**Oil-related qualified production activities income.** Estates and trusts, subtract line 9, column (a), from line 8, column (a), all others, enter amount from line 8, column (a). If zero or less, enter -0- here	10a		
b	**Qualified production activities income.** Estates and trusts, subtract line 9, column (b), from line 8, column (b), all others, enter amount from line 8, column (b). If zero or less, enter -0- here, skip lines 11 through 21, and enter -0- on line 22	10b		

Line	Description		Amount
11	Income limitation (see instructions): • Individuals, estates, and trusts. Enter your adjusted gross income figured without the domestic production activities deduction • All others. Enter your taxable income figured without the domestic production activities deduction (tax-exempt organizations, see instructions)	11	
12	Enter the smaller of line 10b or line 11. If zero or less, enter -0- here, skip lines 13 through 21, and enter -0- on line 22	12	
13	Enter 9% of line 12	13	
14a	Enter the smaller of line 10a or line 12 — 14a		
b	Reduction for oil-related qualified production activities income. Multiply line 14a by 3%	14b	
15	Subtract line 14b from line 13	15	
16	Form W-2 wages (see instructions)	16	
17	Form W-2 wages from estates, trusts, and certain partnerships and S corporations (see instructions)	17	
18	Add lines 16 and 17. Estates and trusts, go to line 19, all others, skip line 19 and go to line 20	18	
19	Amount allocated to beneficiaries of the estate or trust (see instructions)	19	
20	Estates and trusts, subtract line 19 from line 18, all others, enter amount from line 18	20	
21	Form W-2 wage limitation. Enter 50% of line 20	21	
22	Enter the smaller of line 15 or line 21	22	
23	Domestic production activities deduction from cooperatives. Enter deduction from Form 1099-PATR, box 6	23	
24	Expanded affiliated group allocation (see instructions)	24	
25	**Domestic production activities deduction.** Combine lines 22 through 24 and enter the result here and on Form 1040, line 35; Form 1120, line 25; or the applicable line of your return	25

Alternative Fuel Vehicle Refueling Property Credit

▶ Attach to your tax return.

▶ Information about Form 8911 and its instructions is at *www.irs.gov/form8911*.

OMB No. 1545-1981

2016

Attachment Sequence No. **151**

Name(s) shown on return: SCANA CORPORATION

Identifying number: 57-0784499

Part I — Total Cost of Refueling Property

1	Total cost of qualified alternative fuel vehicle refueling property placed in service during the tax year (see **What's New** in the instructions)	1	9,755.

Part II — Credit for Business/Investment Use Part of Refueling Property

2	Business/investment use part (see instructions)	2	9,755.
3	Section 179 expense deduction (see instructions)	3	
4	Subtract line 3 from line 2	4	9,755.
5	Multiply line 4 by 30% (0.30)	5	2,927.
6	*Maximum business/investment use part of credit* (see instructions)	6	2,927.
7	Enter the **smaller** of line 5 or line 6	7	2,927.
8	Alternative fuel vehicle refueling property credit from partnerships and S corporations (see instructions)	8	
9	**Business/investment use part of credit.** Add lines 7 and 8. Partnerships and S corporations, stop here and report this amount on Schedule K. All others, report this amount on Form 3800, Part III, line 1s	9	2,927.

Part III — Credit for Personal Use Part of Refueling Property

10	Subtract line 2 from line 1. If zero, stop here; do not file this form unless you are claiming a credit on line 9	10	
11	Multiply line 10 by 30% (0.30)	11	
12	Maximum personal use part of credit (see instructions)	12	
13	Enter the **smaller** of line 11 or line 12	13	
14	Regular tax before credits: • Individuals. Enter the sum of the amounts from Form 1040, lines 44 and 46; or the sum of the amounts from Form 1040NR, lines 42 and 44. • Other filers. Enter the regular tax before credits from your return.	14	
15	Credits that reduce regular tax before the alternative fuel vehicle refueling property credit:		
a	Foreign tax credit — 15a		
b	Certain allowable credits (see instructions) — 15b		
c	Add lines 15a and 15b	15c	
16	Net regular tax. Subtract line 15c from line 14. If zero or less, enter -0- and stop here; do not file this form unless you are claiming a credit on line 9	16	
17	Tentative minimum tax (see instructions): • Individuals. Enter the amount from Form 6251, line 33. • Other filers. Enter the tentative minimum tax from your alternative minimum tax form or schedule.	17	
18	Subtract line 17 from line 16. If zero or less, stop here; do not file this form unless you are claiming a credit on line 9	18	
19	**Personal use part of credit.** Enter the smaller of line 13 or line 18 here and on Form 1040, line 54; Form 1040NR, line 51; or the appropriate line of your return. If line 18 is smaller than line 13, see instructions	19

Attachment Sequence No. 160

Name(s) as shown on return	Identifying number
SCANA CORPORATION	57-0784499
Name of policyholder, if different from above	Identifying number, if different from above

Type of business

HOLDING COMPANY UTILITY

1	Enter the number of employees the policyholder had at the end of the tax year	1	5,775.
2	Enter the number of employees included on line 1 who were insured at the end of the tax year under the policyholder's employer-owned life insurance contract(s) issued after August 17, 2006. See *Section 1035 exchanges* on page 2 for an exception	2	3.
3	Enter the total amount of employer-owned life insurance in force at the end of the tax year for employees who were insured under the contract(s) specified on line 2	3	1,160,000.
4a	Does the policyholder have a valid consent (see instructions) for each employee included on line 2? [X] Yes [ ] No		
b	If "No," enter the number of employees included on line 2 for whom the policyholder does not have a valid consent	4b	

General Instructions

Section references are to the Internal revenue Code unless otherwise noted.

Purpose of Form

Use Form 8925 to report the number of employees covered by employer-owned life insurance contracts issued after August 17, 2006, and the total amount of employer-owned life insurance in force on those employees at the end of the tax year. Policyholders must also indicate whether a valid consent has been received from each covered employee, and the number of covered employees for which a valid consent has not been received.

See sections 101(j) and 6039I, and Notice 2009-48, 2009-24 I.R.B. 1085, for more information.

Definitions

Employer-owned life insurance contract. For purposes of Form 8925, an insurance contract is an employer-owned life insurance contract if it is owned by a policyholder as defined below, and covers the life of the policyholder's employee(s) on the date the life insurance contract is issued. If you have master contracts, see section 101(j)(3) for additional information.

Policyholder. For purposes of Form 8925 and these instructions, a policyholder is an "applicable policyholder" as defined in section 101(j)(3)(B). Generally, a policyholder is the person who owns the employer-owned life insurance contract, and who is (a) engaged in a trade or business that employs the person insured under the employer-owned life insurance contract and (b) the direct or indirect beneficiary of the employer-owned life insurance contract.

Related person. A related person is considered a policyholder if that person is (a) related to the policyholder (defined earlier) under sections 267(b) or 707(b)(1), or (b) engaged in a trade or business under common control with the policyholder. See sections 52(a) and (b).

Employee. Employee includes an officer, director, or highly compensated employee under section 414(q).

Insured. An individual must be a U.S. citizen or resident to be considered insured under an employer-owned life insurance contract. Both individuals covered by a contract covering the joint lives of two individuals are considered insured.

Notice and consent requirements. To qualify as an employer-owned life insurance contract, the policyholder must meet the notice and consent requirements listed below before the issuance of the contract.

1. Provide written notification to the employee stating the policyholder intends to insure the employee's life and the maximum face amount for which the employee could be insured at the time the contract was issued.

The written notification must include a disclosure of the face amount of life insurance, either in dollars or as a multiple of salary, that the policyholder reasonably expects to purchase with regard to the employee during the course of the employee's tenure. Additional notice and consent are required if the aggregate face amount of the employer-owned life insurance contracts with regard to an employee exceeds the amount of which the employee was given notice and to which the employee consented. See Q&A-9 and Q&A-12 in Notice 2009-48.

2. Provide written notification to the employee that the policyholder will be a beneficiary of any proceeds payable upon the death of the employee.

3. Received written consent from the employee. See *Valid consent* under the instructions for line 4a.

Electronic notification and consent. The written notification and consent requirement can be met electronically only if the system for electronic notification and consent meets requirements 1 through 3, above. See Q&A-11 in Notice 2009-48 for more information.

Issue date of contract. Generally, the issue date of a life insurance contract is the date on the policy assigned by the insurance company on or after the date of application. For purposes of meeting the notice and consent requirements, the issue date of the employer-owned life insurance contract is the later of (1) the date of application of coverage, (2) the effective date of coverage, or (3) the formal issuance of the contract. See Q&A-4 in Notice 2009-48 for more information.

Regulation Section 1.263(a)-1(f) - De Minimis Safe Harbor Election

Taxpayer Name: SCANA CORPORATION

Taxpayer Address: 220 OPERATION WAY CAYCE SC 29033-3701

Taxpayer ID Number: 57-0784499

Year-End: 12/31/2016

Under IRC Regulation Section 1.263(a)-1(f), the taxpayer hereby elects to apply the de minimis safe harbor election.

Election To Deduct Start-Up Expenditures
IRC Section 195

Taxpayer Name: SCANA SERVICES INC
Taxpayer ID Number: 57-1092169
Year-end: 12/31/2016

Section 195 Election

In accordance with IRC Sec. 195, taxpayer hereby elects to deduct start-up expenditures up to $5,000 in the tax year in which the business begins. The remainder of the startup expenditures are deductible ratably over 180 months, beginning with 07/14/2005, the month that the corporation's active trade or business began (or was acquired).

The trade or business of the taxpayer to which this election relates is SCANA Pharmacy

The start-up expense incurred are:

Description of Start-Up Expense	Date Incurred	Amount
SALARIES AND MISCELLANEOUS	06/01/2005	165,233.
	Total	165,233.

Federal Elections

Description: Election RECURRING ITEMS EXCEPTION

Regulation Reference: 461(h)

Pursuant to Internal Revenue Code Section 461(h) and Regulation 1.461-5(D), the taxpayer has elected to use the recurring items exception to the economic performance rules of IRS Section 461(h), and intends for this election to apply to all subsidiaries included in the consolidated return. The election is adopted for all items satisfying the conditions outlined in Section 461(h) that are incurred in the taxpayer's trade or business.

Federal Elections

Description: Election DEPRECIATION UNDER IRC 168(k)

Regulation Reference: 168(k)

PURSUANT TO SECTION 168(K)(2)(C)(III), SCANA CORPORATION, AS AGENT FOR EACH OF ITS SUBSIDIARIES LISTED BELOW, HEREBY ELECTS NOT TO APPLY THE SPECIAL DEPRECIATION ALLOWANCE FOR CERTAIN PROPERTY ACQUIRED AFTER JANUARY 1, 2008, THAT IS PROVIDED UNDER SECTION 168(K) OF THE CODE, AND INTENDS FOR THIS ELECTION TO APPLY TO THE CLASSES OF QUALIFIED PROPERTY SEPARATELY LISTED ON A COMPANY BY COMPANY BASIS FOR THE TAX YEAR 2016. FOR SOUTH CAROLINA FUEL CO INC, THE ELECTION APPLIES TO ALL CLASSES OF QUALIFIED PROPERTY.

Federal Elections

Description: Election DEPRECIATION PRIOR TO JANUARY 1

Regulation Reference: 167

SCANA Corporation elects under Section 1.167(a)-12(e)(2) of the Regulations on behalf of itself and the following named subsidiaries to apply Section 1.167(a)-12 of the Regulations for depreciation of property placed in service prior to January 1, 1971 for the taxable year 2016. This election is for South Carolina Electric and Gas and Public Service Company of North Carolina, Inc.

Tax Year 2016

Schedule M-3, Page 3, Part 3, line 36
Section 118 Exclusion

Non Standard Service Fund $3,464,164 –Municipalities reimburse SCE&G costs for installing non-standard services. Typical work performed is for public benefit generally related to safety and beautification.

South Carolina Department of Transportation $9,029,018 – SCE&G is reimbursed cost for construction services provided to the SCDOT. These services typically include relocation projects involving removing and installing new SCE&G poles and/or lines and gas pipe to accommodate SCDOT improvement projects.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

File Form 8302 to request that the IRS electronically deposit a tax refund of $1 million or more directly into an account at any U.S. bank or other financial institution (such as a mutual fund, credit union, or brokerage firm) that accepts electronic deposits.

The benefits of an electronic deposit include a faster refund, the added security of a paperless payment, and the savings of tax dollars associated with the reduced processing costs.

Who May File

Form 8302 may be filed with any tax return other than Form 1040, 1120, or 1120S to request an electronic deposit of a refund of $1 million or more. You are not eligible to request an electronic deposit if:

• The receiving financial institution is a foreign bank or a foreign branch of a U.S. bank or

• You have applied for an employer identification number but are filing your tax return before receiving one.

If Form 8302 is filed with **Form 1045,** Application for Tentative Refund, or **Form 1139,** Corporation Application for Tentative Refund, both of which allow for more than one year's reporting, electronic deposits may be made only for a year for which the refund is at least $1 million.

Note. *Filers of Form 1040 must request a direct deposit of refund by completing the account information on that form. Filers of Forms 1120 or 1120S must request a direct deposit of a refund using* ***Form 8050,*** *Direct Deposit of Corporate Tax Refund. This includes a request for a refund of $1 million or more.*

Conditions Resulting in a Refund by Check

If the IRS is unable to process this request for an electronic deposit, a refund by check will be generated. Reasons for not processing a request include:

• The name on the tax return does not match the name on the account.

• You fail to indicate the method of deposit to be used (i.e., direct deposit or Fedwire).

• The financial institution rejects the electronic deposit because of an incorrect routing or account number.

• You fail to indicate the type of account the deposit is to be made to (i.e., checking or savings).

• There is an outstanding liability the offset of which reduces the refund to less than $1 million.

How To File

Attach Form 8302 to the applicable return or application for refund. To ensure that your tax return is correctly processed, see **Assembling the Return** in the instructions for the form with which the Form 8302 is filed. For Forms 1045 or 1139, attach a separate Form 8302 for each carryback year.

Specific Instructions

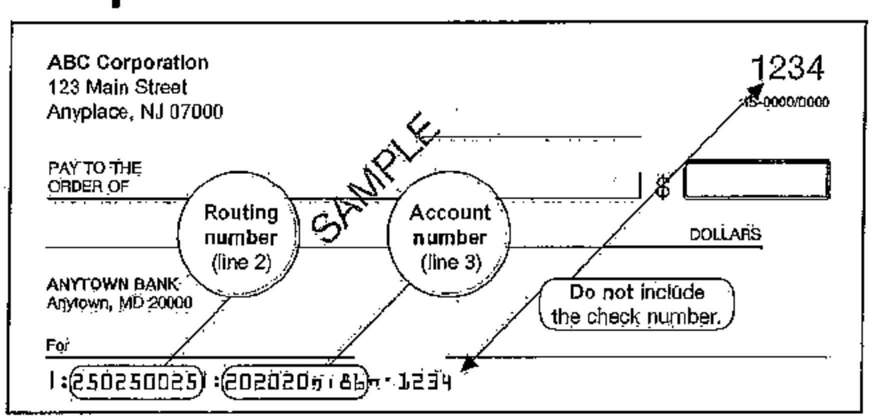
Identifying number. Enter the employer identification number or social security number shown on the tax return to which Form 8302 is attached.

Line 1. Direct deposit is an electronic payment alternative that uses the Automated Clearing House (ACH) system. Fedwire is a transaction-by-transaction processing system designed for items that must be received by payees the same day as originated by the IRS.

Line 2. Enter the financial institution's routing number and **verify** that the institution will accept the type of electronic deposit requested. See the Sample Check below for an example of where the routing number may be shown.

CAUTION: Check with your financial institution, if necessary, to verify the routing number entered on line 2 is correct.

Sample Check



Note. The routing and account numbers may be in different places on your check.

4 **Type of account (one box must be checked):**
☒ Checking ☐ Savings

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Purpose of Form

File Form 8302 to request that the IRS electronically deposit a tax refund of $1 million or more directly into an account at any U.S. bank or other financial institution (such as a mutual fund, credit union, or brokerage firm) that accepts electronic deposits.

The benefits of an electronic deposit include a faster refund, the added security of a paperless payment, and the savings of tax dollars associated with the reduced processing costs.

Who May File

Form 8302 may be filed with any tax return other than Form 1040, 1120, or 1120S to request an electronic deposit of a refund of $1 million or more. You are not eligible to request an electronic deposit if:

• The receiving financial institution is a foreign bank or a foreign branch of a U.S. bank or

• You have applied for an employer identification number but are filing your tax return before receiving one.

If Form 8302 is filed with **Form 1045,** Application for Tentative Refund, or **Form 1139,** Corporation Application for Tentative Refund, both of which allow for more than one year's reporting, electronic deposits may be made only for a year for which the refund is at least $1 million.

Note. *Filers of Form 1040 must request a direct deposit of refund by completing the account information on that form. Filers of Forms 1120 or 1120S must request a direct deposit of a refund using* ***Form 8050,*** *Direct Deposit of Corporate Tax Refund. This includes a request for a refund of $1 million or more.*

Conditions Resulting in a Refund by Check

If the IRS is unable to process this request for an electronic deposit, a refund by check will be generated. Reasons for not processing a request include:

• The name on the tax return does not match the name on the account.

• You fail to indicate the method of deposit to be used (i.e., direct deposit or Fedwire).

• The financial institution rejects the electronic deposit because of an incorrect routing or account number.

• You fail to indicate the type of account the deposit is to be made to (i.e., checking or savings).

• There is an outstanding liability the offset of which reduces the refund to less than $1 million.

How To File

Attach Form 8302 to the applicable return or application for refund. To ensure that your tax return is correctly processed, see **Assembling the Return** in the instructions for the form with which the Form 8302 is filed. For Forms 1045 or 1139, attach a separate Form 8302 for each carryback year.

Specific Instructions

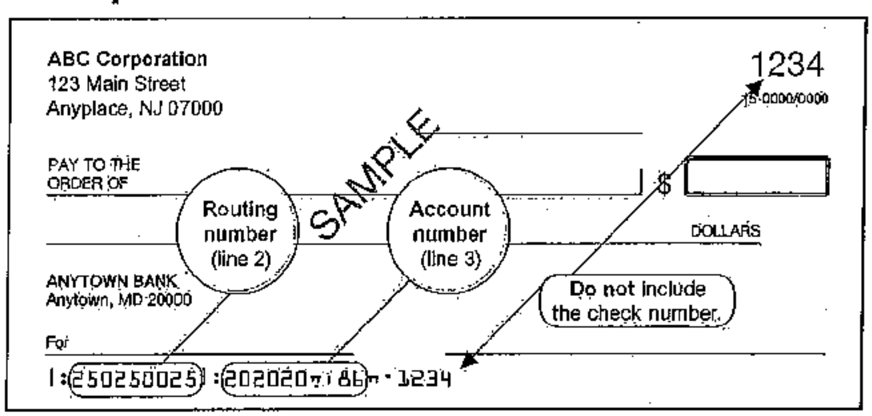
Identifying number. Enter the employer identification number or social security number shown on the tax return to which Form 8302 is attached.

Line 1. Direct deposit is an electronic payment alternative that uses the Automated Clearing House (ACH) system. Fedwire is a transaction-by-transaction processing system designed for items that must be received by payees the same day as originated by the IRS.

Line 2. Enter the financial institution's routing number and **verify** that the institution will accept the type of electronic deposit requested. See the Sample Check below for an example of where the routing number may be shown.

CAUTION: Check with your financial institution, if necessary, to verify the routing number entered on line 2 is correct.

Sample Check



Note. The routing and account numbers may be in different places on your check.

6	Add lines 1, 3, 4, and 5	6	28,148,334.

Part II Allowable Credit

7	Regular tax before credits: • Individuals. Enter the sum of the amounts from Form 1040, lines 44 and 46, or the sum of the amounts from Form 1040NR, lines 42 and 44 • Corporations. Enter the amount from Form 1120, Schedule J, Part I, line 2; or the applicable line of your return • Estates and trusts. Enter the sum of the amounts from Form 1041, Schedule G, lines 1a and 1b; or the amount from the applicable line of your return	7	
8	Alternative minimum tax: • Individuals. Enter the amount from Form 6251, line 35 • Corporations. Enter the amount from Form 4626, line 14 • Estates and trusts. Enter the amount from Schedule I (Form 1041), line 56	8	
9	Add lines 7 and 8	9	
10a	Foreign tax credit [10a]		
b	Certain allowable credits (see instructions) [10b]		
c	Add lines 10a and 10b	10c	
11	Net income tax. Subtract line 10c from line 9. If zero, skip lines 12 through 15 and enter -0- on line 16	11	
12	Net regular tax. Subtract line 10c from line 7. If zero or less, enter -0- [12]		
13	Enter 25% (.25) of the excess, if any, of line 12 over $25,000 (see instructions) [13]		
14	Tentative minimum tax: • Individuals. Enter the amount from Form 6251, line 33 • Corporations. Enter the amount from Form 4626, line 12 • Estates and trusts. Enter the amount from Schedule I (Form 1041), line 54 [14]		
15	Enter the greater of line 13 or line 14	15	
16	Subtract line 15 from line 11. If zero or less, enter -0-	16	
17	Enter the smaller of line 6 or line 16. C corporations: See the line 17 instructions if there has been an ownership change, acquisition, or reorganization.	17	

Form 3800 (2016) SCANA CORPORATION 57-0784499 Page 2

Part II **Allowable Credit** *(Continued)*

Note: If you are *not* required to report any amounts on lines 22 or 24 below, skip lines 18 through 25 and enter -0- on line 26.

18	Multiply line 14 by 75% (.75) (see instructions)	18	
19	Enter the greater of line 13 or line 18	19	
20	Subtract line 19 from line 11. If zero or less, enter -0-	20	
21	Subtract line 17 from line 20. If zero or less, enter -0-	21	
22	Combine the amounts from line 3 of all Parts III with box A, C, or D checked	22	
23	Passive activity credit from line 3 of all Parts III with box B checked [23]		
24	Enter the applicable passive activity credit allowed for 2016 (see instructions)	24	
25	Add lines 22 and 24	25	
26	Empowerment zone and renewal community employment credit allowed. Enter the smaller of line 21 or line 25	26	
27	Subtract line 13 from line 11. If zero or less, enter -0-	27	
28	Add lines 17 and 26	28	
29	Subtract line 28 from line 27. If zero or less, enter -0-	29	
30	Enter the general business credit from line 5 of all Parts III with box A checked	30	8,254,946.
31	Reserved	31	
32	Passive activity credits from line 5 of all Parts III with box B checked [32]		
33	Enter the applicable passive activity credits allowed for 2016 (see instructions)	33	
34	Carryforward of business credit to 2016. Enter the amount from line 5 of Part III with box C checked and line 6 of Part III with box G checked. See instructions for statement to attach	34	
35	Carryback of business credit from 2017. Enter the amount from line 5 of Part III with box D checked (see instructions)	35	
36	Add lines 30, 33, 34, and 35	36	8,254,946.
37	Enter the smaller of line 29 or line 36	37	
38	Credit allowed for the current year. Add lines 28 and 37. Report the amount from line 38 (if smaller than the sum of Part I, line 6, and Part II, lines 25 and 36, see instructions) as indicated below or on the applicable line of your return: • Individuals. Form 1040, line 54, or Form 1040NR, line 51 • Corporations. Form 1120, Schedule J, Part I, line 5c • Estates and trusts. Form 1041, Schedule G, line 2b	38

Name(s) shown on return: SCANA CORPORATION
Identifying number: 57-0784499

Section A - Regular Credit. Skip this section and go to Section B if you are electing or previously elected (and are not revoking) the alternative simplified credit.

Line	Description	Box	Amount	Line	Amount
1	Certain amounts paid or incurred to energy consortia (see instructions)			1	1,723,298.
2	Basic research payments to qualified organizations (see instructions)	2			
3	Qualified organization base period amount	3			
4	Subtract line 3 from line 2. If zero or less, enter -0-			4	
5	Wages for qualified services (do not include wages used in figuring the work opportunity credit)	5	2,585,567.		
6	Cost of supplies	6	9,839,450.		
7	Rental or lease costs of computers (see instructions)	7			
8	Enter the applicable percentage of contract research expenses (see instructions)	8	417,134,646.		
9	Total qualified research expenses. Add lines 5 through 8	9	429,559,663.		
10	Enter fixed-base percentage, but not more than 16% (0.16) (see instructions)	10	0.030 %		
11	Enter average annual gross receipts (see instructions)	11	5,039,022,108.		
12	Multiply line 11 by the percentage on line 10	12	1,511,707.		
13	Subtract line 12 from line 9. If zero or less, enter -0-	13	428,047,956.		
14	Multiply line 9 by 50% (0.50)	14	214,779,832.		
15	Enter the smaller of line 13 or line 14			15	214,779,832.
16	Add lines 1, 4, and 15			16	216,503,130.
17	Are you electing the reduced credit under section 280C? ▶ Yes [X] No [ ] If "Yes," multiply line 16 by 13% (0.13). If "No," multiply line 16 by 20% (0.20) and see the instructions for the statement that must be attached. Members of controlled groups or businesses under common control: see instructions for the statement that must be attached Stmt 84			17	28,145,407.

Section B - Alternative Simplified Credit. Skip this section if you are completing Section A.

Line	Description	Box	Amount	Line	Amount
18	Certain amounts paid or incurred to energy consortia (see the line 1 instructions)			18	
19	Basic research payments to qualified organizations (see the line 2 instructions)	19			
20	Qualified organization base period amount (see the line 3 instructions)	20			
21	Subtract line 20 from line 19. If zero or less, enter -0-			21	
22	Add lines 18 and 21			22	
23	Multiply line 22 by 20% (0.20)			23	
24	Wages for qualified services (do not include wages used in figuring the work opportunity credit)	24			
25	Cost of supplies	25			
26	Rental or lease costs of computers (see the line 7 instructions)	26			
27	Enter the applicable percentage of contract research expenses (see the line 8 instructions)	27			
28	Total qualified research expenses. Add lines 24 through 27	28			
29	Enter your total qualified research expenses for the prior 3 tax years. If you had no qualified research expenses in any one of those years, skip lines 30 and 31	29			
30	Divide line 29 by 6.0	30			
31	Subtract line 30 from line 28. If zero or less, enter -0-	31			
32	Multiply line 31 by 14% (0.14). If you skipped lines 30 and 31, multiply line 28 by 6% (0.06)			32	

For Paperwork Reduction Act Notice, see separate instructions.

SCANA CORPORATION 57-0784499

Section B - Alternative Simplified Credit *(continued)*

33	Add lines 23 and 32	33	
34	Are you electing the reduced credit under section 280C? ▶ Yes ☐ No ☐ If "Yes," multiply line 33 by 65% (0.65). If "No," enter the amount from line 33 and see the line 17 instructions for the statement that must be attached. Members of controlled groups or businesses under common control: see instructions for the statement that must be attached	34	

Section C - Current Year Credit

35	Enter the portion of the credit from Form 8932, line 2, that is attributable to wages that were also used to figure the credit on line 17 or line 34 (whichever applies)	35	
36	Subtract line 35 from line 17 or line 34 (whichever applies). If zero or less, enter -0-	36	28,145,407.
37	Credit for increasing research activities from partnerships, S corporations, estates, and trusts	37	
38	Add lines 36 and 37	38	28,145,407.
	• Estates and trusts, go to line 39. • Partnerships and S corporations not electing the payroll tax credit, stop here and report this amount on Schedule K. • Partnerships and S corporations electing the payroll tax credit, complete Section D and report on Schedule K the amount on this line reduced by the amount on line 44. • Eligible small businesses, stop here and report the credit on Form 3800, Part III, line 4i. See instructions for the definition of eligible small business. • Filers other than eligible small businesses, stop here and report the credit on Form 3800, Part III, line 1c. **Note:** Qualified small business filers, other than partnerships and S corporations, electing the payroll tax credit must complete Form 3800 before completing Section D.		
39	Amount allocated to beneficiaries of the estate or trust (see instructions)	39	
40	Estates and trusts, subtract line 39 from line 38. For eligible small businesses, report the credit on Form 3800, Part III, line 4i. See instructions. For filers other than eligible small businesses, report the credit on Form 3800, Part III, line 1c	40	

Section D - Qualified Small Business Payroll Tax Election and Payroll Tax Credit. Skip this section if the payroll tax election does not apply. See instructions.

41	Check this box if you are a qualified small business electing the payroll tax credit. See instructions ☐		
42	Enter the portion of line 36 elected as a payroll tax credit (do not enter more than $250,000). See instructions	42	
43	General business credit carryforward from the current year (see instructions). Partnerships and S corporations skip this line and go to line 44	43	
44	Partnerships and S corporations, enter the smaller of line 36 or line 42. All others, enter the smallest of line 36, line 42, or line 43. Enter here and on Form 8974, line 5. Members of controlled groups or businesses under common control: see instructions for the statement that must be attached	44

Name(s) shown on return: SCANA CORPORATION
Identifying number: 57-0784499

Part I Total Cost of Refueling Property

1	Total cost of qualified alternative fuel vehicle refueling property placed in service during the tax year (see **What's New** in the instructions)	1	9,755.

Part II Credit for Business/Investment Use Part of Refueling Property

2	Business/investment use part (see instructions)	2	9,755.
3	Section 179 expense deduction (see instructions)	3	
4	Subtract line 3 from line 2	4	9,755.
5	Multiply line 4 by 30% (0.30)	5	2,927.
6	Maximum business/investment use part of credit (see instructions)	6	2,927.
7	Enter the smaller of line 5 or line 6	7	2,927.
8	Alternative fuel vehicle refueling property credit from partnerships and S corporations (see instructions)	8	
9	**Business/investment use part of credit.** Add lines 7 and 8. Partnerships and S corporations, stop here and report this amount on Schedule K. All others, report this amount on Form 3800, Part III, line 1s	9	2,927.

Part III Credit for Personal Use Part of Refueling Property

10	Subtract line 2 from line 1. If zero, stop here; **do not** file this form unless you are claiming a credit on line 9	10	
11	Multiply line 10 by 30% (0.30)	11	
12	Maximum personal use part of credit (see instructions)	12	
13	Enter the smaller of line 11 or line 12	13	
14	Regular tax before credits: • Individuals. Enter the sum of the amounts from Form 1040, lines 44 and 46; or the sum of the amounts from Form 1040NR, lines 42 and 44. • Other filers. Enter the regular tax before credits from your return.	14	
15	Credits that reduce regular tax before the alternative fuel vehicle refueling property credit:		
a	Foreign tax credit — 15a		
b	Certain allowable credits (see instructions) — 15b		
c	Add lines 15a and 15b	15c	
16	**Net regular tax.** Subtract line 15c from line 14. If zero or less, enter -0- and stop here; **do not** file this form unless you are claiming a credit on line 9	16	
17	Tentative minimum tax (see instructions): • Individuals. Enter the amount from Form 6251, line 33. • Other filers. Enter the tentative minimum tax from your alternative minimum tax form or schedule.	17	
18	Subtract line 17 from line 16. If zero or less, stop here; **do not** file this form unless you are claiming a credit on line 9	18	
19	**Personal use part of credit.** Enter the smaller of line 13 or line 18 here and on Form 1040, line 54; Form 1040NR, line 51; or the appropriate line of your return. If line 18 is smaller than line 13, see instructions	19

OMB No. 1545-0123

2014

Name	Employer identification number
SCANA CORPORATION	57-0784499

Note: *See the instructions to find out if the corporation is a small corporation exempt from the alternative minimum tax (AMT) under section 55(e).*

1	Taxable income or (loss) before net operating loss deduction			1	332,631,490
2	**Adjustments and preferences:**				
a	Depreciation of post-1986 property			2a	-29,753,910
b	Amortization of certified pollution control facilities			2b	
c	Amortization of mining exploration and development costs			2c	
d	Amortization of circulation expenditures (personal holding companies only)			2d	
e	Adjusted gain or loss			2e	3,104,493
f	Long-term contracts			2f	
g	Merchant marine capital construction funds			2g	
h	Section 833(b) deduction (Blue Cross, Blue Shield, and similar type organizations only)			2h	
i	Tax shelter farm activities (personal service corporations only)			2i	
j	Passive activities (closely held corporations and personal service corporations only)			2j	
k	Loss limitations			2k	
l	Depletion			2l	
m	Tax-exempt interest income from specified private activity bonds			2m	
n	Intangible drilling costs			2n	
o	Other adjustments and preferences			2o	
3	Pre-adjustment alternative minimum taxable income (AMTI). Combine lines 1 through 2o			3	305,982,073
4	**Adjusted current earnings (ACE) adjustment:**				
a	ACE from line 10 of the ACE worksheet in the instructions	4a	340,852,378		
b	Subtract line 3 from line 4a. If line 3 exceeds line 4a, enter the difference as a negative amount (see instructions)	4b	34,870,305		
c	Multiply line 4b by 75% (.75). Enter the result as a positive amount	4c	26,152,729		
d	Enter the excess, if any, of the corporation's total increases in AMTI from prior year ACE adjustments over its total reductions in AMTI from prior year ACE adjustments (see instructions). **Note:** *You* ***must*** *enter an amount on line 4d (even if line 4b is positive)*	4d	118,564,616		
e	ACE adjustment. • If line 4b is zero or more, enter the amount from line 4c • If line 4b is less than zero, enter the **smaller** of line 4c or line 4d as a negative amount			4e	26,152,729
5	Combine lines 3 and 4e. If zero or less, stop here; the corporation does not owe any AMT			5	332,134,802
6	Alternative tax net operating loss deduction (see instructions)			6	53,417,169
7	**Alternative minimum taxable income.** Subtract line 6 from line 5. If the corporation held a residual interest in a REMIC, see instructions			7	278,717,633
8	**Exemption phase-out** (if line 7 is $310,000 or more, skip lines 8a and 8b and enter -0- on line 8c):				
a	Subtract $150,000 from line 7 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-	8a			
b	Multiply line 8a by 25% (.25)	8b			
c	Exemption. Subtract line 8b from $40,000 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-			8c	0
9	Subtract line 8c from line 7. If zero or less, enter -0-			9	278,717,633
10	Multiply line 9 by 20% (.20)			10	55,743,527
11	Alternative minimum tax foreign tax credit (AMTFTC) (see instructions)			11	
12	Tentative minimum tax. Subtract line 11 from line 10			12	55,743,527
13	Regular tax liability before applying all credits except the foreign tax credit			13	96,431,812
14	**Alternative minimum tax.** Subtract line 13 from line 12. If zero or less, enter -0-. Enter here and on Form 1120, Schedule J, line 3, or the appropriate line of the corporation's income tax return			14	0

Adjusted Current Earnings (ACE) Worksheet

▶ See ACE Worksheet Instructions. (which begin on page 8).

1	Pre-adjustment AMTI. Enter the amount from line 3 of Form 4626					1	305,982,073
2	ACE depreciation adjustment:						
a	AMT depreciation			2a	629,253,038		
b	ACE depreciation:						
	(1) Post-1993 property	2b(1)					
	(2) Post-1989, pre-1994 property	2b(2)					
	(3) Pre-1990 MACRS property	2b(3)					
	(4) Pre-1990 original ACRS property	2b(4)					
	(5) Property described in sections 168(f)(1) through (4)	2b(5)					
	(6) Other property	2b(6)	633,504,022				
	(7) Total ACE depreciation. Add lines 2b(1) through 2b(6)			2b(7)	633,504,022		
c	ACE depreciation adjustment. Subtract line 2b(7) from line 2a					2c	-4,250,984
3	Inclusion in ACE of items included in earnings and profits (E&P):						
a	Tax-exempt interest income			3a			
b	Death benefits from life insurance contracts			3b	1,121,643		
c	All other distributions from life insurance contracts (including surrenders)			3c			
d	Inside buildup of undistributed income in life insurance contracts			3d	9,137,883		
e	Other items (see Regulations sections 1.56(g)-1(c)(6)(iii) through (ix) for a partial list)			3e			
f	Total increase to ACE from inclusion in ACE of items included in E&P. Add lines 3a through 3e					3f	10,259,526
4	Disallowance of items not deductible from E&P:						
a	Certain dividends received			4a	179,017		
b	Dividends paid on certain preferred stock of public utilities that are deductible under section 247			4b			
c	Dividends paid to an ESOP that are deductible under section 404(k)			4c	28,682,746		
d	Nonpatronage dividends that are paid and deductible under section 1382(c)			4d			
e	Other items (see Regulations sections 1.56(g)-1(d)(3)(i) and (ii) for a partial list)			4e			
f	Total increase to ACE because of disallowance of items not deductible from E&P. Add lines 4a through 4e					4f	28,861,763
5	Other adjustments based on rules for figuring E&P:						
a	Intangible drilling costs			5a			
b	Circulation expenditures			5b			
c	Organizational expenditures			5c			
d	LIFO inventory adjustments			5d			
e	Installment sales			5e			
f	Total other E&P adjustments. Combine lines 5a through 5e					5f	0
6	Disallowance of loss on exchange of debt pools					6	
7	Acquisition expenses of life insurance companies for qualified foreign contracts					7	
8	Depletion					8	
9	Basis adjustments in determining gain or loss from sale or exchange of pre-1994 property					9	
10	**Adjusted current earnings.** Combine lines 1, 2c, 3f, 4f, and 5f through 9. Enter the result here and on line 4a of Form 4626					10	340,852,378

Domestic Production Activities Deduction

▶ Attach to your tax return. ▶ See separate instructions.

OMB No. 1545-1984

Attachment Sequence No. 143

Name(s) as shown on return: SCANA CORPORATION

Identifying number: 57-0784499

Note. Do not complete column (a), unless you have oil-related production activities. Enter amounts for all activities in column (b), including oil-related production activities.		(a) Oil-related production activities	(b) All activities
1 Domestic production gross receipts (DPGR)	1		3,309,040,328
2 Allocable cost of goods sold. If you are using the small business simplified overall method, skip lines 2 and 3	2		2,927,379,858
3 Enter deductions and losses allocable to DPGR (see instructions)	3		8,230,446
4 If you are using the small business simplified overall method, enter the amount of cost of goods sold and other deductions or losses you ratably apportion to DPGR. All others, skip line 4	4		
5 Add lines 2 through 4	5		2,935,610,304
6 Subtract line 5 from line 1	6		373,430,024
7 Qualified production activities income from estates, trusts, and certain partnerships and S corporations (see instructions)	7		
8 Add lines 6 and 7. Estates and trusts, go to line 9, all others, skip line 9 and go to line 10	8	0	373,430,024
9 Amount allocated to beneficiaries of the estate or trust (see instructions)	9		
10a **Oil-related qualified production activities income.** Estates and trusts, subtract line 9, column (a), from line 8, column (a), all others, enter amount from line 8, column (a). If zero or less, enter -0- here.	10a	0	
b **Qualified production activities income.** Estates and trusts, subtract line 9, column (b), from line 8, column (b), all others, enter amount from line 8, column (b). If zero or less, enter -0- here, skip lines 11 through 21, and enter -0- on line 22	10b		373,430,024

11 Income limitation (see instructions): • Individuals, estates, and trusts. Enter your adjusted gross income figured without the domestic production activities deduction • All others. Enter your taxable income figured without the domestic production activities deduction (tax-exempt organizations, see instructions)	11	302,768,640
12 Enter the smaller of line 10b or line 11. If zero or less, enter -0- here, skip lines 13 through 21, and enter -0- on line 22	12	302,768,640
13 Enter 9% of line 12	13	27,249,178
14a Enter the smaller of line 10a or line 12 — 14a		
b Reduction for oil-related qualified production activities income. Multiply line 14a by 3%	14b	
15 Subtract line 14b from line 13	15	27,249,178
16 Form W-2 wages (see instructions)	16	856,826,997
17 Form W-2 wages from estates, trusts, and certain partnerships and S corporations (see instructions)	17	
18 Add lines 16 and 17. Estates and trusts, go to line 19, all others, skip line 19 and go to line 20	18	856,826,997
19 Amount allocated to beneficiaries of the estate or trust (see instructions)	19	
20 Estates and trusts, subtract line 19 from line 18, all others, enter amount from line 18	20	856,826,997
21 Form W-2 wage limitation. Enter 50% of line 20	21	428,413,499
22 Enter the smaller of line 15 or line 21	22	27,249,178
23 Domestic production activities deduction from cooperatives. Enter deduction from Form 1099-PATR, box 6	23	
24 Expanded affiliated group allocation (see instructions)	24	
25 **Domestic production activities deduction.** Combine lines 22 through 24 and enter the result here and on Form 1040, line 35; Form 1120, line 25; or the applicable line of your return	25	27,249,178

l	Depletion			2l	
m	Tax-exempt interest income from specified private activity bonds			2m	
n	Intangible drilling costs			2n	
o	Other adjustments and preferences			2o	
3	Pre-adjustment alternative minimum taxable income (AMTI). Combine lines 1 through 2o			3	300,841,991
4	**Adjusted current earnings (ACE) adjustment:**				
a	ACE from line 10 of the ACE worksheet in the instructions	4a	335,712,296		
b	Subtract line 3 from line 4a. If line 3 exceeds line 4a, enter the difference as a negative amount (see instructions)	4b	34,870,305		
c	Multiply line 4b by 75% (.75). Enter the result as a positive amount	4c	26,152,729		
d	Enter the excess, if any, of the corporation's total increases in AMTI from prior year ACE adjustments over its total reductions in AMTI from prior year ACE adjustments (see instructions). **Note:** *You* ***must*** *enter an amount on line 4d (even if line 4b is positive).*	4d	118,564,616		
e	ACE adjustment. • If line 4b is zero or more, enter the amount from line 4c • If line 4b is less than zero, enter the **smaller** of line 4c or line 4d as a negative amount			4e	26,152,729
5	Combine lines 3 and 4e. If zero or less, stop here; the corporation does not owe any AMT			5	326,994,720
6	Alternative tax net operating loss deduction (see instructions)			6	
7	**Alternative minimum taxable income.** Subtract line 6 from line 5. If the corporation held a residual interest in a REMIC, see instructions			7	326,994,720
8	**Exemption phase-out** (if line 7 is $310,000 or more, skip lines 8a and 8b and enter -0- on line 8c):				
a	Subtract $150,000 from line 7 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-	8a			
b	Multiply line 8a by 25% (.25)	8b			
c	Exemption. Subtract line 8b from $40,000 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-			8c	0
9	Subtract line 8c from line 7. If zero or less, enter -0-			9	326,994,720
10	Multiply line 9 by 20% (.20)			10	65,398,944
11	Alternative minimum tax foreign tax credit (AMTFTC) (see instructions)			11	
12	Tentative minimum tax. Subtract line 11 from line 10			12	65,398,944
13	Regular tax liability before applying all credits except the foreign tax credit			13	114,621,993
14	**Alternative minimum tax.** Subtract line 13 from line 12. If zero or less, enter -0-. Enter here and on Form 1120, Schedule J, line 3, or the appropriate line of the corporation's income tax return			14	0

SCANA CORPORATION 57-0784499

Adjusted Current Earnings (ACE) Worksheet

▶ See ACE Worksheet Instructions. (which begin on page 8).

Line	Description						
1	Pre-adjustment AMTI. Enter the amount from line 3 of Form 4626					1	300,841,991
2	ACE depreciation adjustment:						
a	AMT depreciation			2a	629,253,038		
b	ACE depreciation.						
	(1) Post-1993 property	2b(1)					
	(2) Post-1989, pre-1994 property	2b(2)					
	(3) Pre-1990 MACRS property	2b(3)					
	(4) Pre-1990 original ACRS property	2b(4)					
	(5) Property described in sections 168(f)(1) through (4)	2b(5)					
	(6) Other property	2b(6)	633,504,022				
	(7) Total ACE depreciation. Add lines 2b(1) through 2b(6)			2b(7)	633,504,022		
c	ACE depreciation adjustment. Subtract line 2b(7) from line 2a					2c	-4,250,984
3	Inclusion in ACE of items included in earnings and profits (E&P):						
a	Tax-exempt interest income			3a			
b	Death benefits from life insurance contracts			3b	1,121,643		
c	All other distributions from life insurance contracts (including surrenders)			3c			
d	Inside buildup of undistributed income in life insurance contracts			3d	9,137,883		
e	Other items (see Regulations sections 1.56(g)-1(c)(6)(iii) through (ix) for a partial list)			3e			
f	Total increase to ACE from inclusion in ACE of items included in E&P. Add lines 3a through 3e					3f	10,259,526
4	Disallowance of items not deductible from E&P:						
a	Certain dividends received			4a	179,017		
b	Dividends paid on certain preferred stock of public utilities that are deductible under section 247			4b			
c	Dividends paid to an ESOP that are deductible under section 404(k)			4c	28,682,746		
d	Nonpatronage dividends that are paid and deductible under section 1382(c)			4d			
e	Other items (see Regulations sections 1.56(g)-1(d)(3)(i) and (ii) for a partial list)			4e			
f	Total increase to ACE because of disallowance of items not deductible from E&P. Add lines 4a through 4e					4f	28,861,763
5	Other adjustments based on rules for figuring E&P:						
a	Intangible drilling costs			5a			
b	Circulation expenditures			5b			
c	Organizational expenditures			5c			
d	LIFO inventory adjustments			5d			
e	Installment sales			5e			
f	Total other E&P adjustments. Combine lines 5a through 5e					5f	0
6	Disallowance of loss on exchange of debt pools					6	
7	Acquisition expenses of life insurance companies for qualified foreign contracts					7	
8	Depletion					8	
9	Basis adjustments in determining gain or loss from sale or exchange of pre-1994 property					9	
10	**Adjusted current earnings.** Combine lines 1, 2c, 3f, 4f, and 5f through 9. Enter the result here and on line 4a of Form 4626					10	335,712,296

Domestic Production Activities Deduction

▶ Attach to your tax return. ▶ See separate instructions.

OMB No. 1545-1984

Attachment Sequence No. 143

Name(s) as shown on return	Identifying number
SCANA CORPORATION	57-0784499

Note. Do not complete column (a), unless you have oil-related production activities. Enter amounts for all activities in column (b), including oil-related production activities.		(a) Oil-related production activities	(b) All activities
1 Domestic production gross receipts (DPGR)	1		3,309,040,328
2 Allocable cost of goods sold. If you are using the small business simplified overall method, skip lines 2 and 3	2		2,927,379,858
3 Enter deductions and losses allocable to DPGR (see instructions)	3		8,230,446
4 If you are using the small business simplified overall method, enter the amount of cost of goods sold and other deductions or losses you ratably apportion to DPGR. All others, skip line 4	4		
5 Add lines 2 through 4	5		2,935,610,304
6 Subtract line 5 from line 1	6		373,430,024
7 Qualified production activities income from estates, trusts, and certain partnerships and S corporations (see instructions)	7		
8 Add lines 6 and 7. Estates and trusts, go to line 9, all others, skip line 9 and go to line 10	8	0	373,430,024
9 Amount allocated to beneficiaries of the estate or trust (see instructions)	9		
10a **Oil-related qualified production activities income.** Estates and trusts, subtract line 9, column (a), from line 8, column (a), all others, enter amount from line 8, column (a). If zero or less, enter -0- here.	10a	0	
b **Qualified production activities income.** Estates and trusts, subtract line 9, column (b), from line 8, column (b), all others, enter amount from line 8, column (b). If zero or less, enter -0- here, skip lines 11 through 21, and enter -0- on line 22	10b		373,430,024

11 Income limitation (see instructions): • Individuals, estates, and trusts. Enter your adjusted gross income figured without the domestic production activities deduction • All others. Enter your taxable income figured without the domestic production activities deduction (tax-exempt organizations, see instructions)	11	359,880,668
12 Enter the smaller of line 10b or line 11. If zero or less, enter -0- here, skip lines 13 through 21, and enter -0- on line 22	12	359,880,668
13 Enter 9% of line 12	13	32,389,260
14a Enter the smaller of line 10a or line 12 — 14a		
b Reduction for oil-related qualified production activities income. Multiply line 14a by 3%	14b	
15 Subtract line 14b from line 13	15	32,389,260
16 Form W-2 wages (see instructions)	16	856,826,997
17 Form W-2 wages from estates, trusts, and certain partnerships and S corporations (see instructions)	17	
18 Add lines 16 and 17. Estates and trusts, go to line 19, all others, skip line 19 and go to line 20	18	856,826,997
19 Amount allocated to beneficiaries of the estate or trust (see instructions)	19	
20 Estates and trusts, subtract line 19 from line 18, all others, enter amount from line 18	20	856,826,997
21 Form W-2 wage limitation. Enter 50% of line 20	21	428,413,499
22 Enter the smaller of line 15 or line 21.	22	32,389,260
23 Domestic production activities deduction from cooperatives. Enter deduction from Form 1099-PATR, box 6	23	
24 Expanded affiliated group allocation (see instructions)	24	
25 **Domestic production activities deduction.** Combine lines 22 through 24 and enter the result here and on Form 1040, line 35; Form 1120, line 25; or the applicable line of your return	25	32,389,260

c	Multiply line 4b by 75% (.75). Enter the result as a positive amount	4c	18,955,276		
d	Enter the excess, if any, of the corporation's total increases in AMTI from prior year ACE adjustments over its total reductions in AMTI from prior year ACE adjustments (see instructions). **Note:** *You* ***must*** *enter an amount on line 4d (even if line 4b is positive)*	4d	144,717,345		
e	ACE adjustment. • If line 4b is zero or more, enter the amount from line 4c • If line 4b is less than zero, enter the **smaller** of line 4c or line 4d as a negative amount			4e	18,955,276
5	Combine lines 3 and 4e. If zero or less, stop here; the corporation does not owe any AMT			5	739,014,055
6	Alternative tax net operating loss deduction (see instructions)			6	
7	**Alternative minimum taxable income.** Subtract line 6 from line 5. If the corporation held a residual interest in a REMIC, see instructions			7	739,014,055
8	**Exemption phase-out** (if line 7 is $310,000 or more, skip lines 8a and 8b and enter -0- on line 8c):				
a	Subtract $150,000 from line 7 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-	8a			
b	Multiply line 8a by 25% (.25)	8b			
c	Exemption. Subtract line 8b from $40,000 (if completing this line for a member of a controlled group, see instructions). If zero or less, enter -0-			8c	0
9	Subtract line 8c from line 7. If zero or less, enter -0-			9	739,014,055
10	Multiply line 9 by 20% (.20)			10	147,802,811
11	Alternative minimum tax foreign tax credit (AMTFTC) (see instructions)			11	
12	Tentative minimum tax. Subtract line 11 from line 10			12	147,802,811
13	Regular tax liability before applying all credits except the foreign tax credit			13	257,746,855
14	**Alternative minimum tax.** Subtract line 13 from line 12. If zero or less, enter -0-. Enter here and on Form 1120, Schedule J, line 3, or the appropriate line of the corporation's income tax return			14	0

Form **3800**

Department of the Treasury
Internal Revenue Service (99)

General Business Credit

▶ Information about Form 3800 and its separate instructions is at *www.irs.gov/form3800.*
▶ You must attach all pages of Form 3800, pages 1, 2, and 3, to your tax return.

OMB No. 1545-0895
2015
Attachment Sequence No. 22

Name(s) shown on return	Identifying number
SCANA CORPORATION	57-0784499

Part I Current Year Credit for Credits Not Allowed Against Tentative Minimum Tax (TMT)
(See instructions and complete Part(s) III before Parts I and II)

1	General business credit from line 2 of all Parts III with box A checked			1	14,703,607
2	Passive activity credits from line 2 of all Parts III with box B checked	2			
3	Enter the applicable passive activity credits allowed for 2015 (see instructions)			3	0
4	Carryforward of general business credit to 2015. Enter the amount from line 2 of Part III with box C checked. See instructions for statement to attach			4	
5	Carryback of general business credit from 2016. Enter the amount from line 2 of Part III with box D checked (see instructions)			5	28,148,334
6	Add lines 1, 3, 4, and 5			6	42,851,941

Part II Allowable Credit

7	Regular tax before credits: • Individuals. Enter the sum of the amounts from Form 1040, lines 44 and 46, or the sum of the amounts from Form 1040NR, lines 42 and 44 • Corporations. Enter the sum of the amounts from Form 1041, Schedule G, lines 1a and 1b; or the amount from the applicable line of your return			7	257,748,546
8	Alternative minimum tax: • Individuals. Enter the amount from Form 6251, line 35 • Corporations. Enter the amount from Form 4626, line 14 • Estates and trusts. Enter the amount from Schedule I (Form 1041), line 56			8	NONE
9	Add lines 7 and 8			9	257,748,546
10a	Foreign tax credit	10a	1,691		
b	Certain allowable credits (see instructions)	10b			
c	Add lines 10a and 10b			10c	1,691
11	**Net income tax.** Subtract line 10c from line 9. If zero, skip lines 12 through 15 and enter -0- on line 16			11	257,746,855
12	**Net regular tax.** Subtract line 10c from line 7. If zero or less, enter -0-	12	257,746,855		
13	Enter 25% (.25) of the excess, if any, of line 12 over $25,000 (see instructions)	13	64,430,464		
14	Tentative minimum tax: • Individuals. Enter the amount from Form 6251, line 33 • Corporations. Enter the amount from Form 4626, line 12 • Estates and trusts. Enter the amount from Schedule I (Form 1041), line 54	14	147,802,811		
15	Enter the greater of line 13 or line 14			15	147,802,811
16	Subtract line 15 from line 11. If zero or less, enter -0-			16	109,944,044
17	Enter the **smaller** of line 6 or line 16 **C corporations:** See the line 17 instructions if there has been an ownership change, acquisition, or reorganization.			17	42,851,941

SCANA CORPORATION 57-0784499

Part II **Allowable Credit** *(Continued)*

Note. If you are not required to report any amounts on lines 22 or 24 below, skip lines 18 through 25 and enter -0- on line 26.

18	Multiply line 14 by 75% (.75) (see instructions)	18	
19	Enter the greater of line 13 or line 18	19	
20	Subtract line 19 from line 11. If zero or less, enter -0-	20	0
21	Subtract line 17 from line 20. If zero or less, enter -0-	21	0
22	Combine the amounts from line 3 of all Parts III with box A, C, or D checked	22	0
23	Passive activity credit from line 3 of all Parts III with box B checked 23 0		
24	Enter the applicable passive activity credit allowed for 2015 (see instructions)	24	0
25	Add lines 22 and 24	25	0
26	Empowerment zone and renewal community employment credit allowed. Enter the smaller of line 21 or line 25	26	0
27	Subtract line 13 from line 11. If zero or less, enter -0-	27	193,316,391
28	Add lines 17 and 26	28	42,851,941
29	Subtract line 28 from line 27. If zero or less, enter -0-	29	150,464,450
30	Enter the general business credit from line 5 of all Parts III with box A checked	30	8,750,641
31	Reserved	31	
32	Passive activity credits from line 5 of all Parts III with box B checked 32 0		
33	Enter the applicable passive activity credits allowed for 2015 (see instructions)	33	0
34	Carryforward of business credit to 2015. Enter the amount from line 5 of Part III with box C checked and line 6 of Part III with box G checked. See instructions for statement to attach	34	0
35	Carryback of business credit from 2016. Enter the amount from line 5 of Part III with box D checked (see instructions)	35	8,254,946
36	Add lines 30, 33, 34, and 35	36	17,005,587
37	Enter the **smaller** of line 29 or line 36	37	17,005,587
38	**Credit allowed for the current year.** Add lines 28 and 37. Report the amount from line 38 (if smaller than the sum of Part I, line 6, and Part II, lines 25 and 36, see instructions) as indicated below or on the applicable line of your return: • Individuals. Form 1040, line 54, or Form 1040NR, line 51 • Corporations. Form 1120, Schedule J, Part I, line 5c • Estates and trusts. Form 1041, Schedule G, line 2b	38	59,857,528

CREDIT USAGE AND CARRYOVER (ROUND TO NEAREST DOLLAR) **SCHEDULE 9**

1. **Complete a separate schedule for each Credit Code.**
2. Total the amounts on Line 13 of each schedule and enter the total on the credit line of the return.
3. If there is a credit eligible for carryover to 2016, please complete a schedule even if the credit is not used in 2016.
4. See the tax booklet for a list of credit codes.
5. See the relevant forms, statutes, and regulations to determine how the credit is allocated to the owners, to determine when carryovers expire, and to see if the credit is limited to a certain percentage of tax.
6. If the credit for a particular credit code originated with more than one person or company, enter separate information on Lines 3 through 9 below.
7. The credit certificate number is issued by the Department of Revenue for credits that are preapproved. If applicable, please enter the Department of Revenue credit certificate number where indicated.
8. Before the Line 14 carryover is applied to the next year, the amount must be reduced by any amounts elected to be applied to withholding in 2016 and by any carryovers that have expired.

For the credit generated this year, list the Company Name, ID number, Credit Certificate number, if applicable, and % of credit (purchased credits and credits received from an assignment should also be included). If the credit originated with this taxpayer, enter this taxpayer's name and ID# below and 100% for the percentage.

1. Credit Type Code
2. Credit remaining from previous years (do not include amounts elected to be applied to withholding)
3. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

4. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

5. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

6. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

7. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

8. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

9. Company Name | ID Number

Credit Certificate # | % of Credit | Credit Generated in 2016

10. Total available credit for 2016 (sum of Lines 2 through 9) 10.
11. Enter the amount assigned to affiliated entities (See Schedule 10) 11.
12. Enter the amount of the credit sold (Conservation and Film Tax Credits) 12.
13. Credit Used in 2016 13.
14. Potential carryover to 2017 (Line 10 less Lines 11,12, and 13) 14.

ASSIGNED TAX CREDITS (ROUND TO NEAREST DOLLAR) **SCHEDULE 10**

Georgia Code Section 48-7-42 provides that in lieu of claiming any Georgia income tax credit for which a taxpayer otherwise is eligible for the taxable year, the taxpayer may elect to assign credits in whole or in part to one or more "affiliated entities". The term "affiliated entities" is defined as:

1) A corporation that is a member of the taxpayer's affiliated group within the meaning of Section 1504(a) of the Internal Revenue Code; or
2) An entity affiliated with a corporation, business, partnership, or limited liability company taxpayer, which entity:
   (a) Owns or leases the land on which a project is constructed;
   (b) Provides capital for construction of the project; and
   (c) Is the grantor or owner under a management agreement with a managing company for the project.

No carryover attributable to the unused portion of any previously claimed or assigned credit may be assigned or reassigned, except if the assignor and the recipient of an assigned tax credit cease to be affiliated entities, then any carryover attributable to the unused portion of the credit is transferred back to the assignor of the credit. The assignor is permitted to use any such carryover and also shall be permitted to assign the carryover to one or more affiliated entities, as if such carryover were an income tax credit for which the assignor became eligible in the taxable year in which the carryover was transferred back to the assignor. In the case of any credit that must be claimed in installments in more than one taxable year, the election under this subsection may be made on an annual basis with respect to each such installment. For additional information, please refer to Georgia Code Section 48-7-42.

If the corporation filing this return is assigning tax credits to other affiliates, please provide detail below specifying where the tax credits are being assigned.

All assignments of credits must be made before the statutory due date (including extensions) per O.C.G.A. § 48-7-42 (b).

	Credit Code	Corporation Name	FEIN		Amount of Credit	Credit Certificate # (if applicable)

3.						
4.						
5.						
6.						
7.						
8.						
9.						
10.						
11.						
12.						
13.						
14.						
15.						
16.						
17.						
18.						
19.						
20.						

1. NOL Carry Forward Available to Current Year (Enter on Schedule 1, Line 6 or Schedule 7, Line 8)
2. Current Year Income / (Loss)
3. NOL Carry Forward Available to Next Year (Subtract Line 2 from Line 1)

INSTRUCTIONS

Column A: List the loss year(s).

Column B: List the loss amount for the tax year listed in Column A.

Columns C & D: List the years in which the losses were utilized and the amount utilized each year.

Column E: List the balance of the NOL after each year has been applied.

Column F: List the remaining NOL applicable to each loss year.

Total the remaining NOL (Col. F) and enter in the space at the bottom of the worksheet for "NOL Carry Forward Available to Current Year". Then insert "Current Year Income / (Loss)" in the space provided and compute the "NOL Carry Forward Available to Next Year" in the last space. **DO NOT check the box for IT-552 on the return if Schedule 11 is used.** Create photocopies as needed. See example worksheet in 611 instructions.

STATE OF GEORGIA

SOUTH CAROLINA ELECTRIC AND GAS CO	220 OPERATION WAY CAYCE SC 29033
Taxpayer Name	Taxpayer Address
57-0248695	01/01/2016 TO 12/31/2016
Federal Identification Number	Taxable Year (Beginning & End)

Note: Regulation 560-7-3-.05(2) requires that the taxpayer add back related member costs to income *prior* to claiming any exception to the addback.

B. Addback

1. Related member intangible expenses and costs, and interest expenses and costs required to be added back pursuant to Code § 48-7-28.3 and Regulation 560-7-3-.05. Enter amount here and on the applicable line of the tax return in the Georgia "additions to federal taxable income" section. — 1. 6,296,983.

C. Exception for Income Allocated or Apportioned to and Taxed by Georgia or Another State. (For additional information, please see subsection (d) of Code § 48-7-28.3 and paragraph (5) of Regulation 560-7-3-.05).

Attach a separate schedule for each related member. See Statement 2

1. Name of the related member. — 1. SCANA CORPORATION
2. Federal Identification Number of the related member. — 2. 57-0784489
3. Amount of the related member costs taxpayer paid directly or indirectly to such related member. — 3. 5,986,021.
4. Name of each state to whom net income tax was paid by the related member on a tax base which included the related member costs. Do not include jurisdictions in which the related member costs are subject to elimination.

a	b	c	d
S. CAROLINA			

(Attach a schedule if there are more than four states with respect to questions 4 through 9).

5. Enter type of tax paid in each state by the related member.

a	b	c	d
INCOME			

6. Amount of the related member costs paid by the taxpayer and reported by the related member as income subject to allocation and/or apportionment in each respective state.

a	b	c	d
5,986,021.			

7. Apportionment ratio (to six decimals) in each respective state applicable to the amount in line 6. If the related member cost reported to a respective state was allocated in full to that state, enter "1" for that state.

a	b	c	d
1.000000			

8. Multiply the amounts in line 6 by the factors in the corresponding boxes of line 7 and enter the result in the corresponding boxes below.

a	b	c	d
5,986,021.			

9. Total amount eligible for this exception. Add lines 8a through 8d. 9. 5,986,021.

Please see examples in Regulation 560-7-3-.05(5) for further guidance on the above calculations.

10. Provide a brief description of the arm's length status of the transactions between the taxpayer and the related member. Please see subparagraph (5)(d)5. of Regulation 560-7-3-.05 for specific information that should be included:

THE PARTIES ESTABLISHED A MONEY POOL TO COORDINATE AND PROVIDE FOR CERTAIN OF THEIR SHORT-TERM CASH AND WORKING CAPITAL REQUIREMENTS. INTEREST IS CHARGED DAILY BASED ON HIGH GRADE UNSECURED 30 DAY COMMERCIAL PAPER AS QUOTED IN THE WSJ.

D. **Exception for Expenses Paid, Accrued, or Incurred to a Related Member Domiciled in a Foreign Nation.** (For additional information, please see subsection (e) of Code § 48-7-28.3 and paragraph (6) of Regulation 560-7-3-.05).

Attach a separate schedule for each related member.

1. Name of the related member. 1. ________

2. Federal Identification Number of the related member. 2. ________

3. Country of domicile of the related member. 3. ________

4. Provide a description of the comprehensive income tax treaty:

5. Provide a description of the business purpose of the transactions between the taxpayer and the related member. Please see subparagraph (6)(b)5. of Regulation 560-7-3-.05 for the specific information that should be included:

6. Provide a brief description of the arm's length status of the transactions between the taxpayer and the related member. Please see subparagraph (5)(d)5. of Regulation 560-7-3-.05 for specific information that should be included:

7. Amount of the related member costs paid to such related member. (Amount eligible for this exception). 7. ________

E. Exception for Expenses Paid, Accrued, or Incurred to a Related Member Who Paid, Accrued, or Incurred Expenses to a Person Who is Not a Related Member. (For additional information, please see subsection (f) of Code §48-7-28.3 and paragraph (7) of Regulation 560-7-3-.05).

Attach a separate schedule for each related member.

1. Name of the related member. 1.

2. Federal Identification Number of the related member. 2.

3. Name of the unrelated party to whom the costs were paid. 3.

4. Federal Identification Number of such unrelated party. 4.

5. Provide a description of the business purpose of the transactions between the taxpayer and the related member. Please see subparagraph (7)(b)2. of Regulation 560-7-3-.05 for the specific information that should be included:

6. Provide a description of the business purpose of the transactions between the related member and the unrelated party. Please see subparagraph (7)(b)2. of Regulation 560-7-3-.05 for the specific information that should be included:

7. Portion of the related member costs paid by such related member to the unrelated party. (Amount eligible for this exception). 7.

F. Total Amount Eligible for Exception:

Add Line 9 of Section C, Line 7 of Section D, and Line 7 of Section E. Include the amounts from the same lines of any separate schedules attached. Enter the total amount here and on the applicable line of the tax return in the Georgia subtractions from income section. The sum total of all exceptions reported on the tax return pursuant to Form IT-Addback, including any additional schedules, cannot be greater than the amount on Line 1 of Section B. 6,296,983.

Section C--Questions for Employers Who Provide Vehicles for Use by Their Employees

Answer these questions to determine if you meet an exception to completing Section B for vehicles used by employees who are not more than 5% owners or related persons.

		Yes	No
37	Do you maintain a written policy statement that prohibits all personal use of vehicles, including commuting, by your employees?		
38	Do you maintain a written policy statement that prohibits personal use of vehicles, except commuting, by your employees? See IRS instructions for vehicles used by corporate officers, directors, or 1% or more owners		
39	Do you treat all use of vehicles by employees as personal use?		
40	Do you provide more than five vehicles to your employees, obtain information from your employees about the use of the vehicles, and retain the information received?		
41	Do you meet the requirements concerning qualified automobile demonstration use?		

Note: *If your answer to 37, 38, 39, 40, or 41 is "Yes," do not complete Section B for the covered vehicles.*

IA Corporation Schedule D - Non Business Income

https //tax iowa gov

If all corporate business is conducted within Iowa, do not complete Schedule D.
The classification of income by the labels customarily given them, such as interest, dividends, rents, and royalties, is of no aid in determining whether that income is business or nonbusiness income Please provide all documentation to the Department showing why the income must be allocated as nonbusiness income

Instructions When referring to the columns designated below, enter the amounts on lines 1 through 8 if the corporation's commercial domicile is Iowa Enter amounts on lines 9 through 16 if the corporation's commercial domicile is outside Iowa However, rent, royalty, and capital or ordinary gain income from real or tangible personal property is allocated to the situs of the property producing the income Also, see Iowa Admin Code r 701- 54 2(3) for attribution of income from intangibles

Column A Gross Income: Enter the amount of income on the appropriate line. If an entry is made on line 6 or 14, please include federal Schedule D If an entry is made on line 1, do not include any amounts previously deducted on line 13 of Iowa Schedule A relating to foreign dividends

Column B Related Expense: Enter directly-related expenses and indirectly-related interest expenses on the appropriate line Include detailed schedules showing the computation of the related expense

Column C Subtotal: Subtract column B from column A and enter the difference

Column D 50% of Applicable Federal Income Tax: Enter 50% of the applicable federal income tax. Do not enter negative amounts The effective tax rate equals line 5 divided by line 1 of form IA 1120 Multiply column C by this tax rate to determine the entry for column D The total amount is limited to the federal tax deduction shown on line 5, IA 1120

Column E Net Income: Subtract column D from column C and enter the difference

Allocated Within Iowa

Type of Income	A Gross Income	B Related Expenses	C Subtotal	D 50% of Applicable Federal Income Tax	E Net Income
1 Net Dividend See Instructions					
2 Exempt Interest and Dividends					
3 Other Interest

Tax Period Ending Date Start with the tax period that you first made an adjustment for bonus depreciation on the Iowa return Continue entering each subsequent tax period up to, and including, the current period

IA 4562A Adjustment. Enter the amount added/deducted on the Iowa return for each tax period This should be the amount entered in Part III, line 5 of the IA 4562A Enter negative numbers in parenthesis Place an asterisk (*) after the tax period if the IA 4562A adjustment was changed from the amount originally claimed You must provide copies of the prior tax periods' IA 4562As if requested by the Department Failure to provide copies of the prior tax periods' IA 4562As will delay the processing of your return or cause the denial of your adjustment Do not send copies of the asset listings that are required with the IA 4562A

Balance The balance amount for the first tax period should be the same as the amount of the adjustment For each subsequent tax period, the balance amount should be changed by the amount of that tax period's IA 4562A adjustment

Include this form with your IA tax return

Do not file paper copies. This form is to be maintained by ERO.
For calendar year 2016, or tax year beginning ____________, 2016, ending ____________, 2017

PLEASE PRINT OR TYPE.

Name of Corporation			
SOUTH CAROLINA ELECTRIC and GAS COMPANY			
Louisiana Revenue Account Number: 5556337-001	Federal Employer Identification Number *(FEIN)*: 57-0248695		
Street Address of Corporation: 220 OPERATION WAY	City: CAYCE	State: SC	ZIP: 29033-3701

Part 1 - Tax Return Information (whole dollars only)

1	Income & Franchise tax due after Priority 1 Credits *(Form CIFT-620, Line 10, the sum of both columns 1 and 2)*	1	2,754. .00
2	Refund *(Form CIFT-620, Line 29, column 3)*	2	239,563. .00
3	Total amount due *(Form CIFT-620, Line 26, column 3)*	3	.00
4	Amount of payment remitted electronically	4	.00

Part II - Declaration of Officer (Sign only after Part I is completed.)

Under penalties of perjury, I declare that I am an officer of the above corporation and that the information that I have given my electronic return originator (ERO), transmitter, and/or intermediate service provider (ISP) and the amounts in Part 1 above agree with the amounts on the corresponding lines of the Louisiana 2016 Income/2017 Franchise tax return. To the best of my knowledge and belief, the corporation's return is true, correct, and complete. I consent to my ERO, transmitter, and/or ISP sending the corporation's return, this declaration, accompanying schedules, and statements to the Louisiana Department of Revenue. I also consent to the Louisiana Department of Revenue sending my ERO, transmitter, and/or ISP an acknowledgment of receipt of transmission and an indication of whether or not the corporation's return is accepted, and, if rejected, the reason(s) for the rejection.

☐ I authorize a representative of the Louisiana Department of Revenue to discuss my return and attachments with my preparer.

Signature of Officer	Date *(mm/dd/yyyy)*	Title

Part III - Declaration of Electronic Return Originator (ERO) and Paid Preparer

I declare that I have reviewed the above corporation's return and that the entries on LA8453-C are complete and correct to the best of my knowledge. If I am only a collector, I am not responsible for reviewing the return and only declare that this form accurately reflects the data on the return. The corporate office will have signed this form before I submit the return. I will give the officer a copy of all forms and information to be filed with the Louisiana Department of Revenue, and have followed all other requirements in Pub. 3112, IRS E-file Application and Participation, and Pub. 4163, Modernized E-File Information for Authorized IRS E-Providers. If I am also the Paid Preparer, under penalties of perjury I declare that I have examined the above corporation's return and accompanying schedules and statements, and to the best of my knowledge and belief, they are true, correct, and complete. This Paid Preparer declaration is based on all information of which I have any knowledge.

		%				S/L -		
		%				S/L -		
28 Add amounts in column (h), lines 25 through 27. Enter here and on line 21, page 1						28		
29 Add amounts in column (i), line 26. Enter here and on line 7, page 1							29	

Section B - Information on Use of Vehicles

Complete this section for vehicles used by a sole proprietor, partner, or other "more than 5% owner," or related person. If you provided vehicles to your employees, first answer the questions in Section C to see if you meet an exception to completing this section for those vehicles.

	(a) Vehicle 1		(b) Vehicle 2		(c) Vehicle 3		(d) Vehicle 4		(e) Vehicle 5		(f) Vehicle 6	
30 Total business/investment miles driven during the year (don't include commuting miles)												
31 Total commuting miles driven during the year												
32 Total other personal (noncommuting) miles driven												
33 Total miles driven during the year. Add lines 30 through 32												
	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No
34 Was the vehicle available for personal use during off-duty hours?												
35 Was the vehicle used primarily by a more than 5% owner or related person?												
36 Is another vehicle available for personal use?												

Section C - Questions for Employers Who Provide Vehicles for Use by Their Employees

Answer these questions to determine if you meet an exception to completing Section B for vehicles used by employees who aren't more than 5% owners or related persons (see instructions).

	Yes	No
37 Do you maintain a written policy statement that prohibits all personal use of vehicles, including commuting, by your employees?		
38 Do you maintain a written policy statement that prohibits personal use of vehicles, except commuting, by your employees? See the instructions for vehicles used by corporate officers, directors, or 1% or more owners		
39 Do you treat all use of vehicles by employees as personal use?		
40 Do you provide more than five vehicles to your employees, obtain information from your employees about the use of the vehicles, and retain the information received?		
41 Do you meet the requirements concerning qualified automobile demonstration use? (See instructions.)		

Note: If your answer to 37, 38, 39, 40, or 41 is "Yes," don't complete Section B for the covered vehicles.

Part VI **Amortization**

(a) Description of costs	(b) Date amortization begins	(c) Amortizable amount	(d) Code section	(e) Amortization period or percentage	(f) Amortization for this year
42 Amortization of costs that begins during your 2016 tax year (see instructions):					
				Total	1,344,971.
43 Amortization of costs that began before your 2016 tax year				43	6,771,800.
44 Total. Add amounts in column (f). See the instructions for where to report				44	8,116,771.

Application for Corporate Income Tax Extension

North Carolina Department of Revenue

North Carolina law provides for an extension of time to file a North Carolina corporate tax return (Form CD-405, CD-401S, or CD-418) When timely filed, Form CD-419 extends the due date of the return by six months An extension of time to file the return does not extend the time to pay the amount of tax due If the taxpayer does not pay the full amount of tax due by the original due date of the return, interest and penalties will be assessed North Carolina does not accept the federal extension in lieu of Form CD-419 (Note For North Carolina income tax purposes, an income year that ends on any day other than the last day of the month is considered to end on the last day of the month nearest to the last day of the actual income year)

To obtain an extension and pay any tax due, a taxpayer must file Form CD-419 by the original due date of the corporate tax return A taxpayer can use the Department's website or the personalized coupon below The Department's website offers two electronic options (1) an online filing and payment system, and (2) an eFile program For more information, visit www dornc com and search for online file and pay

The Department strongly encourages taxpayers to file and pay electronically Please note, however, that the Department's eFile program **DOES NOT** permit the electronic filing of the "North Carolina Annual Report for Business Corporations" (Form CD-479) Therefore, if a corporation e-files its corporate tax return, the annual report must be filed either (1) online directly with the NC Secretary of State http //www sosnc gov/Corporations/arentry aspx, or (2) in paper form with the Department of Revenue If the corporation chooses to file the annual report in paper form with the Department, include the annual report fee ($25 00) with the corporation's expected income tax liability (See Line 4)

IMPORTANT. Attaching the annual report to an electronically filed tax return does not constitute filing the annual report Failure to timely file the annual report with the NC Secretary of State may result in a corporate administrative dissolution under G S 55-14-20 or revocation under G S 55-15-30

SCHEDULE I

State of New Jersey
Division of Taxation

CERTIFICATION OF INACTIVITY

For the period beginning 01/01 , 2016 and ending 12/31 , 2016

Corporation Name	Federal ID Number
SOUTH CAROLINA ELECTRIC AND GAS COMPANY	570-248-695/000

(NOTE: Attach this schedule to the taxpayer's CBT-100 or CBT-100S, whichever is applicable)

I certify that during the period covered by the attached tax return, the above named taxpayer had no business activities, no income, no assets, and additionally, in the case of a New Jersey S Corporation, made no distributions, and did not have any change in ownership.

Signature of Corporate Officer	Title	Date
	CONTROLLER	10/11/2017

INSTRUCTIONS

In lieu of completing the entire CBT-100 or CBT-100S tax return, an inactive corporation may complete this schedule and one of the following: pages 1 through 4 of the CBT-100 or pages 1 through 5 of the CBT-100S in order to fulfill its filing obligations with the State of New Jersey. Note: If using third party software the Taxpayer Information and Return Summary page must also be included. An inactive corporation is a corporation that, during the entire period covered by the tax return, did not conduct any business, did not have any income, receipts, or expenses, did not own any assets, and additionally, for New Jersey S corporations, did not make any distributions, and did not have any change in ownership.

This schedule and the applicable pages from the Corporation Business Tax Return must be filed annually by the taxpayer. The minimum tax liability and installment payment (if applicable) must be reported on page 1 of the Corporation Business Tax Return. If a balance due exists, taxpayers must submit payment with the appropriate Corporation Business Tax Payment Voucher, either CBT-100-V or CBT-100S-V.

Schedule I and page 1 of the Corporation Business Tax Return must be signed by an officer of the corporation who is authorized to attest to the truth of the statements contained therein.

Content of Form CT-3

567001161062

6D3511 1.000

Part 1 – General corporate information

Section A – Qualification for preferential tax rates

If you are a corporation as identified in this section and qualify for preferential tax rates, mark an *X* in the boxes that apply to you *(see instructions)*.

1 A qualified emerging technology company (QETC) for purposes of the lower tax rates, capital base tax cap, and fixed dollar minimum tax amounts • 1 ☐

2 A qualified New York manufacturer based on the principally engaged test for purposes of the lower business income base tax rate and fixed dollar minimum tax amounts • 2 ☐

3 A qualified New York manufacturer based on the principally engaged test for purposes of the lower capital base tax rate and capital base tax cap • 3 ☐

4 A qualified New York manufacturer based on the significant employment and property test for purposes of the lower tax rates, capital base tax cap, and fixed dollar minimum tax amounts • 4 ☐

5 Claiming cooperative housing corporation status for the lower capital base tax rate • 5 ☐

6 A small business eligible for the capital base tax exception • 6 ☐

If you marked this box, complete line 6a; also mark the box at line 6b or 6c, if applicable.

6a Total capital contributions • 6a

6b Small business taxpayers only: you are also a QETC • 6b ☐

6c Small business taxpayers only: you are also a qualified New York manufacturer • 6c ☐

7 A qualified entity of a New York State innovation hot spot that operates solely within such New York State innovation hot spot, and you have elected to be subject only to the fixed dollar minimum tax base • 7 ☐

Section B – New York State information *(see instructions)*

1 Number of New York State employees • 1

2 Wages paid to New York State employees • 2

3 Number of business establishments in New York State • 3

4 If you have an interest in, or have rented, real property in New York State, mark an *X* in the box and complete lines 4a and 4b *(if multiple counties see instructions)* • 4 ☐

4a The real property's county • 4a

4b The real property's value or rent • 4b

5 If you are claiming an exception to the related member expense addback under Tax Law §208.9(o)(2)(B), mark an *X* in the box • 5 ☐

5a If you marked the line 5 box, use line 5a to report the applicable exception number (1-4) and the amount of royalty payments. 5a • Number • Amount

6 If you are not protected by Public Law 86-272 and are subject to tax **solely** as a result of deriving receipts in New York State, mark an *X* in the box • 6 ☐

Section C – Filing information

1 **Federal return filed** – you must mark an *X* in one box and attach a complete copy of your federal return

1120 • ☐ 1120 consolidated • ☒ 1120-REIT or 1120-RIC ☐ 1120S • ☐ 1120F • ☐ 1120-H ☐

2 **Amended return** – If you marked the amended return box on page 1, then for any item(s) that apply, mark an *X* in the box and attach documentation: Failure to meet investment capital holding period • ☐

Final federal determination • ☐ • Date of determination ____ NOL carryback • ☐ Capital loss carryback • ☐ 1139 • ☐ 1120X • ☐

2a Enter the tax due amount from your most recently filed New York State return for this tax period • 2a

3 **Required attachments** – For all forms, other than tax credit claim forms, that are attached to this return, mark an *X* in the applicable box(es)

CT-3.1 • ☐ CT-3.2 • ☐ CT-3.3 • ☐ CT-3.4 • ☐ CT-60 • ☐ CT-225 • ☐ Other *(identify)*: ________ • ☐

4 If you are claiming tax credits, enter the number of tax credit forms attached to this return. Where multiple forms are filed for the same credit, count **each** form filed • 4

5 If you filed federal Form 1120F and you have effectively connected income (ECI), mark an *X* in the box • 5 ☐

567002161062

Part 2 – Computation of balance due or overpayment

Largest of three tax bases, minus credits

Line	Description	Box	Amount	Box	Amount
1a	Business income base tax *(from Part 3, line 20)*	1a	NONE		
1b	Capital base tax *(from Part 4, line 15; see instructions)*	1b	NONE

PART I TAX REPORT INFORMATION (Whole dollars only.)

1. Income or Loss from Federal Return on a Separate Company Basis (From RCT-101, Section B, Line 1)	1.	-27,000,062.
2. PA Taxable Income or Loss (From RCT-101, Section B, Line 12)	2.	NONE
3. PA Corporate Net Income Tax (From RCT-101, Section B, Line 13)	3.	NONE

PART II DECLARATION OF OFFICER (See instructions.) **Keep a copy of the corporation's tax report, RCT-101.**

4a. ☐ I consent that the corporation's refund check can be mailed directly to the address provided on the RCT-101.

4b. ☐ I do not want a refund mailed to the corporation, or the corporation is not receiving a refund.

4c. ☐ I authorize (1) the PA Department of Revenue and its designated financial institution to initiate an electronic funds withdrawal entry to my financial institution account designated in the electronic portion of my 2016 Pennsylvania Corporate Net Income Tax Report for payment of my state taxes owed; and (2) my financial institution to debit the entry to my account. I also authorize the financial institutions involved in the processing of my electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to my payment. I can revoke this authorization by notifying the PA Department of Revenue no later than two business days prior to the payment date. I understand notification must be made by calling 717-783-6277.

If I filed a balance-due report, I understand if the PA Department of Revenue does not receive full and timely payment of my tax liability, I remain liable for the tax due and all applicable interest and penalties. If I filed a joint federal and state tax return/report and there is an error on my federal return, I understand my state report will be rejected.

Under penalties of perjury, I declare I am an officer of the above-named corporation and the information I provided to my electronic return originator (ERO) and/or transmitter and the amounts in Part I above agree with the amounts on the corresponding lines of the corporation's 2016 Pennsylvania Corporate Net Income Tax Report. To the best of my knowledge and belief, the corporation's report is true, correct and complete. I consent to my ERO and/or transmitter sending the corporation's report and accompanying schedules and statements to the Internal Revenue Service (IRS) and subsequently by the IRS to the PA Department of Revenue. I also consent to the PA Department of Revenue sending my ERO and/or transmitter, through the IRS, an acknowledgment of receipt of transmission, an indication of whether or not the corporation's report is accepted and, if rejected, the reason(s) for rejection.

PART III DECLARATION OF ELECTRONIC RETURN ORIGINATOR (ERO) AND PAID PREPARER (See instructions.)

I declare I have reviewed the above-named corporation's report, and the entries on Form PA 8453-C are complete and correct to the best of my knowledge and belief. I obtained the corporate officer's signature on this form before submitting the report to the PA Department of Revenue, provided the corporate officer a copy of all forms and information to be filed with the PA Department of Revenue and followed all other requirements specified by the PA Department of Revenue and in IRS Pub. 3112, IRS e-file Application and Participation, and Pub. 4163, Modernized e-File (MeF) Information for Authorized IRS e-file Providers of forms 1120/1120S. If I am also the preparer, under penalties of perjury, I declare I examined the above-named corporation's report, accompanying schedules and statements, and to the best of my knowledge and belief they are true, correct and complete. I understand I am required to keep this form and the supporting documents for three years.

ERO's USE ONLY	ERO's Signature ▶	Date	Check if also paid preparer ☒	Check if self-employed ☐	ERO's SSN or PTIN
	Firm's name (or yours if self-employed), address and ZIP code ▶				EIN
				Telephone Number	

Under penalties of perjury, I declare I examined the above-named corporation's report, accompanying schedules and statements, and to the best of my knowledge and belief they are true, correct and complete.

PAID PREPARER'S USE ONLY	Preparer's Signature ▶	Date	Check if self-employed ☐	Preparer's SSN or PTIN
	Firm's name (or yours if self-employed), address and ZIP code ▶		Telephone Number	

Electronic Return Originators (EROs) and paid preparers must retain this form and supporting documents for three years.

DO NOT SUBMIT THIS FORM TO THE PA DEPARTMENT OF REVENUE UNLESS REQUESTED TO DO SO.

I affirm under penalties prescribed by law, this report, including any accompanying schedules and statements, has been examined by me and to the best of my knowledge and belief is a true, correct and complete report. If this report is an amended report, the taxpayer hereby consents to the extension of the assessment period for this tax year to one year from the date of filing of this amended report or three years from the filing of the original report, whichever period last expires, and agrees to retain all required records pertaining to that tax and tax period until the end of the extended assessment period, regardless of any statutory provision providing for a shorter period of retention. For purposes of this extension, an original report filed before the due date is deemed filed on the due date. I am authorized to execute this consent to the extension of the assessment period.

		Yes	No
5	At the end of the tax year, did the corporation:		
a	Own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of stock entitled to vote of any foreign or domestic corporation not included on **Form 851**, Affiliations Schedule? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below.		X

(i) Name of Corporation	(ii) Employer Identification Number (if any)	(iii) Country of Incorporation	(iv) Percentage Owned in Voting Stock

		Yes	No
b	Own directly an interest of 20% or more, or own, directly or indirectly, an interest of 50% or more in any foreign or domestic partnership (including an entity treated as a partnership) or in the beneficial interest of a trust? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below.	X	

(i) Name of Entity	(ii) Employer Identification Number (if any)	(iii) Country of Organization	(iv) Maximum Percentage Owned in Profit, Loss, or Capital

		Yes	No
6	During this tax year, did the corporation pay dividends (other than stock dividends and distributions in exchange for stock) in excess of the corporation's current and accumulated earnings and profits? See sections 301 and 316. If "Yes," file **Form 5452**, Corporate Report of Nondividend Distributions. If this is a consolidated return, answer here for the parent corporation and on Form 851 for each subsidiary.		X
7	At any time during the tax year, did one foreign person own, directly or indirectly, at least 25% of (a) the total voting power of all classes of the corporation's stock entitled to vote or (b) the total value of all classes of the corporation's stock? For rules of attribution, see section 318. If "Yes," enter: (i) Percentage owned ▶ ______ and (ii) Owner's country ▶ ______ (c) The corporation may have to file **Form 5472**, Information Return of a 25% Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business. Enter the number of Forms 5472 attached ▶ ______		X
8	Check this box if the corporation issued publicly offered debt instruments with original issue discount ▶ ☐ If checked, the corporation may have to file **Form 8281**, Information Return for Publicly Offered Original Issue Discount Instruments.		
9	Enter the amount of tax-exempt interest received or accrued during the tax year ▶ $ ______		
10	Enter the number of shareholders at the end of the tax year (if 100 or fewer) ▶ ______		
11	If the corporation has an NOL for the tax year and is electing to forego the carryback period, check here ▶ ☐ If the corporation is filing a consolidated return, the statement required by Regulations section 1.1502-21(b)(3) must be attached or the election won't be valid.		
12	Enter the available NOL carryover from prior tax years (don't reduce it by any deduction on line 29a.) ▶ $ ______		
13	Are the corporation's total receipts (page 1, line 1a, plus lines 4 through 10) for the tax year and its total assets at the end of the tax year less than $250,000? If "Yes," the corporation isn't required to complete Schedules L, M-1, and M-2. Instead, enter the total amount of cash distributions and the book value of property distributions (other than cash) made during the tax year ▶ $ ______		X
14	Is the corporation required to file Schedule UTP (Form 1120), Uncertain Tax Position Statement? See instructions. If "Yes," complete and attach Schedule UTP.	X	
15a	Did the corporation make any payments in 2016 that would require it to file Form(s) 1099?	X	
b	If "Yes," did or will the corporation file required Forms 1099?	X	
16	During this tax year, did the corporation have an 80% or more change in ownership, including a change due to redemption of its own stock?		X
17	During or subsequent to this tax year, but before the filing of this return, did the corporation dispose of more than 65% (by value) of its assets in a taxable, non-taxable, or tax deferred transaction?		X
18	Did the corporation receive assets in a section 351 transfer in which any of the transferred assets had a fair market basis or fair market value of more than $1 million?		X
19	During the corporation's tax year, did the corporation make any payments that would require it to file Forms 1042 and 1042-S under chapter 3 (sections 1441 through 1464) or chapter 4 (sections 1471 through 1474) of the Code?	X	

SCANA CORPORATION 57-0784499

SCHEDULE M-3 (Form 1120)
Department of the Treasury
Internal Revenue Service

Net Income (Loss) Reconciliation for Corporations With Total Assets of $10 Million or More

▶ Attach to Form 1120 or 1120-C. ▶ Information about Schedule M-3 (Form 1120) and its separate instructions is available at *www.irs.gov/form1120*.

OMB No. 1545-0123
2016

Name of corporation (common parent, if consolidated return): SCANA CORPORATION
Employer identification number: 57-0784499

Check applicable box(es): (1) [ ] Non-consolidated return (2) [X] Consolidated return (Form 1120 only)
(3) [ ] Mixed 1120/L/PC group (4) [ ] Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
[X] Yes. Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
[ ] No. Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.

b Did the corporation prepare a certified audited non-tax-basis income statement for that period?
[ ] Yes. *Skip line 1c and complete lines 2a through 11 with respect to that income statement.*
[ ] No. Go to line 1c.

c Did the corporation prepare a non-tax-basis income statement for that period?
[ ] Yes. Complete lines 2a through 11 with respect to that income statement.
[ ] No. Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.

2 a Enter the income statement period: Beginning 01/01/2016 Ending 12/31/2016

b Has the corporation's income statement been restated for the income statement period on line 2a?
[ ] Yes. (If "Yes," attach an explanation and the amount of each item restated.)
[X] No.

c Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
[ ] Yes. (If "Yes," attach an explanation and the amount of each item restated.)
[X] No.

3 a Is any of the corporation's voting common stock publicly traded?
[X] Yes.
[ ] No. If "No," go to line 4a.

b Enter the symbol of the corporation's primary U.S. publicly traded voting common stock: SCG

c Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock: 80589M102

4 a	Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1	4a	594,849,551.
b	Indicate accounting standard used for line 4a (see instructions): (1) [X] GAAP (2) [ ] IFRS (3) [ ] Statutory (4) [ ] Tax-basis (5) [ ] Other (specify)		
5 a	Net income from nonincludible foreign entities (attach statement)	5a	( )
b	Net loss from nonincludible foreign entities (attach statement and enter as a positive amount)	5b	
6 a	Net income from nonincludible U.S. entities (attach statement)	6a	( )
b	Net loss from nonincludible U.S. entities (attach statement and enter as a positive amount)	6b	
7 a	Net income (loss) of other includible foreign disregarded entities (attach statement)	7a	
b	Net income (loss) of other includible U.S. disregarded entities (attach statement)	7b	
c	Net income (loss) of other includible entities (attach statement)	7c	
8	Adjustment to eliminations of transactions between includible entities and nonincludible entities (attach statement)	8	
9	Adjustment to reconcile income statement period to tax year (attach statement)	9	
10 a	Intercompany dividend adjustments to reconcile to line 11 (attach statement)	10a	
b	Other statutory accounting adjustments to reconcile to line 11 (attach statement)	10b	
c	Other adjustments to reconcile to amount on line 11 (attach statement)	10c	
11	**Net income (loss) per income statement of includible corporations.** Combine lines 4 through 10	11	594,849,551.

Note. Part I, line 11, must equal Part II, line 30, column (a) or Schedule M-1, line 1 (see instructions).

12 Enter the total amount (not just the corporation's share) of the assets and liabilities of all entities included or removed on the following lines.

	Total Assets	Total Liabilities
a Included on Part I, line 4 ▶	18,706,879,069.	12,981,847,72[illegible].
b Removed on Part I, line 5 ▶		
c Removed on Part I, line 6 ▶		
d Included on Part I, line 7 ▶

Part III Changes in Stock Holdings During the Tax Year

Corp. No.	Name of corporation	Share-holder of Corpora-tion No.	Date of transaction	(a) Changes: Number of shares acquired	(a) Changes: Number of shares disposed of	(b) Shares held after changes described in column (a): Percentage of voting power	(b) Percentage of value
8	SERVICECARE INC	1	12/20/2016		1,000	%	%
						%	%
						%	%
						%	%
						%	%
						%	%
						%	%
						%	%

(c) If any transaction listed above caused a transfer of a share of subsidiary stock (defined to include dispositions and deconsolidations), did the share's basis exceed its value at the time of the transfer? See instructions . . . . ☐ Yes ☒ No

(d) Did any share of subsidiary stock become worthless within the meaning of section 165 (taking into account the provisions of Regulations section 1.1502-80(c)) during the taxable year? See instructions . . . . . . ☐ Yes ☒ No

(e) If the equitable owners of any capital stock shown above were other than the holders of record, provide details of the changes.

(f) If additional stock was issued, or if any stock was retired during the year, list the dates and amounts of these transactions.

Form 851 (Rev. 10-2016) Page 3

Part IV **Additional Stock Information** (see instructions)

1 During the tax year, did the corporation have more than one class of stock outstanding? . . . . [X] Yes [ ] No

If "Yes," enter the name of the corporation and list and describe each class of stock.

Corp. No.	Name of corporation	Class of stock
3	SOUTH CAROLINA ELECTRIC and GAS COMPANY	COMMON AND PREFERRED 1000 SHS

2 During the tax year, was there any member of the consolidated group that reaffiliated within 60 months of disaffiliation? . . . . [ ] Yes [X] No

If "Yes," enter the name of the corporation(s) and explain the circumstances.

Corp. No.	Name of corporation	Explanation

3 During the tax year, was there any arrangement in existence by which one or more persons that were not members of the affiliated group could acquire any stock, or acquire any voting power without acquiring stock, in the corporation, other than a de minimis amount, from the corporation or another member of the affiliated group? . . . . [ ] Yes [X] No

If "Yes," enter the name of the corporation and see the instructions for the percentages to enter in columns (a), (b), and (c).

Corp. No.	Name of corporation	(a) Percentage of value	(b) Percentage of outstanding voting stock	(c) Percentage of voting power
		%	%	%
		%	%	%
		%	%	%
		%	%	%

Corp. No.	(d) Provide a description of any arrangement.

Response 1-61

Regulatory Assets	Utility Purpose	Balance @ 9/30/2017	Current Balance @ 12/31/2017
Accumulated Deferred Income Taxes	Accumulated Deferred Income Taxes contained within regulatory assets represent deferred tax liabilities that arise from utility operations that have not been included in customer rates. A substantial portion of these regulatory assets relate to depreciation and are expected to be recovered over the remaining lives of the related property which may range up to approximately 85 years.	$ 292,942,600	$ 26,502,000
Columbia & Charleston Franchise	Unamortized balances associated with SCE&G's investment in the 30 year electric and gas franchise agreements with the Cities of Columbia and Charleston, SC	14,349,069	13,303,261
Gas Water Heater Rebate Program (2011-2021)	Unamortized balance of expenditures associated with the Gas Water Heater Rebate Program	5,559,367	5,853,728
Decommissioning Asset Ret. Obligation	Deferred Asset Retirement Obligation (ARO) represents the legal obligation and related funding associated with the decommissioning and dismantlement of VCS Unit 1.	44,036,214	68,427,634
MGP Environmental Remediation	Costs associated with the assessment and cleanup of formerly owned SCE&G manufactured gas plant sites	24,735,928	24,644,099
Deferred ARO Accretion & Depreciation Costs	Accretion and depreciation costs related to conditional AROs for generation, transmission and distribution properties, including gas pipelines.	341,369,990	326,295,964
Interest Rate Derivatives	Deferred losses associated with the effective portions of changes in fair value and payments made upon settlement of interest rate deriviatives entered into by the Company to mitigate exposure to interest rate volatility.	623,230,835	446,412,254
Deferred Employee Benefit Plan Costs-Gas (ASC 715)	Unamortized actuarial losses and prior service costs and transition obligation, as of the balance sheet date, related to SCE&G's post retirement benefit plans assigned to it's gas operations	28,204,995	30,103,557
Deferred Employee Benefit Plan Costs-Elec (ASC 715)	Unamortized actuarial losses and prior service costs and transition obligation, as of the balance sheet date, related to SCE&G's post retirement benefit plans assigned to it's electric operations	198,525,482	179,509,540
Gas Customer Awareness Program (11/2011-10/2018)	Unamortized balance associated with gas customer awareness advertising programs	57,376	33,350
Deferred VCS Coolant Reconfig Costs (7/2010-7/2042)	Unamortized balance associated with reconfiguration of the V.C. Summer Nuclear Station fuel rod coolant flow to minimize the effects of baffle jetting	4,552,289	4,506,335
Deferred Capacity Charges (7/2010-7/2020)	Unamortized balance associated with deferral of certain electric capacity purchases	826,334	752,334
Deferred Capacity Charges	Unamortized balance associated with deferral of certain electric capacity purchases	2,134,511	2,134,511
Electric Demand Side Management	Deferral of expenditures associated with Demand Side Management Programs	64,396,605	66,246,822
Def Pollution Cntrl Costs-Williams (7/2010-2/2045)	Unamortized balance associated with SCE&G's purchased power costs incurred as a result of the installation of a flue gas desulfurization unit (scrubber) at the A.M. Williams Generating Station.	7,731,604	7,660,939
Economic Development Grants (10/2009-11/2031)	Unamortized balance associated with grants made to support economic development within SCE&G's territory and the State of South Carolina	13,684,011	13,324,179
Major Maintenance Accrual and Interest	The major maintenance accrual as approved by the SCPSC is designed to levelized major maintenance costs associated with fossil fuel turbine/generation equipment. This amount represents undercollected costs incurred in excess of the levelized annual amount of $18.4 million. Includes carrying cost on undercollected balance.	14,119,706	19,121,104
Deferred Pension Cost - Gas (11/2013-1/2027)	Deferral of pension costs assigned to gas operations	9,594,474	9,337,097
Deferred Pension Cost - Electric (1/2013-12/2042)	Deferral of pension costs assigned to electric operations	53,210,715	52,713,756
Environmental Compliance Studies (7/2010 - 7/2020)	Unamortized balance associated with the deferral of costs to comply with environmental regulations	264,605	240,906

Deferred Pollution Control Costs - Wateree (1/2013-9/2040)	Unamortized balance associated with SCE&G's deferred operation and maintenance costs incurred as a result of the installation of a scrubber at the Wateree Generating Station.	24,359,501	24,094,016
Research and Development Grant (1/2013-12/2047)	Unamortized balance associated with research and development grants to Clemson University in support of the SCE&G Energy Innovations Center located in North Charleston South Carolina and in support of the Clemson University Hardware-in-the-loop grid simulator facility	3,025,000	3,000,000
Amount Undercollected - Gas Cost Adjustment	Undercollected balance of gas costs under SCE&G's purchased gas adjustment	18,935,237	10,526,844
Gas WNA Cap - Winter 2015 (11/2016 - 10/2021)	In periods of extremely mild winter weather, SCE&G's gas weather normalization adjustment limits the increase to customer bills in the month the mild weather is experienced. SCE&G defers this amount for future RSA recovery. This balance represents, the unamortized balance deferred for recovery for vintage year 2015	1,766,585	1,658,427
Gas WNA Cap - Winter 2016 (11/2017 - 10/2022)	In periods of extremely mild winter weather, SCE&G's gas weather normalization adjustment limits the increase to customer bills in the month the mild weather is experienced. SCE&G defers this amount for future RSA recovery. This balance represents, the unamortized balance deferred for recovery for vintage year 2016	1,455,666	1,407,144
Gas WNA Cap - Winter 2017	In periods of extremely mild winter weather, SCE&G's gas weather normalization adjustment limits the increase to customer bills in the month the mild weather is experienced. SCE&G defers this amount for future RSA recovery. This balance represents, the unamortized balance deferred for recovery for vintage year 2017	1,437,141	1,437,141
Fukushima Compliance Costs	Deferral and amortization of costs associated with complying with certain regulations promulgated by the Nuclear Regulatory Commission as a result of the Fukushima incident	4,211,660	4,242,683
Deferred Long-Term Capacity Contract	Deferral and amortization of deferred capacity aquired as a result of the retirement of Canady's Station	23,323,160	26,019,928
Carrying Costs Accrual	Carrying costs accrued on the balance of nuclear project deferred tax assets held outside of rate base	45,762,447	-
Cyber Compliance Costs	Deferred costs incurred in complying with regulations promulgated by the Nuclear Regulatory Commission for Cyber Security	3,996,416	4,580,257
CIPv5 Compliance Costs	Deferral of depreciation, amortization, and incremental operation & maintenance expesnses incurred in complying with existing and future Critical Infrastructure Protection Reliability Standards promulgated by the FERC. Also includes carrying costs on unamortized balance	11,003,549	12,248,142
Gas Pipeline Integrity Costs	Deferred costs incurred as result of complying with certain regulations promulgated by the US Dept of Transportation Pipeline and Hazardous Materials Safety Administration	7,406,640	7,937,766
Deferred Costs Related to Certain Claims for Tax Deductions and Credits	Estimated amounts of deferred domestic production activites deduction foregone as a result of the deduction of certain research and experimentation expenditures for income tax purposes, net of related tax credits, as well as accrued interest and other costs arising from these claims.	27,688,462	-
Deferred Storm Damage Costs	Deferral of costs incurred to restorse service and repair system as a result of storms	22,200,019	23,793,594
Amt. Undercollected - Elec Fuel Adjustment Clause	Undercollected balance of electric fuel costs in accordance with SCE&G's fuel adjustemnt clause		395,241
Undercollected Electric Pension Expense	Undercollected pension rider recoveries	-	578,227
Excess Deferred Tax Assets	Represents excess deferred income taxes arising from the remeasurement of net operation loss deferred income taxes upon the enactment of the Tax Cuts and Jobs Act in 2017	-	341,359,200
		$ 1,940,098,193	$ 1,760,401,980

Regulatory Liabilities	Utility Purpose	Balance @ 9/30/2017	Balance @ 12/31/2017
Accumulated Deferred Income Tax Credits	Deferred income taxes arising from investment tax credits; offset by deferred income taxes that arise from utility operations that have not been included in customer rates	$ 13,099,400	$ 7,213,600
Nuclear Refueling Accrual	V.C. Summer Unit 1 refueling outage costs are levelized over a 5 outage cycle. This amount represents levelized accrued costs in excess of the actual amount incurred as of the balance sheet date	2,850,791	7,092,979
NOX Emission Allowance Proceeds	Deferral of amounts collected from sale of allowances to offset future purchases of allowances.	1,035	1,035

Interest Rate Derivatives (3/2009-6/2043)	Deferred gains associated with the effective portions of changes in fair value and payments received upon settlement of interest rate deriviatives entered into by the Company to mitigate exposure to interest rate volatility.	134,547,247	130,598,948
Demand Side Management Carrying Costs	Prior SCPSC orders allowed SCE&G to recognize carrying costs on its deferred demand side management costs at its weighted average cost of capital which included an equity component. In accordance with generally accepted accounting principles, the Company has deferred this equity carrying costs as a regulatory liability and is amortizing this balance as the equity carrying costs is recovered through rates.	3,941,801	3,716,468
SO2 Emission Allowance Proceeds	Deferral of amounts collected from sale of allowances to offset future purchases of allowances.	1,028	1,028
Wholesale Fuel Overcollection	Overcollection of wholesale electric fuel costs	1,086,813	1,523,758
Amt. Overcollected - Elec Fuel Adjustment Clause	Overcollected balance of electric fuel costs in accordance with SCE&G's fuel adjustemnt clause	4,414,612	0
Overcollected Electric Pension Expense	Overcollected pension rider recoveries	96,174	0
Overcollected DER and NET Metering Costs	The Company is allowed to defer and recover through specific riders costs associated with Distributed Energy Resource (DER) programs. This amount respresents the overcollected DER costs as of the balance sheet date.	2,163,793	3,281,137
Environmental Remediation Costs	The Company is allowed a levelized accrual for certain electric environmental remediation costs and this amount represents the levelized accrued amounts in excess of actual costs incurred as of the balance sheet date	53,153	113,153
Monetization of Toshiba Settlement	Settlement proceeds received upon the monetization of the Toshiba Settlement	1,095,230,292	1,095,230,292
Excess Deferred Tax Liabilities	Represents excess deferred income taxes arising from the remeasurement of deferred income taxes upon the enactment of the Tax Cuts and Jobs Act in 2017	0	1,237,304,200
		$ 1,257,486,139	$ 2,486,076,598

Attention Mr. James E. Swan
Controller

Ladies and Gentlemen:

Pursuant to your request, we have conducted a depreciation study related to the electric and common plant of South Carolina Electric & Gas Company as of December 31, 2014. The attached report presents a description of the methods used in the estimation of depreciation and the summary of annual and accrued depreciation.

Respectfully submitted,

GANNETT FLEMING VALUATION
AND RATE CONSULTANTS, LLC

SOUTH CAROLINA ELECTRIC & GAS COMPANY

DEPRECIATION STUDY

EXECUTIVE SUMMARY

Pursuant to South Carolina Electric & Gas Company's ("SCE&G" or "Company") request, Gannett Fleming Valuation and Rate Consultants, LLC ("Gannett Fleming") conducted a depreciation study related to the electric plant as of December 31, 2014. The purpose of this study was to determine the annual depreciation accrual rates and amounts for book and ratemaking purposes.

The depreciation rates are based on the straight line method using the average service life ("ASL") procedure and were applied on a remaining life basis. The calculations were based on attained ages and estimated average service life, and forecasted net salvage characteristics for each depreciable group of assets.

SCE&G's accounting policy has not changed since the last depreciation study was prepared. However, there have been changes in past and future retirement plans of assets, particularly at generating facilities. These changes have caused the proposed remaining lives in the depreciation study to become longer than those proposed in the previous depreciation study as of December 31, 2008.

Gannett Fleming recommends the calculated annual depreciation accrual rates set forth herein apply specifically to electric plant in service as of December 31, 2014 as summarized by Table 1 of the study. Supporting analysis and calculations are provided within the study.

The study results set forth an annual depreciation expense of $217.8 million when applied to depreciable plant balances as of December 31, 2014. The results are summarized at the functional level as follows:

SUMMARY OF ORIGINAL COST, ACCRUAL RATES AND AMOUNTS

FUNCTION	ORIGINAL COST AS OF DECEMBER 31, 2014	PROPOSED RATE	PROPOSED EXPENSE
Steam Production Plant	$1,818,215,576.49	**3.69**	$67,014,074
Nuclear Production Plant	1,057,805,596.76	**1.60**	16,949,252
Hydraulic Production Plant	609,710,372.62	**0.71**	4,326,683
Other Production Plant	787,369,882.41	**3.17**	24,951,618
Transmission Plant	1,025,358,232.46	**2.53**	25,892,924
Distribution Plant	2,879,420,633.44	**2.35**	67,574,351
General Plant	181,183,026.42	**2.56**	4,630,604
Common Plant	175,453,421.79	**3.71**	6,506,680
Total	**$8,534,516,742.39**	**2.55**	**$217,846,186**

PART I. INTRODUCTION

SOUTH CAROLINA ELECTRIC & GAS COMPANY
DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study for South Carolina Electric & Gas Company ("Company"), as applied to specific electric plant in service as of December 31, 2014. The rates and amounts are based on the straight line remaining life method of depreciation. This report also describes the concepts, methods and judgments which underlie the recommended annual depreciation accrual rates related to current electric plant in service.

The service life and net salvage estimates resulting from the study were based on informed judgment which incorporated analyses of historical plant retirement data as recorded through 2014, the net salvage analyses of historical plant retirement data recorded through 2014; a review of Company practice and outlook as they relate to plant operation and retirement, and consideration of current practice in the electric industry, including knowledge of service lives and net salvage estimates used for other electric companies.

PLAN OF REPORT

Part I, Introduction, contains statements with respect to the plan of the report, and the basis of the study. Part II, Estimation of Survivor Curves, presents descriptions of the considerations and the methods used in the service life study. Part III, Service Life Considerations, presents the factors and judgment utilized in the average service life analysis. Part IV, Net Salvage Considerations, presents the judgment utilized for the net salvage study. Part V, Calculation of Annual and Accrued Depreciation, describes the procedures used in the calculation of group depreciation. Part VI, Results of Study, presents a summary by depreciable group of annual depreciation accrual rates and amounts, as well as composite remaining lives.

BASIS OF THE STUDY

Depreciation

Depreciation, in public utility regulation, is the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of utility plant in the course of service from causes which are known to be in current operation and against which the utility is not protected by insurance. Among causes to be given consideration are wear and tear, deterioration, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, and the requirements of public authorities.

Depreciation, as used in accounting, is a method of distributing fixed capital costs, less net salvage, over a period of time by allocating annual amounts to expense. Each annual amount of such depreciation expense is part of that year's total cost of providing electric utility service. Normally, the period of time over which the fixed capital cost is allocated to the cost of service is equal to the period of time over which an item renders service, that is, the item's service life. The most prevalent method of allocation is to distribute an equal amount of cost to each year of service life. This method is known as the straight-line method of depreciation.

For all accounts, the annual depreciation was calculated by the straight line method using the average service life procedure and the remaining life basis. The calculated remaining lives and annual depreciation accrual rates were based on attained ages of plant in service and the estimated service life and salvage characteristics of each depreciable group. Amortization accounting or vintage pooling is proposed for most general plant accounts.

The straight line method, average service life procedure is a commonly used depreciation calculation procedure that has been widely accepted in jurisdictions throughout North America. Gannett Fleming recommends its continued use.

Service Life and Net Salvage Estimates

The service life and net salvage estimates used in the depreciation calculations were based on informed judgment which incorporated a review of management's plans, policies and outlook, a general knowledge of the electric utility industry, and comparisons of the service life and net salvage estimates from our studies of other electric utilities. The use of survivor curves to reflect the expected dispersion of retirement provides a consistent method of estimating depreciation for utility property. Iowa type survivor curves were used to depict the estimated survivor curves for the plant accounts. For steam, nuclear, hydraulic and other production plants, the life span technique was used. In this technique, the date of final retirement was estimated for each unit, and the estimated survivor curves applied to each vintage were truncated at ages coinciding with the date of final retirement.

The procedure for estimating service lives consisted of compiling historical data for the plant accounts or depreciable groups, analyzing this history through the use of widely accepted techniques, and forecasting the survivor characteristics for each depreciable group on the basis of interpretations of the historical data analyses and the probable future. The combination of the historical experience and the estimated future yielded estimated survivor curves from which the average service lives were derived.

The estimates of net salvage by account incorporated a review of experienced costs of removal and salvage related to plant retirements, and consideration of trends exhibited by the historical data. Each component of net salvage, i.e., cost of removal and salvage, was stated in dollars and as a percent of retirement.

An understanding of the function of the plant and information with respect to the reasons for past retirements and the expected causes of future retirements was obtained through discussions with operating and management personnel. The supplemental information obtained in this manner was considered in the interpretation and extrapolation of the statistical analyses.

PART II. ESTIMATION OF SURVIVOR CURVES

PART II. ESTIMATION OF SURVIVOR CURVES

The calculation of annual depreciation based on the straight line method requires the estimation of survivor curves and the selection of group depreciation procedures. The estimation of survivor curves is discussed below and the development of net salvage is discussed in later sections of this report.

SURVIVOR CURVES

The use of an average service life for a property group implies that the various units in the group have different lives. Thus, the average life may be obtained by determining the separate lives of each of the units, or by constructing a survivor curve by plotting the number of units which survive at successive ages.

The survivor curve graphically depicts the amount of property existing at each age throughout the life of an original group. From the survivor curve, the average life of the group, the remaining life expectancy, the probable life, and the frequency curve can be calculated. In Figure 1, a typical smooth survivor curve and the derived curves are illustrated. The average life is obtained by calculating the area under the survivor curve, from age zero to the maximum age, and dividing this area by the ordinate at age zero. The remaining life expectancy at any age can be calculated by obtaining the area under the curve, from the observation age to the maximum age, and dividing this area by the percent surviving at the observation age. For example, in Figure 1, the remaining life at age 30 is equal to the crosshatched area under the survivor curve divided by 29.5 percent surviving at age 30. The probable life at any age is developed by adding the age and remaining life. If the probable life of the property is calculated for each year of age, the probable life curve shown in the chart can be developed. The frequency curve presents the number of units retired in each age interval. It is derived by obtaining the differences between the amount of property surviving at the beginning and at the end of each interval.

This study has incorporated the use of Iowa curves developed from a retirement rate analysis of historical retirement history. A discussion of the concepts of survivor curves and of the development of survivor curves using the retirement rate method is presented below.

Iowa Type Curves

The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type curves. There are four families in the Iowa system, labeled in accordance with the location of the modes of the retirements in relationship to the average life and the relative height of the modes. The left moded curves, presented in Figure 2, are those in which the greatest frequency of retirement occurs to the left of, or prior to, average service life. The symmetrical moded curves, presented in Figure 3, are those in which the greatest frequency of retirement occurs at average service life. The right moded curves, presented in Figure 4, are those in which the greatest frequency occurs to the right of, or after, average service life. The origin moded curves, presented in Figure 5, are those in which the greatest frequency of retirement occurs at the origin, or immediately after age zero. The letter designation of each family of curves (L, S, R or O) represents the location of the mode of the associated frequency curve with respect to the average service life. The numbers represent the relative heights of the modes of the frequency curves within each family.

The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. A report of the study which resulted in the classification of property survivor characteristics into 18 type curves,

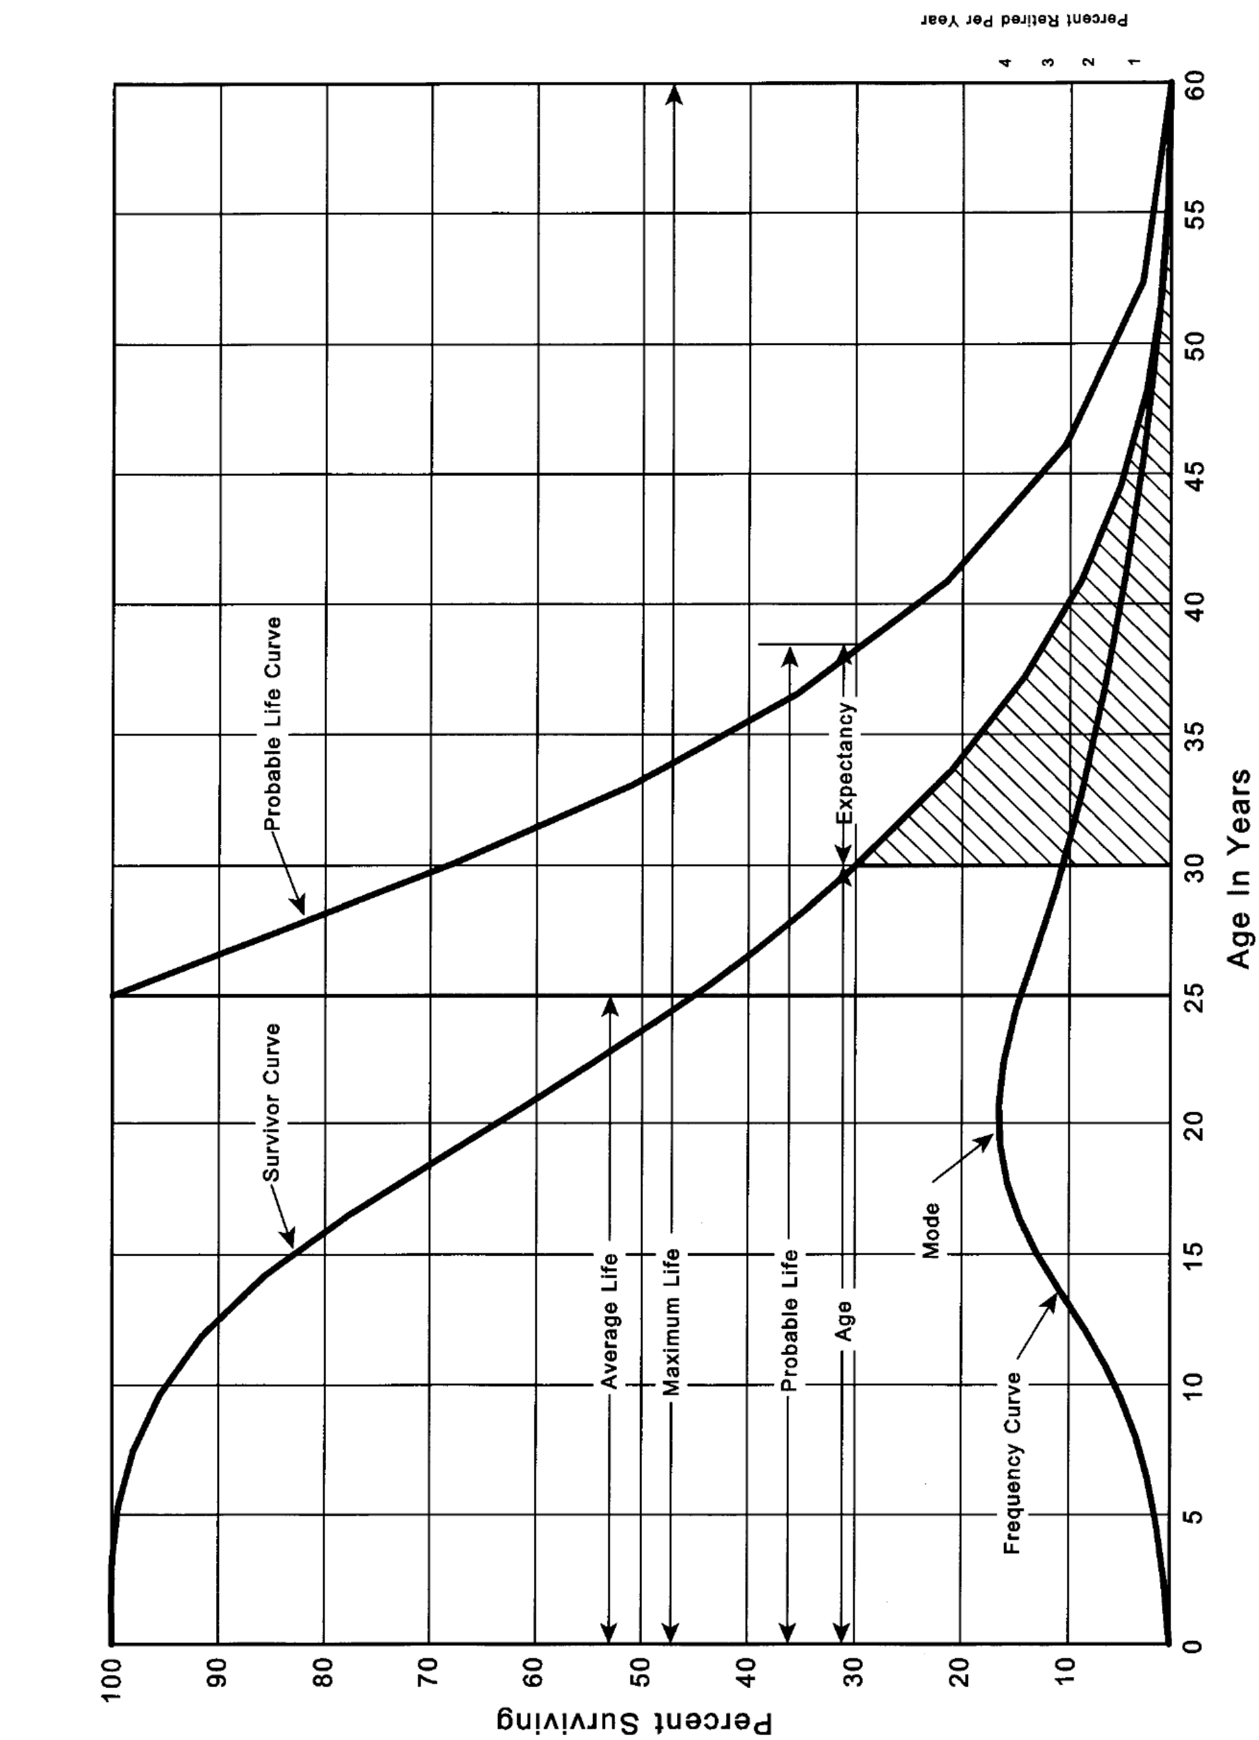

Figure 1. A Typical Survivor Curve and Derived Curves

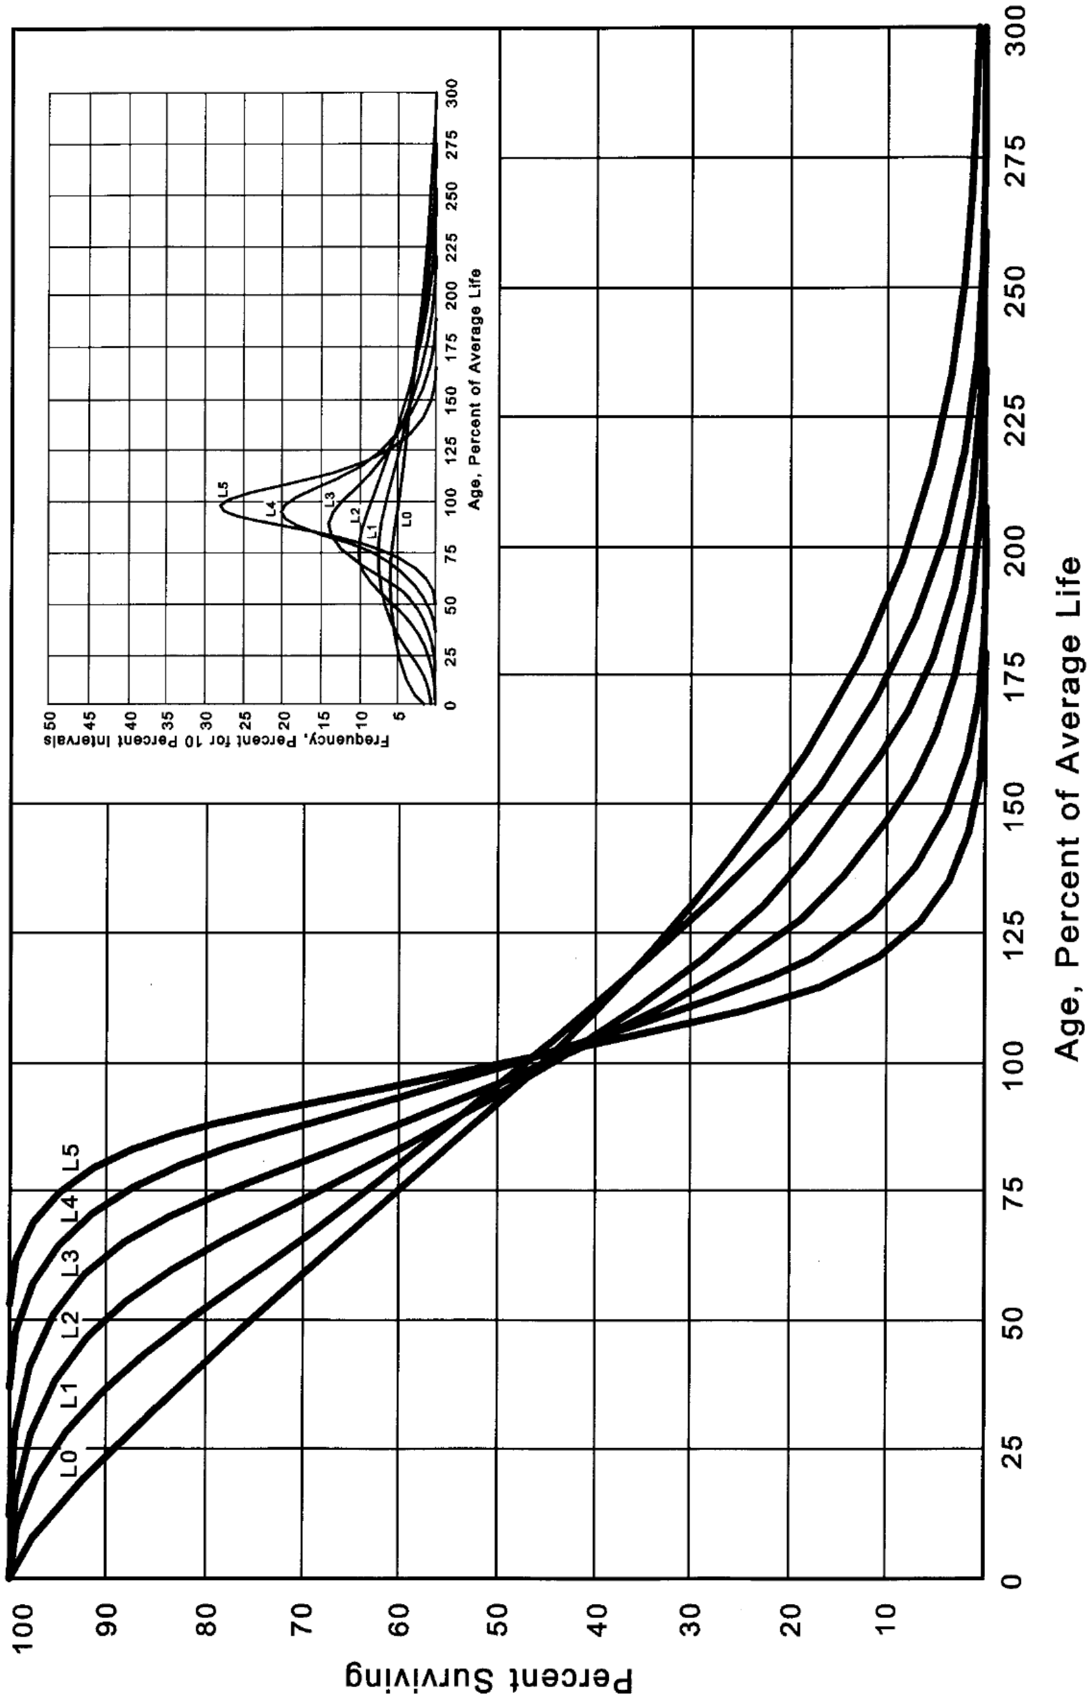

Figure 2. Left Modal or "L" Iowa Type Survivor Curves

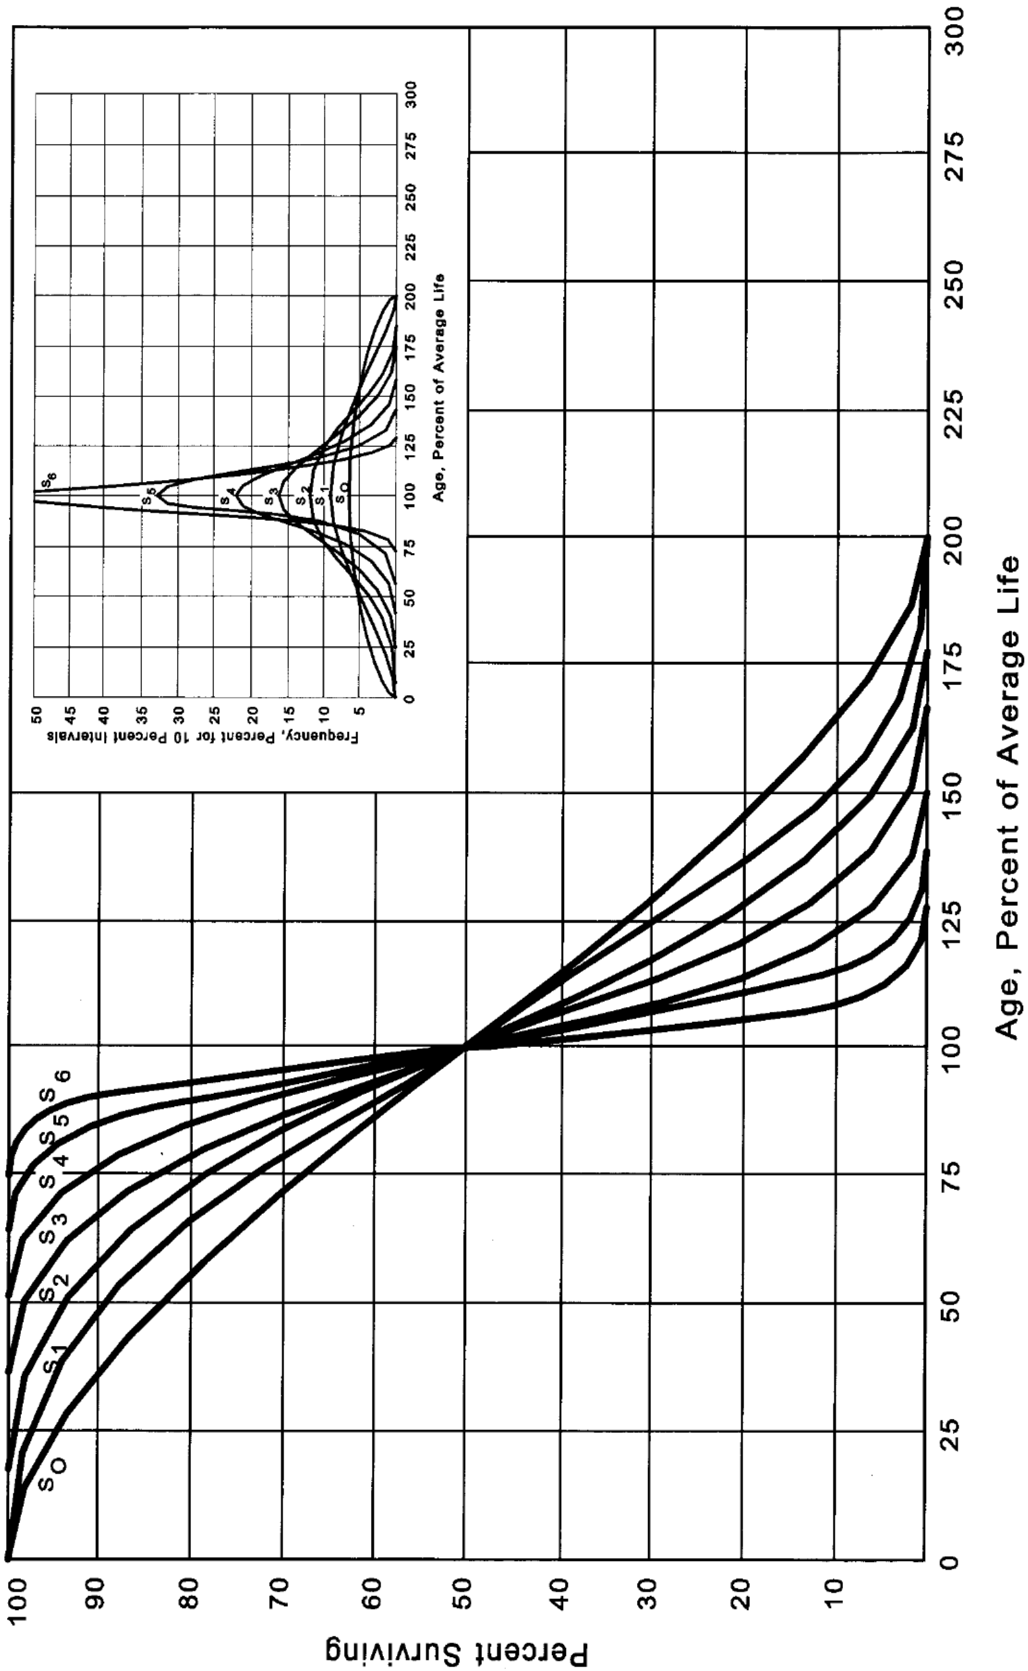

Figure 3. Symmetrical or "S" Iowa Type Survivor Curves

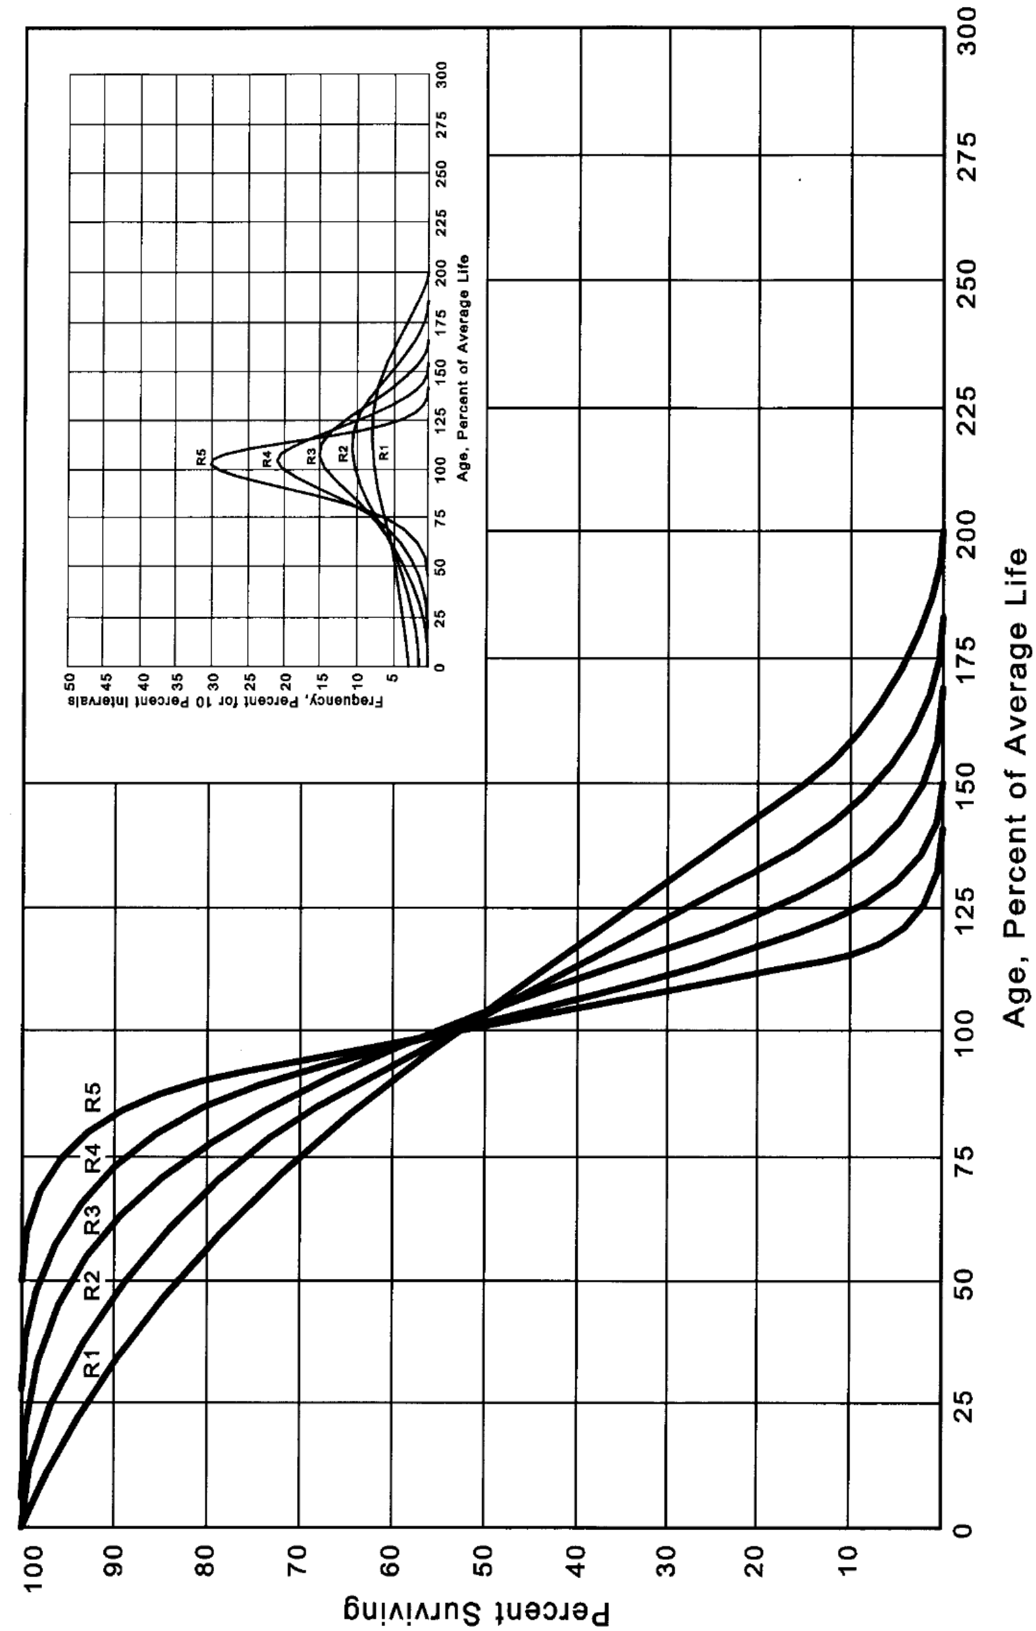

Figure 4. Right Modal or "R" Iowa Type Survivor Curves

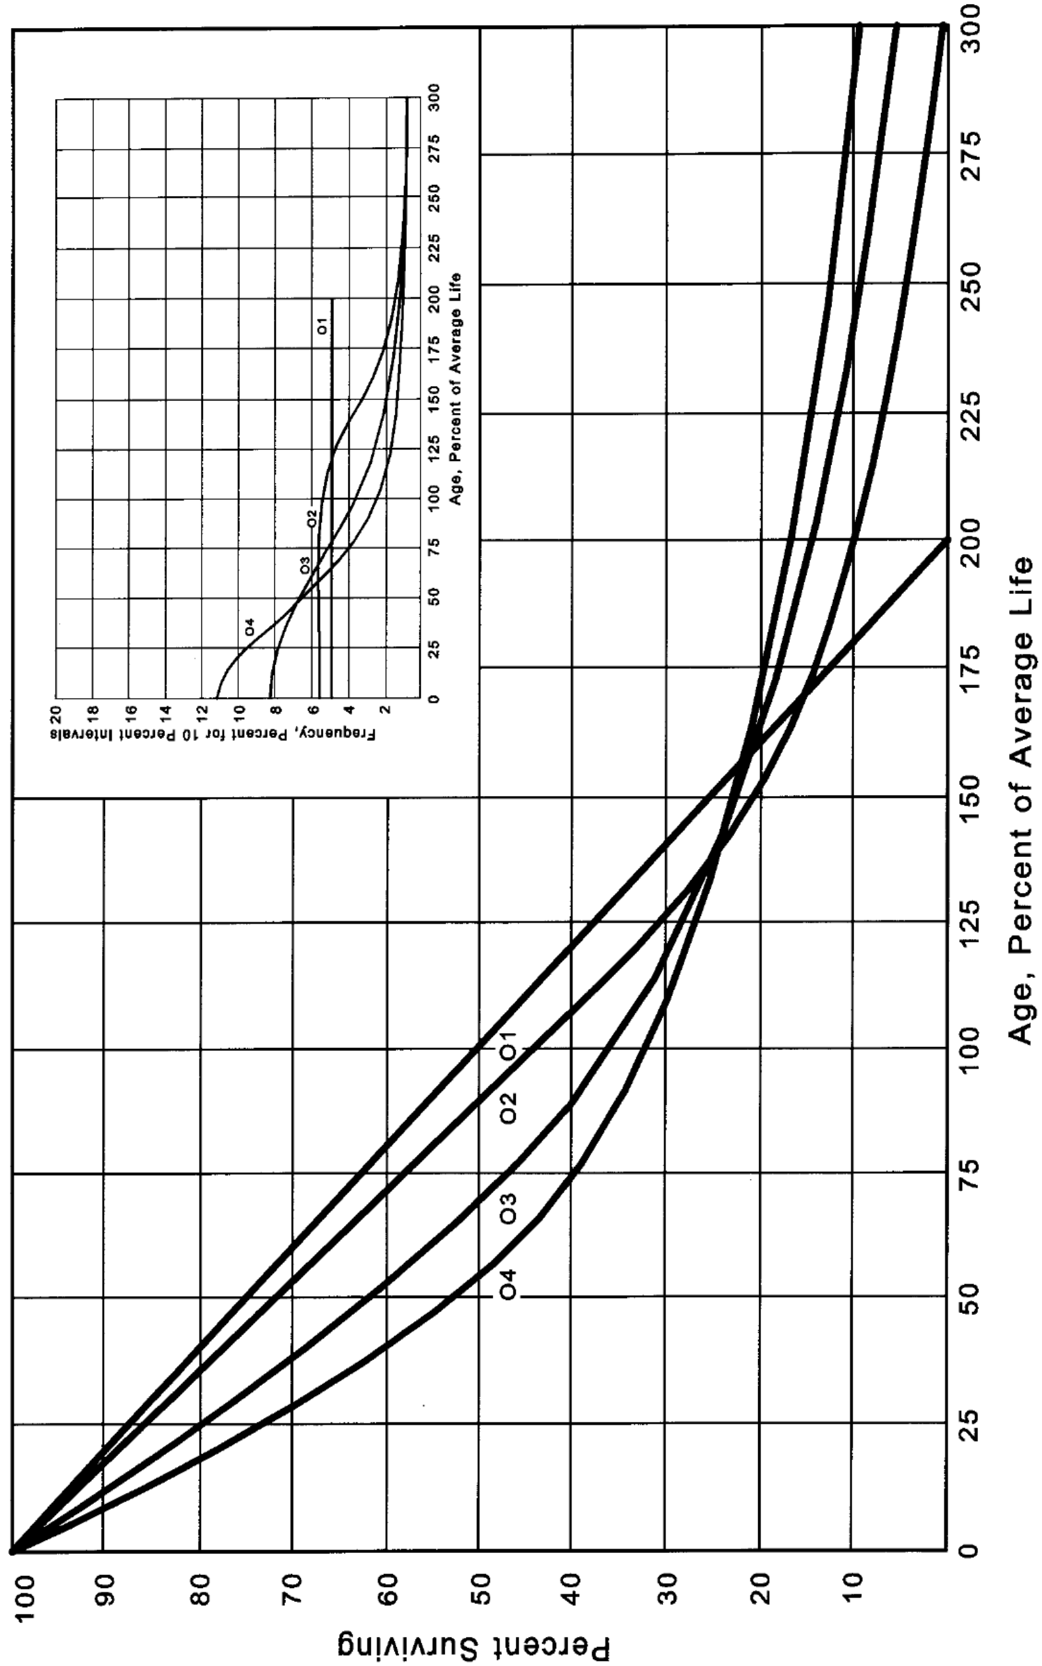

Figure 5. Origin Modal or "O" Iowa Type Survivor Curves

which constitute three of the four families, was published in 1935 in the form of the Experiment Station's Bulletin 125. These curve types have also been presented in subsequent Experiment Station bulletins and in the text, "Engineering Valuation and Depreciation."[1] In 1957, Frank V. B. Couch, Jr., an Iowa State College graduate student submitted a thesis presenting his development of the fourth family consisting of the four O type survivor curves.

Retirement Rate Method of Analysis

The retirement rate method is an actuarial method of deriving survivor curves using the average rates at which property of each age group is retired. The method relates to property groups for which aged accounting experience is available and is the method used to develop the original stub survivor curves in this study. The method (also known as the annual rate method) is illustrated through the use of an example in the following text, and is also explained in several publications, including "Statistical Analyses of Industrial Property Retirements,"[2] "Engineering Valuation and Depreciation,"[3] and "Depreciation Systems."[4]

The average rate of retirement used in the calculation of the percent surviving for the survivor curve (life table) requires two sets of data: first, the property retired during a period of observation, identified by the property's age at retirement; and second, the property exposed to retirement at the beginning of the age intervals during the same period. The period of observation is referred to as the experience band, and the band of years which represent the installation dates of the property exposed to retirement during the experience band is referred to as the placement band. An example of the calculations used in the development of a life table follows. The example includes

schedules of annual aged property transactions, a schedule of plant exposed to retirement, a life table and illustrations of smoothing the stub survivor curve.

Schedules of Annual Transactions in Plant Records

The property group used to illustrate the retirement rate method is observed for the experience band 2005-2014 during which there were placements during the years 2000-2014. In order to illustrate the summation of the aged data by age interval, the data were compiled in the manner presented in Schedules 1 and 2 on pages II-11 and II-12. In Schedule 1, the year of installation (year placed) and the year of retirement are shown. The age interval during which a retirement occurred is determined from this information. In the example which follows, $10,000 of the dollars invested in 2000 were retired in 2005. The $10,000 retirement occurred during the age interval between 4½ and 5½ years on the basis that approximately one-half of the amount of property was installed prior to and subsequent to July 1 of each year. That is, on the average, property installed during a year is placed in service at the midpoint of the year for the purpose of the analysis. All retirements also are stated as occurring at the midpoint of a one-year age interval of time, except the first age interval which encompasses only one-half year.

The total retirements occurring in each age interval in a band are determined by summing the amounts for each transaction year-installation year combination for that age interval. For example, the total of $143,000 retired for age interval 4½-5½ is the sum of the retirements entered on Schedule 1 immediately above the stair step line drawn on the table beginning with the 2005 retirements of 2000 installations and ending with the 2014 retirements of the 2009 installations. Thus, the total amount of 143 for age interval 4½-5½ equals the sum of:

$$10 + 12 + 13 + 11 + 13 + 13 + 15 + 17 + 19 + 20.$$

SCHEDULE 1. RETIREMENTS FOR EACH YEAR 2005-2014
SUMMARIZED BY AGE INTERVAL

Experience Band 2005-2014 | Placement Band 2000-2014

Year Placed	Retirements, Thousands of Dollars During Year 2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	Total During Age Interval	Age Interval
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
2000	10	11	12	13	14	16	23	24	25	26	26	13½-14½
2001	11	12	13	15	16	18	20	21	22	19	44	12½-13½
2002	11	12	13	14	16	17	19	21	22	18	64	11½-12½
2003	8	9	10	11	11	13	14	15	16	17	83	10½-11½

[a] Transfer Affecting Exposures at Beginning of Year
[b] Transfer Affecting Exposures at End of Year
[c] Sale with Continued Use
Parentheses Denote Credit Amount.

In Schedule 2, other transactions which affect the group are recorded in a similar manner. The entries illustrated include transfers and sales. The entries which are credits to the plant account are shown in parentheses. The items recorded on this schedule are not totaled with the retirements, but are used in developing the exposures at the beginning of each age interval.

Schedule of Plant Exposed to Retirement

The development of the amount of plant exposed to retirement at the beginning of each age interval is illustrated in Schedule 3 on page II-14. The surviving plant at the beginning of each year from 2005 through 2014 is recorded by year in the portion of the table headed "Annual Survivors at the Beginning of the Year." The last amount entered in each column is the amount of new plant added to the group during the year. The amounts entered in Schedule 3 for each successive year following the beginning balance or additions are obtained by adding or subtracting the net entries shown on Schedules 1 and 2. For the purpose of determining the plant exposed to retirement, transfers-in are considered as being exposed to retirement in this group at the beginning of the year in which they occurred, and the sales and transfers-out are considered to be removed from the plant exposed to retirement at the beginning of the following year. Thus, the amounts of plant shown at the beginning of each year are the amounts of plant from each placement year considered to be exposed to retirement at the beginning of each successive transaction year. For example, the exposures for the installation year 2010 are calculated in the following manner:

Exposures at age 0	= amount of addition	= \$750,000
Exposures at age ½	= \$750,000 - \$ 8,000	= \$742,000
Exposures at age 1½	= \$742,000 - \$18,000	= \$724,000
Exposures at age 2½	= \$724,000 - \$20,000 - \$19,000	= \$685,000
Exposures at age 3½	= \$685,000 - \$22,000	= \$663,000

SCHEDULE 3. PLANT EXPOSED TO RETIREMENT
JANUARY 1 OF EACH YEAR 2005-2014
SUMMARIZED BY AGE INTERVAL

Experience Band 2005-2014 | Placement Band 2000-2014

Year	Exposures, Thousands of Dollars										Total at	
	Annual Survivors at the Beginning of the Year										Beginning of	Age
Placed	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	Age Interval	Interval
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)
2000	255	245	234	222	209	195	239	216	192	167	167	13½-14½
2001	279	268	256	243	228	212	194	174	153	131	323	12½-13½
2002	307	296	284	271	257	241	224	205	184	162	531	11½-12½
2003	338	330	321	311	300	289	276	262	242	226	823	10½-11½
2004	376	367	357	346	334	321	307	297	280	261	1,097	9½-10½
2005	420[a]	416	407	397	386	374	361	347	332	316	1,503	8½-9½
2006		460[a]	455	444	432	419	405	390	374	356	1,952	7½-8½
2007			510[a]	504	492	479	464	448	431	412	2,463	6½-7½
2008				580[a]	574	561	546	530	501	482	3,057	5½-6½
2009					660[a]	653	639	623	628	609	3,789	4½-5½
2010						750[a]	742	724	685	663	4,332	3½-4½
2011							850[a]	841	821	799	4,955	2½-3½
2012								960[a]	949	926	5,719	1½-2½
2013									1,080[a]	1,069	6,579	½-1½
2014										1,220[a]	7,490	0-½
Total	1,975	2,382	2,824	3,318	3,872	4,494	5,247	6,017	6,852	7,799	44,780	

For the entire experience band 2005-2014, the total exposures at the beginning of an age interval are obtained by summing diagonally in a manner similar to the summing of the retirements during an age interval (Schedule 1). For example, the figure of 3,789, shown as the total exposures at the beginning of age interval 4½-5½, is obtained by summing:

255 + 268 + 284 + 311 + 334 + 374 + 405 + 448 + 501 + 609.

Original Life Table

The original life table, illustrated in Schedule 4 on page II-16, is developed from the totals shown on the schedules of retirements and exposures, Schedules 1 and 3, respectively. The exposures at the beginning of the age interval are obtained from the corresponding age interval of the exposure schedule, and the retirements during the age interval are obtained from the corresponding age interval of the retirement schedule. The retirement ratio is the result of dividing the retirements during the age interval by the exposures at the beginning of the age interval. The percent surviving at the beginning of each age interval is derived from survivor ratios, each of which equals one minus the retirement ratio. The percent surviving is developed by starting with 100% at age zero and successively multiplying the percent surviving at the beginning of each interval by the survivor ratio, i.e., one minus the retirement ratio for that age interval. The calculations necessary to determine the percent surviving at age 5½ are as follows:

Percent surviving at age 4½	=	88.15				
Exposures at age 4½	=	3,789,000				
Retirements from age 4½ to 5½	=	143,000				
Retirement Ratio	=	143,000	÷	3,789,000	=	0.0377
Survivor Ratio	=	1.000	-	0.0377	=	0.9623
Percent surviving at age 5½	=	(88.15)	x	(0.9623)	=	84.83

The totals of the exposures and retirements (columns 2 and 3) are shown for the purpose of checking with the respective totals in Schedules 1 and 3. The ratio of the total retirements to the total exposures, other than for each age interval, is meaningless.

SCHEDULE 4. ORIGINAL LIFE TABLE
CALCULATED BY THE RETIREMENT RATE METHOD

Experience Band 2005-2014 | Placement Band 2000-2014

(Exposure and Retirement Amounts are in Thousands of Dollars)

Age at Beginning of Interval	Exposures at Beginning of Age Interval	Retirements During Age Interval	Retirement Ratio	Survivor Ratio	Percent Surviving at Beginning of Age Interval
(1)	(2)	(3)	(4)	(5)	(6)
0.0	7,490	80	0.0107	0.9893	100.00
0.5	6,579	153	0.0233	0.9767	98.93
1.5	5,719	151	0.0264	0.9736	96.62
2.5	4,955	150	0.0303	0.9697	94.07
3.5	4,332	146	0.0337	0.9663	91.22
4.5	3,789	143	0.0377	0.9623	88.15
5.5	3,057	131	0.0429	0.9571	84.83
6.5	2,463	124	0.0503	0.9497	81.19
7.5	1,952	113	0.0579	0.9421	77.11
8.5	1,503	105	0.0699	0.9301	72.65
9.5	1,097	93	0.0848	0.9152	67.57
10.5	823	83	0.1009	0.8991	61.84
11.5	531	64	0.1205	0.8795	55.60
12.5	323	44	0.1362	0.8638	48.90
13.5	167	26	0.1557	0.8443	42.24
					35.66
Total	44,780	1,606			

Column 2 from Schedule 3, Column 12, Plant Exposed to Retirement.
Column 3 from Schedule 1, Column 12, Retirements for Each Year.
Column 4 = Column 3 Divided by Column 2.
Column 5 = 1.0000 Minus Column 4.
Column 6 = Column 5 Multiplied by Column 6 as of the Preceding Age Interval.

The original survivor curve is plotted from the original life table (column 6, Schedule 4). When the curve terminates at a percent surviving greater than zero, it is called a stub survivor curve. Survivor curves developed from retirement rate studies generally are stub curves.

Smoothing the Original Survivor Curve

The smoothing of the original survivor curve eliminates any irregularities and serves as the basis for the preliminary extrapolation to zero percent surviving of the original stub curve. Even if the original survivor curve is complete from 100% to zero percent, it is desirable to eliminate any irregularities, as there is still an extrapolation for the vintages which have not yet lived to the age at which the curve reaches zero percent. In this study, the smoothing of the original curve with established type curves was used to eliminate irregularities in the original curve.

The Iowa type curves are used in this study to smooth those original stub curves which are expressed as percents surviving at ages in years. Each original survivor curve was compared to the Iowa curves using visual and mathematical matching in order to determine the better fitting smooth curves. In Figures 6, 7, and 8, the original curve developed in Schedule 4 is compared with the L, S, and R Iowa type curves which most nearly fit the original survivor curve. In Figure 6, the L1 curve with an average life between 12 and 13 years appears to be the best fit. In Figure 7, the S0 type curve with a 12-year average life appears to be the best fit and appears to be better than the L1 fitting. In Figure 8, the R1 type curve with a 12-year average life appears to be the best fit and appears to be better than either the L1 or the S0.

In Figure 9, the three fittings, 12-L1, 12-S0 and 12-R1 are drawn for comparison purposes. It is probable that the 12-R1 Iowa curve would be selected as the most representative of the plotted survivor characteristics of the group.

PART III. SERVICE LIFE CONSIDERATIONS

PART III. SERVICE LIFE CONSIDERATIONS

FIELD TRIPS

In order to be familiar with the operation of the Company and to observe representative portions of the plant, field trips were conducted. A general understanding of the function of the plant and information with respect to the reasons for past retirements and the expected future causes of retirements was obtained during this trip. This knowledge and information were incorporated in the interpretation and extrapolation of the statistical analyses.

The plant facilities visited on the most recent field trips in 2004, 2009 and 2015 are as follows:

<u>May 12-14, 2015</u>

- Edenwood Substation
- Congaree Creek Substation
- Coit Substation
- Columbia Office Complex
- McMeekin Generating Station
- Saluda Hydro Plant
- Central Lab
- Fairfield Pump Storage Facility
- Parr Hydro Station
- Coit Gas Turbine Station
- Wateree Generating Station

<u>July 14-16, 2009</u>

- Jasper Generating Station
- Cope Generating Station
- Wateree Generating Station
- Uptown Substation
- Edenwood Substation
- Congaree Creek Substation

March 30-31, 2004

Cope Generating Station
Williams Generating Station
Hagood CT Turbine Station
Coit Gas Turbine Station
Wateree Generating Station
McMeekin Generating Station
Central Lab
Saluda Hydro Plant

SERVICE LIFE ANALYSIS

The service life estimates were based on judgment which considered a number of factors. The primary factors were the statistical analyses of data, current Company policies and outlook as determined during conversations with management; and the survivor curve estimates from previous studies of this company and other electric utility companies.

For 28 plant accounts and subaccounts for which survivor curves were estimated, the statistical analyses using the retirement rate method resulted in good to excellent indications of the survivor patterns experienced. Generally, the information external to the statistics led to minimal or no significant departure from the indicated survivor curves for the accounts listed below.

STEAM PRODUCTION PLANT

311.00	Structures and Improvements
312.00	Boiler Plant Equipment
314.00	Turbogenerator Units
315.00	Accessory Electric Equipment
316.00	Miscellaneous Plant Equipment

NUCLEAR PRODUCTION PLANT

321.00	Structures and Improvements
322.00	Reactor Plant Equipment
325.00	Miscellaneous Power Plant Equipment

HYDRAULIC PRODUCTION PLANT

331.00	Structures and Improvements
335.00	Miscellaneous Power Plant Equipment

OTHER PRODUCTION PLANT

341.00	Structures and Improvements
342.00	Fuel Holders, Producers and Accessories
344.00	Generators
345.00	Accessory Electric Equipment

TRANSMISSION PLANT

352.00	Structures and Improvements
353.00	Station Equipment
353.10	Station Equipment - Step Up Transformer
355.00	Poles and Fixtures
356.10	Overhead Conductors and Devices - Overhead
356.20	Overhead Conductors and Devices - Fiber Optic

DISTRIBUTION PLANT

361.00	Structures and Improvements
362.00	Station Equipment
364.00	Poles, Towers and Fixtures
365.00	Overhead Conductors and Devices
367.00	Underground Conductors and Devices
368.00	Line Transformers
370.00	Meters
373.00	Street Lighting and Signal Systems

Account 368.00, Line Transformers, is used to illustrate the manner in which the study was conducted for the groups in the preceding list. Aged plant accounting data for line transformers have been compiled for the years 1937 through 2014. These data have been coded in the course of the Company's normal record keeping according to account or property group, type of transaction, year in which the transaction took place, and year in which the electric plant was placed in service. The retirements, other plant transactions, and plant additions were analyzed by the retirement rate method.

The survivor curve estimate is based on the statistical indications for the periods 1937 through 2014 and 1989 through 2014. The Iowa 45-R2 is a reasonable fit of the original survivor curve. The 45-year service life is within the typical service life range of

30 to 50 years for line transformers. The 45-year life reflects the Company's plans to continue current practices of replacement for newer technology or high load needs.

Life Span Estimates

For Production Plant, which consists of large generating units, the life span technique was employed in conjunction with the use of interim survivor curves which reflect interim retirements that occur prior to the ultimate retirement of the major unit. An interim survivor curve was estimated for each plant account, inasmuch as the rate of interim retirements differs from account to account. The interim survivor curves estimated for steam, nuclear, hydraulic, and other production plant were based on the retirement rate method of life analysis which incorporated experienced aged retirements through the period 2014.

The life span estimates for power generating stations were the result of considering experienced life spans of similar generating units, the age of surviving units, general operating characteristics of the units, major refurbishing and discussions with management personnel concerning the probable long-term outlook for the units.

The life span estimate for the steam units is 70 to 75 years. The majority of the steam facilities' life spans are more than 65 years which is the upper end of the typical range of life spans for such units. The longer life spans are based on the condition and utilization of the facilities. The 80-year lifespan for the nuclear facilities include the relicensing of the facility through 2062. The 150-year lifespan for the hydraulic production facilities is at the upper end of the typical range. The life span of each facility is determined by condition and Company plans. Life spans of 60 and 75 years were estimated for the combustion turbines. These life span estimates are longer than typical for combustion turbines which are used primarily as peaking units. The longer life spans are still considered appropriate as management has considered the condition and utilization of these units.

A summary of the year in service, life span and probable retirement year for each power production unit follows:

Depreciable Group	Major Year in Service	Probable Retirement Year	Life Span
Steam Production Plant			
McMeekin and Central Lab	1958	2028	70
Cope	1996	2071	75
Urquhart 3	1954	2028	74
Wateree	1970	2045	75
Jasper	2004	2079	75
Nuclear Production Plant			
V.C. Summer	1982	2062	80
Hydraulic Production Plant			
Fairfield	1978	2128	150
Neal Shoals	1905	2055	150
Parr	1914	2064	150
Saluda	1932	2082	150
Stevens Creek	1929	2079	150
Other Production Plant			
Coit	1969	2029	60
Hagood Unit 4	1991	2051	60

Hagood Unit 6	2010	2070	60
Boeing Building Solar Project	2011	2031	20

The survivor curve estimates for the remaining accounts were based on judgment incorporating the statistical analyses and previous studies for this and other electric utilities.

PART IV. NET SALVAGE CONSIDERATIONS

PART IV. NET SALVAGE CONSIDERATIONS

SALVAGE ANALYSIS

The estimates of net salvage by account were based in part on historical data compiled through 2014. Cost of removal and salvage were expressed as percents of the original cost of plant retired, both on annual and three-year moving average bases. The most recent five-year average also was calculated for consideration. The net salvage estimates by account are expressed as a percent of the original cost of plant retired.

Net Salvage Considerations

The estimates of future net salvage are expressed as percentages of surviving plant in service, i.e., all future retirements. In cases in which removal costs are expected to exceed salvage receipts, a negative net salvage percentage is estimated. The net salvage estimates were based on judgment which incorporated analyses of historical cost of removal and salvage data, expectations with respect to future removal requirements and markets for retired equipment and materials.

Statistical analyses of historical data for the period 1987 through 2014 for electric plant were analyzed. The analyses contributed significantly toward the net salvage estimates for 34 plant accounts and subaccount of the depreciable plant, as follows:

Steam Production Plant

312.00	Boiler Plant Equipment
314.00	Turbogenerator Units
315.00	Accessory Electric Equipment
316.00	Miscellaneous Power Plant Equipment

Nuclear Production Plant

322.00	Reactor Plant Equipment
324.00	Accessory Electric Equipment
325.00	Miscellaneous Power Plant Equipment

Hydraulic Production Plant

333.00	Water Wheels, Turbines and Generators
335.00	Miscellaneous Power Plant Equipment

Other Production Plant

341.00	Structures and Improvements
343.00	Prime Movers
345.00	Accessory Electric Equipment
346.00	Miscellaneous Power Plant Equipment

Transmission Plant

353.00	Station Equipment
353.10	Station Equipment - Step-Up Transformers

Distribution Plant

361.00	Structures and Improvements
362.00	Station Equipment
364.00	Poles, Towers and Fixtures
365.00	Overhead Conductors and Devices
366.00	Underground Conduit
367.00	Underground Conductors and Devices
368.00	Line Transformers
369.00	Services - Overhead
369.10	Services - Underground
370.00	Meters
373.00	Street Lighting and Signal Systems

General Plant

390.10	Structures and Improvements
390.20	Structures and Improvements - Warehouse
390.80	Structures and Improvements - Office Lease
380.80	Structures and Improvements - Warehouse Lease

Common Plant

690.10	Structures and Improvements - Office
690.20	Structures and Improvements - Warehouse
690.80	Structures and Improvements - Office Lease
690.90	Structures and Improvements - Warehouse Lease

Account 362.00, Station Equipment, is used to illustrate the manner in which the study was conducted for the groups in the preceding list. Net salvage data for the period 1987 through 2014 were analyzed for this account. The data include cost of removal, gross salvage and net salvage amounts and each of these amounts is

expressed as a percent of the original cost of regular retirements. Three-year moving averages for the 1987-1989 through 2012-2014 periods were computed to smooth the annual amounts.

Cost of removal has fluctuated throughout the twenty-eight year period. The primary cause of the fluctuations in cost of removal relates to the type of station equipment removed each year. The large projects or inside the building assets have lower cost to remove per asset. Cost of removal for the most recent five years averaged 13 percent.

Gross salvage has also varied throughout the period, but has diminished to negligible levels since 1997. The most recent five-year average of 6 percent gross salvage reflects recent lower salvage value of station equipment.

The net salvage percent based on the overall period 1987 through 2014 is 11 percent negative net salvage and based on the most recent five-year period is 7 percent. The range of estimates made by other electric companies for Station Equipment is negative 5 to negative 25 percent. The net salvage estimate for station equipment is negative 10 percent, is within the range of other estimates and reflects the recent levels of negative net salvage.

The net salvage percents for the remaining accounts of plant were based on judgment incorporating estimates of previous studies of this and other electric utilities.

PART V. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

PART V. CALCULATION OF ANNUAL AND ACCRUED DEPRECIATION

GROUP DEPRECIATION PROCEDURES

A group procedure for depreciation is appropriate when considering more than a single item of property. Normally the items within a group do not have identical service lives, but have lives that are dispersed over a range of time. There are two primary group procedures, namely, average service life and equal life group. In the average service life procedure, the rate of annual depreciation is based on the average life or average remaining life of the group, and this rate is applied to the surviving balances of the group's cost. A characteristic of this procedure is that the cost of plant retired prior to average life is not fully recouped at the time of retirement, whereas the cost of plant retired subsequent to average life is more than fully recouped. Over the entire life cycle, the portion of cost not recouped prior to average life is balanced by the cost recouped subsequent to average life.

Single Unit of Property

The calculation of straight line depreciation for a single unit of property is straightforward. For example, if a $1,000 unit of property attains an age of four years and has a life expectancy of six years, the annual accrual over the total life is:

$$\frac{\$1,000}{(4 + 6)} = \$100 \text{ per year.}$$

The accrued depreciation is:

$$\$1,000\left(1 - \frac{6}{10}\right) = \$400.$$

Remaining Life Annual Accruals

For the purpose of calculating remaining life accruals as of December 31, 2014, the depreciation reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation follow. The detailed calculations as of December 31, 2014, are set forth in the Results of Study section of the report.

Average Service Life Procedure

In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated future survivor curve in accordance with the average service life procedure.

The calculated accrued depreciation for each depreciable property group represents that portion of the depreciable cost of the group which would not be allocated to expense through future depreciation accruals if current forecasts of life characteristics are used as the basis for such accruals. The accrued depreciation calculation consists of applying an appropriate ratio to the surviving original cost of each vintage of each account based upon the attained age and service life. The straight line accrued depreciation ratios are calculated as follows for the average service life procedure:

$$Ratio = 1 - \frac{Average\ Remaining\ Life}{Average\ Service\ Life}.$$

CALCULATION OF ANNUAL AND ACCRUED AMORTIZATION

Amortization, as defined in the Uniform System of Accounts, is the gradual extinguishment of an amount in an account by distributing such amount over a fixed period, over the life of the asset or liability to which it applies, or over the period during which it is anticipated the benefit will be realized. Normally, the distribution of the amount is in equal amounts to each year of the amortization period.

The calculation of annual and accrued amortization requires the selection of an amortization period. The amortization periods used in this report were based on judgment which incorporated a consideration of the period during which the assets will render most of their service, the amortization periods and service lives used by other utilities, and the service life estimates previously used for the asset under depreciation accounting.

Amortization accounting is appropriate for certain General and Common Plant accounts that represent numerous units of property, but a very small portion of total depreciable electric plant in service. The accounts and their amortization periods are as follows:

Account		Amortization Period, Years
391.10	Office Furniture and Equipment - Furniture	20
391.20	Office Furniture and Equipment - EDP	5
391.30	Office Furniture and Equipment - Data Handling	20
393	Stores Equipment	25
394	Tools, Shop, Garage Equipment	20
395	Laboratory Equipment	20
397	Communication Equipment	8
398	Miscellaneous Equipment	20
691.10	Office Furniture and Equipment - Furniture	20
691.20	Office Furniture and Equipment - EDP	5
691.30	Office Furniture and Equipment - Data Handling	20
693	Stores Equipment	25
694	Tools, Shop, Garage Equipment	20
695	Laboratory Equipment	20
697	Communication Equipment	8
698	Miscellaneous Equipment	20

For the purpose of calculating annual amortization amounts as of December 31, 2014, the book reserve for each plant account or subaccount is assigned or allocated to vintages. The book reserve assigned to vintages with an age greater than the amortization period is equal to the vintage's original cost. The remaining book reserve is allocated among vintages with an age less than the amortization period in proportion to the calculated accrued amortization. The calculated accrued amortization is equal to the original cost multiplied by the ratio of the vintage's age to its amortization period. The annual amortization amount is determined by dividing the future amortizations (original cost less allocated book reserve) by the remaining period of amortization for the vintage.

PART VI. RESULTS OF STUDY

PART VI. RESULTS OF STUDY

QUALIFICATION OF RESULTS

The calculated annual and accrued depreciation are the principal results of the study. Continued surveillance and periodic revisions are normally required to maintain continued use of appropriate annual depreciation accrual rates. An assumption that accrual rates can remain unchanged over a long period of time implies a disregard for the inherent variability in service lives and salvage and for the change of the composition of property in service. The annual accrual rates were calculated in accordance with the straight line remaining life method of depreciation, using the average service life procedure based on estimates which reflect considerations of current historical evidence and expected future conditions.

The annual depreciation accrual rates are applicable specifically to the electric plant in service as of December 31, 2014. For most plant accounts, the application of such rates to future balances that reflect additions subsequent to December 31, 2014, is reasonable for a period of three to five years.

DESCRIPTION OF DEPRECIATION TABULATIONS

A summary of the results of the study, as applied to the original cost of electric and common plant as of December 31, 2014, is presented on pages VI-3 through VI-9 of this report. The schedule sets forth the original cost, the book reserve, future accruals, the calculated annual depreciation rate and amount, and the composite remaining life related to electric plant.

EXECUTIVE SUMMARY

This report presents estimates of the cost to decommission the Virgil C. Summer Nuclear Station (VCSNS) for the selected decommissioning scenarios following the scheduled cessation of plant operations. The estimates are designed to provide South Carolina Electric & Gas Company, (SCE&G) and South Carolina Public Service Authority (Santee Cooper), the plant's owners, with sufficient information to assess their financial obligations, as they pertain to the eventual decommissioning of the nuclear unit.

The analysis relies upon site-specific, technical information from an evaluation prepared in 2012,[1] updated to reflect current assumptions pertaining to the disposition of the nuclear plant and relevant industry experience in undertaking such projects. The costs are based on several key assumptions in areas of regulation, component characterization, high-level radioactive waste management, low-level radioactive waste disposal, performance uncertainties (contingency) and site restoration requirements.

The analysis is not a detailed engineering evaluation, but estimates prepared in advance of the detailed engineering required to carry out the decommissioning of the nuclear unit. It may also not reflect the actual plan to decommission VCSNS; the plan may differ from the assumptions made in this analysis based on facts that exist at the time of decommissioning.

The plant inventory, the basis for the decontamination and dismantling requirements and cost, and the decommissioning waste streams, were reviewed for this analysis. The following structures were added to the 2012 inventory: FLEX storage building, emergency response building, and combined maintenance shop.

The costs to decommission VCSNS for the scenarios evaluated are tabulated at the end of this section. Costs are reported in 2016 dollars and include monies anticipated to be spent for radiological remediation and operating license termination, spent fuel management, and site restoration activities.

A complete discussion of the assumptions relied upon in this analysis is provided in Section 3, along with schedules of annual expenditures for each scenario. A sequence of significant project activities is provided in Section 4 with a timeline for each scenario. Detailed cost reports used to generate the summary tables contained within this document are provided in Appendices C through F.

---

1 "Decommissioning Cost Analysis for the Virgil C. Summer Nuclear Station," Document S06-1662-001, Rev. 0, TLG Services, Inc., February 2013

Consistent with the 2012 analysis, the current cost estimates assume that the shutdown of the nuclear unit is a scheduled and pre-planned event (e.g., there is no delay in transitioning the plant and workforce from operations or in obtaining regulatory relief from operating requirements, etc.). The estimates include the continued operation of the fuel handling building as an interim wet fuel storage facility for approximately seven years after operations cease. During this time period, it is assumed that the spent fuel residing in the pool that cannot be directly transferred to the Department of Energy (DOE) will be moved to an independent spent fuel storage installation (ISFSI) for interim storage.

The ISFSI will remain operational until the DOE is able to complete the transfer of the fuel to a federal facility (e.g., a monitored retrievable storage facility).[2] DOE has breached its obligations to remove fuel from reactor sites, and has also failed to provide the plant owner with information about how it will ultimately perform. DOE officials have stated that DOE does not have an obligation to accept already-canistered fuel without an amendment to DOE's contracts with plant licensees to remove the fuel (the "Standard Contract"), but DOE has not explained what any such amendment would involve. Consequently, the plant owner has no information or expectations on how DOE will remove fuel from the site in the future. In the absence of information about how DOE will perform, and for purposes of this analysis only, it is assumed that DOE will accept already-canistered fuel. (It is recognized that the canisters may not be licensed or licensable for transportation when DOE performs.) If this assumption is incorrect, it is assumed that DOE will have liability for costs incurred to transfer the fuel to DOE-supplied containers.

Alternatives and Regulations

The Nuclear Regulatory Commission (NRC) provided general decommissioning requirements in a rule adopted on June 27, 1988. [3] In this rule, the NRC set forth technical and financial criteria for decommissioning licensed nuclear facilities. The regulations addressed planning needs, timing, funding methods, and environmental review requirements for decommissioning. The rule also defined three decommissioning alternatives as being acceptable to the NRC: DECON, SAFSTOR, and ENTOMB.

---

2 Projected expenditures for spent fuel management identified in the cost analyses do not consider the outcome of the litigation with the DOE with regard to the delays incurred by the owners in the timely removal of spent fuel from the site.

3 U.S. Code of Federal Regulations, Title 10, Parts 30, 40, 50, 51, 70 and 72 "General Requirements for Decommissioning Nuclear Facilities," Nuclear Regulatory Commission, Federal Register Volume 53, Number 123 (p 24018 et seq.), June 27, 1988

DECON is defined as "the alternative in which the equipment, structures, and portions of a facility and site containing radioactive contaminants are removed or decontaminated to a level that permits the property to be released for unrestricted use shortly after cessation of operations."[4]

SAFSTOR is defined as "the alternative in which the nuclear facility is placed and maintained in a condition that allows the nuclear facility to be safely stored and subsequently decontaminated (deferred decontamination) to levels that permit release for unrestricted use."[5] Decommissioning is required to be completed within 60 years, although longer time periods will be considered when necessary to protect public health and safety.

ENTOMB is defined as "the alternative in which radioactive contaminants are encased in a structurally long-lived material, such as concrete; the entombed structure is appropriately maintained and continued surveillance is carried out until the radioactive material decays to a level permitting unrestricted release of the property."[6] As with the SAFSTOR alternative, decommissioning is currently required to be completed within 60 years, although longer time periods will also be considered when necessary to protect public health and safety.

The 60-year restriction has limited the practicality for the ENTOMB alternative at commercial reactors that generate significant amounts of long-lived radioactive material. In 1997, the Commission directed its staff to re-evaluate this alternative and identify the technical requirements and regulatory actions that would be necessary for entombment to become a viable option. The resulting evaluation provided several recommendations, however, rulemaking has been deferred pending the completion of additional research studies (e.g., on engineered barriers).

In 1996, the NRC published revisions to its general requirements for decommissioning nuclear power plants to clarify ambiguities and codify procedures and terminology as a means of enhancing efficiency and uniformity in the decommissioning process.[7] The

6 Ibid. Page FR24023, Column 2

7 U.S. Code of Federal Regulations, Title 10, Parts 2, 50, and 51, "Decommissioning of Nuclear Power Reactors," Nuclear Regulatory Commission, Federal Register Volume 61, (p 39278 et seq.), July 29, 1996

amendments allow for greater public participation and better define the transition process from operations to decommissioning. Regulatory Guide 1.184, issued in July 2000, further described the methods and procedures that are acceptable to the NRC staff for implementing the requirements of the 1996 revised rule that relate to the initial activities and the major phases of the decommissioning process. The costs and schedules presented in this analysis follow the general guidance and sequence in the amended regulations. The format and content of the estimates is also consistent with the recommendations of Regulatory Guide 1.202, issued February 2005. [8]

In 2011, the NRC published amended regulations to improve decommissioning planning and thereby reduce the likelihood that any current operating facility will become a legacy site.[9] The amended regulations require licensees to conduct their operations to minimize the introduction of residual radioactivity into the site, which includes the site's subsurface soil and groundwater. Licensees also may be required to perform site surveys to determine whether residual radioactivity is present in subsurface areas and to keep records of these surveys with records important for decommissioning. The amended regulations require licensees to report additional details in their decommissioning cost estimate as well as requiring additional financial reporting and assurances. These additional details are included in this analysis, including the ISFSI decommissioning estimate (Appendix F).

Decommissioning Scenarios

Three decommissioning scenarios were evaluated for the VCSNS nuclear unit. The scenarios selected are representative of alternatives available to the owners and are defined as follows:

1. The first scenario assumes that plant would be promptly decommissioned (DECON alternative) upon the expiration of the current operating license, i.e., in 2042. The spent fuel is relocated to the ISFSI for interim storage and to facilitate the decontamination and dismantling of the power block structures. The ISFSI will remain operational, after the plant is decommissioned, until the transfer of the spent fuel to the DOE is complete (approximately 53 years after the cessation of operations for the purpose of this estimate).

2. The second scenario assumes that the plant is placed into safe-storage (SAFSTOR alternative) upon the expiration of the current operating license, i.e., in 2042. The spent fuel is relocated to the ISFSI for interim storage and so that the plant

8 "Standard Format and Content of Decommissioning Cost Estimates for Nuclear Power Reactors," Regulatory Guide 1.202, Nuclear Regulatory Commission, February 2005

9 U.S. Code of Federal Regulations, Title 10, Parts 20, 30, 40, 50, 70, and 72, "Decommissioning Planning," Nuclear Regulatory Commission, Federal Register Volume 76, (p 35512 et seq.), June 17, 2011

systems can be drained and de-energized. Decommissioning is deferred until the spent fuel is removed from the site (approximately 53 years after the cessation of operations, consistent with the DECON alternative). The license is terminated within the required 60-year period. This alternative is designated SAFSTOR-1.

3. The third scenario assumes that the plant operates an additional 20 years. It also assumes that the plant is placed into safe-storage (SAFSTOR alternative) at the conclusion of the extended operating period, i.e., in 2062. Spent fuel remaining in the storage pool that has not been transferred to the DOE (based upon the start date assumed in Scenarios 1 and 2), is relocated to the ISFSI. The ISFSI will remain operational until the transfer of the spent fuel to the DOE is complete (approximately 47 years after the cessation of operations). The plant will remain in storage for another 7 years after the fuel is removed from the site at which time decommissioning will commence. The license is terminated within the required 60-year period. This alternative is designated SAFSTOR-2.

Methodology

The methodology used to develop the estimates follows the basic approach originally presented in the cost estimating guidelines[10] developed by the Atomic Industrial Forum (now Nuclear Energy Institute). This reference describes a unit cost factor method for estimating decommissioning activity costs. The unit cost factors used in this analysis incorporate site-specific costs and the latest available information about worker productivity in decommissioning.

An activity duration critical path is used to determine the total decommissioning program schedule. This is required for calculating the carrying costs, which include program management, administration, field engineering, equipment rental, quality assurance, and security. This systematic approach for assembling decommissioning estimates ensures a high degree of confidence in the reliability of the resulting costs.

The estimates also reflect lessons learned from TLG's involvement in the Shippingport Station Decommissioning Project, completed in 1989, as well as the decommissioning of the Cintichem reactor, hot cells and associated facilities, completed in 1997. In addition, the planning and engineering for the Rancho Seco, Trojan, Yankee Rowe, Big Rock Point, Maine Yankee, Humboldt Bay-3, Oyster Creek, Connecticut Yankee, Crystal River, San Onofre and Vermont Yankee nuclear units have provided additional insight into the process, the regulatory aspects, and the technical challenges of decommissioning commercial nuclear units.

10 T.S. LaGuardia et al., "Guidelines for Producing Commercial Nuclear Power Plant Decommissioning Cost Estimates," AIF/NESP-036, May 1986

Contingency

Consistent with cost estimating practice, contingencies are applied to the decontamination and dismantling costs developed as "specific provision for unforeseeable elements of cost within the defined project scope, particularly important where previous experience relating estimates and actual costs has shown that unforeseeable events which will increase costs are likely to occur."[11] The cost elements in the estimates are based on ideal conditions; therefore, the types of unforeseeable events that are almost certain to occur in decommissioning, based on industry experience, are addressed through a percentage contingency applied on a line-item basis. This contingency factor is a nearly universal element in all large-scale construction and demolition projects. It should be noted that contingency, as used in this analysis, does not account for price escalation and inflation in the cost of decommissioning over the remaining operating life of the station.

Contingency funds are expected to be fully expended throughout the program. As such, inclusion of contingency is necessary to provide assurance that sufficient funding will be available to accomplish the intended tasks.

Low-Level Radioactive Waste Disposal

The contaminated and activated material generated in the decontamination and dismantling of a commercial nuclear reactor is classified as low-level (radioactive) waste, although not all of the material is suitable for "shallow-land" disposal. With the passage of the "Low-Level Radioactive Waste Policy Act" in 1980,[12] and its Amendments of 1985,[13] the states became ultimately responsible for the disposition of low-level radioactive waste generated within their own borders.

South Carolina is a member of the three-state Atlantic Interstate Low-Level Radioactive Waste Management Compact, formed after South Carolina formally joined the Northeast Regional Compact. The Barnwell Low-Level Radioactive Waste Management Facility, located in South Carolina, is expected to be available to support the decommissioning of VCSNS. As such, the rate schedule for the Barnwell facility is used to generate disposal costs for the higher activity waste forms waste (Class A containerized waste, large components and Class B and C material[14]). It is also

11 Project and Cost Engineers' Handbook, Second Edition, American Association of Cost Engineers, Marcel Dekker, Inc., New York, New York, p. 239

12 "Low-Level Radioactive Waste Policy Act of 1980," Public Law 96-573, 1980

13 "Low-Level Radioactive Waste Policy Amendments Act of 1985," Public Law 99-240, 1986

14 U.S. Code of Federal Regulations, Title 10, Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste"

assumed that the owners can access other disposal sites, should it prove cost-effective. Low activity waste forms (concrete debris, dry-active waste) and metallic waste suspected of being contaminated are routed to a Tennessee-based radioactive waste processor for decontamination, volume reduction and/or disposal.

The dismantling of the components residing closest to the reactor core generates radioactive waste considered unsuitable for shallow-land disposal (i.e., low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the NRC for Class C radioactive waste (GTCC)). The Low-Level Radioactive Waste Policy Amendments Act of 1985 assigned the federal government the responsibility for the disposal of this material. The Act also stated that the beneficiaries of the activities resulting in the generation of such radioactive waste bear all reasonable costs of disposing of such waste. However, to date, the federal government has not identified a cost for disposing of GTCC or a schedule for acceptance.

For purposes of this analysis, the GTCC radioactive waste is assumed to be packaged and disposed of in a similar manner as high-level waste and at a cost equivalent to that envisioned for the spent fuel. The GTCC is packaged in the same canisters used for spent fuel and either stored on site or shipped directly to a DOE facility as it is generated (depending upon the timing of the decommissioning and whether the spent fuel has been removed from the site prior to the start of decommissioning).

A significant portion of the waste material generated during decommissioning may only be potentially contaminated by radioactive materials. This waste can be analyzed on site or shipped off site to licensed facilities for further analysis, for processing and/or for conditioning/recovery. Reduction in the volume of low-level radioactive waste requiring disposal in a licensed low-level radioactive waste disposal facility can be accomplished through a variety of methods, including analyses and surveys or decontamination to isolate the portion of waste that does not require disposal as radioactive waste, compaction, incineration or metal melt. The estimates reflect the savings from waste recovery/volume reduction.

<u>High-Level Radioactive Waste Management</u>

Congress passed the "Nuclear Waste Policy Act" (NWPA) in 1982, assigning the federal government's long-standing responsibility for disposal of the spent nuclear fuel created by the commercial nuclear generating plants to the DOE. The DOE was to begin accepting spent fuel by January 31, 1998; however, to date no progress in the removal of spent fuel from commercial generating sites has been made.

Today, the country is at an impasse on high-level waste disposal, even with the License Application for a geologic repository submitted by the DOE to the NRC in

2008. The current administration has cut the budget for the repository program while promising to "conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle … and make recommendations for a new plan."[15] Towards this goal, the administration appointed a Blue Ribbon Commission on America's Nuclear Future (Blue Ribbon Commission) to make recommendations for a new plan for nuclear waste disposal. The Blue Ribbon Commission's charter includes a requirement that it consider "[o]ptions for safe storage of used nuclear fuel while final disposition pathways are selected and deployed."[16]

On January 26, 2012, the Blue Ribbon Commission issued its "Report to the Secretary of Energy" containing a number of recommendations on nuclear waste disposal. Two of the recommendations that may impact decommissioning planning are:

- "[T]he United States [should] establish a program that leads to the timely development of one or more consolidated storage facilities"[17]
- "[T]he United States should undertake an integrated nuclear waste management program that leads to the timely development of one or more permanent deep geological facilities for the safe disposal of spent fuel and high-level nuclear waste."[18]

In January 2013, the DOE issued the "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste," in response to the recommendations made by the Blue Ribbon Commission and as "a framework for moving toward a sustainable program to deploy an integrated system capable of transporting, storing, and disposing of used nuclear fuel..."[19]

"With the appropriate authorizations from Congress, the Administration currently plans to implement a program over the next 10 years that:

18 Ibid., p.27

19 "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste," U.S. DOE, January 11, 2013

- Sites, designs and licenses, constructs and begins operations of a pilot interim storage facility by 2021 with an initial focus on accepting used nuclear fuel from shut-down reactor sites;
- Advances toward the siting and licensing of a larger interim storage facility to be available by 2025 that will have sufficient capacity to provide flexibility in the waste management system and allows for acceptance of enough used nuclear fuel to reduce expected government liabilities; and
- Makes demonstrable progress on the siting and characterization of repository sites to facilitate the availability of a geologic repository by 2048."[20]

The NRC's review of DOE's license application to construct a geologic repository at Yucca Mountain was suspended in 2011 when the Administration significantly reduced the budget for completing that work. However, the US Court of Appeals for the District of Columbia Circuit issued a writ of mandamus (in August 2013)[21] ordering NRC to comply with federal law and resume its review of DOE's Yucca Mountain repository license application to the extent allowed by previously appropriated funding for the review. That review is now complete with the publication of the five-volume safety evaluation report. A supplement to DOE's environmental impact statement and adjudicatory hearing on the contentions filed by interested parties must be completed before a licensing decision can be made.

Completion of the decommissioning process is dependent upon the DOE's ability to remove spent fuel from the site in a timely manner. DOE's repository program assumes that spent fuel allocations will be accepted for disposal from the nation's commercial nuclear plants, with limited exceptions, in the order (the "queue") in which it was discharged from the reactor.[22]

---

[20] Ibid., p.2

[21] U.S. Court of Appeals for the District Of Columbia Circuit, In Re: Aiken County, et al, Aug. 2013,http://www.cadc.uscourts.gov/internet/opinions.nsf/BAE0CF34F762EBD985257BC6004DEB18/$file/11-1271-1451347.pdf

[22] In 2008, the DOE issued a report to Congress in which it concluded that it did not have authority, under present law, to accept spent nuclear fuel for interim storage from decommissioned commercial nuclear power reactor sites. However, the Blue Ribbon Commission, in its final report, noted that: "[A]ccepting spent fuel according to the OFF [Oldest Fuel First] priority ranking instead of giving priority to shutdown reactor sites could greatly reduce the cost savings that could be achieved through consolidated storage if priority could be given to accepting spent fuel from shutdown reactor sites before accepting fuel from still-operating plants. …. The magnitude of the cost savings that could be achieved by giving priority to shutdown sites appears to be large enough (i.e., in the billions of dollars) to warrant DOE exercising its right under the Standard Contract to move this fuel first." For planning purposes only, the estimates do not assume that VCSNS, as a permanently shutdown unit, will receive priority; the fuel removal schedule assumed in this estimate is based upon DOE acceptance of fuel according to the "Oldest Fuel

For purposes of this analysis, the spent fuel management plan for 2042 shutdown scenarios assumes "just-in-time" acceptance, i.e., the DOE will be able to complete the transfer of spent fuel so as not to impede a deferred decommissioning scenario (SAFSTOR-1) and the termination of the operating license within the required 60 year period (from the cessation of operations). To achieve this objective, based upon the oldest fuel receiving the highest priority and an annual maximum rate of transfer of 3,000 metric tons of uranium, DOE would commence pickup of spent fuel from commercial generators no later than 2054, with fuel completely removed from the site by 2095 (the year prior to reactivation of the site and the start of deferred decommissioning). Different DOE acceptance schedules may result in different completion dates.

The spent fuel management plan for the SAFSTOR-2 scenario assumes the same DOE start date (2054) as the DECON and SAFSTOR-1 scenarios. Assuming that VCSNS operates until 2062, DOE will begin removing spent fuel from the site eight years prior to the cessation of plant operations and throughout the seven years of post-shutdown spent fuel pool operations. The estimate assumes that ISFSI campaigns during plant operations are suspended once DOE begins to remove fuel from the site and that the additional dry storage systems required post-shutdown to empty the pool are significantly reduced by the DOE performance.

The NRC requires that licensees establish a program to manage and provide funding for the caretaking of all irradiated fuel at the reactor site until title of the fuel is transferred to the DOE.[23] Interim storage of the fuel, until the DOE has completed the transfer, will be at an on-site ISFSI.

An ISFSI, operated under a Part 50 General License (in accordance with 10 CFR 72, Subpart K[24]), is being constructed to support continued plant operations. The facility is assumed to be available to support future decommissioning operations. As such, following the final cessation of plant operations, the fuel from the wet storage pool, including the final core, is either transferred to the DOE or packaged for interim storage at the ISFSI (depending upon the shutdown date assumed). Once the fuel handling building's wet storage pool is emptied, the building can be either decontaminated and dismantled or prepared for long-term storage.

First" priority ranking. The plant owners will seek the most expeditious means of removing fuel from the site when DOE commences performance.

23 U.S. Code of Federal Regulations, Title 10, Part 50 – Domestic Licensing of Production and Utilization Facilities, Subpart 54 (bb), "Conditions of Licenses"

24 U.S. Code of Federal Regulations, Title 10, Part 72, Subpart K, "General License for Storage of Spent Fuel at Power Reactor Sites"

SCE&G's position is that the DOE has a contractual obligation to accept the spent fuel earlier than the projections set out above consistent with its contract commitments. No assumption made in this study should be interpreted to be inconsistent with this claim. However, at this time, including the cost of storing spent fuel in this study is the most reasonable approach because it insures the availability of sufficient decommissioning funds at the end of the station's life if, contrary to its contractual obligation, the DOE has not performed earlier. The cost for the interim storage of spent fuel has been calculated and is separately presented as "Spent Fuel Management" expenditures in this report.

Site Restoration

The efficient removal of the contaminated materials at the site may result in damage to many of the site structures. Blasting, coring, drilling, and the other decontamination activities can substantially damage power block structures, potentially weakening the footings and structural supports. It is unreasonable to anticipate that these structures would be repaired and preserved after the radiological contamination is removed. The cost to dismantle site structures with a work force already mobilized is more efficient and less costly than if the process is deferred. Experience at shutdown generating stations has shown that plant facilities quickly degrade without maintenance, adding additional expense and creating potential hazards to the public and the demolition work force.

This estimate assumes that some site features will remain following the decommissioning project. These include the existing electrical switchyard, which is assumed to remain functional in support of the regional electrical distribution system. The existing shoreline will also be left intact.

Consequently, this study assumes that site structures addressed by this analysis are removed to a nominal depth of three feet below the local grade level wherever possible. The site is then graded and stabilized. The cost for the site restoration of non-essential and/or non-contaminated structures has been calculated and is separately presented as "Site Restoration" expenditures in this report.

Summary

The estimates to decommission VCSNS assume the removal of all contaminated and activated plant components and structural materials such that the owners may then have unrestricted use of the site with no further requirements for an operating license. Low-level radioactive waste, other than GTCC waste, is sent to a commercial processor for treatment/conditioning or to a controlled disposal facility.

Decommissioning is accomplished within the 60-year period required by current NRC regulations. In the interim, the spent fuel remains in storage at the site until such time that the transfer to a DOE facility is complete.

The alternatives evaluated in this analysis are described in Section 2. The assumptions are presented in Section 3, along with schedules of annual expenditures. The major cost contributors are identified in Section 6, with detailed activity costs, waste volumes, and associated manpower requirements delineated in Appendices C through F. The major cost components are also identified in the cost summary provided at the end of this section.

The cost elements in the estimates for the DECON and SAFSTOR alternatives are assigned to one of three subcategories: NRC License Termination (radiological remediation), Spent Fuel Management, and Site Restoration. The subcategory "NRC License Termination" is used to accumulate costs that are consistent with "decommissioning" as defined by the NRC in its financial assurance regulations (i.e., 10 CFR §50.75). The cost reported for this subcategory is generally sufficient to terminate the plant's operating license, recognizing that there may be some additional cost impact from spent fuel management. The License Termination cost subcategory also includes costs to decommission the ISFSI (as required by 10 CFR §72.30). Section 3.4.1 provides the basis for the ISFSI decommissioning cost delineated in Appendix F.

The "Spent Fuel Management" subcategory contains costs associated with the containerization and transfer of spent fuel from the wet storage pool to the ISFSI for interim storage, and/or directly to the DOE (SAFSTOR-2), as well as the eventual transfer of the spent fuel in storage at the ISFSI to the DOE. Costs are included for the operation of the storage pool and the management of the ISFSI until such time that the transfer is complete. It does not include any spent fuel management expenses incurred prior to the cessation of plant operations, nor does it include any costs related to the final disposal of the spent fuel.

"Site Restoration" is used to capture costs associated with the dismantling and demolition of buildings and facilities demonstrated to be free from contamination. This includes structures never exposed to radioactive materials, as well as those facilities that have been decontaminated to appropriate levels. Structures are removed to a depth of three feet and backfilled to conform to local grade.

It should be noted that the costs assigned to these subcategories are allocations. Delegation of cost elements is for the purposes of comparison (e.g., with NRC financial guidelines) or to permit specific financial treatment (e.g., Asset Retirement Obligation determinations). In reality, there can be considerable interaction between the activities in the three subcategories. For example, selected non-contaminated structures may be removed early in the project to improve access to highly contaminated facilities or plant components. In these instances, the non-contaminated removal costs could be reassigned from Site Restoration to an NRC License Termination support activity. However, in general, the allocations represent a reasonable accounting of those costs that can be expected to be incurred for the specific subcomponents of the total estimated program cost, if executed as described.

As noted within this document, the estimates were developed and costs are presented in 2016 dollars. As such, the estimates do not reflect the escalation of costs (due to inflationary and market forces) over the remaining operating life of the plant or during the decommissioning period.

DECON COST SUMMARY
DECOMMISSIONING COST ELEMENTS
(thousands of 2016 dollars)

Cost Element	Cost
Decontamination	11,582
Removal	121,160
Packaging	25,330
Transportation	6,625
Waste Disposal	71,130
Off-site Waste Processing	8,306
Program Management [1]	319,191
Site Security	196,113
Spent Fuel Pool Isolation	13,062
Spent Fuel (Direct Expenditures) [2]	192,320
Insurance and Regulatory Fees	46,838
Energy	15,468
Characterization and Licensing Surveys	25,590
Property Taxes	14,921
Miscellaneous Equipment / Site Services	7,499
Corporate Overhead	23,031
Non-Labor Overhead	10,600
Total [3]	1,108,765

Cost Element	Cost
License Termination	629,138
Spent Fuel Management	413,016
Site Restoration	66,611
Total [3]	1,108,765

[1] Includes engineering costs

[2] Excludes program management costs (staffing) but includes costs for spent fuel loading/transfer/spent fuel pool O&M and EP fees

[3] Columns may not add due to rounding

SAFSTOR-1 COST SUMMARY
DECOMMISSIONING COST ELEMENTS
(thousands of 2016 dollars)

Cost Element	Cost
Decontamination	13,671
Removal	123,209

1. INTRODUCTION

This report presents estimates of the cost to decommission the Virgil C. Summer Nuclear Station (VCSNS) for the selected decommissioning scenarios following the scheduled cessation of plant operations. The current estimates are designed to provide South Carolina Electric & Gas Company, (SCE&G) and South Carolina Public Service Authority (Santee Cooper), the plant's owners, with sufficient information to assess their financial obligations, as they pertain to the eventual decommissioning of the nuclear unit.

The analysis relies upon site-specific, technical information from an earlier evaluation prepared in 2012,[1]* updated to reflect current assumptions pertaining to the disposition of the nuclear plant and relevant industry experience in undertaking such projects. The costs are based on several key assumptions in areas of regulation, component characterization, high-level radioactive waste management, low-level radioactive waste disposal, performance uncertainties (contingency) and site restoration requirements.

The analysis is not a detailed engineering evaluation, but rather estimates prepared in advance of the detailed engineering required to carry out the decommissioning of the nuclear unit. It may also not reflect the actual plan to decommission VCSNS; the plan may differ from the assumptions made in this analysis based on facts that exist at the time of decommissioning.

The plant inventory, the basis for the decontamination and dismantling requirements and cost, and the decommissioning waste streams, were reviewed for this analysis. The following structures were added to the 2012 inventory: FLEX storage building, emergency response building, and combined maintenance shop.

1.1 OBJECTIVES OF STUDY

The objectives of this study are to prepare comprehensive estimates of the costs to decommission VCSNS, to provide a sequence or schedule for the associated activities, and to develop waste stream projections from the decontamination and dismantling activities.

VCSNS is owned by SCE&G (two-thirds) and Santee Cooper (one-third). SCE&G is a wholly-owned subsidiary of SCANA Corporation and has exclusive responsibility and control over the operation and maintenance of the nuclear unit. In August of 2002, SCE&G submitted an application to the NRC for

---

* References provided in Section 7 of the document

renewal of VCSNS's operating license (originally set to expire on August 6, 2022). The NRC approved the application on April 23, 2004, extending the term of the license an additional 20 years to August 6, 2042.

The NRC is anticipating that licensees will consider extending the operation of their nuclear power plants beyond the 60-year license renewal period and has drafted a standard review plan for such applications (NUREG-2192). It is assumed, for purposes of this study, that SCE&G will submit a "subsequent renewal application" during VCSNS's currently licensed operating life. Approval would extend permissible reactor operations to 80 years. Under this scenario, the cessation of plant operations would be August 6, 2062.

1.2 SITE DESCRIPTION

The nuclear unit is located in Fairfield County, South Carolina, approximately 26 miles northwest of Columbia. The plant site is adjacent to the manmade Monticello Reservoir which provides water requirements to the nuclear plant and a nearby pumped storage facility.

The nuclear steam supply system (NSSS), provided by the Westinghouse Electric Corporation, consists of a pressurized water reactor and a three-loop reactor coolant system (each loop with a steam generator and a reactor coolant pump). The licensed rating of the unit is 2,900 MWt. The equivalent station net electrical output is 966 MWe.

The NSSS is housed within a seismic Category I pre-stressed concrete containment structure. The containment is a steel-lined, vertical right cylindrical structure with a shallow dome roof and flat base. A welded carbon steel liner plate, anchored to the inside face of the containment, serves as a leaktight membrane.

Heat produced in the reactor is converted to electrical energy by the steam and power conversion system. A turbine-generator system converts the thermal energy of steam produced in the steam generators into mechanical shaft power and then into electrical energy. The plant's turbine-generator is a General Electric 1,800 rpm, tandem compound, four-flow, reheat unit. It consists of one high-pressure, double-flow element and two low-pressure, double-flow elements. The turbine is operated in a closed feedwater cycle which condenses the steam; the heated feedwater is returned to the steam generators. Heat rejected in the main condensers is removed by the circulating water system. The system provides the heat sink required for removal of waste heat in the power plant's thermal cycle through the plant's main condenser. Water is withdrawn from the Monticello Reservoir by three circulating water pumps located in the circulating discharge structure. The discharge from the pumps is routed into the main supply line to the plant. The main condensers are supplied with cooling water through branches from the main circulating supply line.

1.3 REGULATORY GUIDANCE

The Nuclear Regulatory Commission (NRC or Commission) provided initial decommissioning requirements in its rule "General Requirements for Decommissioning Nuclear Facilities," issued in June 1988.[2] This rule set forth financial criteria for decommissioning licensed nuclear power facilities. The regulation addressed decommissioning planning needs, timing, funding methods, and environmental review requirements. The intent of the rule was to ensure that decommissioning would be accomplished in a safe and timely manner and that adequate funds would be available for this purpose. Subsequent to the rule, the NRC issued Regulatory Guide 1.159, "Assuring the Availability of Funds for Decommissioning Nuclear Reactors,"[3] which provided additional guidance to the licensees of nuclear facilities on the financial methods acceptable to the NRC staff for complying with the requirements of the rule. The regulatory guide addressed the funding requirements and provided guidance on the content and form of the financial assurance mechanisms indicated in the rule.

The rule defined three decommissioning alternatives as being acceptable to the NRC: DECON, SAFSTOR, and ENTOMB. The DECON alternative assumes that any contaminated or activated portion of the plant's systems, structures and facilities are removed or decontaminated to levels that permit the site to be released for unrestricted use shortly after the cessation of plant operations, while the SAFSTOR and ENTOMB alternatives defer the process.

The rule also placed limits on the time allowed to complete the decommissioning process. For all alternatives, the process is restricted in overall duration to 60 years, unless it can be shown that a longer duration is necessary to protect public health and safety. At the conclusion of a 60-year dormancy period (or longer if the NRC approves such a case), the site would still require significant remediation to meet the unrestricted release limits for license termination.

The ENTOMB alternative has not been viewed as a viable option for power reactors due to the significant time required to isolate the long-lived radionuclides for decay to permissible levels. However, with rulemaking permitting the controlled release of a site,[4] the NRC did re-evaluate the alternative. The resulting feasibility study, based upon an assessment by

Pacific Northwest National Laboratory, concluded that the method did have conditional merit for some, if not most reactors. The staff also found that additional rulemaking would be needed before this option could be treated as a generic alternative.

The NRC had considered rulemaking to alter the 60-year time for completing decommissioning and to clarify the use of engineered barriers for reactor entombments.[5] However, the NRC's staff has subsequently recommended that rulemaking be deferred, based upon several factors (e.g., no licensee has committed to pursuing the entombment option, the unresolved issues associated with the disposition of greater-than-Class C material (GTCC), and the NRC's current priorities), at least until after the additional research studies are complete. The Commission concurred with the staff's recommendation.

In 1996, the NRC published revisions to the general requirements for decommissioning nuclear power plants.[6] When the decommissioning regulations were adopted in 1988, it was assumed that the majority of licensees would decommission at the end of the facility's operating licensed life. Since that time, several licensees permanently and prematurely ceased operations. Exemptions from certain operating requirements were required once the reactor was defueled to facilitate the decommissioning. Each case was handled individually, without clearly defined generic requirements. The NRC amended the decommissioning regulations in 1996 to clarify ambiguities and codify procedures and terminology as a means of enhancing efficiency and uniformity in the decommissioning process. The amendments allow for greater public participation and better define the transition process from operations to decommissioning.

Under the revised regulations, licensees will submit written certification to the NRC within 30 days after the decision to cease operations. Certification will also be required once the fuel is permanently removed from the reactor vessel. Submittal of these notices, along with related changes to Technical Specifications, entitle the licensee to a fee reduction and eliminate the obligation to follow certain requirements needed only during operation of the reactor. Within two years of submitting notice of permanent cessation of operations, the licensee is required to submit a Post-Shutdown Decommissioning Activities Report (PSDAR) to the NRC. The PSDAR describes the planned decommissioning activities, the associated sequence and schedule, and an estimate of expected costs. Prior to completing decommissioning, the licensee is required to submit an application to the NRC to terminate the license, which includes a license termination plan (LTP).

In 2011, the NRC published amended regulations to improve decommissioning planning and thereby reduce the likelihood that any current operating facility will become a legacy site.[7] The amended regulations require licensees to conduct their operations to minimize the introduction of residual radioactivity into the site, which includes the site's subsurface soil and groundwater. Licensees also may be required to perform site surveys to determine whether residual radioactivity is present in subsurface areas and to keep records of these surveys with records important for decommissioning. The amended regulations require licensees to report additional details in their decommissioning cost estimate as well as requiring additional financial reporting and assurances. These additional details, including an ISFSI decommissioning estimate, are included in this analysis.

1.3.1 High-Level Radioactive Waste Management

Congress passed the "Nuclear Waste Policy Act"[8] (NWPA) in 1982, assigning the federal government's long-standing responsibility for disposal of the spent nuclear fuel created by the commercial nuclear generating plants to the DOE. It was to begin accepting spent fuel by January 31, 1998; however, to date no progress in the removal of spent fuel from commercial generating sites has been made.

Today, the country is at an impasse on high-level waste disposal, even with the License Application for a geologic repository submitted by the DOE to the NRC in 2008. The current administration has cut the budget for the repository program while promising to "conduct a comprehensive review of policies for managing the back end of the nuclear fuel cycle … and make recommendations for a new plan." Towards this goal, the administration appointed a Blue Ribbon Commission on America's Nuclear Future (Blue Ribbon Commission) to make recommendations for a new plan for nuclear waste disposal. The Blue Ribbon Commission's charter includes a requirement that it consider "[o]ptions for safe storage of used nuclear fuel while final disposition pathways are selected and deployed."[9]

On January 26, 2012, the Blue Ribbon Commission issued its "Report to the Secretary of Energy" containing a number of recommendations on nuclear waste disposal. Two of the recommendations that may impact decommissioning planning are:

- "[T]he United States [should] establish a program that leads to the timely development of one or more consolidated storage facilities"

- "[T]he United States should undertake an integrated nuclear waste management program that leads to the timely development of one or more permanent deep geological facilities for the safe disposal of spent fuel and high-level nuclear waste"[10]

In January 2013, the DOE issued the "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste," in response to the recommendations made by the Blue Ribbon Commission and as "a framework for moving toward a sustainable program to deploy an integrated system capable of transporting, storing, and disposing of used nuclear fuel..."[11]

"With the appropriate authorizations from Congress, the Administration currently plans to implement a program over the next 10 years that:

- Sites, designs and licenses, constructs and begins operations of a pilot interim storage facility by 2021 with an initial focus on accepting used nuclear fuel from shut-down reactor sites;
- Advances toward the siting and licensing of a larger interim storage facility to be available by 2025 that will have sufficient capacity to provide flexibility in the waste management system and allows for acceptance of enough used nuclear fuel to reduce expected government liabilities; and
- Makes demonstrable progress on the siting and characterization of repository sites to facilitate the availability of a geologic repository by 2048."

The NRC's review of DOE's license application to construct a geologic repository at Yucca Mountain was suspended in 2011 when the Administration significantly reduced the budget for completing that work. However, the US Court of Appeals for the District of Columbia Circuit issued a writ of mandamus (in August 2013)[12] ordering NRC to comply with federal law and resume its review of DOE's Yucca Mountain repository license application to the extent allowed by previously appropriated funding for the review. That review is now complete with the publication of the five-volume safety evaluation report. A supplement to DOE's environmental impact statement and adjudicatory hearing on the contentions filed by interested parties must be completed before a licensing decision can be made.

Completion of the decommissioning process is dependent upon the DOE's ability to remove spent fuel from the site in a timely manner. DOE's repository program assumes that spent fuel allocations will be accepted for disposal from the nation's commercial nuclear plants, with limited exceptions, in the order (the "queue") in which it was discharged from the reactor.[13]

For purposes of this analysis, the spent fuel management plan for 2042 shutdown scenarios assumes "just-in-time" acceptance, i.e., the DOE will be able to complete the transfer of spent fuel so as not to impede a deferred decommissioning scenario (SAFSTOR-1) and the termination of the operating license within the required 60 year period (from the cessation of operations). To achieve this objective, based upon the oldest fuel receiving the highest priority and an annual maximum rate of transfer of 3,000 metric tons of uranium, DOE would commence pickup of spent fuel from commercial generators no later than 2054, with fuel completely removed from the site by 2095 (the year prior to reactivation of the site and the start of deferred decommissioning). Different DOE acceptance schedules may result in different completion dates.

The spent fuel management plan for the SAFSTOR-2 scenario assumes the same DOE start date (2054) as the DECON and SAFSTOR-1 scenarios. Assuming that VCSNS operates until 2062, DOE will begin removing spent fuel from the site eight years prior to the cessation of plant operations and throughout the seven years of post-shutdown spent fuel pool operations. The estimate assumes that ISFSI campaigns during plant operations are suspended once DOE begins to remove fuel from the site and that the additional dry storage systems required post-shutdown to empty the pool are significantly reduced by the DOE performance.

The NRC requires that licensees establish a program to manage and provide funding for the caretaking of all irradiated fuel at the reactor site until title of the fuel is transferred to the DOE.[14] Interim storage of the fuel, until the DOE has completed the transfer, will be at an on-site ISFSI.

An ISFSI, operated under a Part 50 General License (in accordance with 10 CFR 72, Subpart K[15]), is being constructed to support continued plant operations. The facility is assumed to be available to support future decommissioning operations. As such, following the final cessation of plant operations, the fuel from the wet storage pool, including the final core, is either transferred to the DOE or packaged for interim storage at the ISFSI (depending upon the shutdown date assumed). Once the fuel handling building's wet storage pool is emptied, the building can be either decontaminated and dismantled or prepared for long-term storage.

SCE&G's position is that the DOE has a contractual obligation to accept the spent fuel earlier than the projections set out above consistent with its contract commitments. No assumption made in this study should be interpreted to be inconsistent with this claim. However, at this time, including the cost of storing spent fuel in this study is the most reasonable approach because it insures the availability of sufficient decommissioning funds at the end of the station's life if, contrary to its contractual obligation, the DOE has not performed earlier.

1.3.2 Low-Level Radioactive Waste Disposal

The contaminated and activated material generated in the decontamination and dismantling of a commercial nuclear reactor is classified as low-level (radioactive) waste, although not all of the material is suitable for "shallow-land" disposal. With the passage of the "Low-Level Radioactive Waste Policy Act" in 1980,[16] and its Amendments of 1985,[17] the states became ultimately responsible for the disposition of low-level radioactive waste generated within their own borders.

South Carolina is a member of the three-state Atlantic Interstate Low-Level Radioactive Waste Management Compact, formed after South Carolina formally joined the Northeast Regional Compact. The Barnwell Low-Level Radioactive Waste Management Facility, located in South Carolina, is expected to be available to support the decommissioning of VCSNS. As such, the rate schedule for the Barnwell facility is used to generate disposal costs for the higher activity waste forms waste (Class A containerized waste, large components and Class B and C material[18]). It is also assumed that the owners can access other disposal sites, should it prove cost-effective. Low activity waste forms (concrete debris, dry-active waste) and metallic waste suspected of being contaminated are routed to a Tennessee-based radioactive waste processor for decontamination, volume reduction and/or disposal.

The dismantling of the components residing closest to the reactor core generates radioactive waste considered unsuitable for shallow-land disposal (i.e., low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the NRC for Class C radioactive waste (GTCC)). The Low-Level Radioactive Waste Policy Amendments Act of 1985 assigned the federal government the responsibility for the disposal of this material. The Act also stated that the beneficiaries of the activities resulting in the generation of such radioactive waste bear all reasonable costs of disposing of such waste. However, to date, the federal government has not identified a cost for disposing of GTCC or a schedule for acceptance.

For purposes of this analysis, the GTCC radioactive waste is assumed to be packaged and disposed of in a similar manner as high-level waste and at a cost equivalent to that envisioned for the spent fuel. The GTCC is packaged in the same canisters used for spent fuel and either stored on site or shipped directly to a DOE facility as it is generated (depending upon the timing of the decommissioning and whether the spent fuel has been removed from the site prior to the start of decommissioning).

A significant portion of the waste material generated during decommissioning may only be potentially contaminated by radioactive materials. This waste can be analyzed on site or shipped off site to licensed facilities for further analysis, for processing and/or for conditioning/recovery. Reduction in the volume of low-level radioactive waste requiring disposal in a licensed low-level radioactive waste disposal facility can be accomplished through a variety of methods, including analyses and surveys or decontamination to isolate the portion of waste that does not require disposal as radioactive waste, compaction, incineration or metal melt. The estimates reflect the savings from waste recovery/volume reduction.

1.3.3 Radiological Criteria for License Termination

In 1997, the NRC published Subpart E, "Radiological Criteria for License Termination,"[19] amending 10 CFR Part 20. This subpart provides radiological criteria for releasing a facility for unrestricted use. The regulation states that the site can be released for unrestricted use if radioactivity levels are such that the average member of a critical group would not receive a Total Effective Dose Equivalent (TEDE) in excess of 25 millirem per year, and provided that residual radioactivity has been reduced to levels that are As Low As Reasonably Achievable (ALARA). The decommissioning estimates assume that the VCSNS site will be remediated to a residual level consistent with the NRC-prescribed level.

It should be noted that the NRC and the Environmental Protection Agency (EPA) differ on the amount of residual radioactivity considered acceptable in site remediation. The EPA has two limits that apply to radioactive materials. An EPA limit of 15 millirem per year is derived from criteria established by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund).[20] An additional and separate limit of 4 millirem per year, as defined in 40 CFR §141.16, is applied to drinking water.[21]

On October 9, 2002, the NRC signed an agreement with the EPA on the radiological decommissioning and decontamination of NRC-licensed sites. The Memorandum of Understanding (MOU)[22] provides that EPA will defer exercise of authority under CERCLA for the majority of facilities decommissioned under NRC authority. The MOU also includes provisions for NRC and EPA consultation for certain sites when, at the time of license termination, (1) groundwater contamination exceeds EPA-permitted levels; (2) NRC contemplates restricted release of the site; and/or (3) residual radioactive soil concentrations exceed levels defined in the MOU.

The MOU does not impose any new requirements on NRC licensees and should reduce the involvement of the EPA with NRC licensees who are decommissioning. Most sites are expected to meet the NRC criteria for unrestricted use, and the NRC believes that only a few sites will have groundwater or soil contamination in excess of the levels specified in the MOU that trigger consultation with the EPA. However, if there are other hazardous materials on the site, the EPA may be involved in the cleanup. As such, the possibility of dual regulation remains for certain licensees. The present study does not include any costs for this occurrence.

2. DECOMMISSIONING ALTERNATIVES

Detailed cost estimates were developed to decommission VCSNS based upon the NRC-approved decommissioning alternatives DECON and SAFSTOR. Although the alternatives differ with respect to technique, process, cost, and schedule, they attain the same result: the ultimate release of the site for unrestricted use.

Three decommissioning scenarios were evaluated for the VCSNS nuclear unit. The scenarios selected are representative of alternatives available to the owners and are defined as follows:

1. The first scenario assumes that plant would be promptly decommissioned (DECON alternative) upon the expiration of the current operating license, i.e., in 2042. The spent fuel is relocated to the ISFSI for interim storage and to facilitate the decontamination and dismantling of the power block structures. The ISFSI will remain operational, after the plant is decommissioned, until the transfer of the spent fuel to the DOE is complete (approximately 53 years after the cessation of operations for the purpose of this estimate).

2. The second scenario assumes that the plant is placed into safe-storage (SAFSTOR alternative) upon the expiration of the current operating license, i.e., in 2042. The spent fuel is relocated to the ISFSI for interim storage and so that the plant systems can be drained and de-energized. Decommissioning is deferred until the spent fuel is removed from the site (approximately 53 years after the cessation of operations, consistent with the DECON alternative). The license is terminated within the required 60-year period. This alternative is designated SAFSTOR-1.

3. The third scenario assumes that the plant operates an additional 20 years. It also assumes that the plant is placed into safe-storage (SAFSTOR alternative) at the conclusion of the extended operating period, i.e., in 2062. Spent fuel remaining in the storage pool that has not been transferred to the DOE (based upon the start date assumed in Scenarios 1 and 2), is relocated to the ISFSI. The ISFSI will remain operational until the transfer of the spent fuel to the DOE is complete (approximately 47 years after the cessation of operations). The plant will remain in storage for another 7 years after the fuel is removed from the site at which time decommissioning will commence. The license is terminated within the required 60-year period. This alternative is designated SAFSTOR-2.

The following sections describe the basic activities associated with each alternative. Although detailed procedures for each activity identified are not provided, and the actual sequence of work may vary, the activity descriptions provide a basis not only for estimating but also for the expected scope of work, i.e., engineering and planning at the time of decommissioning.

The conceptual approach that the NRC has described in its regulations divides decommissioning into three phases. The initial phase commences with the effective date of permanent cessation of operations and involves the transition of both plant and licensee from reactor operations (i.e., power production) to facility de-activation and closure. During the first phase, notification is to be provided to the NRC certifying the permanent cessation of operations and the removal of fuel from the reactor vessel. The licensee is then prohibited from reactor operation.

The second phase encompasses activities during the storage period or during major decommissioning activities, or a combination of the two. The third phase pertains to the activities involved in license termination. The decommissioning estimates developed for VCSNS are also divided into phases or periods; however, demarcation of the phases is based upon major milestones within the project or significant changes in the projected expenditures.

2.1 DECON

The DECON alternative, as defined by the NRC, is "the alternative in which the equipment, structures, and portions of a facility and site containing radioactive contaminants are removed or decontaminated to a level that permits the property to be released for unrestricted use shortly after cessation of operations." This study does not address the cost to dispose of the spent fuel residing at the site; such costs are funded through a surcharge on electrical generation. However, the study does estimate the costs incurred with the interim on-site storage of the fuel pending shipment by the DOE to an off-site disposal facility. Those costs are separately presented as "Spent Fuel Management Expenditures" in this report.

2.1.1 Period 1 - Preparations

In anticipation of the cessation of plant operations, detailed preparations are undertaken to provide a smooth transition from plant operations to site decommissioning. Through implementation of a staffing transition plan, the organization required to manage the intended decommissioning activities is assembled from available plant staff and outside resources. Preparations include the planning for permanent defueling of the reactor, revision of technical specifications applicable to the operating conditions and requirements, a characterization of the facility and major components, and the development of the PSDAR.

Engineering and Planning

The PSDAR, required prior to or within two years of permanent cessation of operations, provides a description of the licensee's planned decommissioning activities, a timetable, a site-specific decommissioning cost estimate, and the associated financial requirements of the intended decommissioning program. Upon receipt of the PSDAR, the NRC will make the document available to the public for comment in a local hearing to be held in the vicinity of the reactor site. Ninety days following submittal and NRC receipt of the PSDAR, the licensee may begin to perform major decommissioning activities under a modified 10 CFR §50.59 procedure, i.e., without specific NRC approval. Major activities are defined as any activity that results in permanent removal of major radioactive components, permanently modifies the structure of the containment, or results in dismantling components (for shipment) containing GTCC, as defined by 10 CFR §61. Major components are further defined as comprising the reactor vessel and internals, large bore reactor coolant system piping, and other large components that are radioactive. The NRC includes the following additional criteria for use of the §50.59 process in decommissioning. The proposed activity must not:

- foreclose release of the site for possible unrestricted use,
- significantly increase decommissioning costs,
- cause any significant environmental impact, or
- violate the terms of the licensee's existing license

Existing operational technical specifications are reviewed and modified to reflect plant conditions and the safety concerns associated with permanent cessation of operations. The environmental impact associated with the planned decommissioning activities is also considered. Typically, a licensee will not be allowed to proceed if the consequences of a particular decommissioning activity are greater than that bounded by previously evaluated environmental assessments or impact statements. In this instance, the licensee would have to submit a license amendment for the specific activity and update the environmental report.

The decommissioning program outlined in the PSDAR will be designed to accomplish the required tasks within the ALARA guidelines (as defined in 10 CFR §20) for protection of personnel from exposure to radiation hazards. It will also address the continued protection of the health and safety of the public and the environment during the dismantling activity. Consequently, with the development of the

PSDAR, activity specifications, cost-benefit and safety analyses, work packages, and procedures, would be assembled to support the proposed decontamination and dismantling activities.

Site Preparations

Following final plant shutdown, and in preparation for actual decommissioning activities, the following activities are initiated:

- Characterization of the site and surrounding environs. This includes radiation surveys of work areas, major components (including the reactor vessel and its internals), internal piping, and biologic shield cores.
- An ISFSI is being constructed to support continued plant operation and will need to be expanded following the cessation of operations to offload the spent fuel pool in support of the decommissioning program.
- Isolation of the spent fuel storage pool and fuel handling systems, such that decommissioning operations can commence on the balance of the plant. The pool will remain operational for approximately seven years following the cessation of operations. During this time period, it is assumed that the spent fuel residing in the pool that cannot be directly transferred to the DOE will be moved to an ISFSI for interim storage.
- Specification of transport and disposal requirements for activated materials and/or hazardous materials, including shielding and waste stabilization.
- Development of procedures for occupational exposure control, control and release of liquid and gaseous effluent, processing of radwaste (including dry-active waste, resins, filter media, metallic and non-metallic components generated in decommissioning), site security and emergency programs, and industrial safety.

2.1.2 Period 2 - Decommissioning Operations

This period includes the physical decommissioning activities associated with the removal and disposal of contaminated and activated components and structures, including the successful release of the site from the 10 CFR §50 operating license, exclusive of the ISFSI. Significant decommissioning activities in this phase include:

- Construction of temporary facilities and/or modification of existing facilities to support dismantling activities. For example, this will include a centralized processing area to facilitate equipment removal and component preparations for off-site disposal.
- Reconfiguration and modification of site structures and facilities as needed to support decommissioning operations. This will include the upgrading of roads (on- and off-site) to facilitate hauling and transport. Modifications will be required to the containment structure to facilitate access of large/heavy equipment. Modifications will also be required to the refueling area of the building to support the segmentation of the reactor vessel internals and component extraction.
- Transfer of the spent fuel from the storage pool to the ISFSI pad.
- Design and fabrication of temporary and permanent shielding to support removal and transportation activities, construction of contamination control envelopes, and the procurement of specialty tooling.
- Procurement (lease or purchase) of shipping casks, cask liners, and industrial packages.
- Decontamination of components and piping systems as required to control (minimize) worker exposure.
- Removal of piping and components no longer essential to support decommissioning operations.
- Removal of control rod drive housings and the head service structure from reactor vessel head. Segmentation of the vessel closure head.
- Removal and segmentation of the upper internals assemblies. Segmentation will maximize the loading of the shielded transport casks, i.e., by weight and activity. The operations are conducted under water using remotely operated tooling and contamination controls.
- Disassembly and segmentation of the remaining reactor internals, including the core former and lower core support assembly. Some material is expected to exceed Class C disposal requirements. As such, the segments will be packaged in modified fuel storage canisters for geologic disposal.
- Segmentation of the reactor vessel. A shielded platform is installed for segmentation as cutting operations are performed in-air using remotely operated equipment within a contamination control envelope. The water level is maintained just below the cut to

minimize the working area dose rates. Segments are transferred in-air to containers that are stored under water, for example, in an isolated area of the refueling canal.

- Removal of the activated portions of the concrete biological shield and accessible contaminated concrete surfaces. If dictated by the steam generator and pressurizer removal scenarios, those portions of the associated cubicles necessary for access and component extraction are removed.
- Removal of the steam generators and pressurizer for material recovery and controlled disposal. These components can serve as their own burial containers provided that all penetrations are properly sealed and the internal contaminants are stabilized, e.g., with grout. Steel shielding will be added, as necessary, to those external areas of the package to meet transportation limits and regulations.
- Spent fuel storage operations continue throughout the active decommissioning period.

At least two years prior to the anticipated date of license termination, an LTP is required. Submitted as a supplement to the Final Safety Analysis Report (FSAR) or its equivalent, the plan must include: a site characterization, description of the remaining dismantling activities, plans for site remediation, procedures for the final radiation survey, designation of the end use of the site, an updated cost estimate to complete the decommissioning, and any associated environmental concerns. The NRC will notice the receipt of the plan, make the plan available for public comment, and schedule a local hearing. LTP approval will be subject to any conditions and limitations as deemed appropriate by the Commission. The licensee may then commence with the final remediation of site facilities and services, including:

- Removal of remaining plant systems and associated components as they become nonessential to the decommissioning program or worker health and safety (e.g., waste collection and treatment systems, electrical power and ventilation systems).
- Removal of the steel liners from refueling canal and spent fuel storage pool, disposing of the activated and contaminated sections as radioactive waste. Removal of any activated/ contaminated concrete.
- Surveys of the decontaminated areas of the containment structure.

- Remediation and removal of the contaminated equipment and material from the auxiliary and fuel buildings and any other contaminated facility. Radiation and contamination controls will be utilized until residual levels indicate that the structures and equipment can be released for unrestricted access and conventional demolition. This activity may necessitate the dismantling and disposition of most of the systems and components (both clean and contaminated) located within these buildings. This activity facilitates surface decontamination and subsequent verification surveys required prior to obtaining release for demolition.
- Removal of the remaining components, equipment, and plant services in support of the area release survey(s).
- Routing of material removed in the decontamination and dismantling to a central processing area. Material certified to be free of contamination is released for unrestricted disposition, e.g., as scrap, recycle, or general disposal. Contaminated material is characterized and segregated for additional off-site processing (disassembly, chemical cleaning, volume reduction, and waste treatment), and/or packaged for controlled disposal at a low-level radioactive waste disposal facility.

Incorporated into the LTP is the Final Survey Plan. This plan identifies the radiological surveys to be performed once the decontamination activities are completed and is developed using the guidance provided in the "Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM)."[23] This document incorporates the statistical approaches to survey design and data interpretation used by the EPA. It also identifies commercially available instrumentation and procedures for conducting radiological surveys. Use of this guidance ensures that the surveys are conducted in a manner that provides a high degree of confidence that applicable NRC criteria are satisfied. Once the survey is complete, the results are provided to the NRC in a format that can be verified. The NRC then reviews and evaluates the information, performs an independent confirmation of radiological site conditions, and makes a determination on the requested change to the operating license (that would release the property, exclusive of the ISFSI, for unrestricted use).

The NRC will amend the operating license to reduce the licensed area to the ISFSI area if it determines that site remediation has been performed in accordance with the LTP, and that the terminal radiation survey and associated documentation demonstrate that the property (exclusive of the ISFSI) is suitable for release.

2.1.3 Period 3 - Site Restoration

Following completion of decommissioning operations, site restoration activities can begin. Efficient removal of the contaminated materials and verification that residual radionuclide concentrations are below the NRC limits will result in substantial damage to many of the structures. Although performed in a controlled, safe manner, blasting, coring, drilling, scarification (surface removal), and the other decontamination activities will substantially degrade power block structures including the reactor, fuel handling, radioactive waste, solidification facility and condensate polishing buildings. Under certain circumstances, verifying that subsurface radionuclide concentrations meet NRC site release requirements will require removal of grade slabs and lower floors, potentially weakening footings and structural supports. This removal activity will be necessary for those facilities and plant areas where historical records, when available, indicate the potential for radionuclides having been present in the soil, where system failures have been recorded, or where it is required to confirm that subsurface process and drain lines were not breached over the operating life of the station.

It is not currently anticipated that these structures would be repaired and preserved after the radiological contamination is removed. The cost to dismantle site structures with a work force already mobilized on site is more efficient than if the process is deferred.

Dismantling of site structures following decommissioning is clearly the most appropriate and cost-effective option. It is unreasonable to anticipate that these structures would be repaired and preserved after the radiological contamination is removed. The effort to dismantle site structures with a work force already mobilized on site is more efficient than if the process were deferred. Site facilities quickly degrade without maintenance, adding additional expense and creating potential hazards to the public as well as to future workers. Abandonment creates a breeding ground for vermin infestation as well as other biological hazards.

This cost study presumes that site structures and other facilities are dismantled as a continuation of the decommissioning activity. Foundations and exterior walls are removed to a nominal depth of three feet below grade. The three-foot depth allows for the placement of gravel for drainage, as well as topsoil, so that vegetation can be established for erosion control. Site areas affected by the dismantling activities are restored and the plant area graded as required to prevent ponding and inhibit the refloating of subsurface materials.

Non-contaminated concrete rubble produced by demolition activities is processed to remove reinforcing steel and miscellaneous embedments. The processed material is then used on site to backfill foundation voids. Excess non-contaminated materials are trucked to an off-site area for disposal as construction debris.

2.1.4 ISFSI Operations and Decommissioning

For purposes only of this estimate, transfer of spent fuel to a DOE repository or interim facility is assumed to be exclusively from the ISFSI once the fuel pool has been emptied and the fuel handling building released for decommissioning. If this assumption is incorrect, it is assumed that DOE will have liability for costs incurred to transfer the fuel to DOE-supplied containers and to dispose of existing containers. The ISFSI will continue to operate under a general license (10 CFR Part 50) following the amendment of the operating license to release the adjacent (power block) property.

Assuming the DOE starts accepting fuel from VCSNS in 2054, transfer of spent fuel from the ISFSI is anticipated to continue through the year 2095. This assumption is made for purposes of this estimate, although it is acknowledged that the plant owner will seek the most expeditious means of removing fuel from the site when DOE commences performance.

At the conclusion of the spent fuel transfer process, the ISFSI will be decommissioned. The Commission will terminate the Part 50 license if it determines that the remediation of the ISFSI has been performed in accordance with an ISFSI license termination plan and that the final radiation survey and associated documentation demonstrate that the facility is suitable for release. Once the requirements are satisfied, the NRC can terminate the license for the ISFSI.

The design of the ISFSI is based upon the use of a multi-purpose canister and a vertical concrete module/overpack for pad storage. It is assumed that once the canisters containing the spent fuel assemblies have been removed, any required decontamination is performed on the storage modules (some minor neutron activation is assumed), and the license for the facility terminated, the modules can be dismantled using conventional techniques for the demolition of reinforced concrete. The concrete storage pad is then removed and the area regraded.

2.2 SAFSTOR

The NRC defines SAFSTOR as "the alternative in which the nuclear facility is placed and maintained in a condition that allows the nuclear facility to be safely stored and subsequently decontaminated (deferred decontamination) to levels that permit release for unrestricted use." The facility is left intact (during the dormancy period), with structures maintained in a sound condition. Systems that are not required to support the spent fuel pool or site surveillance and security are drained, de-energized, and secured. Minimal cleaning/removal of loose contamination and/or fixation and sealing of remaining contamination are performed. Access to contaminated areas is secured to provide controlled access for inspection and maintenance.

The engineering and planning requirements are similar to those for the DECON alternative, although a shorter time period is expected for these activities due to the more limited work scope. Site preparations are also similar to those for the DECON alternative. However, with the exception of the required radiation surveys and site characterizations, the mobilization and preparation of site facilities is less extensive.

The SAFSTOR-2 cost estimate is based upon VCSNS operating for an additional 20 years. It is not expected that this additional operating time will have significant cost impacts, other than the change to the spent fuel disposal schedule and associated capital purchases for spent fuel storage cask and transfer costs, and a slight increase in the disposal cost for the reactor vessel and internals due to increased neutron activation.

2.2.1 Period 1 - Preparations

Preparations for long-term storage include the planning for permanent defueling of the reactor, revision of technical specifications appropriate to the operating conditions and requirements, a characterization of the facility and major components, and the development of the PSDAR.

The process of placing the plant in safe-storage includes, but is not limited to, the following activities:

- Isolation of the spent fuel storage services and fuel handling systems so that safe-storage operations may commence on the balance of the plant. This activity may be carried out by plant personnel in accordance with existing operating technical specifications. Activities are scheduled around the fuel handling systems to the greatest extent possible.
- Transferring the spent fuel from the storage pool to the DOE or to the ISFSI, following the minimum required cooling period in the spent fuel pool.
- Draining and de-energizing of the non-contaminated systems not required to support continued site operations or maintenance.
- Disposing of contaminated filter elements and resin beds not required for processing wastes from layup activities for future operations.
- Draining of the reactor vessel, with the internals left in place and the vessel head secured.
- Draining and de-energizing non-essential, contaminated systems with decontamination as required for future maintenance and inspection.
- Preparing lighting and alarm systems whose continued use is required; de-energizing portions of fire protection, electric power, and HVAC systems whose continued use is not required.
- Cleaning of the loose surface contamination from building access pathways.
- Performing an interim radiation survey of plant, posting warning signs where appropriate.
- Erecting physical barriers and/or securing all access to radioactive or contaminated areas, except as required for inspection and maintenance.
- Installing security and surveillance monitoring equipment and relocating security fence around secured structures, as required.

2.2.2 Period 2 - Dormancy

The second phase identified by the NRC in its rule addresses licensed activities during a storage period and is applicable to the dormancy phases of the deferred decommissioning alternatives. Dormancy activities include a 24-hour security force, preventive and corrective maintenance on security systems, area lighting, general building maintenance, heating and ventilation of buildings, routine radiological inspections of contaminated structures, maintenance of structural integrity, and a site environmental and radiation monitoring program. Resident maintenance personnel perform equipment maintenance, inspection activities, routine services to maintain safe conditions, adequate lighting, heating, and ventilation, and periodic preventive maintenance on essential site services.

An environmental surveillance program is carried out during the dormancy period to ensure that releases of radioactive material to the environment are prevented or detected and controlled. Appropriate emergency procedures are established and initiated for potential releases that exceed prescribed limits. The environmental surveillance program constitutes an abbreviated version of the program in effect during normal plant operations.

Security during the dormancy period is conducted primarily to protect the spent nuclear fuel while it is on site, prevent unauthorized entry, and to protect the public from the consequences of their own actions. The security fence, sensors, alarms, and other surveillance equipment provide security. Fire and radiation alarms are also monitored and maintained. While remote surveillance is an option, it does not offer the immediate response time of a physical presence.

Consistent with the DECON scenario, the spent fuel storage pool is emptied within seven years of the cessation of operations. It is assumed that the transfer of the spent fuel from the site to the DOE begins in 2054. The transfer continues throughout the dormancy period until completed in 2095. This assumption is made for purposes of this estimate, although it is acknowledged that the plant owner will seek the most expeditious means of removing fuel from the site when DOE commences performance. If the assumption of transfer of fuel from the ISFSI to DOE is incorrect, it is assumed that DOE will have liability for costs incurred to transfer the fuel to DOE-supplied containers and to dispose of existing containers. Once emptied, the ISFSI is secured for storage and decommissioned along with the power block structures in Period 4.

After a period of storage (such that license termination is accomplished within 60 years of final shutdown), it is required that the licensee submit an application to terminate the license, along with a LTP (described in Section 2.1.2), thereby initiating the third phase.

2.2.3 Periods 3 and 4 - Delayed Decommissioning

Prior to the commencement of decommissioning operations, preparations are undertaken to reactivate site services and prepare for decommissioning. Preparations include engineering and planning, a detailed site characterization, and the assembly of a decommissioning management organization. Final planning and the assembly of activity specifications and detailed work procedures are also initiated at this time.

Much of the work in developing a termination plan is relevant to the development of the detailed engineering plans and procedures. The activities associated with this phase and the follow-on decontamination and dismantling processes are detailed in Sections 2.1.1 and 2.1.2. The primary difference between the sequences anticipated for the DECON and this deferred scenario is the absence, in the latter, of any constraint on the dismantling process due to the operation of the spent fuel pool in the DECON option.

Variations in the length of the dormancy period are expected to have some effect upon the quantities of radioactive wastes generated from system and structure removal operations. Given the levels of radioactivity and spectrum of radionuclides expected from sixty to eighty years of plant operation, no plant process system identified as being contaminated upon final shutdown will become releasable due to the decay period alone. However, due to the lower activity levels, a greater percentage of the waste volume can be designated for off-site processing and recovery.

The delay in decommissioning also yields lower working area radiation levels. As such, the estimate for this delayed scenario incorporates reduced ALARA controls for the SAFSTOR's lower occupational exposure potential.

Although the initial radiation levels due to ^{60}Co will substantially decrease during the dormancy period, the internal components of the reactor vessel will still exhibit sufficiently high radiation dose rates to require remote sectioning under water due to the presence of long-lived radionuclides such as ^{94}Nb, ^{59}Ni, and ^{63}Ni. Therefore, the dismantling procedures described for the DECON alternative would still be employed during this scenario. Portions of the biological shield will still be radioactive due to the presence of activated trace elements with long half-lives (^{152}Eu and ^{154}Eu). Decontamination will require controlled removal and disposal. It is assumed that radioactive corrosion products on inner surfaces of piping and components will not have decayed to levels that will permit unrestricted use or allow conventional removal. These systems and components will be surveyed as they are removed and disposed of in accordance with the existing radioactive release criteria.

2.2.4 Period 5 - Site Restoration

Following completion of decommissioning operations, site-restoration activities begin. Dismantling, as a continuation of the decommissioning process is a cost-effective option, as described in Section 2.1.3. The basis for the dismantling cost is consistent with that described for DECON, presuming the removal of structures and site facilities to a nominal depth of three feet below grade and the limited restoration of the site.

3. COST ESTIMATES

The cost estimates prepared for decommissioning VCSNS consider the unique features of the site, including the nuclear steam supply system, electric power generating systems, structures, and supporting facilities. The basis of the estimates, including the sources of information relied upon, the estimating methodology employed, site-specific considerations, and other pertinent assumptions, is described in this section.

3.1 BASIS OF ESTIMATES

The current estimates were developed using the site-specific, technical information relied upon in the decommissioning analysis prepared in 2012. This information was reviewed for the current analysis and updated as deemed appropriate. Review of systems and structural information confirmed that, with the exception of the new FLEX storage building, emergency response building, and combined maintenance shop, there were no substantive changes, over the four year period to the configuration of the plant or site facilities that would impact decommissioning. The site-specific considerations and assumptions used in the previous evaluation were also revisited. Modifications were incorporated where new information was available or experience from ongoing decommissioning programs provided viable alternatives or improved processes.

3.2 METHODOLOGY

The methodology used to develop the estimates follows the basic approach originally presented in the AIF/NESP-036 study report, "Guidelines for Producing Commercial Nuclear Power Plant Decommissioning Cost Estimates,"[24] and the DOE "Decommissioning Handbook."[25] These documents present a unit factor method for estimating decommissioning activity costs, which simplifies the estimating calculations. Unit factors for concrete removal ($/cubic yard), steel removal ($/ton), and cutting costs ($/inch) are developed using local labor rates. The activity-dependent costs are estimated with the item quantities (cubic yards and tons), developed from plant drawings and inventory documents. Removal rates and material costs for the conventional disposition of components and structures rely upon information available in the industry publication, "Building Construction Cost Data," published by R.S. Means.[26]

The unit factor method provides a demonstrable basis for establishing reliable cost estimates. The detail provided in the unit factors, including activity duration, labor costs (by craft), and equipment and consumable costs, ensures that essential elements have not been omitted. Appendix A presents the detailed development of a typical unit factor. Appendix B provides the values contained within one set of factors developed for this analysis.

This analysis reflects lessons learned from TLG's involvement in the Shippingport Station Decommissioning Project, completed in 1989, as well as the decommissioning of the Cintichem reactor, hot cells, and associated facilities, completed in 1997. In addition, the planning and engineering for the Rancho Seco, Trojan, Yankee Rowe, Big Rock Point, Maine Yankee, Humboldt Bay-3, Oyster Creek, Connecticut Yankee, Crystal River, San Onofre and Vermont Yankee nuclear units have provided additional insight into the process, the regulatory aspects, and the technical challenges of decommissioning commercial nuclear units.

Work Difficulty Factors

TLG has historically applied work difficulty adjustment factors (WDFs) to account for the inefficiencies in working in a power plant environment. WDFs are assigned to each unique set of unit factors, commensurate with the inefficiencies associated with working in confined, hazardous environments. The ranges used for the WDFs are as follows:

- Access Factor 10% to 20%
- Respiratory Protection Factor 10% to 50%
- Radiation/ALARA Factor 10% to 37%
- Protective Clothing Factor 10% to 30%
- Work Break Factor 8.33%

The factors and their associated range of values were developed in conjunction with the AIF/NESP-036 study. The application of the factors is discussed in more detail in that publication.

Scheduling Program Durations

The unit factors, adjusted by the WDFs as described above, are applied against the inventory of materials to be removed in the radiological controlled areas. The resulting labor-hours, or crew-hours, are used in the development of the decommissioning program schedule, using resource loading and event sequencing considerations. The scheduling of conventional removal and dismantling activities is based upon productivity information available from the "Building Construction Cost Data" publication. In the DECON alternative, dismantling of the fuel handing building systems and decontamination of the spent fuel pool is also dependent upon the timetable for the transfer of the spent fuel assemblies from the pool to the ISFSI.

An activity duration critical path is used to determine the total decommissioning program schedule. The schedule is relied upon in calculating the carrying costs, which include program management, administration, field engineering, equipment rental, and support services such as quality control and security. This systematic approach for assembling decommissioning estimates ensures a high degree of confidence in the reliability of the resulting costs.

3.3 FINANCIAL COMPONENTS OF THE COST MODEL

TLG's proprietary decommissioning cost model, DECCER, produces a number of distinct cost elements. These direct expenditures, however, do not comprise the total cost to accomplish the project goal, i.e., license termination, spent fuel management and site restoration.

3.3.1 Contingency

Inherent in any cost estimate that does not rely on historical data is the inability to specify the precise source of costs imposed by factors such as tool breakage, accidents, illnesses, weather delays, and labor stoppages. In the DECCER cost model, contingency fulfills this role. Contingency is added to each line item to account for costs that are difficult or impossible to develop analytically. Such costs are historically inevitable over the duration of a job of this magnitude; therefore, this cost analysis includes funds to cover these types of expenses.

The activity- and period-dependent costs are combined to develop the total decommissioning cost. A contingency is then applied on a line-item basis, using one or more of the contingency types listed in the AIF/NESP-036 study. "Contingencies" are defined in the American Association of Cost Engineers "Project and Cost Engineers' Handbook"[27] as "specific provision for unforeseeable elements of cost within the defined project scope; particularly important where previous experience relating estimates and actual costs has shown that unforeseeable events which will increase costs are likely to occur." The cost elements in this analysis are based upon ideal conditions and maximum efficiency; therefore, consistent with industry practice, contingency is included. In the AIF/NESP-036 study, the types of unforeseeable events that are likely to occur in decommissioning are discussed and guidelines are provided for a contingency percentage in each category. It should be noted that contingency, as used in this analysis, does not account for price escalation and inflation in the cost of decommissioning over the remaining operating life of the station.

The use and role of contingency within decommissioning estimates is not a "safety factor issue." Safety factors provide additional security and address situations that may never occur. Contingency funds are expected to be fully expended throughout the program. They also provide assurance that sufficient funding is available to accomplish the intended tasks. An estimate without contingency, or from which contingency has been removed, can disrupt the orderly progression of events and jeopardize a successful conclusion to the decommissioning process.

For example, the most technologically challenging task in decommissioning a commercial nuclear plant is the disposition of the reactor vessel and internal components, now highly radioactive after a lifetime of exposure to core activity. The disposition of these components forms the basis of the critical path (schedule) for decommissioning operations. Cost and schedule are interdependent, and any deviation in schedule has a significant impact on cost for performing a specific activity.

Disposition of the reactor vessel internals involves the underwater cutting of complex components that are highly radioactive. Costs are based upon optimum segmentation, handling, and packaging scenarios. The schedule is primarily dependent upon the turnaround time for the heavily shielded shipping casks, including preparation, loading, and decontamination of the containers for transport. The number of casks required is a function of the pieces generated in the segmentation activity, a value calculated on optimum performance of the tooling employed in cutting the various subassemblies. The expected optimization, however, may not be achieved, resulting in delays and additional program costs. For this reason, contingency must be included to mitigate the consequences of the expected inefficiencies inherent in this complex activity, along with related concerns associated with the operation of highly specialized tooling, field conditions, and water clarity.

Contingency funds are an integral part of the total cost to complete the decommissioning process. Exclusion of this component puts at risk a successful completion of the intended tasks and, potentially, subsequent related activities. For this study, TLG examined the major activity-related problems (decontamination, segmentation, equipment handling, packaging, transport, and waste disposal) that necessitate a contingency. Individual activity contingencies ranged from 10% to 75%, depending on the degree of difficulty judged to be appropriate from TLG's actual decommissioning experience. The contingency values used in this study are as follows:

- Decontamination 50%
- Contaminated Component Removal 25%
- Contaminated Component Packaging 10%
- Contaminated Component Transport 15%
- Low-Level Radioactive Waste Disposal 25%

- Reactor Segmentation 75%
- NSSS Component Removal 25%
- Reactor Waste Packaging 25%
- Reactor Waste Transport 25%
- Reactor Vessel Component Disposal 50%

- GTCC Disposal 15%
- Non-Radioactive Component Removal 15%
- Heavy Equipment and Tooling 15%
- Supplies 25%
- Engineering 15%

- Energy 15%
- Characterization and Termination Surveys 30%
- Construction 15%
- Taxes and Fees 10%
- Insurance 10%

- Staffing 15%
- Spent Fuel Storage (Dry) Systems 15%
- Spent Fuel Transfer Costs 15%
- Operations and Maintenance Expenses 15%
- ISFSI Decommissioning 25%

The contingency values are applied to the appropriate components of the estimates on a line item basis. A composite value is then reported at the end of each detailed estimate (as provided in Appendix C through E).

Appendix F, the ISFSI decommissioning calculation, uses a flat 25% contingency added at the end of the calculation.

3.3.2 Financial Risk

In addition to the routine uncertainties addressed by contingency, another cost element that is sometimes necessary to consider when bounding decommissioning costs relates to uncertainty, or risk. Examples can include changes in work scope, pricing, job performance, and other variations that could conceivably, but not necessarily, occur. Consideration is sometimes necessary to generate a level of confidence in the estimate, within a range of probabilities. TLG considers these types of costs under the broad term “financial risk.” Included within the category of financial risk are:

- Transition activities and costs: ancillary expenses associated with reducing the size of the labor force 50% to 80% shortly after the cessation of plant operations, national or company-mandated retraining, and retention incentives for key personnel.
- Delays in approval of the decommissioning plan due to intervention, public participation in local community meetings, legal challenges, and national and local hearings.
- Changes in the project work scope from the baseline estimate, involving the discovery of unexpected levels of contaminants, contamination in places not previously expected, contaminated soil previously undiscovered (either radioactive or hazardous material contamination), variations in plant inventory or configuration not indicated by the as-built drawings.
- Regulatory changes, for example, affecting worker health and safety, site release criteria, waste transportation, and disposal.
- Policy decisions altering national commitments (e.g., in the ability to accommodate certain waste forms for disposition, or in the timetable for such, or the start and rate of acceptance of spent fuel by the DOE).
- Pricing changes for basic inputs such as labor, energy, materials, and disposal. Items subject to widespread price competition (such as materials) may not show significant variation; however, others such as energy could exhibit large pricing uncertainties.

This cost study does not add any additional costs to the estimate for financial risk, since there is insufficient historical data from which to project future liabilities. Consequently, the areas of uncertainty or risk are revisited periodically and addressed through repeated revisions or updates of the base estimates.

3.4 SITE-SPECIFIC CONSIDERATIONS

There are a number of site-specific considerations that affect the method for dismantling and removal of equipment from the site and the degree of restoration required. The cost impact of the considerations identified below is included in this cost study.

3.4.1 Spent Fuel Management

The cost to dispose the spent fuel generated from plant operations is not reflected within the estimates to decommission VCSNS. Ultimate disposition of the spent fuel is within the province of the DOE's Waste Management System, as defined by the Nuclear Waste Policy Act. As such, the disposal cost is financed by a surcharge paid into the DOE's waste fund during operations. On November 19, 2013, the U.S. Court of Appeals for the D.C. Circuit ordered the Secretary of the Department of Energy to suspend collecting annual fees for nuclear waste disposal from nuclear power plant operators until the DOE has conducted a legally adequate fee assessment.

The NRC does, however, requires licensees to establish a program to manage and provide funding for the management of all irradiated fuel at the reactor site until title of the fuel is transferred to the Secretary of Energy. This requirement is prepared for through inclusion of certain high-level waste cost elements within the estimates, as described below.

Completion of the decommissioning process is highly dependent upon the DOE's ability to remove spent fuel from the site. The spent fuel management plan for VCSNS assumes "just-in-time" acceptance, i.e., the DOE will be able to complete the transfer of spent fuel so as not to impede the SAFSTOR-1 deferred decommissioning scenario and the termination of the operating license within the required 60-year period (from the cessation of operations). To achieve this objective, based upon the oldest fuel receiving the highest priority and an annual maximum rate of transfer of 3,000 metric tons of uranium, DOE would commence pickup of spent fuel from VCSNS in 2054 so that the fuel is completely removed from the site by 2095 (one year prior to the latest assumed start date for the decommissioning). These dates are also used for the DECON scenario. The SAFSTOR-2 deferred decommissioning scenario uses the same logic as SAFSTOR-1 (DOE first pickup of VCSNS fuel in 2054), but with the additional 20 years of operations, estimates a final pickup date of 2119.

ISFSI

Due to DOE's inability to remove fuel from the site, an ISFSI has been constructed at the site and fuel casks have been emplaced thereon to support continued plant operations.

An ISFSI has been constructed to support continued plant operations. The ISFSI will continue to operate throughout decommissioning, and beyond the conclusion of the remediation phase in the DECON decommissioning scenario, until such time that the transfer of spent fuel to the DOE can be completed. The scenario is similar for the SAFSTOR alternative; however, based upon the expected completion date for fuel transfer, the ISFSI will be emptied prior to the commencement of deferred decommissioning operations.

Operation and maintenance costs for the spent fuel pool and the ISFSI are included within the estimates and address the cost for staffing the facility, as well as security, insurance, and licensing fees. The estimates include the costs to purchase, load, and transfer the multi-purpose spent fuel storage canisters (MPCs) from the pool to the ISFSI. Costs are also provided for transfer of the MPCs to the DOE from the ISFSI (although it is acknowledged that this may not occur and that the fuel in the MPCs may have to be repackaged at DOE expense).

Storage Canister Design

The dry storage system at VCSNS is based upon Holtec International's (Holtec) HI-STORM FW System. The HI-STORM FW System consists of a sealed metallic multi-purpose canister (MPC) contained within an overpack constructed from a combination of steel and concrete. The MPC can accommodate up to 37 undamaged Zircaloy-clad pressurized water fuel assemblies. The overpack provides structural protection, cooling, and radiological shielding for the MPC.

Canister Loading and Transfer

The estimates include the cost for the labor and equipment to transfer and load each spent fuel canister into the DOE transport cask or to the ISFSI from the wet storage pool. For estimating purposes, an allowance is used to estimate the cost to transfer the fuel from the ISFSI into the DOE transport cask.

Operations and Maintenance

The estimates also include the cost of operating and maintaining the spent fuel pool and the ISFSI, respectively. Pool operations are expected to continue approximately seven years after the cessation of operations. It is assumed that the seven years provides the necessary cooling period for the final core to meet the licensing and design requirements of the dry cask storage vendor's system. ISFSI operating costs are based upon the previously stated assumptions on fuel transfer assumptions. ISFSI operating costs are based upon a 53-year period of operations following plant shutdown.

ISFSI Decommissioning

In accordance with 10 CFR §72.30, licensees must have a proposed decommissioning plan for the ISFSI site and facilities that includes a cost estimate for the plan. The plan should contain sufficient information on the proposed practices and procedures for the decontamination of the ISFSI and for the disposal of residual radioactive materials after all spent fuel, high-level radioactive waste, and reactor-related GTCC waste have been removed.

The dry storage vendor does not expect the concrete casks to have any interior or exterior radioactive surface contamination. Any neutron activation of the steel and concrete is expected to be extremely small.

The decommissioning estimate is based on the premise that some of the concrete casks will contain low levels of neutron-induced residual radioactivity that would necessitate remediation at the time of decommissioning. As an allowance, 5 casks are assumed to be affected, i.e., contain residual radioactivity. The allowance is based upon the number of casks required for the final core off-load (i.e., 157 offloaded assemblies, 37 assemblies per cask) which results in 5 overpacks. It is assumed that these are the final casks offloaded; consequently they have the least time for radioactive decay of the neutron activation products.

No contamination or activation of the ISFSI pad is assumed. It would be expected that this assumption would be confirmed as a result of good radiological practice of surveying potentially impacted areas after each spent fuel transfer campaign. As such, only verification surveys are included for the pad in the decommissioning estimate. The estimate is limited to costs necessary to terminate the ISFSI's NRC license and meet the §20.1402 criteria for unrestricted use.

In accordance with the specific requirements of 10 CFR §72.30 for the ISFSI work scope, the cost estimate for decommissioning the ISFSI reflects: 1) the cost of an independent contractor performing the decommissioning activities; 2) an adequate contingency factor; and 3) the cost of meeting the criteria for unrestricted use. The cost summary for decommissioning the ISFSI is presented in Appendix F.

<u>GTCC</u>

The dismantling of the reactor internals is expected to generate radioactive waste considered unsuitable for shallow land disposal (i.e., low-level radioactive waste with concentrations of radionuclides that exceed the limits established by the NRC for Class C radioactive waste (GTCC)). The Low-Level Radioactive Waste Policy Amendments Act of 1985 assigned the federal government the responsibility for the disposal of this material. The Act also stated that the beneficiaries of the activities resulting in the generation of such radioactive waste bear all reasonable costs of disposing of such waste. [28]

Although the material is not classified as high-level waste, federal regulations under the Act designate that disposal of this material is a federal responsibility under Section 3(b)(1)(D). However, the DOE has not been forthcoming with an acceptance criteria or disposition schedule for this material, and numerous questions remain as to the ultimate disposal cost and waste form requirements.

For purposes of this estimate, the GTCC has been assumed to be packaged in the same canisters used to store spent fuel and disposed of as high-level waste, at a cost equivalent to that envisioned for the spent fuel. The number of canisters required and the packaged volume for GTCC was based upon experience at Maine Yankee (e.g., the constraints on loading as identified in the canister's certificate of compliance).

It is assumed that the DOE would not accept this waste prior to completing the transfer of spent fuel. Therefore, until such time as the

DOE is ready to accept GTCC waste, it is assumed that this material would remain in storage at the VCSNS site (for the DECON alternative). In the SAFSTOR scenario, the GTCC material is shipped directly to a DOE facility as it is generated since the fuel has been removed from the site prior to the start of decommissioning.

3.4.2 Reactor Vessel and Internal Components

The reactor pressure vessel and internal components are segmented for disposal in shielded, reusable transportation casks. Segmentation is performed in the refueling canal, where a turntable and remote cutter are installed. The vessel is segmented in place, using a mast-mounted cutter supported off the lower head and directed from a shielded work platform installed overhead in the reactor cavity. Transportation cask specifications and transportation regulations dictate the segmentation and packaging methodology.

Intact disposal of reactor vessel shells has been successfully demonstrated at several of the sites that have been decommissioned. Access to navigable waterways has allowed these large packages to be transported to the Barnwell disposal site with minimal overland travel. Intact disposal of the reactor vessel and internal components can provide savings in cost and worker exposure by eliminating the complex segmentation requirements, isolation of the GTCC material, and transport/storage of the resulting waste packages. Portland General Electric (PGE) was able to dispose of the Trojan reactor as an intact package (including the internals). However, its location on the Columbia River simplified the transportation analysis since:

- the reactor package could be secured to the transport vehicle for the entire journey, i.e., the package was not lifted during transport,
- there were no man-made or natural terrain features between the plant site and the disposal location that could produce a large drop, and
- transport speeds were very low, limited by the overland transport vehicle and the river barge.

As a member of the Northwest Compact, PGE had a site available for disposal of the package - the US Ecology facility in Washington State. The characteristics of this arid site proved favorable in demonstrating compliance with land disposal regulations.

It is not known whether this option will be available when the VCSNS plant ceases operation. Future viability of this option will depend upon the ultimate location of the disposal site, as well as the disposal site licensee's ability to accept highly radioactive packages and effectively isolate them from the environment. Consequently, the study assumes that the reactor vessel will require segmentation, as a bounding condition.

3.4.3 Primary System Components

In the DECON scenario, the reactor coolant system components are assumed to be decontaminated using chemical agents prior to the start of dismantling operations. This type of decontamination can be expected to have a significant ALARA impact, since in this scenario the removal work is done within the first few years of shutdown. A decontamination factor (average reduction) of 10 is assumed for the process. Disposal of the decontamination solution effluent is included within the estimate as a "process liquid waste" charge. In the SAFSTOR scenario, radionuclide decay is expected to provide the same benefit and, therefore, a chemical decontamination is not included.

The following discussion deals with the removal and disposition of the steam generators, but the techniques involved are also applicable to other large components, such as heat exchangers, component coolers, and the pressurizer. The steam generators' size and weight, as well as their location within the reactor building, will ultimately determine the removal strategy.

A trolley crane is set up for the removal of the generators. It can also be used to move portions of the steam generator cubicle walls and floor slabs from the reactor building to a location where they can be decontaminated and transported to the material handling area. Interferences within the work area, such as grating, piping, and other components are removed to create sufficient laydown space for processing these large components.

The generators are rigged for removal, disconnected from the surrounding piping and supports, and maneuvered into the open area where they are lowered onto a dolly. Each generator is rotated into the horizontal position for extraction from the containment and placed onto a multi-wheeled vehicle for transport to an on-site processing and storage area.

Disposal costs are based upon the displaced volume and weight of the units. Each component is then loaded onto a rail car for transport to the disposal facility.

Reactor coolant piping is cut from the reactor vessel once the water level in the vessel (used for personnel shielding during dismantling and cutting operations in and around the vessel) is dropped below the nozzle zone. The piping is boxed and transported by shielded van. The reactor coolant pumps and motors are lifted out intact, packaged, and transported for processing and/or disposal.

3.4.4 Main Turbine and Condenser

The main turbine is dismantled using conventional maintenance procedures. The turbine rotors and shafts are removed to a laydown area. The lower turbine casings are removed from their anchors by controlled demolition. The main condensers are also disassembled and moved to a laydown area. Material is then prepared for transportation to an off-site recycling facility where it is surveyed and designated for either decontamination or volume reduction, conventional disposal, or controlled disposal. Components are packaged and readied for transport in accordance with the intended disposition.

3.4.5 Retired Components

The estimates include the disposition of three retired steam generators currently in storage at the site.

3.4.6 Transportation Methods

Contaminated piping, components, and structural material other than the highly activated reactor vessel and internal components will qualify as LSA-I, II or III or Surface Contaminated Object, SCO-I or II, as described in Title 49.[29] The contaminated material will be packaged in Industrial Packages (IP-1, IP-2, or IP-3, as defined in 49 CFR §173.411) for transport unless demonstrated to qualify as their own shipping containers. The reactor vessel and internal components are expected to be transported in accordance with 10 CFR Part 71, in Type B containers. It is conceivable that the reactor, due to its limited specific activity, could qualify as LSA II or III. However, the high radiation levels on the outer surface would require that additional shielding be incorporated within the packaging so as to attenuate the dose to levels acceptable for transport.

Any fuel cladding failure that occurred during the lifetime of the plant is assumed to have released fission products at sufficiently low levels that the buildup of quantities of long-lived isotopes (e.g., ^{137}Cs, ^{90}Sr, or transuranics) has been prevented from reaching levels exceeding those that permit the major reactor components to be shipped under current transportation regulations and disposal requirements.

Transport of the highly activated metal, produced in the segmentation of the reactor vessel and internal components, will be by shielded truck cask. Cask shipments may exceed 95,000 pounds, including vessel segment(s), supplementary shielding, cask tie-downs, and tractor-trailer. The maximum level of activity per shipment assumed permissible was based upon the license limits of the available shielded transport casks. The segmentation scheme for the vessel and internal segments is designed to meet these limits.

The transport of large intact components (e.g., large heat exchangers and other oversized components) will be by a combination of truck, rail, and/or multi-wheeled transporter to the Barnwell disposal facility.

Transportation costs for Class A radioactive material requiring controlled disposal are based upon the mileage to Barnwell, South Carolina. Transportation costs for the higher activity Class B and C radioactive material are also based upon the mileage to Barnwell, South Carolina. Transportation costs for off-site waste processing are based upon the mileage to Oak Ridge, Tennessee. Truck transport costs were developed from published tariffs from Tri-State Motor Transit.[30] The transportation cost for the GTCC material is assumed to be contained within the disposal cost.

3.4.7 Low-Level Radioactive Waste Disposal

To the greatest extent practical, metallic material generated in the decontamination and dismantling processes is processed to reduce the total cost of controlled disposal. Material meeting the regulatory and/or site release criterion, is released as scrap, requiring no further cost consideration. Conditioning (preparing the material to meet the waste acceptance criteria of the disposal site) and recovery of the waste stream is performed off site at a licensed processing center. Any material leaving the site is subject to a survey and release charge, at a minimum.

The mass of radioactive waste generated during the various decommissioning activities at the site is shown on a line-item basis in the detailed Appendices C through F, and summarized in Section 5. The quantified waste summaries shown in these tables are consistent with 10 CFR Part 61 classifications. Commercially available steel containers are presumed to be used for the disposal of piping, small components, and concrete. Larger components can serve as their own containers, with proper closure of all openings, access ways, and penetrations. The volumes are calculated based on the exterior package dimensions for containerized material or a specific calculation for components serving as their own waste containers.

The more highly activated reactor components will be shipped in reusable, shielded truck casks with disposable liners. In calculating disposal costs, the burial fees are applied against the liner volume, as well as the special handling requirements of the payload. Packaging efficiencies are lower for the highly activated materials (greater than Class A waste), where high concentrations of gamma-emitting radionuclides limit the capacity of the shipping canisters.

Disposal fees are calculated using the current disposal agreement for the Atlantic Compact, with surcharges added for the highly activated components, for example, generated in the segmentation of the reactor vessel internals. Low-level radioactive material, or material suspected to be contaminated, is sent to a waste processor for conditioning and treatment, including volume reduction and disposal.

Material exceeding Class C limits (limited to material closest to the reactor core and comprising less than 1% of the total waste volume) is generally not suitable for shallow-land disposal. This material is packaged in the same multipurpose canisters used for spent fuel storage/transport.

3.4.8 Site Conditions Following Decommissioning

The NRC will amend or terminate the site license if it determines that site remediation has been performed in accordance with the license termination plan, and that the terminal radiation survey and associated documentation demonstrate that the facility is suitable for release. The NRC's involvement in the decommissioning process will end at this point. Building codes and environmental regulations will dictate the next step in the decommissioning process, as well as owners' own future plans for the site.

A significant amount of the below grade piping is located around the perimeter of the power block. The estimate includes a cost to excavate this area to an average depth of four feet so as to expose the piping, duct bank, conduit, and any near-surface grounding grid. The overburden is surveyed and stockpiled on site for future use in backfilling the below grade voids.

Only existing site structures are considered in the dismantling cost. Site structures are removed to a nominal depth of three feet below grade. The voids are backfilled with clean debris and capped with soil. The site is then re-graded to conform to the adjacent landscape. Vegetation is established to inhibit erosion. These "non-radiological costs" are included in the total cost of decommissioning.

Concrete rubble generated from demolition activities is processed and made available as clean fill for the power block foundations. Excess construction debris is trucked off site as an alternative to onsite disposal. The excavations will be regraded such that the power block area will have a final contour consistent with adjacent surroundings.

The Nuclear Learning Center and Nuclear Operations Building will be left in place. The electrical switchyard will also remain after VCSNS is decommissioned in support of the regional transmission and distribution system.

The estimates do not assume the remediation of any significant volume of contaminated soil. This assumption may be affected by continued plant operations and/or future regulatory actions, such as the development of site-specific release criteria.

3.5 ASSUMPTIONS

The following are the major assumptions made in the development of the estimates for decommissioning the site.

3.5.1 <u>Estimating Basis</u>

Decommissioning costs are reported in the year of projected expenditure; however, the values are provided in 2016 dollars. Costs provided as input to the decommissioning cost model in dollars other than 2016 dollars were escalated to 2016 dollars.

The plant inventory, the basis for the decontamination and dismantling requirements and cost, and the decommissioning waste streams, were reviewed for this analysis. The following structures were added to the 2012 inventory: FLEX storage building, emergency response building, and combined maintenance shop.

The study follows the principles of ALARA through the use of work duration adjustment factors. These factors address the impact of activities such as radiological protection instruction, mock-up training, and the use of respiratory protection and protective clothing. The factors lengthen a task's duration, increasing costs and lengthening the overall schedule. ALARA planning is considered in the costs for engineering and planning, and in the development of activity specifications and detailed procedures. Changes to worker exposure limits may impact the decommissioning cost and project schedule.

3.5.2 Labor Costs

For purposes of this analysis, it is assumed that SCE&G will hire a Decommissioning Operations Contractor (DOC) to manage the decommissioning. SCE&G will provide site security, radiological health and safety, quality assurance and overall site administration during the decommissioning and demolition phases. Contract personnel will provide engineering services (e.g., for preparing the activity specifications, work procedures, neutron activation, and structural analyses) under the direction of SCE&G.

Personnel costs are based upon average salary information provided by SCE&G. Overhead costs are included for site and corporate support, reduced commensurate with the staffing of the project.

Reduction in the operating organization is assumed to be handled through normal staffing processes (e.g., reassignment and outplacement).

The craft labor required to decontaminate and dismantle the nuclear plant is acquired through standard site contracting practices. The current cost of labor at the site is used as an estimating basis. Craft labor costs include applicable overheads and profit.

Staffing levels are assigned by sub-period and functional area. The types of positions and staffing levels are adjusted based upon the type of activity occurring in each sub-period.

A profile of the staffing level for decommissioning, including contractors and craft, is provided in Figures 3.1, 3.2, and 3.3 for the DECON, SAFSTOR-1 and SAFSTOR-2 scenarios, respectively. Utility staffing levels will gradually decrease after completing the removal of physical systems. Staffing levels and management support will vary based upon the amount and type of decommissioning work. Craft manpower levels decrease after systems removal and structures decontamination and drop substantially during the delay period and the license termination survey period. However, craft levels increase again during the site restoration period due to the work associated with structures demolition.

Security, while reduced from operating levels, is maintained throughout the decommissioning for access control, material control, and to safeguard the spent fuel (in accordance with the requirements of 10 CFR Part 37, Part 72, and Part 73). Security costs include provisions for recurring expenses. Once the fuel has been transferred to the DOE in 2096 (or 2119 for SAFSTOR-2), the security organization will be reduced to Part 37 requirements.

3.5.3 Design Conditions

Any fuel cladding failure that occurred during the lifetime of the plant is assumed to have released fission products at sufficiently low levels that the buildup of quantities of long-lived isotopes (e.g., ^{137}Cs, ^{90}Sr, or transuranics) has been prevented from reaching levels exceeding those that permit the major NSSS components to be shipped under current transportation regulations and disposal requirements.

The curie contents of the vessel and internals at final shutdown are derived from those listed in NUREG/CR-3474.[31] Actual estimates are derived from the curie/gram values contained therein and adjusted for the different mass of the VCSNS components, projected operating life, and different periods of decay. Additional short-lived isotopes were derived from NUREG/CR-0130[32] and NUREG/CR-0672,[33] and benchmarked to the long-lived values from NUREG/CR-3474.

It is anticipated that there will be control element assemblies (CEAs) in the spent fuel pool at the cessation of operations, including those CEAs from the final core. This analysis assumes that the CEAs can be disposed of along with the spent fuel at no additional cost (in accordance with Appendix E of the Standard Contract).

It is anticipated that there may other highly activated material, generated during plant operations, in the spent fuel pool at the cessation of operations. This analysis assumes that the cost of disposal will be paid for by operations' accruals and not charged to the decommissioning program.

Neutron activation of the containment building structure is assumed to be confined to the biological shield.

3.5.4 General

Transition Activities

Existing warehouses are cleared of non-essential material and remain for use by SCE&G and its subcontractors. The warehouses are removed once they are no longer needed. The plant's operating staff performs the following activities at no additional cost or credit to the project during the transition period:

- Drain and collect fuel oils, lubricating oils, and transformer oils for recycle and/or sale.
- Drain and collect acids, caustics, and other chemical stores for recycle and/or sale.
- Process operating waste inventories. Disposal of operating wastes (e.g., filtration media, resins) during this initial period is not considered a decommissioning expense.

Scrap and Salvage

The existing plant equipment is considered obsolete and suitable for scrap as deadweight quantities only. SCE&G will make economically reasonable efforts to salvage equipment following final plant shutdown. However, dismantling techniques assumed by TLG for equipment in this analysis are not consistent with removal techniques required for salvage (resale) of equipment. Experience has indicated that some buyers wanted equipment stripped down to very specific requirements before they would consider purchase. This required expensive rework after the equipment had been removed from its installed location. Since placing a salvage value on this machinery and equipment would be speculative, and the value would be small in comparison to the overall decommissioning expenses, this analysis does not attempt to quantify the value that an owner may realize based upon those efforts.

It is assumed, for purposes of this analysis, that any value received from the sale of scrap generated in the dismantling process would be more than offset by the on-site processing costs. The dismantling techniques assumed in the decommissioning estimates do not include the additional cost for size reduction and preparation to meet "furnace ready" conditions. For example, the recovery of copper from electrical cabling may require the removal and disposition of any contaminated insulation, an added expense. With a volatile market, the potential profit margin in scrap recovery is highly speculative, regardless of the ability to free release this material. This assumption is an implicit recognition of scrap value in the disposal of clean metallic waste at no additional cost to the project.

Furniture, tools, mobile equipment such as forklifts, trucks, bulldozers, and other property is removed at no cost or credit to the decommissioning project. Disposition may include relocation to other facilities. Spare parts are also made available for alternative use.

The concrete debris resulting from building demolition activities is crushed on site to reduce the size of the debris. The resulting crushed concrete is used to backfill below grade voids. The rebar removed from the concrete crushing process is disposed of as scrap steel in a similar fashion as other scrap metal as discussed previously.

<u>Energy</u>

For estimating purposes, the plant is assumed to be de-energized, with the exception of those facilities associated with spent fuel storage. Replacement power costs are used to calculate the cost of energy consumed during decommissioning for tooling, lighting, ventilation, and essential services.

<u>Emergency Planning</u>

FEMA fees associated with emergency planning are assumed to continue for approximately 18 months following the cessation of operations. At this time, the fees are discontinued. The timing is based upon the anticipated condition of the spent fuel (i.e., the hottest spent fuel assemblies are assumed to be cool enough that no substantial Zircaloy oxidation and off-site event would occur with the loss of spent fuel pool water). State fees are included until all fuel has been moved from the pool into dry storage (approximately seven years following the cessation of operations). Local fees are included until the fuel is removed from the site.

Insurance

Costs for continuing coverage (nuclear liability and property insurance) following cessation of plant operations and during decommissioning are included and based upon current operating premiums. Reductions in premiums, throughout the decommissioning process, are based upon the guidance and the limits for coverage defined in the NRC's proposed rulemaking "Financial Protection Requirements for Permanently Shutdown Nuclear Power Reactors."[34] The NRC's financial protection requirements are based on various reactor (and spent fuel) configurations.

Taxes

Property taxes are included for the full year in the shutdown year. After the first year, based on present state tax codes, there will be no net utility property to serve as a tax basis, as the plant will be retired.

Disposal of Processed Water

This estimate assumes that processed water which meets state and federal release limits can be disposed of without additional cost.

Site Modifications

The perimeter fence and in-plant security barriers will be moved, as appropriate, to conform to the Site Security Plan in force during the various stages of the project.

3.6 COST ESTIMATE SUMMARY

Schedules of expenditures are provided in Tables 3.1, 3.2 and 3.3. The tables delineate the cost contributors by year of expenditures as well as cost contributor (e.g., labor, materials, and waste disposal).

The tables in Appendices C through F provide additional detail. The cost elements in these tables are assigned to one of three subcategories: "License Termination," "Spent Fuel Management," and "Site Restoration." The subcategory "License Termination" is used to accumulate costs that are consistent with "decommissioning" as defined by the NRC in its financial assurance regulations (i.e., 10 CFR §50.75). The cost reported for this subcategory is generally sufficient to terminate the plant's operating license, recognizing that there may be some additional cost impact from spent fuel management. The License Termination cost subcategory also includes costs to decommission the ISFSI (as required by 10 CFR §72.30). The basis for the ISFSI decommissioning cost that is included in both Appendices C, D and E is provided in Appendix F.

The "Spent Fuel Management" subcategory contains costs associated with the containerization and transfer of spent fuel from the wet storage pool to the ISFSI for interim storage and/or to the DOE directly from the pool (SAFSTOR-2 only), as well as the transfer of the spent fuel in storage at the ISFSI to the DOE. Costs are also included for the operations of the pool and management of the ISFSI until such time that the transfer of all fuel from this facility to an off-site location (e.g., interim storage facility) is complete.

"Site Restoration" is used to capture costs associated with the dismantling and demolition of buildings and facilities demonstrated to be free from contamination. This includes structures never exposed to radioactive materials, as well as those facilities that have been decontaminated to appropriate levels. Structures are removed to a depth of three feet and backfilled.

As discussed in Section 3.4.1, it is assumed that the DOE will not accept the GTCC waste prior to completing the transfer of spent fuel. Therefore, the cost of GTCC disposal is included in the final year of ISFSI operation (for the DECON alternative) or during the reactor vessel dismantling operations period (SAFSTOR alternatives). While designated for disposal at a federal facility along with the spent fuel, GTCC waste is still classified as low-level radioactive waste and, as such, included as a "License Termination" expense.

Decommissioning costs are reported in 2016 dollars. Costs are not inflated, escalated, or discounted over the period of expenditure (or projected lifetime of the plant). The schedules are based upon the detailed activity costs reported in Appendices C through F.

4. SCHEDULE ESTIMATE

The schedules for the decommissioning scenarios considered in this analysis follow the sequences presented in the AIF/NESP-036 study, with minor changes to reflect recent experience and site-specific constraints. In addition, the scheduling has been revised to reflect the spent fuel management described in Section 3.4.1.

A schedule or sequence of activities for the DECON alternative is presented in Figure 4.1. The scheduling sequence is based on the fuel being removed from the spent fuel pool within seven years. The key activities listed in the schedule do not reflect a one-to-one correspondence with those activities in the cost table, but reflect dividing some activities for clarity and combining others for convenience. The schedule was prepared using the "Microsoft Project Professional" computer software.[35]

4.1 SCHEDULE ESTIMATE ASSUMPTIONS

The schedule reflects the results of a precedence network developed for the site decommissioning activities, i.e., a PERT (Program Evaluation and Review Technique) Software Package. The work activity durations used in the precedence network reflect the actual man-hour estimates from the cost table, adjusted by stretching certain activities over their slack range and shifting the start and end dates of others. The following assumptions were made in the development of the decommissioning schedule:

- The fuel handling building is isolated until such time that all spent fuel has been discharged from the spent fuel pool to the ISFSI. Decontamination and dismantling of the storage pool is initiated once the transfer of spent fuel is complete (DECON option).
- All work (except reactor vessel and reactor vessel internals removal and the spent fuel loading campaigns) is performed during an 8-hour workday, 5 days per week, with no overtime.
- Reactor and internals removal activities are performed by using separate crews for different activities working on different shifts, with a corresponding backshift charge for the second shift.
- Multiple crews work parallel activities to the maximum extent possible, consistent with optimum efficiency, adequate access for cutting, removal and laydown space, and with the stringent safety measures necessary during demolition of heavy components and structures.

- For plant systems removal, the systems with the longest removal durations in areas on the critical path are considered to determine the duration of the activity.

4.2 PROJECT SCHEDULE

The period-dependent costs presented in the detailed cost tables are based upon the durations developed in the schedules for decommissioning. Durations are established between several milestones in each project period; these durations are used to establish a critical path for the entire project. In turn, the critical path duration for each period is used as the basis for determining the period-dependent costs. A second critical path is shown for the spent fuel storage period, which determines the release of the fuel handling building for final decontamination.

Project timelines are provided in Figures 4.2 through 4.4, with milestone dates based on the shutdown date. The fuel pool is emptied seven years after shutdown, while ISFSI operations continue until the DOE can complete the transfer of assemblies. Deferred decommissioning in the SAFSTOR scenario is assumed to commence so that the operating license is terminated within a 60-year period from the cessation of plant operations.

5. RADIOACTIVE WASTES

The objectives of the decommissioning process are the removal of all radioactive material from the site that would restrict its future use and the termination of the NRC license. This currently requires the remediation of all radioactive material at the site in excess of applicable legal limits. Under the Atomic Energy Act,[36] the NRC is responsible for protecting the public from sources of ionizing radiation. Title 10 of the Code of Federal Regulations delineates the production, utilization, and disposal of radioactive materials and processes. In particular, Part 71 defines radioactive material as it pertains to transportation and Part 61 specifies its disposition.

Most of the materials being transported for controlled burial are categorized as Low Specific Activity (LSA) or Surface Contaminated Object (SCO) materials containing Type A quantities, as defined in 49 CFR Parts 173-178. Shipping containers are required to be Industrial Packages (IP-1, IP-2 or IP-3, as defined in 10 CFR §173.411). For this study, commercially available steel containers are presumed to be used for the disposal of piping, small components, and concrete. Larger components can serve as their own containers, with proper closure of all openings, access ways, and penetrations.

The destinations for the various waste streams from decommissioning are identified in Figures 5.1 and 5.2. The volumes are shown on a line-item basis in Appendices C through F and summarized in Tables 5.1 through 5.3. The quantified waste volume summaries shown in these tables are consistent with §61 classifications. The volumes are calculated based on the exterior dimensions for containerized material and on the displaced volume of components serving as their own waste containers.

The reactor vessel and internals are categorized as large quantity shipments and, accordingly, will be shipped in reusable, shielded truck casks with disposable liners. In calculating disposal costs, the burial fees are applied against the liner volume, as well as the special handling requirements of the payload. Packaging efficiencies are lower for the highly activated materials (greater than Type A quantity waste), where high concentrations of gamma-emitting radionuclides limit the capacity of the shipping casks.

No process system containing/handling radioactive substances at shutdown is presumed to meet material release criteria by decay alone (i.e., systems radioactive at shutdown will still be radioactive over the time period during which the decommissioning is accomplished, due to the presence of long-lived radionuclides). While the dose rates decrease with time, radionuclides such as ^{137}Cs will still control the disposition requirements.

The waste material produced in the decontamination and dismantling of the nuclear plant is primarily generated during Period 2 of DECON and Period 4 of SAFSTOR. Material that is considered potentially contaminated when removed from the radiological controlled area is sent to processing facilities in Tennessee for conditioning and disposal. Heavily contaminated components and activated materials are routed for controlled disposal. The disposal volumes reported in the tables reflect the savings resulting from reprocessing and recycling.

For purposes of constructing the estimates, the current cost for disposal at Barnwell, South Carolina was used for a majority of the radioactive waste produced from the decommissioning activities. Separate rates were used for containerized waste and large components. Demolition debris including miscellaneous steel, scaffolding, and concrete was disposed of at a bulk rate. The decommissioning waste stream also included resins and dry active waste.

Disposal costs for the higher activity waste (Class B and C) were based upon current agreement with Barnwell, South Carolina.

A small quantity of material generated during the VCSNS decommissioning will not be considered suitable for near-surface disposal, and is assumed to be disposed of in a geologic repository, in a manner similar to that envisioned for spent fuel disposal. Such material, known as Greater-Than-Class-C or GTCC material, is estimated to require four spent fuel storage canisters (or the equivalent) to dispose of the most radioactive portions of the reactor vessel internals. The volume and weight reported in Tables 5.1 through 5.3 represent the packaged weight and volume of the spent fuel storage canisters.

FIGURE 5.1
RADIOACTIVE WASTE DISPOSITION

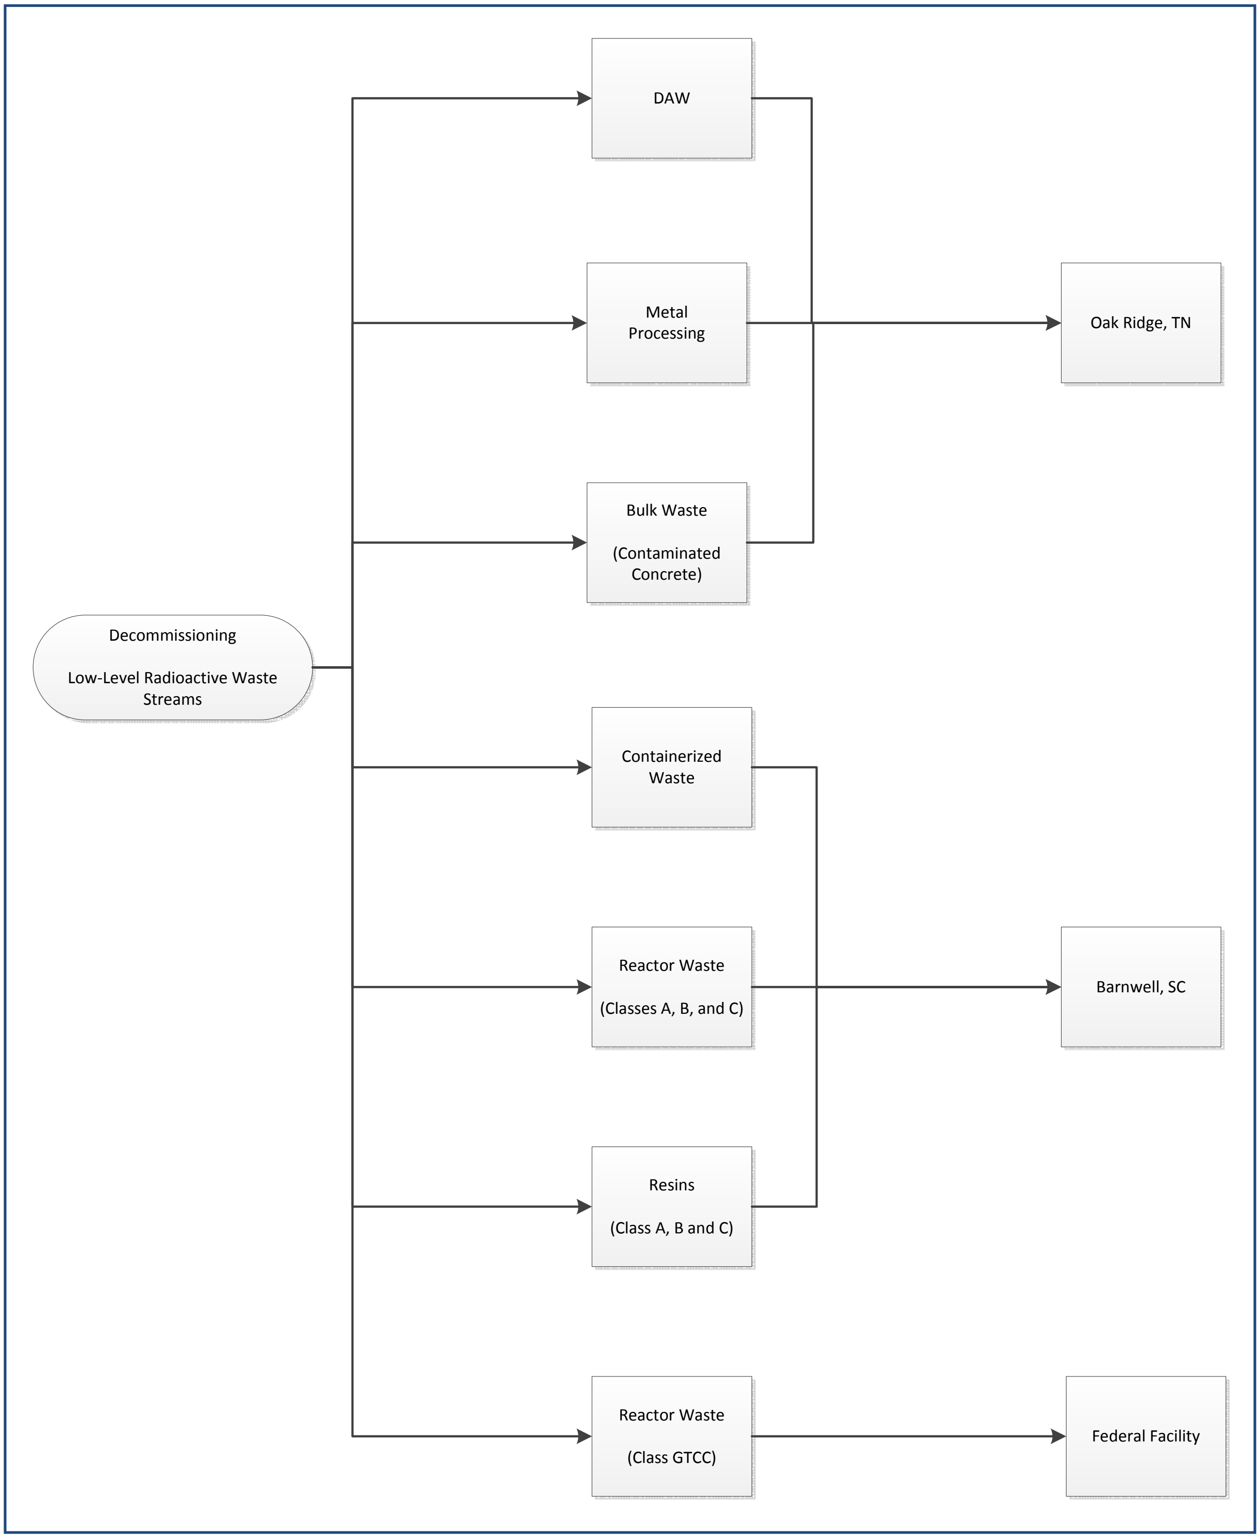

FIGURE 5.2
DECOMMISSIONING WASTE DESTINATIONS
RADIOLOGICAL

The figure indicates the destinations for the low-level radioactive waste designated for direct disposal (Barnwell, South Carolina and Oak Ridge, Tennessee) and processing/recovery (Oak Ridge, Tennessee).

Disposition of the Class B and C low-level radioactive waste will be at the Atlantic Compact's disposal facility in Barnwell, South Carolina.

Disposal options (and destinations) for GTCC are still being evaluated.

6. RESULTS

The analysis to estimate the costs to decommission VCSNS relied upon the site-specific, technical information developed for a previous analysis prepared in 2012. While not an engineering study, the estimates provide the owners with sufficient information to assess their financial obligations, as they pertain to the eventual decommissioning of the nuclear station.

The estimates described in this report are based on numerous fundamental assumptions, including regulatory requirements, project contingencies, low-level radioactive waste disposal practices, high-level radioactive waste management options, and site restoration requirements.

The cost projected to promptly decommission the station, dismantle the structures, and manage the spent fuel is estimated to be $1,108.8 million. The majority of this cost (approximately 56.7%) is associated with the physical decontamination and dismantling of the nuclear plant so that the operating license can be terminated. Another 37.3% is associated with the management, interim storage, and eventual transfer of the spent fuel. The remaining 6.0% is for the demolition of the designated structures and limited restoration of the site.

The cost projected for deferred decommissioning (SAFSTOR-1) is estimated to be $1,245.2 million. The majority of this cost (approximately 63.8%) is associated with placing the plant in storage, ongoing caretaking of the plant during dormancy, and the eventual physical decontamination and dismantling of the nuclear plant so that the operating license can be terminated. Another 30.9% is associated with the management, interim storage, and eventual transfer of the spent fuel. The remaining 5.3% is for the demolition of the designated structures and limited restoration of the site.

The cost projected for deferred decommissioning (SAFSTOR-2) is estimated to be $1,179.6 million. The majority of this cost (approximately 66.8%) is associated with placing the plant in storage, ongoing caretaking of the plant during dormancy, and the eventual physical decontamination and dismantling of the nuclear plant so that the operating license can be terminated. Another 27.6% is associated with the management, interim storage, and eventual transfer of the spent fuel. The remaining 5.6% is for the demolition of the designated structures and limited restoration of the site.

The primary cost contributors, identified in Tables 6.1, 6.2 and 6.3, are either labor-related or associated with the management and disposition of the radioactive waste. Program management is the largest single contributor to the overall cost. The magnitude of the expense is a function of both the size of the organization required to manage the decommissioning, as well as the duration of the program. It is assumed, for purposes of this analysis, that SCE&G Operations will oversee the decommissioning program and manage the decommissioning labor force (with the exception of the ISFSI decommissioning discussed in Section 3.4.1). The size and composition of the management organization varies with the decommissioning phase and associated site activities. However, once the operating license is amended or terminated, the staff is substantially reduced for the conventional demolition and restoration of the site, and the long-term care of the spent fuel (for the DECON alternative).

As described in this report, the spent fuel pool will remain operational for seven years following the cessation of operations. The pool will be isolated and an independent spent fuel island created. This will allow decommissioning operations to proceed in and around the pool area. Over the seven year period, the spent fuel will be packaged into canisters assumed to be loaded into a DOE-provided transport cask or relocated to the ISFSI.

The cost for waste disposal includes only those costs associated with the controlled disposition of the low-level radioactive waste generated from decontamination and dismantling activities, including plant equipment and components, structural material, filters, resins and dry-active waste. As described in Section 5, disposition of the majority of the low-level radioactive material requiring controlled disposal is at the Barnwell facility. Highly activated components, requiring additional isolation from the environment (GTCC), are packaged for geologic disposal. The cost of geologic disposal is based upon a cost equivalent for spent fuel.

A significant portion of the metallic waste is designated for additional processing and treatment at an off-site facility. Processing reduces the volume of material requiring controlled disposal through such techniques and processes as survey and sorting, decontamination, and volume reduction. The material that cannot be unconditionally released is packaged for controlled disposal at one of the currently operating facilities. The cost identified in the summary tables for processing is all-inclusive, incorporating the ultimate disposition of the material.

Removal costs reflect the labor-intensive nature of the decommissioning process, as well as the management controls required to ensure a safe and successful program. Decontamination and packaging costs also have a large labor component that is based upon prevailing wages. Non-radiological demolition is a natural extension of the decommissioning process. The methods employed in decontamination and dismantling are generally destructive and indiscriminate in inflicting collateral damage. With a work force mobilized to support decommissioning operations, non-radiological demolition can be an integrated activity and a logical expansion of the work being performed in the process of terminating the operating license.

The reported cost for transport includes the tariffs and surcharges associated with moving large components and/or overweight shielded casks overland, as well as the general expense, e.g., labor and fuel, of transporting material to the destinations identified in this report. For purposes of this analysis, material is primarily moved overland by truck.

Decontamination is used to reduce the plant's radiation fields and minimize worker exposure. Slightly contaminated material or material located within a contaminated area is sent to an off-site processing center, i.e., this analysis does not assume that contaminated plant components and equipment can be decontaminated for uncontrolled release in-situ. Centralized processing centers have proven to be a more economical means of handling the large volumes of material produced in the dismantling of a nuclear plant.

License termination survey costs are associated with the labor intensive and complex activity of verifying that contamination has been removed from the site to the levels specified by the regulating agency. This process involves a systematic survey of all remaining plant surface areas and surrounding environs, sampling, isotopic analysis, and documentation of the findings. The status of any plant components and materials not removed in the decommissioning process will also require confirmation and will add to the expense of surveying the facilities alone.

The remaining costs include allocations for heavy equipment and temporary services, as well as for other expenses such as regulatory fees and the premiums for nuclear insurance. While site operating costs are greatly reduced following the final cessation of plant operations, certain administrative functions do need to be maintained either at a basic functional or regulatory level.

13. In 2008, the DOE issued a report to Congress in which it concluded that it did not have authority, under present law, to accept spent nuclear fuel for interim storage from decommissioned commercial nuclear power reactor sites. However, the Blue Ribbon Commission, in its final report, noted that: "[A]ccepting spent fuel according to the OFF [Oldest Fuel First] priority ranking instead of giving priority to shutdown reactor sites could greatly reduce the cost savings that could be achieved through consolidated storage if priority could be given to accepting spent fuel from shutdown reactor sites before accepting fuel from still-operating plants. …. The magnitude of the cost savings that could be achieved by giving priority to shutdown sites appears to be large enough (i.e., in the billions of dollars) to warrant DOE exercising its right under the Standard Contract to move this fuel first." For planning purposes only, the estimates do not assume that VCSNS, as a permanently shutdown unit, will receive priority; the fuel removal schedule assumed in this estimate is based upon DOE acceptance of fuel according to the "Oldest Fuel First" priority ranking. The plant owners will seek the most expeditious means of removing fuel from the site when DOE commences performance.

APPENDIX A

UNIT COST FACTOR DEVELOPMENT

APPENDIX A
UNIT COST FACTOR DEVELOPMENT

Example: Unit Factor for Removal of Contaminated Heat Exchanger < 3,000 lbs.

1. SCOPE

Heat exchangers weighing < 3,000 lbs. will be removed in one piece using a crane or small hoist. They will be disconnected from the inlet and outlet piping. The heat exchanger will be sent to the waste processing area.

2. CALCULATIONS

Act ID	Activity Description	Activity Duration (minutes)	Critical Duration (minutes)*
a	Remove insulation	60	(b)
b	Mount pipe cutters	60	60
c	Install contamination controls	20	(b)
d	Disconnect inlet and outlet lines	60	60
e	Cap openings	20	(d)
f	Rig for removal	30	30
g	Unbolt from mounts	30	30
h	Remove contamination controls	15	15
i	Remove, wrap, send to waste processing area	60	60
	Totals (Activity/Critical)	355	255

Duration adjustment(s):	
+ Respiratory protection adjustment (50% of critical duration)	128
+ Radiation/ALARA adjustment (37.1% of critical duration)	95
Adjusted work duration	478
+ Protective clothing adjustment (30% of adjusted duration)	143
Productive work duration	621
+ Work break adjustment (8.33 % of productive duration)	52
Total work duration (minutes)	673

***** Total duration = 11.217 hr *****

* alpha designators indicate activities that can be performed in parallel

APPENDIX A
(continued)

3. LABOR REQUIRED

Crew	Number	Duration (hours)	Rate ($/hr)	Cost
Laborers	3.00	11.217	$32.90	$1,107.12
Craftsmen	2.00	11.217	$39.29	$881.43
Foreman	1.00	11.217	$42.01	$471.23
General Foreman	0.25	11.217	$44.74	$125.46
Fire Watch	0.05	11.217	$32.90	$18.45
Health Physics Technician	1.00	11.217	$44.96	$504.32
Total Labor Cost				$3,108.01

4. EQUIPMENT & CONSUMABLES COSTS

Equipment Costs	none
Consumables/Materials Costs	
-Universal Sorbent 50 @ $0.63 sq. ft. {1}	$31.50
-Tarpaulins (oil resistant/fire retardant) 50 @ $0.43/sq. ft. {2}	$21.50
-Gas torch consumables 1 @ $21.02/hr. x 1 hr. {3}	$21.02
Subtotal cost of equipment and materials	$74.02
Overhead & profit on equipment and materials @ 16.00 %	$11.84
Total costs, equipment & material	$85.86

TOTAL COST:

Removal of contaminated heat exchanger <3000 pounds:	**$3,193.87**
Total labor cost:	$3,108.01
Total equipment/material costs:	$85.86
Total craft labor man-hours required per unit:	81.88

5. NOTES AND REFERENCES

- Work difficulty factors were developed in conjunction with the Atomic Industrial Forum's (now NEI) program to standardize nuclear decommissioning cost estimates and are delineated in Volume 1, Chapter 5 of the "Guidelines for Producing Commercial Nuclear Power Plant Decommissioning Cost Estimates," AIF/NESP-036, May 1986.

- Material and consumable costs were adjusted using the regional indices for Columbia, South Carolina

APPENDIX B

UNIT COST FACTOR LISTING
(DECON: Power Block Structures Only)

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Removal of clean instrument and sampling tubing, $/linear foot	0.35
Removal of clean pipe 0.25 to 2 inches diameter, $/linear foot	3.85
Removal of clean pipe >2 to 4 inches diameter, $/linear foot	5.45
Removal of clean pipe >4 to 8 inches diameter, $/linear foot	10.39
Removal of clean pipe >8 to 14 inches diameter, $/linear foot	20.15
Removal of clean pipe >14 to 20 inches diameter, $/linear foot	26.38
Removal of clean pipe >20 to 36 inches diameter, $/linear foot	38.76
Removal of clean pipe >36 inches diameter, $/linear foot	45.98
Removal of clean valve >2 to 4 inches	69.62
Removal of clean valve >4 to 8 inches	103.91
Removal of clean valve >8 to 14 inches	201.50
Removal of clean valve >14 to 20 inches	263.77
Removal of clean valve >20 to 36 inches	387.63
Removal of clean valve >36 inches	459.77
Removal of clean pipe hanger for small bore piping	26.82
Removal of clean pipe hanger for large bore piping	91.56
Removal of clean pump, <300 pound	179.10
Removal of clean pump, 300-1000 pound	485.27
Removal of clean pump, 1000-10,000 pound	1,905.93
Removal of clean pump, >10,000 pound	3,699.61
Removal of clean pump motor, 300-1000 pound	199.53
Removal of clean pump motor, 1000-10,000 pound	786.93
Removal of clean pump motor, >10,000 pound	1,770.59
Removal of clean heat exchanger <3000 pound	1,030.16
Removal of clean heat exchanger >3000 pound	2,612.09
Removal of clean feedwater heater/deaerator	7,315.92
Removal of clean moisture separator/reheater	14,976.11
Removal of clean tank, <300 gallons	229.92
Removal of clean tank, 300-3000 gallon	717.71
Removal of clean tank, >3000 gallons, $/square foot surface area	6.01

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Removal of clean electrical equipment, <300 pound	94.42
Removal of clean electrical equipment, 300-1000 pound	324.86
Removal of clean electrical equipment, 1000-10,000 pound	649.71
Removal of clean electrical equipment, >10,000 pound	1,541.08
Removal of clean electrical transformer < 30 tons	1,070.27
Removal of clean electrical transformer > 30 tons	3,082.18
Removal of clean standby diesel generator, <100 kW	1,093.18
Removal of clean standby diesel generator, 100 kW to 1 MW	2,440.04
Removal of clean standby diesel generator, >1 MW	5,051.40
Removal of clean electrical cable tray, $/linear foot	9.07
Removal of clean electrical conduit, $/linear foot	3.98
Removal of clean mechanical equipment, <300 pound	94.42
Removal of clean mechanical equipment, 300-1000 pound	324.86
Removal of clean mechanical equipment, 1000-10,000 pound	649.71
Removal of clean mechanical equipment, >10,000 pound	1,541.08
Removal of clean HVAC equipment, <300 pound	114.17
Removal of clean HVAC equipment, 300-1000 pound	390.34
Removal of clean HVAC equipment, 1000-10,000 pound	777.95
Removal of clean HVAC equipment, >10,000 pound	1,541.08
Removal of clean HVAC ductwork, $/pound	0.37
Removal of contaminated instrument and sampling tubing, $/linear foot	1.18
Removal of contaminated pipe 0.25 to 2 inches diameter, $/linear foot	18.61
Removal of contaminated pipe >2 to 4 inches diameter, $/linear foot	29.96
Removal of contaminated pipe >4 to 8 inches diameter, $/linear foot	46.48
Removal of contaminated pipe >8 to 14 inches diameter, $/linear foot	89.94
Removal of contaminated pipe >14 to 20 inches diameter, $/linear foot	107.25
Removal of contaminated pipe >20 to 36 inches diameter, $/linear foot	146.52
Removal of contaminated pipe >36 inches diameter, $/linear foot	172.20
Removal of contaminated valve >2 to 4 inches	346.60
Removal of contaminated valve >4 to 8 inches	409.83

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Removal of contaminated valve >8 to 14 inches	837.95
Removal of contaminated valve >14 to 20 inches	1,060.17
Removal of contaminated valve >20 to 36 inches	1,403.70
Removal of contaminated valve >36 inches	1,660.51
Removal of contaminated pipe hanger for small bore piping	117.24
Removal of contaminated pipe hanger for large bore piping	387.22
Removal of contaminated pump, <300 pound	737.22
Removal of contaminated pump, 300-1000 pound	1,665.99
Removal of contaminated pump, 1000-10,000 pound	5,235.15
Removal of contaminated pump, >10,000 pound	12,748.90
Removal of contaminated pump motor, 300-1000 pound	734.71
Removal of contaminated pump motor, 1000-10,000 pound	2,156.57
Removal of contaminated pump motor, >10,000 pound	4,842.02
Removal of contaminated heat exchanger <3000 pound	3,193.87
Removal of contaminated heat exchanger >3000 pound	9,351.53
Removal of contaminated tank, <300 gallons	1,231.64
Removal of contaminated tank, >300 gallons, $/square foot	22.88
Removal of contaminated electrical equipment, <300 pound	554.24
Removal of contaminated electrical equipment, 300-1000 pound	1,331.04
Removal of contaminated electrical equipment, 1000-10,000 pound	2,565.12
Removal of contaminated electrical equipment, >10,000 pound	5,019.34
Removal of contaminated electrical cable tray, $/linear foot	26.94
Removal of contaminated electrical conduit, $/linear foot	13.98
Removal of contaminated mechanical equipment, <300 pound	616.07
Removal of contaminated mechanical equipment, 300-1000 pound	1,467.94
Removal of contaminated mechanical equipment, 1000-10,000 pound	2,824.24
Removal of contaminated mechanical equipment, >10,000 pound	5,019.34
Removal of contaminated HVAC equipment, <300 pound	616.07
Removal of contaminated HVAC equipment, 300-1000 pound	1,467.94
Removal of contaminated HVAC equipment, 1000-10,000 pound	2,824.24

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Removal of contaminated HVAC equipment, >10,000 pound	5,019.34
Removal of contaminated HVAC ductwork, $/pound	1.80
Removal/plasma arc cut of contaminated thin metal components, $/linear in.	2.89
Additional decontamination of surface by washing, $/square foot	6.34
Additional decontamination of surfaces by hydrolasing, $/square foot	24.88
Decontamination rig hook up and flush, $/ 250 foot length	5,155.11
Chemical flush of components/systems, $/gallon	20.76
Removal of clean standard reinforced concrete, $/cubic yard	67.88
Removal of grade slab concrete, $/cubic yard	77.17
Removal of clean concrete floors, $/cubic yard	323.81
Removal of sections of clean concrete floors, $/cubic yard	925.60
Removal of clean heavily rein concrete w/#9 rebar, $/cubic yard	97.85
Removal of contaminated heavily rein concrete w/#9 rebar, $/cubic yard	1,763.94
Removal of clean heavily rein concrete w/#18 rebar, $/cubic yard	132.57
Removal of contaminated heavily rein concrete w/#18 rebar, $/cubic yard	2,330.78
Removal heavily rein concrete w/#18 rebar & steel embedments, $/cubic yard	389.13
Removal of below-grade suspended floors, $/cubic yard	185.78
Removal of clean monolithic concrete structures, $/cubic yard	750.25
Removal of contaminated monolithic concrete structures, $/cubic yard	1,749.26
Removal of clean foundation concrete, $/cubic yard	593.88
Removal of contaminated foundation concrete, $/cubic yard	1,630.76
Explosive demolition of bulk concrete, $/cubic yard	41.13
Removal of clean hollow masonry block wall, $/cubic yard	23.32
Removal of contaminated hollow masonry block wall, $/cubic yard	60.63
Removal of clean solid masonry block wall, $/cubic yard	23.32
Removal of contaminated solid masonry block wall, $/cubic yard	60.63
Backfill of below-grade voids, $/cubic yard	33.75
Removal of subterranean tunnels/voids, $/linear foot	97.02
Placement of concrete for below-grade voids, $/cubic yard	133.86
Excavation of clean material, $/cubic yard	2.87

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Excavation of contaminated material, $/cubic yard	36.12
Removal of clean concrete rubble (tipping fee included), $/cubic yard	24.01
Removal of contaminated concrete rubble, $/cubic yard	23.93
Removal of building by volume, $/cubic foot	0.27
Removal of clean building metal siding, $/square foot	1.18
Removal of contaminated building metal siding, $/square foot	3.96
Removal of standard asphalt roofing, $/square foot	1.66
Removal of transite panels, $/square foot	1.73
Scarifying contaminated concrete surfaces (drill & spall), $/square foot	10.91
Scabbling contaminated concrete floors, $/square foot	6.52
Scabbling contaminated concrete walls, $/square foot	16.92
Scabbling contaminated ceilings, $/square foot	57.77
Scabbling structural steel, $/square foot	5.13
Removal of clean overhead crane/monorail < 10 ton capacity	448.77
Removal of contaminated overhead crane/monorail < 10 ton capacity	1,336.18
Removal of clean overhead crane/monorail >10-50 ton capacity	1,077.00
Removal of contaminated overhead crane/monorail >10-50 ton capacity	3,206.26
Removal of polar crane > 50 ton capacity	4,495.62
Removal of gantry crane > 50 ton capacity	19,263.56
Removal of structural steel, $/pound	0.16
Removal of clean steel floor grating, $/square foot	3.40
Removal of contaminated steel floor grating, $/square foot	10.17
Removal of clean free standing steel liner, $/square foot	9.01
Removal of contaminated free standing steel liner, $/square foot	26.61
Removal of clean concrete-anchored steel liner, $/square foot	4.51
Removal of contaminated concrete-anchored steel liner, $/square foot	31.05
Placement of scaffolding in clean areas, $/square foot	15.84
Placement of scaffolding in contaminated areas, $/square foot	23.83
Landscaping with topsoil, $/acre	23,159.87
Cost of CPC B-88 LSA box & preparation for use	2,048.32

APPENDIX B

UNIT COST FACTOR LISTING
(Power Block Structures Only)

Unit Cost Factor	Cost/Unit($)
Cost of CPC B-25 LSA box & preparation for use	1,926.41
Cost of CPC B-12V 12 gauge LSA box & preparation for use	1,522.93
Cost of CPC B-144 LSA box & preparation for use	10,582.75
Cost of LSA drum & preparation for use	189.38
Cost of cask liner for CNSI 8 120A cask (resins)	12,206.78
Cost of cask liner for CNSI 8 120A cask (filters)	8,695.42
Decontamination of surfaces with vacuuming, $/square foot	0.68

TOTAL COST TO DECOMMISSION WITH 17.19% CONTINGENCY:	**$1,108,765**	**thousands of 2016 dollars**
TOTAL NRC LICENSE TERMINATION COST IS 56.74% OR:	**$629,138**	**thousands of 2016 dollars**
SPENT FUEL MANAGEMENT COST IS 37.25% OR:	**$413,016**	**thousands of 2016 dollars**
NON-NUCLEAR DEMOLITION COST IS 6.01% OR:	**$66,611**	**thousands of 2016 dollars**
TOTAL LOW-LEVEL RADIOACTIVE WASTE VOLUME BURIED (EXCLUDING GTCC):	**229,723**	**cubic feet**
TOTAL GREATER THAN CLASS C RADWASTE VOLUME GENERATED:	**1,773**	**cubic feet**
TOTAL SCRAP METAL REMOVED:	**52,852**	**tons**
TOTAL CRAFT LABOR REQUIREMENTS:	**1,253,424**	**man-hours**

End Notes:
n/a - indicates that this activity not charged as decommissioning expense.
a - indicates that this activity performed by decommissioning staff.
0 - indicates that this value is less than 0.5 but is non-zero.
a cell containing " - " indicates a zero value

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2013-2-E

March 14, 2013

IN RE: Annual Review of Base Rates for Fuel Costs of South Carolina Electric & Gas Company	)))	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made between the South Carolina Office of Regulatory Staff ("ORS"), South Carolina Energy Users Committee ("SCEUC"), and South Carolina Electric & Gas Company ("SCE&G" or the "Company") (collectively referred to as the "Parties" or sometimes individually as a "Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina (the "Commission") pursuant to the procedure established in S.C. Code Ann. §58-27-865 (Supp. 2012), and the Parties to this Settlement Agreement are parties of record in the above-captioned docket;

WHEREAS, the Parties have varying legal positions regarding the issues in this case;

WHEREAS, the Parties have engaged in discussions to determine if a settlement would be in their best interest;

WHEREAS, following these discussions the Parties have each determined that their interest and the public interest would be best served by settling matters in the above-captioned case under the terms and conditions set forth below:

1. ORS's review of SCE&G's operation of its generating facilities resulted in ORS concluding that SCE&G has made reasonable efforts to maximize unit availability and minimize fuel costs. Additionally, ORS has determined that SCE&G took appropriate corrective action with respect to outages that occurred during the review period.

2. The Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

a. SCE&G witnesses:
   i. Andy T. Barbee
   ii. Joseph K. Todd
   iii. Michael D. Shinn
   iv. Rose M. Jackson
   v. Allen W. Rooks
b. ORS witnesses:
   i. Joseph W. Coates
   ii. Michael L. Seaman-Huynh

3. SCE&G's net cumulative (under)-recovered balance of total fuel and variable environmental costs for the periods ending December 31, 2012, and April 30, 2013, are ($84,155,155) and ($71,310,286), respectively. As of December 31, 2012, the net cumulative (under)-recovered balance of ($84,155,155) consists of cumulative (under)-recovered base fuel costs of ($82,500,782) and cumulative (under)-recovered environmental costs of ($1,654,373). As of April 2013, the projected net cumulative (under)-recovered balance of ($71,310,286) consists of cumulative (under)-recovered base fuel costs of ($71,234,193) and cumulative (under)-recovered environmental costs of ($76,093).

4. Commission Order No. 2012-951 (issued December 20, 2012) established a base fuel component of 3.278 cents per kilowatt-hour ("kWh") for the period January 1, 2013, through the last billing cycle of April 2014 based on the Company's forecast. In keeping with that Order, SCE&G agrees to carry forward an amount equal to the actual base fuel (under)-recovered balance as of April 30, 2013, which is projected to be ($71,234,193). Carrying costs will be permitted for any (under)-collected amounts of base fuel costs that exceed ($24,338,526) from January 2013 through April 2014 at the rate of the 3-year U.S. Government Treasury Note as reported by the Wall Street Journal plus an all-in spread of 65 basis points (0.65 percentage points).

5. The appropriate fuel factors for SCE&G to charge pursuant to this Settlement Agreement for the period beginning with the first billing cycle in May 2013 and extending through the last billing cycle for April 2014 are listed below and set forth in the tariff sheet entitled "Adjustment for Fuel and Variable Environmental Costs," which is attached hereto as Exhibit A.

Class	Base Fuel Cost Component (cents/kWh)	Environmental Fuel Cost Component (cents/kWh)	Total Fuel Costs Factor (cents/kWh)
Residential	3.278	0.079	3.357
Small General Service	3.278	0.066	3.344
Medium General Service	3.278	0.055	3.333
Large General Service	3.278	0.036	3.314
Lighting	3.278	--	3.278

6. The Parties agree the fuel factors set forth above are consistent with S.C. Code Ann. § 58-27-865 (Supp. 2012) and Order No. 2012-951. The Parties further agree that, except as provided in Paragraph 7 herein, any and all challenges to SCE&G's historical fuel costs recovery for the period ending December 31, 2012, are not subject to further review; however,

the projected fuel costs for the period beginning January 1, 2013, and thereafter shall be an open issue in future fuel costs proceedings held under the procedure and criteria established in S.C. Code Ann. § 58-27-865 (Supp. 2012).

7. With regards to plant outages not completed as of December 31, 2012 and outages where final reports of the Company, contractor, governmental entities or others are not available, the Parties agree that ORS retains the right to review the reasonableness of the plant outage(s) and associated costs in the review period during which the outage is completed or when the report(s) on such outage(s) become available.

8. SCE&G agrees to apply any money received from litigation, arbitration, or negotiated settlements with coal suppliers, where the dispute is for non-deliveries, defaults or other similar non-performance issues or for other matters related to or associated with S.C. Code § 58-27-865 (Supp. 2012), to reduce the fuel costs account(s). SCE&G also agrees to provide the Parties with reports showing SCE&G's efforts to seek compensation for non-deliveries, defaults or other similar non-performance upon request.

9. SCE&G agrees to provide to ORS and SCEUC the following:

   a. Copies of the monthly fuel recovery reports currently filed with the Commission and ORS; and,

   b. Quarterly forecasts beginning with the quarter ending June 30, 2013, of the expected fuel factors to be set at SCE&G's next annual fuel proceeding and SCE&G's historical over (under)-recovered balance to date. SCE&G agrees it will put forth reasonable efforts to forecast the expected fuel factors to be set at its next annual fuel proceeding; however, the Parties agree that these quarterly forecasts will not be admitted into evidence in any future SCE&G proceeding.

10. The Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy. This Settlement Agreement in no way constitutes a waiver or acceptance of the position of any Party concerning the requirements of S.C. Code Ann. § 58-27-865 (Supp. 2012) in any future proceeding.

11. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code § 58-4-10(B) (Supp. 2012). S.C. Code § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

12. The Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable, and full resolution in the above-captioned proceeding. The Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Settlement Agreement and the terms and conditions contained herein.

13. This written Settlement Agreement contains the complete agreement of the Parties. There are no other terms and conditions to which the Parties have agreed. This Settlement Agreement integrates all discussions among the Parties into the terms of this written document. The Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If

the Commission should decline to approve this Settlement Agreement in its entirety, then any Party desiring to do so may withdraw from this Settlement Agreement without penalty.

14. This Settlement Agreement shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

SOUTH CAROLINA ELECTRIC & GAS COMPANY — ELECTRICITY

ADJUSTMENT FOR FUEL AND VARIABLE ENVIRONMENTAL COSTS — **RETAIL RATES**

APPLICABILITY

This adjustment is applicable to and is part of the Utility's South Carolina retail electric rate schedules.

The fuel and variable environmental costs, to be recovered in an amount rounded to the nearest one-thousandth of a cent per kilowatt-hour, will be determined by the following formulas:

$$F_C = \frac{E_F}{S} + \frac{G_F}{S_1}$$

$$F_{EC} = \frac{E_{EC} + G_{EC}}{S_2}$$

$$\text{Total Fuel Rate} = F_C + F_{EC}$$

Where:

F_C = Fuel cost per kilowatt-hour included in base rate, rounded to the nearest one-thousandth of a cent.

E_F = Total projected system fuel costs:

(A) Fuel consumed in the Utility's own plants and the Utility's share of fuel consumed in jointly owned or leased plants. The cost of fossil fuel shall include no items other than those listed in Account 151 of the Commission's Uniform System of Accounts for Public Utilities and Licensees. The cost of nuclear fuel shall be that as shown in Account 518 excluding rental payments on leased nuclear fuel and except that, if Account 518 also contains any expense for fossil fuel which has already been included in the cost of fossil fuel, it shall be deducted from this account.

PLUS

(B) Fuel costs related to purchased power such as those incurred in unit power and limited term power purchases where the fossil fuel costs associated with energy purchased are identifiable and are identified in the billing statement. Also, the cost of "firm generation capacity purchases," which are defined as purchases made to cure a capacity deficiency or to maintain adequate reserve levels. Costs of "firm generation capacity purchases" includes the total delivered costs of firm generation capacity purchased and excludes generation capacity reservation charges, generation capacity option charges and any other capacity charges.

PLUS

(C) Fuel costs related to purchased power (including transmission charges), such as short term, economy and other such purchases, where the energy is purchased on an economic dispatch basis, including the total delivered cost of economy purchases of electric power defined as purchases made to displace higher cost generation at a cost which is less than the purchasing Utility's avoided variable costs for the generation of an equivalent quantity of electric power.

Energy receipts that do not involve money payments such as diversity energy and payback of storage energy are not defined as purchased or interchange power relative to this fuel calculation.

MINUS

(D) The cost of fuel recovered through intersystem sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

Energy deliveries that do not involve billing transactions such as diversity energy and payback of storage energy are not defined as sales relative to this fuel calculation.

S = Projected system kilowatt-hour sales excluding any intersystem sales.

G_F = Cumulative difference between jurisdictional fuel revenues billed and fuel expenses at the end of the month preceding the projected period utilized in E_F and S.

S_1 = Projected jurisdictional kilowatt-hour sales, for the period covered by the fuel costs included in E_F.

F_{EC} = Customer class variable environmental costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

SOUTH CAROLINA ELECTRIC & GAS COMPANY **ELECTRICITY**

ADJUSTMENT FOR FUEL AND VARIABLE ENVIRONMENTAL COSTS **RETAIL RATES**

E_{EC} = The projected variable environmental costs including: a) the cost of ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions, plus b) the cost of emission allowances, as used, including allowances for SO2, NOx, mercury and particulates minus net proceeds of sales of emission allowances, and c) as approved by the Commission, all other variable environmental costs incurred in relation to the consumption of fuel and air emissions caused thereby, including but not limited to environmental reagents, other environmental allowances, and emission related taxes. Any environmental related costs recovered through intersystem sales would be subtracted from the totals produced by subparts a), b), and c).

These environmental costs will be allocated to retail customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{EC} = Cumulative difference between jurisdictional customer class environmental fuel revenues billed and jurisdictional customer class environmental costs at the end of the month preceding the projected period utilized in E_{EC} and S_2.

S_2 = The projected jurisdictional customer class kilowatt-hour sales.

The appropriate revenue-related tax factor is to be included in these calculations.

FUEL RATES BY CLASS

The total fuel costs in cents per kilowatt-hour by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2013 through April, 2014:

Customer Class	F_C Rate	+	F_{EC} Rate	=	Total Fuel Rate
Residential	**3.278**		**0.079**		**3.357**
Small General Service	**3.278**		**0.066**		**3.344**
Medium General Service	**3.278**		**0.055**		**3.333**

Effective Upon Approval by the Public
Service Commission of South Carolina

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2014-2-E

March 27, 2014

IN RE:	Annual Review of Base Rates for Fuel Costs of South Carolina Electric & Gas Company	)))	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made among the South Carolina Office of Regulatory Staff ("ORS"), South Carolina Energy Users Committee ("SCEUC"), and South Carolina Electric & Gas Company ("SCE&G" or the "Company") (collectively referred to as the "Parties" or sometimes individually as a "Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the procedure established in S.C. Code Ann. § 58-27-865 (Supp. 2013), and the Parties to this Settlement Agreement are parties of record in the above-captioned docket;

WHEREAS, the Parties have varying legal positions regarding the issues in this proceeding;

WHEREAS, the Parties have engaged in discussions to determine if a settlement would be in their best interest;

WHEREAS, following these discussions the Parties have each determined that their interests and the public interest would be best served by settling matters in the above-captioned case under the terms and conditions set forth below:

1. ORS's review of SCE&G's operation of its generating facilities resulted in ORS concluding that SCE&G has made reasonable efforts to maximize unit availability and minimize fuel costs. Additionally, ORS has determined that SCE&G took appropriate corrective action with respect to outages that occurred during the review period of January 1, 2013, through December 31, 2013. Further, ORS has concluded that, subject to the adjustments set forth in its pre-filed direct testimony, SCE&G's accounting practices are in compliance with S.C. Code Ann. § 58-27-865 (Supp. 2013).

2. The Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

a. SCE&G witnesses:
   i. George A. Lippard, III
   ii. Joseph K. Todd
   iii. Michael D. Shinn
   iv. Rose M. Jackson
   v. Keith C. Coffer, Jr.
   vi. Allen W. Rooks

b. ORS witnesses:
   i. Ivana C. Gearheart
   ii. Michael L. Seaman-Huynh

3. SCE&G and SCEUC agree with the accounting adjustment proposed by ORS. Accordingly, SCE&G's net cumulative (under)-recovered balance of total fuel and variable environmental costs for the periods ending December 31, 2013, and projected through April 30, 2014, are ($60,509,405) and ($54,444,098), respectively. As of December 31, 2013, the net cumulative (under)-recovered balance of ($60,509,405) consists of cumulative (under)-recovered

base fuel costs of ($60,307,192) and cumulative (under)-recovered environmental costs of ($202,213). As of April 30, 2014, the projected net cumulative (under)-recovered balance of ($54,444,098) consists of cumulative (under)-recovered base fuel costs of ($54,247,591) and cumulative (under)-recovered environmental costs of ($196,507). The projected net cumulative (under)-recovered balance as of April 30, 2014, totaling ($54,444,098) reflects the application of an estimated $46 million of gains from the settlement of certain forward-starting interest rate swap contracts to reduce fuel costs.

4. The Parties agree that the appropriate fuel factors for SCE&G to charge pursuant to this Settlement Agreement for the period beginning with the first billing cycle for May 2014 and extending through the last billing cycle for April 2015 are listed below and set forth in the tariff sheet entitled "Adjustment for Fuel and Variable Environmental Costs," which is attached hereto as Exhibit A.

Class	Base Fuel Cost Component (cents/kWh)	Environmental Fuel Cost Component (cents/kWh)	Total Fuel Costs Factor (cents/kWh)
Residential	3.325	0.079	3.404
Small General Service	3.325	0.066	3.391
Medium General Service	3.325	0.055	3.380
Large General Service	3.325	0.036	3.361
Lighting	3.325	--	3.325

5. The Parties agree that the total fuel costs factors set forth in Paragraph 4 do not completely eliminate the (under)-collected balance of total fuel costs. Therefore, the Parties agree that SCE&G will be allowed to charge and accrue carrying costs monthly on its base fuel (under)-collected balance. The applicable period during which carrying costs may be applied pursuant to this Settlement Agreement begins May 1, 2014, and ends April 30, 2015. The applicable interest rate used to calculate the carrying costs under this Settlement Agreement is

the rate of interest as of the first day of each month during the applicable period for the 3-year U.S. Government Treasury Note, as reported by the *Wall Street Journal*, either in its print edition or on its website, plus an all-in spread of 65 basis points (0.65 percentage points).

6. In Docket No. 2014-88-E, SCE&G proposed decreasing its Rider Related to Pension Costs ("Pension Rider") from $0.00051 per kilowatt-hour ("kWh") to $0.00004 per kWh, resulting in a reduction in the Pension Rider of $0.00047. The Parties agree that the rate rider decrease proposed in Docket No. 2014-88-E offsets the adjustment to the base fuel factor set forth in Paragraph 4, resulting in no net increase to retail electric customers' bills.

7. The Parties agree the fuel factors set forth above are consistent with S.C. Code Ann. § 58-27-865 (Supp. 2013). The Parties further agree that, except as provided in Paragraph 8 herein, any and all challenges to SCE&G's historical fuel costs recovery for the period ending December 31, 2013, are not subject to further review; however, the projected fuel costs for the period beginning January 1, 2014, and thereafter shall be an open issue in future fuel costs proceedings held under the procedure and criteria established in S.C. Code Ann. § 58-27-865 (Supp. 2013).

8. With regards to plant outages not completed as of December 31, 2013, and outages where final reports of the Company, contractors, governmental entities or others are not available, the Parties agree that ORS retains the right to review the reasonableness of the plant outage(s) and associated costs in the review period during which the outage is completed or when the report(s) on such outage(s) become available.

9. SCE&G agrees to apply any money received from litigation, arbitration, or negotiated settlements with coal suppliers, where the dispute is for non-deliveries, defaults or other similar non-performance issues or for other matters related to or associated with S.C. Code

§ 58-27-865 (Supp. 2013), to reduce the fuel costs account(s). SCE&G also agrees to provide the Parties with reports showing SCE&G's efforts to seek compensation for non-deliveries, defaults or other similar non-performance upon request.

10. SCE&G agrees to provide to ORS and SCEUC the following:

a. Copies of the monthly fuel recovery reports currently filed with the Commission and ORS; and,

b. Quarterly forecasts beginning with the quarter ending June 30, 2014, of the expected fuel factors to be set at SCE&G's next annual fuel proceeding and SCE&G's historical over (under)-recovered balance to date. SCE&G agrees it will put forth reasonable efforts to forecast the expected fuel factors to be set at its next annual fuel proceeding; however, the Parties agree that these quarterly forecasts will not be admitted into evidence in any future SCE&G proceeding.

11. The Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy. This Settlement Agreement in no way constitutes a waiver or acceptance of the position of any Party concerning the requirements of S.C. Code Ann. § 58-27-865 (Supp. 2013) in any future proceeding.

12. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code § 58-4-10(B) (Supp. 2013). S.C. Code § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of

> utility facilities so as to provide reliable and high quality utility services."

13. The Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable, and full resolution in the above-captioned proceeding. The Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Settlement Agreement and the terms and conditions contained herein.

14. This written Settlement Agreement contains the complete agreement of the Parties. There are no other terms and conditions to which the Parties have agreed. This Settlement Agreement integrates all discussions among the Parties into the terms of this written document. The Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve this Settlement Agreement in its entirety, then any Party desiring to do so may withdraw from this Settlement Agreement without penalty.

15. This Settlement Agreement shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

SOUTH CAROLINA ELECTRIC & GAS COMPANY **ELECTRICITY**

ADJUSTMENT FOR FUEL AND VARIABLE ENVIRONMENTAL COSTS **RETAIL RATES**
(Page 1 of 2)

APPLICABILITY

This adjustment is applicable to and is part of the Utility's South Carolina retail electric rate schedules.

The fuel and variable environmental costs, to be recovered in an amount rounded to the nearest one-thousandth of a cent per kilowatt-hour, will be determined by the following formulas:

$$F_C = \frac{E_F}{S} + \frac{G_F}{S_1}$$

$$F_{EC} = \frac{E_{EC} + G_{EC}}{S_2}$$

$$\text{Total Fuel Rate} = F_C + F_{EC}$$

Where:

F_C = Fuel cost per kilowatt-hour included in base rate, rounded to the nearest one-thousandth of a cent.

E_F = Total projected system fuel costs:

(A) Fuel consumed in the Utility's own plants and the Utility's share of fuel consumed in jointly owned or leased plants. The cost of fossil fuel shall include no items other than those listed in Account 151 of the Commission's Uniform System of Accounts for Public Utilities and Licensees. The cost of nuclear fuel shall be that as shown in Account 518 excluding rental payments on leased nuclear fuel and except that, if Account 518 also contains any expense for fossil fuel which has already been included in the cost of fossil fuel, it shall be deducted from this account.

PLUS

(B) Fuel costs related to purchased power such as those incurred in unit power and limited term power purchases where the fossil fuel costs associated with energy purchased are identifiable and are identified in the billing statement. Also, the cost of "firm generation capacity purchases," which are defined as purchases made to cure a capacity deficiency or to maintain adequate reserve levels. Costs of "firm generation capacity purchases" includes the total delivered costs of firm generation capacity purchased and excludes generation capacity reservation charges, generation capacity option charges and any other capacity charges.

PLUS

(C) Fuel costs related to purchased power (including transmission charges), such as short term, economy and other such purchases, where the energy is purchased on an economic dispatch basis, including the total delivered cost of economy purchases of electric power defined as purchases made to displace higher cost generation at a cost which is less than the purchasing Utility's avoided variable costs for the generation of an equivalent quantity of electric power.

Energy receipts that do not involve money payments such as diversity energy and payback of storage energy are not defined as purchased or interchange power relative to this fuel calculation.

MINUS

(D) The cost of fuel recovered through intersystem sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

Energy deliveries that do not involve billing transactions such as diversity energy and payback of storage energy are not defined as sales relative to this fuel calculation.

S = Projected system kilowatt-hour sales excluding any intersystem sales.

G_F = Cumulative difference between jurisdictional fuel revenues billed and fuel expenses at the end of the month preceding the projected period utilized in E_F and S.

S_1 = Projected jurisdictional kilowatt-hour sales, for the period covered by the fuel costs included in E_F.

F_{EC} = Customer class variable environmental costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

SOUTH CAROLINA ELECTRIC & GAS COMPANY **ELECTRICITY**

ADJUSTMENT FOR FUEL AND VARIABLE ENVIRONMENTAL COSTS **RETAIL RATES**
(Page 2 of 2)

E_{EC} = The projected variable environmental costs including: a) the cost of ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions, plus b) the cost of emission allowances, as used, including allowances for SO2, NOx, mercury and particulates minus net proceeds of sales of emission allowances, and c) as approved by the Commission, all other variable environmental costs incurred in relation to the consumption of fuel and air emissions caused thereby, including but not limited to environmental reagents, other environmental allowances, and emission related taxes. Any environmental related costs recovered through intersystem sales would be subtracted from the totals produced by subparts a), b), and c).

These environmental costs will be allocated to retail customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{EC} = Cumulative difference between jurisdictional customer class environmental fuel revenues billed and jurisdictional customer class environmental costs at the end of the month preceding the projected period utilized in E_{EC} and S_2.

S_2 = The projected jurisdictional customer class kilowatt-hour sales.

The appropriate revenue-related tax factor is to be included in these calculations.

FUEL RATES BY CLASS

The total fuel costs in cents per kilowatt-hour by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2014 through April, 2015:

Customer Class	F_C Rate	+	F_{EC} Rate	=	Total Fuel Rate
Residential	**3.325**		**0.079**		**3.404**
Small General Service	**3.325**		**0.066**		**3.391**
Medium General Service	**3.325**		**0.055**		**3.380**
Large General Service	**3.325**		**0.036**		**3.361**
Lighting	**3.325**		**0.000**		**3.325**

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2014-86-E

IN RE:

Application of South Carolina Electric & Gas Company for a Certificate of Environmental Compatibility and Public Convenience and Necessity for the Construction and Operation of Two 230 kV Transmission Lines from its Lyles Substation to its Lake Murray Substation	))))))))	**STIPULATION**

This Stipulation is made by and between the South Carolina Office of Regulatory Staff ("ORS") and South Carolina Electric & Gas Company ("SCE&G") (collectively referred to as the "Parties" or sometimes individually as a "Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the provisions in S.C. Code Ann. § 58-33-10 *et seq.* (1976 & Supp. 2013) ("the Siting Act") and 10 S.C. Ann. Regs. 103-304 (2012) at the request of SCE&G, which filed an Application for a Certificate of Environmental Compatibility and Public Convenience and Necessity for the Construction and Operation of Two 230 kV Transmission Lines from its Lyles Substation to its Lake Murray Substation ("Application");

WHEREAS, in the Application, SCE&G seeks a Certificate of Environmental Compatibility and Public Convenience and Necessity ("Certificate") for the construction and operation of two 230 kV Transmission Lines from its Lyles 230/115 kV Substation in

Columbia, South Carolina, to its Lake Murray 230/115 kV Substation near the Saluda River Dam on the basis that, after the retirement of the McMeekin Generating Station, in the event of the loss of the existing Edenwood-Lake Murray 230 kV Line and one of the 230/115 kV autotransformers at the Lake Murray 230/115 kV Substation, the remaining Lake Murray 230/115 kV autotransformer would be overloaded;

WHEREAS, the Parties to this Stipulation are parties of record in the above-captioned docket;

WHEREAS, in accordance with the provisions of S.C. Code Ann. § 58-33-140 (1976 & Supp. 2013) the South Carolina Department of Health and Environmental Control, the Department of Natural Resources, and the Department of Parks, Recreation, and Tourism, are also parties to this proceeding (collectively, the "Other Parties of Record"). The Other Parties of Record have been contacted with regard to the Stipulation; however, they have not taken a position on this matter;

WHEREAS, the Parties have engaged in discussions to determine if a Stipulation would be in their best interest; and

WHEREAS, following these discussions the Parties have determined that their interests, and those of the public, would be best served by reaching an agreement on matters set forth in SCE&G's Application in the above-captioned case under the terms and conditions set forth below:

1. The Parties agree to stipulate into the record before the Commission the direct testimony of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

A. SCE&G witnesses: Hubert C. Young, III and Dwight M. Hollifield
B. ORS witness: Michael L. Seaman-Huynh.

2. As a compromise, the following is adopted, accepted, and acknowledged as the agreement of the Parties:

A. ORS will recommend that the Commission approve SCE&G's Application and grant SCE&G a Certificate for two 230 kV Transmission Lines, and associated facilities, between its Lyles Substation and its Lake Murray Substation, as requested in the Application in this Docket;

B. SCE&G agrees to follow all South Carolina, Commission and local government regulations and laws arising from matters set forth in the Application; and

C. SCE&G will notify ORS and the Commission when the facilities begin commercial operation and of any changes to the planned commercial operation dates.

3. The Parties agree this Stipulation is reasonable, in the public interest and in accordance with law and regulatory policy.

4. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code §58-4-10(B) (Supp. 2013). S.C. Code §58-4-10(B)(1) through (3) reads in part as follows:

"... public interest' means a balancing of the following:

(1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
(2) Economic development and job attraction and retention in South Carolina; and
(3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

5. The Parties agree to cooperate in good faith with one another in recommending to the Commission that this Stipulation be accepted and approved by the Commission as a fair, reasonable and full resolution in the above-captioned proceeding. The Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Stipulation and the terms and conditions contained herein.

6. This written Stipulation contains the complete agreement of the Parties. There are no other terms and conditions to which the Parties have agreed. The Parties agree that this Stipulation will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will the Stipulation or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve the Stipulation in its entirety, then any Party desiring to do so may withdraw from the Stipulation without penalty.

7. This Stipulation shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Stipulation by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Stipulation.

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2015-2-E

April 2, 2015

IN RE: Annual Review of Base Rates for Fuel Costs for South Carolina Electric & Gas Company	)))	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made among the South Carolina Office of Regulatory Staff ("ORS"), South Carolina Energy Users Committee, and South Carolina Electric & Gas Company ("SCE&G") (collectively referred to as the "Settling Parties" or sometimes individually as a "Settling Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the procedure established in S.C. Code Ann. § 58-27-865 (Supp. 2014), and the Settling Parties to this Settlement Agreement are parties of record in the above-captioned docket;

WHEREAS, the Settling Parties have varying legal positions regarding the issues in this proceeding;

WHEREAS, the Settling Parties have engaged in discussions to determine if a settlement would be in their best interest;

WHEREAS, following these discussions the Settling Parties have each determined that their interests and the public interest would be best served by settling matters in the above-captioned case under the terms and conditions set forth below:

1. ORS's review of SCE&G's operation of its generating facilities resulted in ORS concluding that SCE&G has made reasonable efforts to maximize unit availability and minimize fuel costs. Additionally, ORS has determined that SCE&G took appropriate corrective action with respect to outages that occurred during the review period of January 1, 2014, through December 31, 2014. Further, ORS has concluded that, subject to the adjustments set forth in its pre-filed direct testimony, SCE&G's accounting practices are in compliance with S.C. Code Ann. § 58-27-865 (Supp. 2014).

2. The Settling Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

a. SCE&G witnesses:
   i. George A. Lippard, III
   ii. Joseph K. Todd
   iii. Michael D. Shinn
   iv. J. Darrin Kahl
   v. Thomas N. Effinger
   vi. Allen W. Rooks
b. ORS witnesses:
   i. Robert A. Lawyer
   ii. Michael L. Seaman-Huynh

3. The Settling Parties agree to accept all recommendations in ORS's testimony and exhibits. Accordingly, SCE&G's net cumulative (under)-recovered balance of total base fuel, variable environmental, and avoided capacity costs for the periods ending December 31, 2014, and projected through April 30, 2015, are ($64,150,324) and ($36,081,435), respectively. As of December 31, 2014, the net cumulative (under)-recovered balance of ($64,150,324) consists of

cumulative (under)-recovered base fuel costs of ($64,427,701) and cumulative over-recovered environmental and avoided capacity costs of $277,377. As of April 30, 2015, the projected net cumulative (under)-recovered balance of ($36,081,435) consists of cumulative (under)-recovered base fuel costs of ($36,467,759) and cumulative over-recovered environmental and avoided capacity costs of $386,324.

4. The Settling Parties agree that the appropriate fuel factors for SCE&G to charge pursuant to this Settlement Agreement for the period beginning with the first billing cycle for May 2015 and extending through the last billing cycle for April 2016 are listed below and set forth in the tariff sheet entitled "Adjustment for Fuel, Variable Environmental, and Avoided Capacity Costs," which is attached hereto as Exhibit A.

Class	Base Fuel Cost Component (cents/kWh)	Environmental Fuel & Avoided Capacity Cost Component (cents/kWh)	Total Fuel Costs Factor (cents/kWh)
Residential	3.137	0.076	3.213
Small General Service	3.137	0.076	3.213
Medium General Service	3.137	0.066	3.203
Large General Service	3.137	0.037	3.174
Lighting	3.137	0.000	3.137

5. The Settling Parties agree that the total fuel costs factors set forth in Paragraph 4 above are projected to eliminate SCE&G's (under)-collected balance of total fuel costs as of April 30, 2016.

6. If approved by the Commission, the ORS proposed rates would decrease the average monthly bill for a residential customer on Rate 8 using 1,000 kWh by approximately $1.91, from $146.40 to $144.49.

7. The Settling Parties agree the fuel factors set forth above are consistent with S.C. Code Ann. § 58-27-865 (Supp. 2014). The Settling Parties further agree that, except as provided

in Paragraph 8 herein, any and all challenges to SCE&G's historical fuel costs recovery for the period ending December 31, 2014, are not subject to further review; however, the projected fuel costs for the period beginning January 1, 2015, and thereafter, shall be an open issue in future fuel costs proceedings held under the procedure and criteria established in S.C. Code Ann. § 58-27-865 (Supp. 2014).

8. With regards to plant outages not completed as of December 31, 2014, and outages where final reports of SCE&G, contractors, governmental entities or others are not available, the Settling Parties agree that ORS retains the right to review the reasonableness of the plant outage(s) and associated costs in the review period during which the outage is completed or when the report(s) on such outage(s) become available.

9. SCE&G agrees to apply any money received or saved from litigation, arbitration, termination of contract, or negotiated settlements with coal suppliers, where the dispute is for non-deliveries, defaults or other similar non-performance issues or for other matters related to or associated with S.C. Code § 58-27-865 (Supp. 2014), to reduce the fuel costs account(s).

10. SCE&G agrees to provide the following to the other Settling Parties:

a. Copies of the monthly fuel recovery reports currently filed with the Commission and ORS; and,

b. Quarterly forecasts beginning with the quarter ending June 30, 2015, of the expected fuel factors to be set at SCE&G's next annual fuel proceeding and SCE&G's historical over (under)-recovered balance to date. SCE&G agrees it will put forth reasonable efforts to forecast the expected fuel factors to be set at its next annual fuel proceeding; however, the Settling Parties agree that these quarterly forecasts will not be admitted into evidence in any future SCE&G proceeding.

11. The Settling Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy. This Settlement Agreement in no way constitutes a waiver or acceptance of the position of any Settling Party concerning the requirements of S.C. Code Ann. § 58-27-865 (Supp. 2014) in any future proceeding.

12. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code § 58-4-10(B) (Supp. 2014). S.C. Code § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

13. The Settling Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable, and full resolution in the above-captioned proceeding. The Settling Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Settlement Agreement and the terms and conditions contained herein.

14. This written Settlement Agreement contains the complete agreement of the Settling Parties. There are no other terms and conditions to which the Settling Parties have agreed. This Settlement Agreement integrates all discussions among the Settling Parties into the terms of this written document. The Settling Parties agree that this Settlement Agreement will

not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve this Settlement Agreement in its entirety, then any Settling Party desiring to do so may withdraw from this Settlement Agreement without penalty.

15. This Settlement Agreement shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Settling Parties hereto. Therefore, each Settling Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Settling Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL, AND AVOIDED CAPACITY COSTS **RETAIL RATES**

APPLICABILITY

This adjustment is applicable to and is part of the Utility's South Carolina retail electric rate schedules.

The fuel, variable environmental, and avoided capacity costs, to be recovered in an amount rounded to the nearest one-thousandth of a cent per kilowatt-hour, will be determined by the following formulas:

$$F_C = \frac{E_F}{S} + \frac{G_F}{S_1}$$

$$F_{EC} = \frac{E_{EC} + G_{EC}}{S_2}$$

$$\text{Total Fuel Rate} = F_C + F_{EC}$$

Where:

F_C = Fuel cost per kilowatt-hour included in base rate, rounded to the nearest one-thousandth of a cent.

E_F = Total projected system fuel costs:

(A) Fuel consumed in the Utility's own plants and the Utility's share of fuel consumed in jointly owned or leased plants. The cost of fossil fuel shall include no items other than those listed in Account 151 of the Commission's Uniform System of Accounts for Public Utilities and Licensees. The cost of nuclear fuel shall be that as shown in Account 518 excluding rental payments on leased nuclear fuel and except that, if Account 518 also contains any expense for fossil fuel which has already been included in the cost of fossil fuel, it shall be deducted from this account.

PLUS

(B) Fuel costs related to purchased power such as those incurred in unit power and limited term power purchases where the fossil fuel costs associated with energy purchased are identifiable and are identified in the billing statement, and also including avoided energy costs incurred by the Utility. Also, the cost of "firm generation capacity purchases," which are defined as purchases made to cure a capacity deficiency or to maintain adequate reserve levels. Costs of "firm generation capacity purchases" includes the total delivered costs of firm generation capacity purchased and excludes generation capacity reservation charges, generation capacity option charges and any other capacity charges.

PLUS

(C) Fuel costs related to purchased power (including transmission charges), such as short term, economy and other such purchases, where the energy is purchased on an economic dispatch basis, including the total delivered cost of economy purchases of electric power defined as purchases made to displace higher cost generation at a cost which is less than the purchasing Utility's avoided variable costs for the generation of an equivalent quantity of electric power.

Energy receipts that do not involve money payments such as diversity energy and payback of storage energy are not defined as purchased or interchange power relative to this fuel calculation.

MINUS

(D) The cost of fuel recovered through intersystem sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

Energy deliveries that do not involve billing transactions such as diversity energy and payback of storage energy are not defined as sales relative to this fuel calculation.

S = Projected system kilowatt-hour sales excluding any intersystem sales.

G_F = Cumulative difference between jurisdictional fuel revenues billed and fuel expenses at the end of the month preceding the projected period utilized in E_F and S.

S_1 = Projected jurisdictional kilowatt-hour sales, for the period covered by the fuel costs included in E_F.

F_{EC} = Customer class variable environmental and avoided capacity costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

EXHIBIT A

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL, AND AVOIDED CAPACITY COSTS **RETAIL RATES**

E_{EC} = The projected variable environmental costs including: a) the cost of ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions, plus b) the cost of emission allowances, as used, including allowances for SO2, NOx, mercury and particulates minus net proceeds of sales of emission allowances, and c) as approved by the Commission, all other variable environmental costs incurred in relation to the consumption of fuel and air emissions caused thereby, including but not limited to environmental reagents, other environmental allowances, and emission related taxes. Any environmental related costs recovered through intersystem sales would be subtracted from the totals produced by subparts a), b), and c). This component also includes avoided capacity costs incurred by the Utility.

These environmental and avoided capacity costs will be allocated to retail customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{EC} = Cumulative difference between jurisdictional customer class environmental fuel revenues billed and jurisdictional customer class environmental costs at the end of the month preceding the projected period utilized in E_{EC} and S_2.

S_2 = The projected jurisdictional customer class kilowatt-hour sales.

The appropriate revenue-related tax factor is to be included in these calculations.

FUEL RATES BY CLASS

The total fuel costs in cents per kilowatt-hour by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2015 through April, 2016:

Customer Class	F_C Rate	+	F_{EC} Rate	=	Total Fuel Rate
Residential	**3.137**		**0.076**		**3.213**
Small General Service	**3.137**		**0.076**		**3.213**
Medium General Service	**3.137**		**0.066**		**3.203**
Large General Service	**3.137**		**0.037**		**3.174**
Lighting	**3.137**		**0.000**		**3.137**

Re: Petition of the Office of Regulatory Staff to Establish Generic Proceeding Pursuant to the Distributed Energy Resource Program Act, No. 236 of 2014, Ratification No. 241, Senate Bill No. 1189
Docket No. 2014-246-E

Dear Ms. Boyd:

Please find enclosed a Settlement Agreement in the above-referenced matter. Should you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Shannon B. Hudson

Shannon B. Hudson

Enclosure

cc: All Parties of Record

I. Parties to this Settlement Agreement

The parties to this Settlement Agreement (individually, the "Party" or collectively, the "Parties") are listed on the signature pages that follow. The following Parties may be referenced hereafter as follows: South Carolina Office of Regulatory Staff ("ORS"); Duke Energy Carolinas, LLC, Duke Energy Progress, Inc., South Carolina Electric & Gas Company (individually, the "Utility" and collectively, the "Utilities"); Central Electric Power Cooperative, Inc. and The Electric Cooperatives of South Carolina, Inc. (collectively, the "Coops"); South Carolina Coastal Conservation League, the Southern Alliance for Clean Energy, the South Carolina Solar Business Alliance, LLC, Sustainable Energy Solutions, LLC, Solbridge Energy, LLC, The Alliance for Solar Choice, and the Sierra Club (collectively, the "Solar Parties").

II. Introduction and Preamble

1. The Parties believe that this Settlement Agreement is consistent with both the spirit and the letter of Act 236 ("the Act").

2. The Parties acknowledge and agree that this Settlement Agreement is a product of negotiations and includes compromises made in order to reach a comprehensive settlement that all Parties can support. The Parties accept this Settlement Agreement as a whole and agree not to challenge any term or part for the duration of this Settlement Agreement, which expires January 1, 2021. However, Parties are not precluded from participating in future proceedings to set and adopt policies which will be implemented after the expiration of this Settlement Agreement. If any term or part of this Settlement Agreement is not adopted, a Party reserves the right to withdraw from the Settlement Agreement pursuant to the steps in Section IV.2.

3. The Solar Parties take the position (a) that due to environmental and other factors, if all inputs are fully quantified, the true value of solar would be such that each kilowatt hour ("kWh") of energy generated by a solar customer-generator, and intended primarily to offset part or all of the customer-generator's own electrical use, would be at least as valuable, for ratemaking purposes, as a kWh of power supplied to that customer from the Utility grid ("1:1 Rate"), and (b) that no charges specific to solar customer-generators should be levied.

4. The Solar Parties, however, acknowledge that quantifying the value of certain benefits of solar power would be difficult and contentious at this time. In the interest of settlement, the Solar Parties are willing to agree to forego quantifying the value of certain benefits of solar power so long as the 1:1 Rate can be achieved.

5. The ORS, Utilities, and Coops take the position (a) that S.C. Code §§ 58-40-10, et seq., ("the Net Metering Statute") requires net metering rates to be set based on the net cost to serve customer-generators; (b) that it would constitute a subsidy to Distributed Energy Resource ("DER") customers to value DER generation at a level higher than is indicated by the benefits quantifiable under the known and measurable standard for ascertaining costs in a ratemaking context, and (c) that by law any subsidy for DER generation should be captured in the Utility's DER Program ("DER Program") as a DER expense to be measured and recovered subject to the cost caps and other limitations that apply under S.C. Code § 58-39-110.

6. The ORS, Utilities, and Coops, however, acknowledge that those provisions of the Act were intended and designed to incent the development of DER such as solar customer-generation, in South Carolina. In the interest of settlement, the Utilities are willing to agree to incent net metered DER

generation to achieve the 1:1 Rate during the term of this Settlement Agreement and to recover such incentive costs from customers as a component of the Utilities' respective DER Programs, subject to the limitations of South Carolina law.

7. As a practical means to bridge the differences between the Parties in their positions in this proceeding and without any Party waiving or abandoning its positions related to the proper interpretation or application of the Net Metering Statute or any other matter set forth in this proceeding, the Parties have agreed to resolve the matters at issue in this proceeding by agreeing as follows:

a. The 1:1 Rate shall be preserved for the term of this Settlement Agreement as set forth below;
b. The ORS Methodology, as defined below, shall be used to compute the value of DER generation;
c. The difference between the value of DER generation, as computed using the ORS Methodology, and the 1:1 Rate shall be treated as a DER program expense and collected accordingly through the fuel clause. This difference shall not be recovered through base rates;
d. The other terms of this Settlement Agreement, as set forth below, detail how this arrangement will be carried out.

III. Elements of Settlement Proposal

1. Within 60 days of the effective date of this Settlement Agreement, the Utilities will each file with the Public Service Commission of South Carolina ("Commission") applications for the approval of the initial DER Program consistent with the terms of this Settlement Agreement and the terms and conditions of the Act. Utility DER Programs will include provisions for incentives to residential and small commercial customers and will make new tariffs, amendments to existing tariffs, and/or programs available to customer-generators with production of less than 20 kilowatt ("kW") ("Residential/Small Commercial"). DER Programs will include the following provisions:

a. The Utilities shall propose to make available DER incentives available to Residential/Small Commercial customer-generators with production of less than 20 kW ("Residential/Small Commercial DER Incentives") that provide these customer-generators with an investment incentive (i.e., an up-front incentive or rebate) and/or a fixed, production-based incentive payment. These incentives shall provide price-certainty to the customer-generator over a defined term.
b. In aggregate and over the DER planning horizon, the proposed Residential/Small Commercial DER Incentives shall be reasonably sufficient to enable the Utilities to meet the Residential/Small Commercial customer-generator adoption targets enumerated in S.C. Code § 58-39-130 (C)(2).
c. The Utilities shall propose to make Residential/Small Commercial DER Incentives available to all qualifying customer-generators on a non-discriminatory basis subject to the terms and provisions of general law, including the Act, and any limitations contained therein, up to a cumulative capacity no less than 0.25% of the Utility's previous five-year average South Carolina retail peak demand, as defined by the Act.

d. The Utilities shall propose to make Residential/Small Commercial DER Incentives available retroactively to customer-generators who interconnect between January 1, 2015, and the date on which the Commission approves each Utility's DER application.
e. To be eligible for the Residential/Small Commercial DER Incentive, the customer-generator must agree to the installation of metering equipment, as specified by the Utility, sufficient to read the production of the facility.
f. The Utilities shall include in their DER applications a provision that allows customer-generators the option, at the expiration of the term of a particular DER Incentive, to request and receive service under any available schedule or tariff for which they qualify.
g. Nothing herein is intended to obviate the Utilities' statutory obligation as enumerated in S.C. Code § 58-39-130 (C)(2)(b) to provide incentives to customers to purchase or lease renewable energy facilities up to 1,000 kW.
h. The rate and tariff structure under which Residential/Small Commercial DER Incentives are to be provided shall be determined in the proceedings to consider the DER Program filings of the Utilities.

2. Within 60 days of the adoption by the Commission of a final, unappealable order that approves and adopts the terms of this Settlement Agreement as the generic net metering methodology required by S.C. Code § 58-40-20(F)(4) of the Act, the Utilities will each file with the Commission separate applications for approval of the following:

a. **Net Metering Tariffs:** New net metering tariffs (the "Net Metering Tariffs") shall incorporate the terms of this Settlement Agreement as well as the terms defined in S.C. Code § 58-40-10, including allowable customer-generator system size up to 1,000 kW, net metering capacity cap, annual kWh credit reconciliation, and other terms and conditions required by the Act for net metering tariffs adopted under its provisions. Settlement Agreement Attachment B is illustrative of the Net Metering Tariffs and the required tariff components.
b. **Net Metering Incentives:** A Net Metering Incentive, funded through a DER Program ("DER NEM Incentive"), shall be applied to qualifying net metering customers sufficient to make such customer-generators' bills equal to the bills they would have received if the power generated by their DER facilities were valued at the 1:1 Rate.
    i. The DER NEM Incentive will be applied to customer-generators receiving service under the Net Metering Tariffs prior to January 1, 2021. DER NEM Incentives shall be available to these customers through December 31, 2025, or until these customers elect to receive service under a different tariff, whichever occurs first.
    ii. Net Metering Tariffs shall reference any Commission order(s) approving the terms of this Settlement Agreement which addresses the calculation of DER NEM Incentives. DER NEM Incentives will not be separately stated on each net metering customer's bill. All DER NEM Incentives shall be treated as Incremental Costs as defined in S.C. Code § 58-39-140.
    iii. Any DER Program must conform to the terms of this Settlement Agreement to trigger the requirement under this Settlement Agreement that the Utilities implement its Net Metering Tariff and DER Program. The Utilities shall propose

and seek in good faith to adopt DER Programs that provide DER NEM Incentives for net metering customers representing up to 2% of the Utility's five-year average South Carolina retail peak demand, which is the statutory cap on net metering customers under the Act, or until the expiration of this Settlement Agreement, whichever occurs first.

3. The net metering and DER program applications will be considered in separate, Utility-specific dockets before the Commission. All issues related to net metering rates and DER programs not addressed in this Settlement Agreement will be addressed in these Utility-specific proceedings, as appropriate. All interested parties shall have the right to fully participate in these proceedings. Utility cost recovery from customers related to net metering and DER programs shall be reviewed and determined in each Utility's fuel cost proceeding.
4. All Parties will support the terms of this Settlement Agreement and will support the adoption by the Utilities and Commission of programs, tariffs, orders and other rulings consistent with the terms of this Settlement Agreement and the Act. The Parties will take no action or advocate any position inconsistent with this commitment.
5. If the Utilities fail to comply with their obligations under Section III.2 above, the other Parties to this Settlement Agreement may seek a rule to show cause or other order of the Commission compelling the Utilities to take the action required or ordering other relief necessary or appropriate in the circumstances.
6. If any of the Parties to this Settlement Agreement other than a Utility fail to comply with their obligations under Section III.4 above, then the Utility shall notice the Parties of their intent to treat this Settlement Agreement as null and void and forego, withdraw, terminate or seek to cancel any applications, programs, tariffs, filings, orders or other proceedings undertaken in reliance on this Settlement Agreement. Within five (5) days of receiving notice of the Utility's intent, the Parties may petition the Commission for relief.
7. This Settlement Agreement shall expire on January 1, 2021 (the "Settlement Expiration Date"). Subject to the regulatory authority of the Commission and ORS, the Utilities will adopt Net Metering Tariffs that are consistent with the terms of this Settlement Agreement and will make them available to customers on a first-come, first-served basis until the Settlement Expiration Date, and subject to the caps on DER program expenses contained in S.C. Code § 58-39-150 of the Act.
8. The Parties have convened and developed, according to a process managed by ORS and its consultant Energy + Environmental Economics ("E3"), a specific, standardized methodology for assessing costs and benefits of the net metering program. The standardized methodology is reflected in Settlement Agreement Attachment A (the "Methodology"). The Methodology includes all categories of potential costs or benefits to the Utility system that are capable of quantification or possible quantification in the future. Where there is currently a lack of capability to accurately quantify a particular category and/or a lack of cost or benefit to the Utility system, that category has been included in the Methodology as a placeholder. (For example, Avoided CO_2 Emission Cost is included as a placeholder. A zero monetary value will be used until state or federal laws or regulations result in an avoidable cost on Utility systems for these emissions.) Placeholder categories will be updated and included in the calculation of costs and benefits of net metering if and when capabilities to reasonably

quantify those values and quantifiable costs or benefits to the Utility system in such categories become available.

9. As set forth below, the Utilities shall use the following methodology to compute the net estimated under-recovered (lost revenue) or over-recovered revenue (net benefit) from net metering customers under existing rate structures, based on the Utility's cost of service study within its last general rate case. The formula used to apply the Methodology shall be as follows:
   a. To determine the under-recovered or over-recovered revenue from the net metering customer:
      i. Compute what the actual or a representative customer's bill would have been under the applicable standard rate, without consideration of the production of the DER.
      ii. Subtract from that amount the actual or a representative customer's estimated bill under the applicable standard rates with consideration of the production of the DER.
      iii. Subtract from that amount the net benefits delivered by the DER as computed according to the Methodology and based upon the production of the DER.
      iv. If the final number is positive, the result is the "under-recovered revenue from the net metering customer."
      v. If the final number is negative, the result is the "over-recovered revenue from the net metering customer."
   b. For under-recovered revenue, calculate the amount of any DER NEM Incentive to be applied to allow a net metering customer to achieve the 1:1 Rate for gross production from the net metering facility.
   c. For over-recovered revenue, calculate the credit, if any, to be applied to a net metering customer.
      i. No DER NEM Incentive shall be provided when the net metering customer receives a credit.

10. The Utilities shall use actual customer-generator energy production data to the maximum extent available to calculate the costs and benefits of net metering on their system using the Methodology. In the absence of actual customer metered production data from a customer-generator's DER, the Utilities shall be allowed to estimate DER energy production for purposes of implementing the Methodology, consistent with best practices relating to such estimation and modeling.

11. The costs and benefits of net metering and the required amount of the DER NEM Incentive shall be computed and updated annually coincident in time with the Utility's filing under the fuel clause.

12. Each Utility shall file reports with the Commission and copy ORS when the following participation levels are reached to identify and illustrate the costs unrecovered, if any, arising from customer adoption of net metered DER generation through December 31, 2020: (1) 0.5%; (2) 1.0%; (3) 1.5%; and (4) 2.0% of the Utility's previous five-year average South Carolina retail peak demand, as defined by the Act.

13. The Parties acknowledge that the establishment of appropriate net metering rates is complicated by current Utility ratemaking methodologies which collect a substantial part of a

Utility's fixed cost of providing service to customers through volumetric or kWh charges. The Utilities and any interested parties may participate in the study of these issues to be conducted by ORS as required by S.C. Code § 58-27-1050.

14. Each Utility shall monitor and track ongoing unrecovered DER costs or unpaid benefits associated with the net metering program after the Settlement Agreement Expiration Date. The Utilities shall not propose any new separately enumerated charges or fees to be imposed specifically on customer-generators before the Settlement Agreement Expiration Date, and no standby service charges shall be imposed on customer-generators pursuant to the Utilities' Net Metering Tariffs before the Settlement Agreement Expiration Date. A Utility is not precluded, however, from seeking a change in general rates that apply in an identical manner to customer-generators and non-participating customers prior to reaching the 2% participation cap or the Settlement Expiration Date. If a general rate change is sought prior to the Settlement Expiration Date, the general rate change shall not include DER Program costs.

15. A customer-generator taking service under any net metering rates resulting from this Settlement Agreement shall have the right to remain on that rate, according to the terms and conditions specified in this Settlement Agreement through December 31, 2025, including protection against any new separately enumerated charges or fees that would only apply to DER customer-generators. The right to remain on a Net Metering Tariff shall be assignable by the customer-generator to subsequent owners of the premises to which the electrical generating system is connected and providing electrical service. The Utilities agree to file applications in a specific docket with the Commission for new net metering tariffs to replace the Net Metering Tariffs based on this Settlement Agreement no later than January 31, 2020; all interested parties shall have the right to fully participate in these proceedings.

IV. Miscellaneous

1. The Parties acknowledge that ORS has an on-going statutory mandate from the General Assembly of the State of South Carolina to protect the interest of the public in all matters related to the electric utility rates and terms and conditions of service. Nothing in this Settlement Agreement shall be construed to limit ORS in its fulfillment of this mandate.
2. This written Settlement Agreement contains the complete agreement of the Parties. The Parties agree that signing this Settlement Agreement does not constrain, inhibit or impair their arguments or positions in future proceedings. If the Commission declines to approve the agreement in its entirety, then any Party desiring to do so may withdraw from the agreement without penalty, within three (3) days of receiving notice of the decision, by providing written notice of withdrawal via electronic mail to all parties in that time period.
3. The Parties agree that the terms of this Settlement Agreement shall have no precedential value and shall not be cited in legal or regulatory proceedings except to enforce the terms of this Settlement Agreement.
4. This Settlement Agreement does not limit the rights of the signatories with respect to their ability to participate in a proceeding wherein the Utilities propose to populate the Methodology with Utility-specific data and information, or their ability to participate in

Commission review of Utility DER program offerings and proposals except as specified herein.

5. This Settlement Agreement is binding on the Parties only. It creates no rights in third parties nor are there third party beneficiaries to it. Only Parties who are signatories may make any claim under this Settlement Agreement.

6. The Parties agree to stipulate into the record before the Commission this Settlement Agreement. The Parties agree to stipulate into the record before the Commission the pre-filed testimony and exhibits of each Parties' witness(es) without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction. The Parties, however, reserve the right to engage in redirect examination of witnesses as necessary to respond to issues raised during the examination of their respective witnesses, if any, by the Commission or any non-settling party or by subsequently filed testimony.

7. The Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy.

8. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code § 58-4-10(B) (Supp. 2013). S.C. Code § 58-4-10(B)(l) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

9. This Settlement Agreement shall be effective upon execution of the Parties and shall be interpreted according to South Carolina law.

10. This Settlement Agreement shall bind and inure to the benefit of each of the signatories hereto and their representatives, predecessors, successors, assigns, agents, shareholders, officers, directors (in their individual and representative capacities), subsidiaries, affiliates, parent corporations, if any, joint ventures, heirs, executors, administrators, trustees, and attorneys.

11. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the Settlement Agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind each Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

Net Energy Metering ("NEM") Methodology

+/- Avoided Energy
+/- Energy Losses/Line Losses
+/- Avoided Capacity
+/- Ancillary Services
+/- Transmission and Distribution ("T&D") Capacity
+/- Avoided Criteria Pollutants
+/- Avoided CO_2 Emission Cost
+/- Fuel Hedge
+/- Utility Integration & Interconnection Costs
+/- Utility Administration Costs
+/- Environmental Costs
= **Total Value of NEM Distributed Energy Resource**

The following table details the components of the Methodology.

Methodology Component	Description	Calculation Methodology/Value
+/- Avoided Energy	Increase/reduction in variable costs to the Utility from conventional energy sources, i.e. fuel use and power plant operations, associated with the adoption of NEM.	Component is the marginal value of energy derived from production simulation runs per the Utility's most recent Integrated Resource Planning ("IRP") study and/or Public Utility Regulatory Policy Act ("PURPA") Avoided Cost formulation.
+/- Energy Losses/Line Losses	Increase/reduction of electricity losses by the Utility from the points of generation to the points of delivery associated with the adoption of NEM.	Component is the generation, transmission, and distribution loss factors from either the Utility's most recent cost of service study or its approved Tariffs. Average loss factors are more readily available, but marginal loss data is more appropriate and should be used when available.
+/- Avoided Capacity	Increase/reduction in the fixed costs to the Utility of building and maintaining new conventional generation resources associated with the adoption of NEM.	Component is the forecast of marginal capacity costs derived from the Utility's most recent IRP and/or PURPA Avoided Cost formulation. These capacity costs should be adjusted for the appropriate energy losses.
+/- Ancillary Services	Increase/reduction of the costs of services for the Utility such as operating reserves, voltage control, and frequency regulation needed for grid stability associated with the adoption of NEM.	Component includes the increase/decrease in the cost of each Utility's providing or procurement of services, whether services are based on variable load requirements and/or based on a fixed/static requirement, i.e. determined by an N-1 contingency. It also includes the cost of future NEM technologies like "smart inverters" if such technologies can provide services like VAR support, etc.

Methodology Component	Description	Calculation Methodology/Value
+/- T&D Capacity	Increase/reduction of costs to the Utility associated with expanding, replacing and/or upgrading transmission and/or distribution capacity associated with the adoption of NEM.	Marginal T&D distribution costs will need to be determined to expand, replace, and/or upgrade capacity on each Utility's system. Due to the nature of NEM generation, this analysis will be highly locational as some distribution feeders may or may not be aligned with the NEM generation profile although they may be more aligned with the transmission system profile/peak. These capacity costs should be adjusted for the appropriate energy losses.
+/- Avoided Criteria Pollutants	Increase/reduction of SOx, NOx, and PM10 emission costs to the Utility due to increase/reduction in production from the Utility's marginal generating resources associated with the adoption of NEM generation if not already included in the Avoided Energy component.	The costs of these criteria pollutants are most likely already accounted for in the Avoided Energy Component, but, if not, they should be accounted for separately. The Avoided Energy component must specify if these are included.
+/- Avoided CO_2 Emissions Cost	Increase/reduction of CO_2 emissions due to increase/reduction in production from each Utility's marginal generating resources associated with the adoption of NEM generation.	The cost of CO_2 emissions may be included in the Avoided Energy Component, but, if not, they should be accounted for separately. A zero monetary value will be used until state or federal laws or regulations result in an avoidable cost on Utility systems for these emissions.
+/- Fuel Hedge	Increase/reduction in administrative costs to the Utility of locking in future price of fuel associated with the adoption of NEM.	Component includes the increases/decreases in administrative costs of any Utility's current fuel hedging program as a result of NEM adoption and the cost or benefit associated with serving a portion of its load with a resource that has less volatility due to fuel costs than certain fossil fuels. This value does not include commodity gains or losses and may currently be zero.
+/- Utility Integration & Interconnection Costs	Increase/reduction of costs borne by each Utility to interconnect and integrate NEM.	Costs can be determined most easily by detailed studies and/or literature reviews that have examined the costs of integration and interconnection associated with the adoption of NEM. Appropriate levels of photovoltaic penetration increases in South Carolina should be included.
+/- Utility Administration Costs	Increase/reduction of costs borne by each Utility to administer NEM.	Component includes the incremental costs associated with net metering, such as hand billing of net metering customers and other administrative costs.
+/- Environmental Costs	Increase/reduction of environmental compliance and/or system costs to the Utility.	The environmental compliance and/or Utility system costs might be accounted for in the Avoided Energy component, but, if not, should be accounted for separately. The Avoided Energy component must specify if these are included. These environmental compliance and/ or Utility system costs must be quantifiable and not based on estimates.

Example of Net Energy Metering Generic Tariff Components

The standard Net Energy Metering ("NEM") tariff will contain the following components:

1. Availability provisions;
2. General eligibility and technical service-related provisions;
3. Monthly rate provisions relating to administrative charges and/or excess energy credit calculations;
4. Terms;

Customers electing service under (Tariff Name) or after (Effective Date of New Tariff) are eligible to remain on (Tariff Name) until December 31, 2025, or until such time the customer elects to terminate service under (Tariff Name), whichever occurs first. The rates set forth here are subject to Commission Order No. ___, in Docket No. 2014-246-E entered under the terms of S.C. Code § 58-40-20(F)(4). Eligibility for this rate will terminate as set forth in that Order. The value of distributed energy resource generation shall be computed using the methodology contained in Commission Order No. ____, in Docket No. 2014-246-E and updated annually. The value for (Year) is $____ per kilowatt hour ("kWh").

If a customer-generator's energy consumption exceeds the electricity provided by the customer-generator during a monthly billing period, the customer-generator shall be billed in kWh for the net electricity supplied by the Utility.

If a customer-generator's energy generation exceeds the electricity provided by the Utility during a monthly billing period, the customer-generator shall be credited for the excess kWh generated during that billing period.

Excess energy not used in the current billing month to reduce billed kWh usage shall be accumulated and used to reduce usage in future months. Any accumulated excess energy not used to reduce billed kWh usage shall be paid to the customer-generator each (Date of Zeroing Out) at the Utility's avoided cost for qualified facilities, zeroing-out the customer-generator's account of net excess kWh credits.

Service on (Tariff Name) will be closed to new participants as of January 1, 2021, or after statutory caps described in S.C. Code § 58-39-130 have been reached, whichever occurs first.

Customers who elect NEM service after January 1, 2021, will receive service in accordance with the NEM tariff in effect the time at which the customer requests NEM service.

5. Language specifying that the customer is responsible for the applicable customer charge/basic facilities charge and any applicable demand charges or extra facilities charges associated with standard rate (non-NEM), etc.;

6. Metering requirement provisions;

7. Safety, interconnection and inspection requirements;

8. Power factor provisions;

9. Contract period provisions;

10. Any other standard tariff language, as required.

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2015-103-E

June 29, 2015

IN RE: Petition of South Carolina Electric & Gas Company for Updates and Revisions to Schedules Related to the Construction of a Nuclear Base Load Generation Facility at Jenkinsville, South Carolina	)))))))	**SETTLEMENT AGREEMENT**

This Settlement Agreement ("Settlement Agreement") is made by and among the South Carolina Office of Regulatory Staff ("ORS"); South Carolina Energy Users Committee ("SCEUC"); and South Carolina Electric & Gas Company ("SCE&G" or the "Company") (collectively referred to as the "Parties" or sometimes individually as a "Party").

WHEREAS, on March 12, 2015, SCE&G filed a petition with the Public Service Commission of South Carolina ("Commission") requesting an order from the Commission approving an updated capital cost schedule and updated construction schedule for the construction of two 1,117 net megawatt nuclear units (the "Units") to be located at the V.C. Summer Nuclear Station near Jenkinsville, South Carolina (the "Petition");

WHEREAS, SCE&G filed its Petition pursuant to S.C. Code Ann. § 58-33-270(E) (Supp. 2014) of the Base Load Review Act ("BLRA"), which states:

> (E) As circumstances warrant, the utility may petition the commission, with notice to the Office of Regulatory Staff, for an order modifying any of the schedules, estimates, findings, class allocation factors, rate designs, or conditions that form part of any base load review order issued under this section. The commission

shall grant the relief requested if, after a hearing, the commission finds:

(1) as to the changes in the schedules, estimates, findings, or conditions, that the evidence of record justifies a finding that the changes are not the result of imprudence on the part of the utility; and

(2) as to the changes in the class allocation factors or rate designs, that the evidence of record indicates the proposed class allocation factors or rate designs are just and reasonable.

WHEREAS, the Commission established Docket No. 2015-103-E in which to hear the Company's request set forth in the Petition;

WHEREAS, among other statements, SCE&G states in its Petition that circumstances warrant modifying the schedules approved in the most recent Base Load Review order because in 2014 Westinghouse Electric Company ("WEC") and Chicago Bridge & Iron ("CB&I", and together with WEC, the "Consortium") reevaluated the engineering, procurement, and construction ("EPC") activities necessary to complete the Units and provided SCE&G a revised, fully-integrated construction schedule (the "Revised Fully-Integrated Construction Schedule") with an associated cash flow forecast for completion of the project (the "Revised Cash Flow Forecast");

WHEREAS, the Revised Fully-Integrated Construction Schedule reflects new substantial completion dates for Units 2 and 3 of June 19, 2019, and June 16, 2020, respectively ("Substantial Completion Dates");

WHEREAS, the updated capital cost schedule associated with the revised Substantial Completion Dates includes approximately $698 million in additional capital costs of which $245 million represents Owner's costs and $453 million represents EPC Contract costs;

WHEREAS, SCE&G has asserted, among other things, that it is not responsible for costs related to the delay in the project and that the Consortium is liable for these costs as a result of its failure to meet its responsibilities under the EPC Contract and otherwise. Nevertheless, it is clear that it will take the Consortium until June 19, 2019, and June 16, 2020, to complete Units 2 and 3, respectively, and that the additional costs reflected in the updated capital cost schedule will be incurred and are reasonable and necessary in completing the work on the Units;[1]

WHEREAS, the Consortium has not accepted responsibility for SCE&G's assertions;

WHEREAS, as set forth in the prefiled direct testimony of Stephen A. Byrne, SCE&G and the Consortium currently are engaged in active negotiations concerning the responsibility for the increased cost resulting from the delay and other disputed issues;

WHEREAS, after careful review conducted over many weeks and the performance of careful analyses using teams of experts in accounting, finance, and construction, SCE&G determined that circumstances warranted petitioning the Commission, under the BLRA, to update the approved construction schedule and the approved capital cost schedule to reflect reasonable and prudent changes to these schedules based upon the information currently available to SCE&G;[2]

WHEREAS, based on its review and analyses and as stated in its Petition, SCE&G has modified, and submitted for consideration and approval of the Commission the BLRA Milestone Construction Schedule, as reflected in Settlement Exhibit 1 attached hereto and incorporated herein by this reference, to align remaining BLRA Milestones as approved in Order No. 2012-884 to the new Substantial Completion Dates and to the current construction and fabrication schedules;

---

[1] The Parties' agreement that these additional capital costs are "reasonable and necessary," in the context of the BLRA, is independent of the issue of whether SCE&G or the Consortium is ultimately responsible for the delay and associated costs, which is an issue that is governed by the EPC Agreement.

[2] In presenting the modified and updated construction and capital cost schedules as reasonable and prudent for approval under the BLRA, SCE&G does not waive, but specifically reserves, its rights against the Consortium under the EPC Contract and otherwise to dispute who is liable for the increased cost of the project, to recover damages for the delay in the Substantial Completion Dates of the Units, to continue to negotiate with the Consortium seeking to achieve fair resolutions of these disputes, and for other appropriate relief.

WHEREAS, based on its review and analyses and as stated in its Petition, SCE&G has also modified, and submitted for consideration and approval of the Commission, the capital cost schedule for completion of the Units, as reflected in Settlement Exhibit 2, attached hereto and incorporated herein by this reference, to reflect (a) the effect of the new Substantial Completion Dates on Owner's costs and EPC Contract costs, and (b) other changes in costs that have been identified since Order Exhibit No. 1 was approved by the Commission in Order No. 2012-884;

WHEREAS, S.C. Code Ann. § 58-33-277(B) (Supp. 2014) of the BLRA provides that ORS:

> shall conduct on-going monitoring of the construction of the plant and expenditure of capital through review and audit of the quarterly reports under this article, and shall have the right to inspect the books and records regarding the plant and the physical progress of construction upon reasonable notice to the utility.

WHEREAS, in connection with this case as well as since the inception of this project, ORS has exercised its rights and fulfilled its responsibilities under S.C. Code Ann. § 58-33-277 (Supp. 2014) to monitor the status of the project, by, among other things, routinely and regularly observing the progress of the plant construction and submodule production, requesting and reviewing substantial amounts of relevant financial data from the Company, auditing the quarterly reports submitted by the Company pursuant to the BLRA, inspecting the books and records of the Company regarding the plant and physical progress of construction, and reviewing in detail SCE&G's request to modify the Units' construction schedule and capital cost schedule in the above-captioned matter;

WHEREAS, SCE&G has provided information deemed satisfactory by ORS and SCEUC to support the relief requested in the Petition that the delay in the Substantial Completion Dates and other changes in construction, construction oversight, and operational readiness requirements result in necessary and reasonable modifications to the capital cost and BLRA Milestone

Construction schedule under the terms of the BLRA and are not the result of imprudence on the part of the Company;

WHEREAS, the Commission allowed for public comment and intervention in the above-captioned docket;

WHEREAS, ORS is automatically a party of record to proceeding pursuant to S.C. Code Ann. § 58-4-10(B) (Supp. 2014);

WHEREAS, SCEUC made a timely request to intervene in this docket;

WHEREAS, the Parties have varying positions regarding the issues in this case;

WHEREAS, the Parties to this Settlement Agreement have engaged in discussions to determine if a Settlement Agreement would be in their best interest; and

WHEREAS, following these discussions the Parties have each determined that their interest and the public interest would be best served by agreeing to settle the issues in the above-captioned case under the terms and conditions set forth in this Settlement Agreement;

NOW, THEREFORE, the Parties hereby stipulate and agree to the following terms:

A. STIPULATION OF SETTLEMENT AGREEMENT, TESTIMONY AND WAIVER OF CROSS-EXAMINATION

1. The Settling Parties agree to stipulate into the record before the Commission this Settlement Agreement.

2. The Settling Parties agree to stipulate into the record before the Commission the prefiled testimony and exhibits (collectively "Stipulated Testimony") of the following witnesses without objection, change, amendment, or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction consistent with this Settlement Agreement. The Settling Parties agree that no other evidence will be offered in the proceeding by them other than the Stipulated Testimony and exhibits and this Settlement Agreement unless additional evidence is necessary to support the

Settlement Agreement. The Settling Parties also reserve the right to engage in redirect examination of witnesses as necessary to respond to issues raised by the examination of their witnesses, if any, by non-Parties or by testimony filed by non-Parties.

SCE&G witnesses

1. Kevin B. Marsh
2. Stephen A. Byrne
3. Ronald A. Jones
4. Carlette L. Walker
5. Joseph M. Lynch

ORS witness:

1. M. Anthony James

If SCE&G determines that rebuttal testimony should be filed in response to any testimony filed by any Intervenor that is not a signatory to this Settlement Agreement, then the Parties hereto agree that any such testimony likewise would be stipulated into the record before the Commission under this Settlement Agreement without objection, change, amendment, or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction consistent with this Settlement Agreement.

B. SETTLEMENT TERMS

3. SCE&G has identified and itemized approximately $698 million in additional capital costs that it deems as reasonable and necessary for completion of the construction of the Units through the delayed Substantial Completion Dates. These additional capital costs have been assigned to specific cost categories and are reflected and included in Settlement Exhibit 2.

4. These modifications increase the capital cost for the Units in 2007 dollars from the approximately $4.5 billion, approved by the Commission in Order No. 2012-884, Order Exhibit No. 1 to approximately $5.2 billion. Further, along with changes in escalation rates, these

modifications increase the gross construction cost of the Units in current dollars from the approximately $5.7 billion approved by the Commission in Order No. 2012-884, Order Exhibit No. 1 to approximately $6.8 billion as reflected in Settlement Exhibit 2.

5. The Parties agree that the modified construction schedule and capital cost schedule are not the result of imprudence by SCE&G and are fully consistent with the requirements of the BLRA.

6. The Parties agree that the updated construction schedule, as reflected in the updated BLRA Milestone Construction schedule attached hereto as Settlement Exhibit 1, should be approved by the Commission as the new construction schedule.

7. The Parties also agree that the restated and updated capital cost schedule, as reflected in Settlement Exhibit 2 attached hereto, should be approved by the Commission as the new construction expenditure schedule for completion of the Units. Specifically, Settlement Exhibit 2 should replace and supersede Order Exhibit No. 1 of Order No. 2012-884.

8. By Commission Order No. 2009-104(A), the Commission established a return on equity of eleven percent (11%), which is applicable for revised rates filings under the Base Load Review Act. This return on equity has been consistently and lawfully used for each revised rates filing advanced by the Company since issuance of the initial Base Load Review order in 2009. However, as an integral part of this Settlement Agreement and for Base Load Review Act purposes only, beginning with any revised rates filing made on or after January 1, 2016, and prospectively thereafter until such time as the Units are completed, SCE&G agrees to develop and calculate its revised rates filings using ten and one-half percent (10.5%) as the return on common equity rather than the approved return on common equity of eleven percent (11%) subject to Paragraph 14 hereof.[3]

[3] Any revised rates placed into effect prior to January 1, 2016, shall not be affected by this Settlement Agreement, and the Parties specifically agree that Paragraph 8 of the Settlement Agreement is not intended to

9. As set forth in S.C. Code Ann. § 58-33-277 (Supp. 2014) of the BLRA, ORS will continue to monitor the progress of the Units' construction, including the ongoing status of negotiations between SCE&G and the Consortium of disputes related to the delayed Substantial Completion Dates and costs associated therewith.

10. The Parties agree that the terms of this Settlement Agreement are reasonable, in the public interest and in accordance with law and regulatory policy.

11. ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B) (Supp. 2014). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

12. The Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable and full resolution of all issues in the above-captioned proceeding, and shall neither take any position contrary to the good faith duty agreed to herein nor encourage or aid any other Intervenors to take a position contrary to the terms of this Settlement Agreement. The Parties agree to use reasonable efforts to defend and support any Commission order with no

---

require SCE&G to provide any offset, credit, refund, reimbursement, or other compensation to customers for rates considered and approved by the Commission and placed into effect prior to January 1, 2016. The reduction in the Company's return on equity shall only be prospectively applied for the purpose of calculating revised rates sought by the Company on and after January 1, 2016, until such time as the Units are completed and for Base Load Review Act purposes only.

other provisions issued approving this Settlement Agreement and the terms and conditions contained herein.

13. The Parties request that the Commission hold a hearing on this Settlement Agreement, pursuant to S.C. Code Ann. § 58-33-270(G) (Supp. 2014), simultaneously with the hearing on the merits of the Petition, which is currently scheduled to begin on July 21, 2015, and request that the Commission adopt this Settlement Agreement as part of its order in this proceeding. In furtherance of this request, the Parties stipulate and agree that the terms of this Settlement Agreement comport with the terms of the BLRA.

14. This Settlement Agreement contains the complete agreement of the Parties. There are no other terms and conditions to which the Parties have agreed. The Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement, or any of the matters agreed to in it, be used as evidence or precedent in any future proceeding. Any Party may withdraw from the Settlement Agreement without penalty if (i) the Commission does not approve this Settlement Agreement in its entirety or (ii) an appellate court does not affirm in all respects the Commission's order approving this Settlement Agreement in its entirety. If a Party elects to withdraw from the Settlement Agreement pursuant to this paragraph, then the provisions of this Settlement Agreement will no longer be binding upon the Parties.

15. This Settlement Agreement shall be effective upon execution by the Parties and shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to the terms and conditions of this Settlement Agreement by affixing his or her signature or authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the Settlement Agreement. Facsimile signatures and e-mail

signatures shall be as effective as original signatures to bind any party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

BLRA Milestones
VC Summer Units 2 and 3

Tracking ID	Order No. 2012-884 Description	Order No. 2012-884 Date	Revised Completion Date	Unit
1	Approve Engineering Procurement and Construction Agreement	Complete	Complete	
2	Issue POs to nuclear component fabricators for Units 2 & 3 Containment Vessels	Complete	Complete	
3	Contractor Issue PO to Passive Residual Heat Removal Heat Exchanger Fabricator - First Payment - Unit 2	Complete	Complete	
4	Contractor Issue PO to Accumulator Tank Fabricator - Unit 2	Complete	Complete	
5	Contractor Issue PO to Core Makeup Tank Fabricator - Units 2 & 3	Complete	Complete	
6	Contractor Issue PO to Squib Valve Fabricator - Units 2 & 3	Complete	Complete	
7	Contractor Issue PO to Steam Generator Fabricator - Units 2 & 3	Complete	Complete	
8	Contractor Issue Long Lead Material PO to Reactor Coolant Pump Fabricator - Units 2 & 3	Complete	Complete	
9	Contractor Issue PO to Pressurizer Fabricator - Units 2 & 3	Complete	Complete	
10	Contractor Issue PO to Reactor Coolant Loop Pipe Fabricator - First Payment - Units 2 & 3	Complete	Complete	
11	Reactor Vessel Internals - Issue Long Lead Material PO to Fabricator - Units 2 & 3	Complete	Complete	
12	Contractor Issue Long Lead Material PO to Reactor Vessel Fabricator - Units 2 & 3	Complete	Complete	
13	Contractor Issue PO to Integrated Head Package Fabricator - Units 2 & 3	Complete	Complete	
14	Control Rod Drive Mechanism Issue PO for Long Lead Material to Fabricator - Units 2 & 3 - first payment	Complete	Complete	
15	Issue POs to nuclear component fabricators for Nuclear Island structural CA20 Modules	Complete	Complete	
16	Start Site Specific and balance of plant detailed design	Complete	Complete	
17	Instrumentation & Control Simulator - Contractor Place Notice to Proceed - Units 2 & 3	Complete	Complete	
18	Steam Generator - Issue Final PO to Fabricator for Units 2 & 3	Complete	Complete	
19	Reactor Vessel Internals - Contractor Issue PO for Long Lead Material (Heavy Plate and Heavy Forgings) to Fabricator - Units 2 & 3	Complete	Complete	
20	Contractor Issue Final PO to Reactor Vessel Fabricator - Units 2 & 3	Complete	Complete	
21	Variable Frequency Drive Fabricator Issue Transformer PO - Units 2 & 3	Complete	Complete	
22	Start clearing, grubbing and grading	Complete	Complete	
23	Core Makeup Tank Fabricator Issue Long Lead Material PO - Units 2 & 3	Complete	Complete	
24	Accumulator Tank Fabricator Issue Long Lead Material PO - Units 2 & 3	Complete	Complete	
25	Pressurizer Fabricator Issue Long Lead Material PO - Units 2 & 3	Complete	Complete	
26	Reactor Coolant Loop Pipe - Contractor Issue PO to Fabricator - Second Payment - Units 2 & 3	Complete	Complete	
27	Integrated Head Package - Issue PO to Fabricator - Units 2 and 3 - second payment	Complete	Complete	
28	Control Rod Drive Mechanisms - Contractor Issue PO for Long Lead Material to Fabricator - Units 2 & 3	Complete	Complete	
29	Contractor Issue PO to Passive Residual Heat Removal Heat Exchanger Fabricator - Second Payment - Units 2 & 3	Complete	Complete	
30	Start Parr Road intersection work	Complete	Complete	
31	Reactor Coolant Pump - Issue Final PO to Fabricator - Units 2 & 3	Complete	Complete	
32	Integrated Heat Packages Fabricator Issue Long Lead Material PO - Units 2 & 3	Complete	Complete	
33	Design Finalization Payment 3	Complete	Complete	
34	Start site development	Complete	Complete	
35	Contractor Issue PO to Turbine Generator Fabricator - Units 2 & 3	Complete	Complete	
36	Contractor Issue PO to Main Transformers Fabricator - Units 2 & 3	Complete	Complete	
37	Core Makeup Tank Fabricator Notice to Contractor Receipt of Long Lead Material - Units 2 & 3	Complete	Complete	
38	Design Finalization Payment 4	Complete	Complete	
39	Turbine Generator Fabricator Issue PO for Condenser Material - Unit 2	Complete	Complete	
40	Reactor Coolant Pump Fabricator Issue Long Lead Material Lot 2 - Units 2 & 3	Complete	Complete	
41	Passive Residual Heat Removal Heat Exchanger Fabricator Receipt of Long Lead Material - Units 2 & 3	Complete	Complete	
42	Design Finalization Payment 5	Complete	Complete	
43	Start erection of construction buildings, to include craft facilities for personnel, tools, equipment; first aid facilities; field offices for site management and support personnel; temporary warehouses; and construction hiring office	Complete	Complete	
44	Reactor Vessel Fabricator Notice to Contractor of Receipt of Flange Nozzle Shell Forging - Unit 2	Complete	Complete	
45	Design Finalization Payment 6	Complete	Complete	
46	Instrumentation and Control Simulator - Contractor Issue PO to Subcontractor for Radiation Monitor System - Units 2 & 3	Complete	Complete	
47	Reactor Vessel Internals - Fabricator Start Fit and Welding of Core Shroud Assembly - Unit 2	Complete	Complete	
48	Turbine Generator Fabricator Issue PO for Moisture Separator Reheater/Feedwater Heater Material - Unit 2	Complete	Complete	
49	Reactor Coolant Loop Pipe Fabricator Acceptance of Raw Material - Unit 2	Complete	Complete	

BLRA Milestones
VC Summer Units 2 and 3

Tracking ID	Order No. 2012-884 Description	Order No. 2012-884 Date	Revised Completion Date	Unit
50	Reactor Vessel Internals - Fabricator Start Weld Neutron Shield Spacer Pads to Assembly - Unit 2	Complete	Complete	
51	Control Rod Drive Mechanisms - Fabricator to Start Procurement of Long Lead Material - Unit 2	Complete	Complete	
52	Contractor Notified that Pressurizer Fabricator Performed Cladding on Bottom Head - Unit 2	Complete	Complete	
53	Start excavation and foundation work for the standard plant for Unit 2	Complete	Complete	
54	Steam Generator Fabricator Notice to Contractor of Receipt of 2nd Steam Generator Tubesheet Forging - Unit 2	Complete	Complete	
55	Reactor Vessel Fabricator Notice to Contractor of Outlet Nozzle Welding to Flange Nozzle Shell Completion - Unit 2	Complete	Complete	
56	Turbine Generator Fabricator Notice to Contractor Condenser Fabrication Started - Unit 2	Complete	Complete	
57	Complete preparations for receiving the first module on site for Unit 2	Complete	Complete	
58	Steam Generator Fabricator Notice to Contractor of Receipt of 1st Steam Generator Transition Cone Forging - Unit 2	Complete	Complete	
59	Reactor Coolant Pump Fabricator Notice to Contractor of Manufacturing of Casing Completion - Unit 2	Complete	Complete	
60	Reactor Coolant Loop Pipe Fabricator Notice to Contractor of Machining, Heat Treating & Non-Destructive Testing Completion - Unit 2	Complete	Complete	
61	Core Makeup Tank Fabricator Notice to Contractor of Satisfactory Completion of Hydrotest - Unit 2	Complete	Complete	
62	Polar Crane Fabricator Issue PO for Main Hoist Drum and Wire Rope - Units 2 & 3	Complete	Complete	
63	Control Rod Drive Mechanisms - Fabricator to Start Procurement of Long Lead Material - Unit 3	Complete	Complete	
64	Turbine Generator Fabricator Notice to Contractor Condenser Ready to Ship - Unit 2	Complete	Complete	
65	Start placement of mud mat for Unit 2	Complete	Complete	
66	**Steam Generator Fabricator Notice to Contractor of Receipt of 1st Steam Generator Tubing - Unit 2**	Complete	Complete	
67	Pressurizer Fabricator Notice to Contractor of Welding of Upper and Intermediate Shells Completion - Unit 2	Complete	Complete	
68	Reactor Vessel Fabricator Notice to Contractor of Closure Head Cladding Completion - Unit 3	Complete	Complete	
69	Begin Unit 2 first nuclear concrete placement	Complete	Complete	
70	Reactor Coolant Pump Fabricator Notice to Contractor of Stator Core Completion - Unit 2	Complete	Complete	
71	Fabricator Start Fit and Welding of Core Shroud Assembly - Unit 2	Complete	Complete	
72	Steam Generator Fabricator Notice to Contractor of Completion of 1st Steam Generator Tubing Installation - Unit 2	Complete	Complete	
73	Reactor Coolant Loop Pipe - Shipment of Equipment to Site - Unit 2	Complete	Complete	
74	Control Rod Drive Mechanism - Ship Remainder of Equipment (Latch Assembly & Rod Travel Housing) to Head Supplier - Unit 2	Complete	Complete	
75	Pressurizer Fabricator Notice to Contractor of Welding of Lower Shell to Bottom Head Completion - Unit 2	Complete	Complete	
76	Steam Generator Fabricator Notice to Contractor of Completion of 2nd Steam Generator Tubing Installation - Unit 2	Complete	Complete	
77	Design Finalization Payment 14	Complete	Complete	
78	Set module CA04 for Unit 2	Complete	Complete	
79	Passive Residual Heat Removal Heat Exchanger Fabricator Notice to Contractor of Final Post Weld Heat Treatment - Unit 2	Complete	Complete	
80	Passive Residual Heat Removal Heat Exchanger Fabricator Notice to Contractor of Completion of Tubing - Unit 2	Complete	Complete	
81	Polar Crane Fabricator Notice to Contractor of Girder Fabrication Completion - Unit 2	Complete	Complete	
82	Turbine Generator Fabricator Notice to Contractor Condenser Ready to Ship - Unit 3	Complete	Complete	
83	Set Containment Vessel ring #1 for Unit 2	Complete	Complete	
84	Reactor Coolant Pump Fabricator Delivery of Casings to Port of Export - Unit 2	Complete	Complete	
85	Reactor Coolant Pump Fabricator Notice to Contractor of Stator Core Completion - Unit 3	Complete	Complete	
86	Reactor Vessel Fabricator Notice to Contractor of Receipt of Core Shell Forging - Unit 3	Complete	Complete	
87	Contractor Notified that Pressurizer Fabricator Performed Cladding on Bottom Head - Unit 3	Complete	Complete	
88	Set Nuclear Island structural module CA03 for Unit 2	6/26/2013	12/28/2015	Unit 2
89	Squib Valve Fabricator Notice to Contractor of Completion of Assembly and Test for Squib Valve Hardware - Unit 2	Complete	Complete	
90	Accumulator Tank Fabricator Notice to Contractor of Satisfactory Completion of Hydrotest - Unit 3	Complete	Complete	
91	Polar Crane Fabricator Notice to Contractor of Electric Panel Assembly Completion - Unit 2	Complete	Complete	
92	Start containment large bore pipe supports for Unit 2	Complete	Complete	
93	Integrated Head Package - Shipment of Equipment to Site - Unit 2	Complete	Complete	
94	Reactor Coolant Pump Fabricator Notice to Contractor of Final Stator Assembly Completion - Unit 2	Complete	Complete	
95	Steam Generator Fabricator Notice to Contractor of Completion of 2nd Steam Generator Tubing Installation - Unit 3	Complete	Complete	
96	Steam Generator Fabricator Notice to Contractor of Satisfactory Completion of 1st Steam Generator Hydrotest - Unit 2	Complete	Complete	
97	Start concrete fill of Nuclear Island structural modules CA01 and CA02 for Unit 2	4/3/2014	7/18/2016	Unit 2
98	Passive Residual Heat Removal Heat Exchanger - Delivery of Equipment to Port of Entry - Unit 2	Complete	Complete	
99	Refueling Machine Fabricator Notice to Contractor of Satisfactory Completion of Factory Acceptance Test - Unit 2	Complete	Complete

***Applicable index escalation rates for 2014 are estimated. Escalation is subject to restatement when actual indices for 2014 are final.**

Notes:
Current Period AFUDC rate applied 5.68%

Escalation rates vary from reporting period to reporting period according to the terms of Commission Order 2009-104(A).
These projections reflect current escalation rates. Future changes in escalation rates could substatially change these projections.
The AFUDC rate applied is the current SCE&G rate. AFUDC rates can vary with changes in market interest rates,
SCE&G's embedded cost of capital, capitalization ratios, construction work in process, and SCE&G's short-term debt outstanding.

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2015-54-E

May 26, 2015

IN RE:	)	
Petition of South Carolina Electric & Gas Company for Approval to Participate in a Distributed Energy Resource Program	)	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made by and among: (1) the South Carolina Office of Regulatory Staff ("ORS"); (2) South Carolina Electric & Gas Company ("SCE&G" or the "Company"); (3) Wal-Mart Stores East, LP and Sam's East, Inc. ("Wal-Mart"); (4) The Alliance for Solar Choice ("TASC"); (5) South Carolina Coastal Conservation League and the Southern Alliance for Clean Energy ("SCCCL" and "SACE"); and (6) South Carolina Solar Business Alliance, LLC (collectively referred to as the "Settling Parties" and "Parties" or sometimes individually as "Party").

WHEREAS, pursuant to S.C. Code Ann. § 58-39-130, and the settlement agreement ("NEM Settlement Agreement") entered into in Docket No. 2014-246-E by the ORS, SCE&G, Duke Energy Carolinas, LLC, Duke Energy Progress, Inc., Central Electric Power Cooperative, Inc. and The Electric Cooperatives of South Carolina, Inc., SCCCL, SACE, the South Carolina Solar Business Alliance, LLC, Sustainable Energy Solutions, LLC, Solbridge Energy, LLC, TASC, Nucor Steel-South Carolina and Frank Knapp, Jr., the Company prepared and filed a Petition (the "Petition") to establish a Distributed Energy Resource Program ("DERP") to accomplish and further the purposes and goals of the South Carolina Distributed Energy Resource Program Act ("Act 236");

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina (the "Commission") pursuant to the Act 236 codified at S.C. Code Ann. §§ 58-39-110 *et seq.*;

WHEREAS, the Settling Parties to this Settlement Agreement are parties of record in the above-captioned Docket;

WHEREAS, ORS is charged by law with the duty to represent the public interest of South Carolina pursuant to S.C. Code § 58-4-10(B);

WHEREAS, ORS reviewed the Petition filed in this Docket;

WHEREAS, the Settling Parties have varying positions regarding the issues in this case;

WHEREAS, the Parties engaged in discussions to determine if a settlement of some or all of the issues would be in their best interests and, in the case of ORS, in the public interest; and,

WHEREAS, following those discussions, the Settling Parties determined that their interests, and ORS determined that the public interest, would be best served by stipulating to a comprehensive settlement of all issues raised by the Settling Parties and pending in the above-captioned case under the terms and conditions set forth herein.

NOW, THEREFORE, the Parties hereby stipulate and agree to the following terms:

A. STIPULATION OF SETTLEMENT AGREEMENT, TESTIMONY AND WAIVER OF CROSS-EXAMINATION

A.1 The Settling Parties agree to stipulate into the record before the Commission this Settlement Agreement.

A.2 The Settling Parties agree to stipulate into the record before the Commission the pre-filed testimony and exhibits (collectively "Stipulated Testimony") of the following witnesses without objection, change, amendment, or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction consistent with this Settlement Agreement. The Settling Parties agree that no other evidence will be offered in the proceeding by them other than the Stipulated Testimony and exhibits and this Settlement Agreement unless additional evidence is necessary to support the Settlement Agreement. The Settling Parties also reserve the right to engage in redirect examination of witnesses as necessary to respond to issues raised by the examination of their witnesses, if any, by non-Parties or by late filed testimony by non-Parties.

ORS witness:
1. Lynda S. Shafer

SCE&G witnesses

1. John H. Raftery
2. Allen W. Rooks

Wal-Mart witness:
1. Kenneth E. Baker

SCCCL AND SACE witnesses:
1. Hamilton Davis
2. John D. Wilson

TASC witness
1. Justin R. Barnes

B. SETTLEMENT TERMS

B.1. As a compromise, the Settling Parties agree to the proposal set out immediately below, and this proposal is hereby adopted, accepted, and acknowledged as the agreement of the Settling Parties.

B.2. Except as set forth explicitly below in this Settlement Agreement, the Parties agree to accept all recommendations and modifications in ORS's testimony. Where the Petition and Company testimony differ from ORS testimony, ORS testimony governs.

MW Goals

B.3. The Settling Parties agree that the Company's DERP Petition is designed to meet the Company's statutorily designated goals as set by S.C. Code Ann. § 58-39-130. According to S.C. Code Ann. § 58-39-130, the Company's DERP shall, at a minimum result in development by December 31, 2020 of renewable energy facilities located in South Carolina with a nameplate capacity equal to at least two percent of the previous five-year average of the electrical utility's South Carolina retail peak demand. For SCE&G, this amount equates to approximately 84.5 megawatts ("MW"). Of this two percent, Act 236 states that half shall be met by facilities sized between one (1) and ten (10) MW, hereafter defined as "Utility Scale Program." The remaining half shall be met by facilities sized less than one (1) MW ("Customer Scale Program") with a quarter of the one percent (0.25%) nameplate capacity being from renewable energy generation 20 kilowatts ("kW") or less ("Small Scale Requirement").

Utility-Scale Program

B.4. The Settling Parties agree that the Company will make a good faith effort to have at least 30 MW of utility-scale solar capacity in service before the end of 2016. To accelerate the development of this capacity, the Company agrees to solicit proposals for utility-scale solar engineering, procurement and construction for projects that are located on non-Company owned land within SCE&G's electric service territory.

Customer Scale Program - Performance Based Incentive

B.5. The Settling Parties agree that SCE&G's DERP will include a Performance Based Incentive ("PBI") to residential customers who install solar photovoltaic facilities of not more than 20 kW AC nameplate capacity. This PBI will be provided in conjunction with the Company's net metering tariff. The PBI will be provided to residential customers for a term of ten (10) years. The PBI is prospective and retroactive for facilities constructed after January 1, 2015.

B.6. After such time that the Company's PBI reservation system is publicly available, customers must submit a PBI application prior to installation of the generating system and, upon approval, the Company will guarantee the amount of the incentive for one hundred and eighty (180) days from the date the Applicant is notified of PBI application approval. The Company will grant up to two (2) extensions of 90 days each upon written request of the Applicant, or a designated representative, such as the installer or lessor of the generating system. Customers applying for net metering after January 1, 2015, and that install or are in the process of installing a generating system prior to the time the Company's PBI reservation system is publicly available, shall have 90 days from the date the reservation system is established by the Company to apply, retroactively, for the net metering PBI and shall be treated on a first-come, first serve basis according to the date of the net metering application.

B.7. The PBI will be administered using the capacity-based step-down tiers set forth in Chart A below. Each step-down level shall be triggered when the capacity limit for a given PBI step level has been reserved by residential customer-generators. Once sufficient reservations have been secured to meet a capacity limit, the PBI shall be automatically adjusted downward for all new customers enrolling in the PBI program. The PBI program shall be open to new net metering customers through (i) December 31, 2020, or (ii) until the date on which the total capacity limit in Chart A has been met by approved PBI reservations for residential net metering customers, whichever is earlier.

Chart A

PBI Program Incentive Step-Down

Cumulative Capacity ***(Megawatts)***	**Performance Based Incentive** ***(per kWh)***
0 – 2.5	$0.04
2.5 - 5	$0.03
5 – 7.5	$0.02
7.5 - 9	$0.01

B.8. The Settling Parties agree that the Company shall update the current PBI generator capacity reservations, in kW, on its website on a monthly basis.

B.9. The Settling Parties further agree that: SCE&G's customers will be allowed to assign the right to receive payment of their PBI to a third-party installer or lessor of the solar facility and SCE&G will communicate with, and require, each customer to execute the necessary documents to effectuate such assignments.

Customer Scale Program - Bill Credit Agreements

B.10. The Settling Parties agree that as part of its DERP SCE&G will offer bill credit agreements ("BCA") to its non-residential customers but will not offer any BCA to its residential customers. Initially SCE&G will offer non-residential customers the BCA bill credit rates presented in Company witness John Raftery's direct testimony. BCA bill credit rates will be fixed and offered for a term of ten (10) years. Facilities constructed after January 1, 2015 which are eligible for BCA, credits pursuant to the customer's ten-year BCA term will begin upon the customer's acceptance into the BCA bill credit rate program, and will not be paid retroactively to the time the facility was constructed.

B.11. If capacity installed by non-residential customers participating in the BCA program is no greater than 20 kW, this capacity shall count toward the Small Scale Requirement pursuant to S.C. Code Ann. § 58-39-130(C)(2), but shall not count toward reaching the capacity-based PBI net metering program step-down levels that are set forth in Paragraph B.7 of this Settlement Agreement.

B.12. The Settling Parties agree that the Company offered BCA is available to any non-residential customer, including those who lease a solar electric generating facility from a third-party provider or those who own a solar electric generating facility.

Customer Scale Program - Lease/Finance Program

B.13. The Settling Parties agree that SCE&G will withdraw its proposal to offer a Lease/Finance Program as part of its DERP. The Settling Parties also agree that the Company may request approval of a Lease/Finance Program in the future.

Customer Scale Program - Community Solar

B.14. The Settling Parties agree that at this time capacity from SCE&G's Community Solar Program shall not count toward the Small Scale Requirement and Customer Scale Program pursuant to S.C. Code Ann. § 58-39-130(C)(2). The Company is not precluded from seeking approval from the Commission to count the Community Solar Program capacity towards satisfying the Small Scale Requirement and Customer Scale Program.

B.15. Community Solar capacity shall not impact any BCA offerings or be used in calculating the capacity-based PBI step-down levels that are set forth in Paragraph B.7 of this Settlement Agreement.

B.16. The Settling Parties agree that the Company will evaluate the per-watt price paid by a customer to ensure that it accurately reflects the developer's per-watt cost. Should the Company choose to incentivize the up-front customer costs for Community Solar, these incentives shall be deemed DER Program incremental costs.

DERP Advisory Group

B.17. The Settling Parties agree that the Company shall convene a DERP Advisory Group to use as a resource for sharing ideas and advancing the effectiveness of the Company's DERP. The DERP Advisory Group shall meet at least twice a year, and group participants shall receive notification 15 days prior to the Company filing with the Commission to add, modify or terminate any DERP offering. Pending exigent circumstances, the DERP Advisory Group may meet more than twice a year. All Settling Parties have the right to participate in the DERP Advisory Group. To the extent possible, the DERP Advisory Group shall consist of no more than twelve (12) participants, inclusive of the Company and ORS. The DERP Advisory Group participants will represent interested stakeholders with diverse viewpoints, for example those including but not limited to consumer groups, developers of large scale renewable energy, developers of small-scale renewable energy, lessors of renewable energy facilities, and environmental advocates.

B.18. The Settling Parties agree that within the first two (2) DERP Advisory Group meetings, evaluation of the viability of future incentives or offerings designed for the needs of economically disadvantaged customers will begin. Within eighteen (18) months of the date of the Settlement Agreement, the Company will propose to the Commission a DERP initiative or offering designed for the needs of economically disadvantaged customers.

B.19. The Settling Parties agree that, on or before November 1, 2015, the Company will discuss with the DERP Advisory Group a program that allows an owner of a structure with SCE&G load and meters on-site to enter a buy-all/sell-all agreement for a term of 10 years at the same rates available to customers receiving the BCA provided that the system is sized not to produce more than 100% of energy consumed by the aggregate of the existing meters on the property over the prior 12 months so long as the program is consistent with Act 236.

Renewable Energy Credits

B.20. The Settling Parties agree that the Company will retain ownership of the renewable energy credits ("RECs") until all DERP Incremental Costs are recovered by the Company and DERP charges are removed from all customer bills. At such time the system owner will begin retaining ownership of any RECs generated from that point forward.

B.21. The Settling Parties agree that all value derived by the Company from RECs be credited against DERP incremental costs or used to offset future South Carolina environmental compliance costs or requirements incurred by the Company.

DERP Modification

B.22. The Settling Parties agree that, with the exception of the pre-approved step-down method outlined in paragraph B.7, Chart A, the Company shall file for Commission approval of any program additions or terminations, and that the Company shall seek Commission approval for any program modifications that result in a variation greater than twenty-five percent (25%) of a program tariff's approved charges, incentives or credits.

Other

B.23. The Parties agree that the Company will file tariffs for each of its DERP offerings within 90 days of the issuance of a Commission Order in this Docket.

B.24. The Settling Parties agree that SCE&G will only allow a customer-generator to size their renewable generator in such a manner so that the renewable generation will off-set part, or all, of the customer's own electrical energy requirements, as determined by historic data on the customer's annual electricity usage or as estimated by SCE&G where annual usage data does not exist (e.g., new customer).

DERP Cost Recovery

B.25. The Parties agree that DERP costs shall be allocated and recovered pursuant to S.C. Code Ann. §§ 58-27-865 and 58-39-140, to the extent such costs are reasonably and prudently incurred to implement an approved program.

B.26. For purposes of cost allocation and recovery, the Parties agree that the following DERP costs shall be treated as avoided costs (instead of as incremental costs subject to the cap): (i) amounts paid under avoided cost rates or rates negotiated under the Public Utility Regulatory Policy Act ("PURPA") for purchased power agreements, and (ii) amounts paid for generation purchased at the Company's avoided cost rates from Community Solar, net metering and BCA. Though not included for recovery as avoided costs in the Company's Application, the Company may have avoided costs arising from the following areas in the future: (i) the avoided cost component of SCE&G owned generation constructed to implement a DERP, as set forth in S.C. Code Section 58-39-140, and (ii) the avoided cost component related to new programs introduced in the future to implement a DERP, as set forth in S.C. Code Ann. § 58-39-140.

B.27. The Parties agree that the Company will recover from customers avoided DERP costs using the same methodology used for the variable environmental component of the fuel factor for SCE&G's rate classes and customers.

B.28. The Parties agree that because the incremental DERP costs that may be recovered from ratepayers are capped pursuant to S.C. Code Ann. § 58-39-150, it would be reasonable for the Company to establish a fixed incremental dollar amount per-account charge ("DER Component") within its fuel factor to collect incremental DERP costs from customers not to exceed annually per account: $12 for residential; $120 for commercial; and $1,200 for industrial.

B.29. The Parties agree that for the purpose of billing the DER Component, the Company shall define an account as a single point of delivery in the same manner as SCE&G applies its basic facilities charge. For industrial customers being served on more than one large general service rate (i.e. Rate 23, Rate, 24, or Rate 27) and located on the same property, only one DER Component will be assessed.

B.30. The Parties agree that, in the event the incremental costs to be recovered from any customer class in a given year exceeds the per-account annual cost caps set forth in S.C. Code Ann. § 58-39-150, the Company will follow and use deferral accounting and may carry forward such costs in excess of the per-account annual cost caps for recovery to be reallocated among all customer classes, consistent with the methodology for allocating variable environmental costs, through the fuel factor in subsequent years as an incremental DERP cost subject to the caps. Non-capital incremental costs will be deferred with carrying costs calculated at the three-year treasury note plus 65 basis points. Incremental capital costs will be deferred using the Company's weighted average cost of capital as defined in Act 236.

C. REMAINING TERMS AND CONDITIONS

C.1 The Parties agree this Settlement Agreement is reasonable, in the public interest and in accordance with law and regulatory policy.

C.2 Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;

(2) Economic development and job attraction and retention in South Carolina; and

(3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

C.3 The Settling Parties agree to advocate that the Commission accept and approve this Settlement Agreement in its entirety as a fair, reasonable and full resolution of all issues in the above-captioned proceeding, and to take no action inconsistent with its adoption by the Commission.

C.4 The Settling Parties further agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission in its entirety.

C.5 This Settlement Agreement is binding on the Settling Parties only. It creates no rights in third parties nor are there third party beneficiaries to it. Only Parties who are signatories may make any claim under this Settlement Agreement.

C.6 The Settling Parties agree that signing this Settlement Agreement (a) will not constrain, inhibit, impair, waive, or prejudice their arguments or positions held in future or collateral proceedings; (b) will not constitute a precedent or evidence of acceptable practice in future proceedings; and (c) will not limit the relief, rates, recovery or rates of return that any Party may seek or advocate in any future proceeding.

C.7 If the Commission declines to approve this Settlement Agreement in its entirety, then any Party may withdraw from the Settlement Agreement without penalty or obligation within three (3) days of receiving notice of the decision, by providing written notice of withdrawal via electronic mail to all parties in that time period.

C.8 This Settlement Agreement shall be effective upon execution by the Settling Parties and shall be interpreted according to South Carolina law.

C.9 This Settlement Agreement contains the complete agreement of the Settling Parties. This Settlement Agreement shall bind and inure to the benefit of each of the signatories hereto and their representatives, predecessors, successors, assigns, agents, shareholders, officers, directors (in their individual and representative capacities), subsidiaries, affiliates, parent corporations, if any, joint ventures, heirs, executors, administrators, trustees, and attorneys.

C.10 The above terms and conditions fully represent the agreement of the Settling Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Settlement Agreement, by affixing its signature or by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement. The Settling Parties agree that in the event any Party should fail to indicate its consent to this Settlement Agreement and the terms contained herein, then this Settlement Agreement shall be null and void and will not be binding on any Party.

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2016-2-E

April 4, 2016

IN RE:	Annual Review of Base Rates for Fuel Costs for South Carolina Electric & Gas Company	)))	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made among the South Carolina Office of Regulatory Staff ("ORS"), South Carolina Energy Users Committee, South Carolina Solar Business Alliance, LLC, South Carolina Solar Development, LLC, Southern Current, LLC, and South Carolina Electric & Gas Company ("SCE&G") (collectively referred to as the "Settling Parties" or sometimes individually as a "Settling Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the procedure established in S.C. Code Ann. § 58-27-865 (2015), and the Settling Parties to this Settlement Agreement are parties of record in the above-captioned docket;

WHEREAS, the Settling Parties have varying legal positions regarding the issues in this proceeding;

WHEREAS, the Settling Parties have engaged in discussions to determine if a settlement would be in their best interest;

WHEREAS, following these discussions the Settling Parties have each determined that their interests and the public interest would be best served by settling matters in the above-captioned case under the terms and conditions set forth below:

A. STIPULATION OF SETTLEMENT AGREEMENT, TESTIMONY, AND WAIVER OF CROSS EXAMINATION

A.1. The Settling Parties agree to stipulate into the record before the Commission this Settlement Agreement.

A.2. The Settling Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

a. SCE&G witnesses:

i. Todd B. Johnson

ii. Joseph K. Todd

iii. Michael D. Shinn

iv. J. Darrin Kahl

v. Joseph M. Lynch

vi. Allen W. Rooks

vii. John H. Raftery

b. ORS witnesses:

i. Margaret D. Romaniello

ii. Michael L. Seaman-Huynh

iii. Lynda S. Shafer

c. S. C. Solar Business Alliance:

i. Paul Fleury

The Settling Parties further agree to stipulate into the record before the Commission the rebuttal testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

d. SCE&G witnesses:

i. Joseph M. Lynch

ii. Allen W. Rooks

iii. John H. Raftery

The Settling Parties reserve the right to engage in redirect of witnesses as may be necessary to respond to issues raised by the examination of their witnesses, if any, by non-parties or parties that are not signatories to this Settlement Agreement.

A.3. The Settling Parties agree that no other evidence will be offered in this proceeding by them other than the Stipulated Testimony and Exhibits, and this Settlement Agreement.

B. SETTLEMENT TERMS

B.1. As a compromise, the Settling Parties agree to the proposal set out immediately below, and this proposal is hereby adopted, accepted, and acknowledged as the agreement of the Settling Parties.

Avoided Costs, Net Energy Metering, and Distributed Energy Resources

B.2. As a compromise and without constraining, inhibiting, or impairing their arguments or positions in future proceedings, the Settling Parties agree to resolve the matters at issue in this proceeding by agreeing as follows:

a. The methodologies used by SCE&G to calculate its avoided energy and capacity costs under the Public Utility Regulatory Policies Act of 1978 ("PURPA") as described in the testimony of SCE&G Witness Lynch are reasonable and prudent.

b. Rate Schedules PR-1 and PR-2, attached hereto as Attachments A and B, including the rates, credits, charges, and underlying methodologies, and the terms and conditions of service, are lawful, just, and reasonable. If approved by the Commission, Rate Schedules PR-1 and PR-2 shall become effective for the period beginning with the first billing cycle for May 2016.

c. The updated components of value for Net Energy Metering ("NEM") Distributed Energy Resources as shown in Table 6 on corrected page 23 in the testimony of SCE&G Witness Lynch and listed below are reasonable and prudent, comply with the NEM methodology approved by the Commission in Order No. 2015-194, properly evaluate and/or quantify all categories of potential costs or benefits to SCE&G's system, and satisfy the requirements of S.C. Code Ann. § 58-40-10, *et seq*. (2015).

	Current Period ($/kWh)	IRP Planning Horizon (15-Year Levelized) ($/kWh)	Components
1	$0.02984	$0.03201	Avoided Energy Costs
2	$0	$0.00600	Avoided Capacity Costs
3	$0	$0	Ancillary Services
4	$0	$0	T & D Capacity
5	$0.00006	$0.00006	Avoided Criteria Pollutants
6	$0	$0	Avoided CO_2 Emission Cost
7	$0	$0	Fuel Hedge
8	$0	$0	Utility Integration & Interconnection Costs
9	$0	$0	Utility Administration Costs
10	$0	$0	Environmental Costs
11	$0.02990	$0.03807	Subtotal
12	$0.00251	$0.00319	Line Losses @ 0.9226
13	$0.03241	$0.04126	**Total Value of NEM Distributed Energy Resources**

d. SCE&G's proposed revisions to its "Rider to Retail Rates – Net Energy Metering for Renewable Energy Facilities" tariff sheet, attached hereto as Attachment C, including the rates, terms, and conditions, are lawful, just, and reasonable, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2016.

e. SCE&G's calculation and method of accounting for avoided and incremental costs for NEM during the review period of January 1, 2015, through December 31, 2015, were reasonable and prudent, were consistent with methodology approved in Commission Order No. 2015-194, and complied with S.C. Code Ann. § 58-40-10, *et seq.* (2015).

f. During the review period of January 1, 2015, through December 31, 2015, SCE&G offered Distributed Energy Resource ("DER") programs and took steps to fulfill its DER goals approved by the Commission in Order No. 2015-194, which programs and steps were reasonable and prudent, complied with Commission Order Nos. 2015-194 and 2015-512, and were designed to meet SCE&G's statutorily designated goals as set by S.C. Code Ann. § 58-39-130 (2015).

g. As a result of SCE&G's efforts to provide the DER programs, the balance of the DER program costs as of December 31, 2015, totaled $2,035 in avoided costs and $729,474 in incremental costs, which costs are reasonable and prudent.

h. SCE&G reasonably projected its DER program costs for the period January 1, 2016, through April 30, 2017, which projected costs include $2,390,670 in avoided costs and $4,479,822 in incremental costs.

i. SCE&G's proposed DER Avoided Cost Component by class, as set forth below, are reasonable and prudent, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2016.

Class	DER Avoided Cost Component (cents/kWh)
Residential	0.015
Small General Service	0.012
Medium General Service	0.011
Large General Service	0.007

j. SCE&G's proposed monthly per account DER Incremental Cost Component by class, as set forth below, properly allocates SCE&G's DER program incremental costs, are reasonable and prudent, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2016.

Class	Monthly Per Account DER Incremental Cost Component
Residential	$ 0.34
Small & Medium Gen. Svc.	$ 1.27
Large General Service	$ 100.00

k. SCE&G's proposed "Adjustment for Fuel, Variable Environmental, & Avoided Capacity, and Distributed Energy Resource Program Costs" tariff sheet, attached hereto as Attachment D, including the rates, terms, and conditions, is lawful, just, and reasonable, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2016.

<u>Fuel Expenses and Power Plant Operations</u>

B.3. ORS's review of SCE&G's operation of its generating facilities resulted in ORS concluding that SCE&G has made reasonable efforts to maximize unit availability and minimize fuel costs. Additionally, ORS has determined that SCE&G took appropriate corrective action with respect to outages that occurred during the review period of January 1, 2015, through December 31, 2015. Further, ORS has concluded that, subject to the adjustments set forth in its pre-filed direct testimony, SCE&G's accounting practices are in compliance with S.C. Code Ann. § 58-27-865 (2015).

B.4 The Settling Parties agree to accept all recommendations, if any, in ORS Witnesses Romaniello's and Seaman-Huynh's testimonies and exhibits pertaining to SCE&G's fuel expenses and power plant operations for the periods January 1, 2015, through December 31, 2015 ("Actual Period"), and January 1, 2016, through April 30, 2016 ("Estimated Period"), as well as forecasted data for the period May 1, 2016 through April 30, 2017 ("Forecasted Period"). Accordingly, SCE&G's net cumulative over-recovered balance of total base fuel, variable environmental, and avoided capacity costs for the periods ending December 31, 2015, and projected through April 30, 2016, are $25,667,141 and $61,020,158, respectively. As of December 31, 2015, the net cumulative over-recovered balance of $25,667,141 consists of cumulative over-recovered base fuel costs of $21,307,142 and cumulative over-recovered environmental and avoided capacity costs of $4,359,999. As of April 30, 2016, the projected net cumulative over-recovered balance of $61,020,158 consists of cumulative over-recovered base fuel costs of $55,924,568 and cumulative over-recovered environmental and avoided capacity costs of $5,095,590.

Fuel Factors

B.5. The Settling Parties agree that the appropriate fuel factors for SCE&G to charge pursuant to this Settlement Agreement for the period beginning with the first billing cycle for May 2016 and extending through the last billing cycle for April 2017 are listed below and set forth in the tariff sheet entitled "Adjustment for Fuel, Variable Environmental, and Avoided Capacity Costs," which is attached hereto as Attachment D.

Class	Base Fuel Cost Component (cents/kWh)	DERP Avoided Cost Component	Environmental Fuel & Avoided Capacity Component (cents/kWh)	Total Fuel Costs Factor (cents/kWh)
Residential	2.445	0.015	0.032	2.492
Small General Service	2.445	0.012	0.026	2.483
Medium General Service	2.445	0.011	0.024	2.480
Large General Service	2.445	0.007	0.017	2.469
Lighting	2.445	0.000	0.000	2.445

B.6. The Settling Parties agree that the total fuel costs factors set forth in Paragraph B.5 above are projected to eliminate SCE&G's over-collected balance of total fuel costs as of April 30, 2017.

B.7. If approved by the Commission, the proposed rates would decrease the average monthly bill for a residential customer on Rate 8 using 1,000 kWh by approximately $6.87, from $149.58 to $142.71.

B.8. The Settling Parties agree the fuel factors set forth above are consistent with S.C. Code Ann. § 58-27-865 (2015). The Settling Parties further agree that, except as provided in Paragraph B.2 and C.4 herein, any and all challenges to SCE&G's historical fuel costs recovery for the period ending December 31, 2015, are not subject to further review; however, the projected fuel costs for the period beginning January 1, 2016, and thereafter, shall be an open issue in future fuel costs proceedings held under the procedure and criteria established in S.C. Code Ann. § 58-27-865 (2015).

Other

B.9. With regards to plant outages not completed as of December 31, 2015, if any, and outages where final reports of SCE&G, contractors, governmental entities or others are not available, if any, the Settling Parties agree that ORS retains the right to review the reasonableness of the plant outage(s) and associated costs in the review period during which the outage is completed or when the report(s) on such outage(s) become available.

B.10. Upon written request, SCE&G will provide the following to the Settling Parties:

a. Copies of the monthly fuel recovery reports currently filed with the Commission and ORS; and,

b. Quarterly forecasts beginning with the quarter ending June 30, 2016, of the expected fuel factors to be set at SCE&G's next annual fuel proceeding and SCE&G's historical over (under)-recovered balance to date. SCE&G agrees it will put forth reasonable efforts to forecast the expected fuel factors to be set at its next annual fuel proceeding; however, the Settling Parties agree that these quarterly forecasts will not be admitted into evidence in any future SCE&G proceeding.

C. REMAINING SETTLEMENT TERMS AND CONDITIONS

C.1 The Settling Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy. This Settlement Agreement in no way constitutes a waiver or acceptance of the position of any Settling Party concerning the requirements of S.C. Code Ann. § 58-27-865 (2015) in any future proceeding.

C.2. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B) (2015). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

C.3. The Settling Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable, and full resolution in the above-captioned proceeding. The

Settling Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Settlement Agreement and the terms and conditions contained herein.

C.4. This written Settlement Agreement contains the complete agreement of the Settling Parties. There are no other terms and conditions to which the Settling Parties have agreed. This Settlement Agreement integrates all discussions among the Settling Parties into the terms of this written document. The Settling Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve this Settlement Agreement in its entirety, then any Settling Party desiring to do so may withdraw from this Settlement Agreement without penalty.

C.5. This Settlement Agreement shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Settling Parties hereto. Therefore, each Settling Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Settling Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

ATTACHMENT A

SOUTH CAROLINA ELECTRIC & GAS COMPANY **ELECTRICITY**

RATE PR-1 **SMALL POWER PRODUCTION, COGENERATION**

AVAILABILITY

Available to Small Power Producers and Cogenerators that are a Qualifying Facility as defined by the Federal Energy Regulatory Commission (FERC) Order No. 70 under Docket No. RM 79-54. This schedule is not available for Qualifying Facilities that have power production capacity greater than 100 KW.

CHARACTER OF SERVICE

Energy supplied by the Qualifying Facility must be at 60 hertz and voltage, phase and power factor approved by the Company.

Energy supplied by the Qualifying Facility must be at a voltage level compatible with the voltage level of the Company's system at the point of delivery.

MONTHLY RATE
(Seller Charges & Credits)

For Qualifying Facilities, Company will pay Seller a monthly credit equal to the Energy Credit and the Capacity Credit reduced by the Seller Charge.

I. Energy Credit:

Company shall pay Seller the following rates per KWH for energy delivered by the Seller to Company's system.

		Summer (June -September)	Winter (October-May)
1.	On-Peak	$0.03274	$0.03525
2.	Off-Peak	$0.02662	$0.03379

The South Carolina Power Excise Tax of $.0005 per KWH is included in the energy credits above.

DETERMINATION OF ON-PEAK AND OFF-PEAK HOURS FOR ENERGY CREDITS

A. On-Peak Hours:

Summer Months of June - September:

The on-peak Summer hours are defined to be 10:00 a.m.-10:00 p.m. Monday-Friday.

Winter Months of October - May:

1. November through April: The on-peak hours are defined as those hours between 6:00 a.m.-1:00 p.m. and 5:00 p.m.-10:00 p.m., Monday-Friday.
2. October and May: The on-peak hours are defined as those hours between 10:00 a.m.-10:00p.m., Monday-Friday.

B. Off-Peak Hours:

The off-peak hours in any month are defined as all hours not specified as on-peak hours.

II. Capacity Credit:

In addition to the energy credit, the Company shall pay the Seller $0.06466 per kWh for energy delivered by the Seller to the Company's system during critical peak Summer hours. The Company shall pay the Seller $0.02190 per kWh for energy delivered by the Seller to the Company's system during critical peak Winter hours.

DETERMINATION OF CRITICAL PEAK HOURS FOR CAPACITY CREDITS

A. Critical Peak Hours:

Summer Months of June - August:

The critical peak Summer hours are defined to be 2:00 p.m. - 6:00 p.m. Monday-Friday.

Winter Months of December - February:

The critical peak Winter hours are defined to be 6:00 a.m. - 9:00 a.m. Monday-Friday.

III. Seller Charge:

Seller shall pay the following Seller Charge each monthly billing period $ 4.50

BILLING MONTH

A Billing Month is defined in this schedule as the time period between successive meter readings for the purpose of monthly billing. Readings are taken approximately once each month.

MONTHLY RATE DETERMINATION

The Seller will be liable to the Company each billing month for the Seller Charge regardless of the amount of energy delivered by the Seller to the Company.

The Company will be liable to the Seller each billing month an amount determined as the total kWh delivered to the Company's system times the cost per kWh as specified herein.

PAYMENT TERMS

Payments due the Seller under this schedule shall be payable to the Seller within fifteen (15) days of the billing date.

Payment due the Company under this schedule is due and payable to the Company within fifteen (15) days of the billing date.

LIMITING PROVISIONS

Company shall not be liable for purchase of electricity from Qualifying Facility until such facility and Company have executed an Agreement for Purchase of Power from Small Power Production facility or Cogeneration Facility.

Effective Upon Approval of the
Public Service Commission of South Carolina

AVAILABILITY

Available to Small Power Producers and Cogenerators that are a Qualifying Facility as defined by the Federal Energy Regulatory Commission (FERC) Order No. 70 under Docket No. RM 79-54 that have power production capacity greater than 100 kW and less than or equal to 80 MW, and entering into a power purchase agreement ("Seller") with South Carolina Electric & Gas Company. This schedule is not available for Qualifying Facilities that have power production capacity greater than 80 MW or equal to or less than 100 KW.

CHARACTER OF SERVICE

Energy supplied by the Qualifying Facility must be at 60 hertz and voltage, phase and power factor approved by the Company.

Energy supplied by the Qualifying Facility must be at a voltage level compatible with the voltage level of the Company's system at the point of delivery.

MONTHLY RATES

For a Qualifying Facility as described in the Availability section above, the Company will pay Seller an amount equal to the Energy Payment and the Capacity Payment reduced by the Seller Charge. The Company will pay this amount monthly.

I. **Energy Payment:**

Company shall pay the Seller the following rates per kWh for energy delivered by the Seller to Company's system:

A. For the period 2016 - 2020:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.03385	$ 0.03189	$ 0.03385	$ 0.03189
2.	Off-Peak	$ 0.02757	$ 0.03162	$ 0.02757	$ 0.03162

B. For the period 2021 - 2025:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.03316	$ 0.03178	$ 0.03316	$ 0.03178
2.	Off-Peak	$ 0.02682	$ 0.02615	$ 0.02682	$ 0.02615

C. For the period 2026 - 2030:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.03861	$ 0.03913	$ 0.03861	$ 0.03913
2.	Off-Peak	$ 0.03042	$ 0.03294	$ 0.03042	$ 0.03294

The South Carolina Power Excise Tax of $.0005 per kWh is included in the energy payments above.

Transmission Level is defined as voltages equal to or greater than 33 kV. Distribution Level is defined as voltages less than 33 kV.

DETERMINATION OF ON-PEAK AND OFF-PEAK HOURS FOR ENERGY PAYMENTS

A. On-Peak Hours:

Summer Months of June - September:

The on-peak Summer hours are defined to be 10:00 a.m. - 10:00 p.m. Monday-Friday.

Non-Summer Months of October - May:

1. November through April: The on-peak hours are defined as those hours between 6:00 a.m. - 1:00 p.m. and 5:00 p.m. - 10:00 p.m., Monday-Friday.
2. October and May: The on-peak hours are defined as those hours between 10:00 a.m. - 10:00p.m., Monday - Friday.

B. Off-Peak Hours:

The off-peak hours in any month are defined as all hours not specified as on-peak hours.

ATTACHMENT B

II. Capacity Payment:

In addition to the energy payment, the Company shall pay the Seller the following capacity payment per kWh for energy delivered by the Seller to the Company's system during Critical Peak hours.

For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
Summer (Jun. - Aug.)	Winter (Dec. - Feb.)	Summer (Jun. - Aug.)	Winter (Dec. - Feb.)
$ 0.06466	$ 0.02190	$ 0.06466	$ 0.02190

Transmission Level is defined as voltages equal to or greater than 33 kV. Distribution Level is defined as voltages less than 33 kV.

DETERMINATION OF CRITICAL PEAK HOURS FOR CAPACITY PAYMENTS

A. Critical Peak Hours:

Summer Months of June - August:

The critical peak Summer hours are defined to be 2:00 p.m. - 6:00 p.m. Monday-Friday.

Winter Months of December - February:

The critical peak Winter hours are defined to be 6:00 a.m. - 9:00 a.m. Monday-Friday.

III. Seller Charge:

Seller shall pay the following Seller Charge each monthly billing period: $ 45.00

BILLING MONTH

A Billing Month is defined in this schedule as the time period between successive meter readings for the purpose of monthly billing. Readings are taken approximately once each month.

MONTHLY RATE DETERMINATION

The Seller will be liable to the Company each billing month for the Seller Charge regardless of the amount of energy delivered by the Seller to the Company.

The Company will be liable to the Seller each billing month for an amount determined as the total kWh delivered to the Company's system times the cost per kWh as specified herein.

PAYMENT TERMS

Payments due the Seller under this schedule shall be payable to the Seller within fifteen (15) days of the billing date.

Payment due the Company under this schedule is due and payable to the Company within fifteen (15) days of the billing date.

LIMITING PROVISIONS

Company shall not be liable for purchase of electricity from a Qualifying Facility until such facility and Company have executed a power purchase agreement.

RIDER TO RETAIL RATES

NET ENERGY METERING FOR RENEWABLE ENERGY FACILITIES ("NEM")
(Page 1 of 4)

AVAILABILITY

This rider is available in conjunction with the Company's Retail Electric Service Rates, for a Customer-Generator. The customer's generating system must be manufactured, installed and operated in accordance with governmental and industry standards and must fully conform with the Company's current interconnection standards as approved by the Public Service Commission of South Carolina.

This rider is available on a first come, first serve basis until the total nameplate generating capacity of net energy metering systems equals 2% of the previous five-year average of the Company's South Carolina retail electric peak demand.

CHARACTER OF SERVICE

The applicable character of service is specific to the rate schedule that the customer receives service under.

RATE PER MONTH

The applicable rate per month shall be from the appropriate rate schedule as referenced in the availability section above. The monthly bill shall be determined as follows:

For electric service under a time-of-use rate schedule:

1. The basic facilities charge shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

2. Any demand charges shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

3. If a customer-generator's energy consumption exceeds the electricity provided by the customer-generator during a monthly billing period, the customer-generator shall be billed in kWh for the net electricity supplied by the Utility.

   If a customer-generator's energy generation exceeds the electricity provided by the Utility during a monthly billing period, the customer-generator shall be credited for the excess kWh generated during that billing period.

   Energy charges (or credits) shall be based on the rates in the applicable rate schedules as described in the availability section above. For on-peak energy, the customer's monthly usage amount in kilowatt-hours shall be reduced by the total of (a) any on-peak excess energy delivered to the Company in the current month plus (b) any accumulated on-peak excess energy balance remaining from prior months. Total on-peak energy in kilowatt-hours billed to customers shall never be less than zero. For off-peak energy, the customer's monthly usage shall be reduced by the total of (a) any off-peak excess energy delivered to the Company in the current month plus (b) any accumulated off-peak excess energy balance remaining from prior months plus (c) any accumulated on-peak excess energy balance from the current month or prior months that was not used to reduce on-peak usage. Total off-peak energy in kilowatt-hours billed to customers shall also never be less than zero. For any billing month during which excess energy exceeds the customer's usage in total, producing a net credit, the respective energy charges for the billing month shall be zero. Any excess energy credits shall carry forward on the following month's bill by first applying excess on-peak kWh against on-peak kWh charges and excess off-peak kWh against off-peak kWh charges, then applying any remaining on-peak kWh against any remaining off-peak kWh charges. Credits shall not offset the basic facilities charge or the demand charge for the applicable rate schedule.

4. Excess energy not used in the current billing month to reduce billed kWh usage shall be accumulated and used to reduce usage in future months. For all affected billing statements rendered during November billing cycles, any accumulated excess energy not used to reduce billed kWh usage shall be paid to the customer-generator at the Company's avoided cost, zeroing out the customer generator's account of excess energy. The avoided cost is the off-peak winter energy credit as approved in the Company's Rate PR-1, Small Power Production and Cogeneration schedule.

For electric service under a standard, non time-of-use rate schedule:

1. The basic facilities charge shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

2. Any demand charges shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

3. If a customer-generator's energy consumption exceeds the electricity provided by the customer-generator during a monthly billing period, the customer-generator shall be billed in kWh for the net electricity supplied by the Utility.

   If a customer-generator's energy generation exceeds the electricity provided by the Utility during a monthly billing period, the customer-generator shall be credited for the excess kWh generated during that billing period.

   Energy charges (or credits) shall be based on the rates in the applicable rate schedules as described in the availability section above. For purposes of calculating monthly energy, the customer's usage shall be reduced by the total of (a) any excess energy delivered to the Company in the current month plus (b) any accumulated excess energy balance remaining from prior months. Total energy in kilowatt-hours billed to customers shall never be less than zero. For any billing month during which excess energy exceeds the customer's usage in total, producing a net credit, the respective energy charges for the billing month shall be zero. Credits shall not offset the basic facilities charge or the demand charge for the applicable rate schedule.

4. Excess energy not used in the current billing month to reduce billed kWh usage shall be accumulated and used to reduce usage in future months. For all affected billing statements rendered during November billing cycles, any accumulated excess energy not used to reduce billed kWh usage shall be paid to the customer-generator at the Company's avoided cost, zeroing out the customer generator's account of excess energy. The avoided cost is the off-peak winter energy credit as approved in the Company's Rate PR-1, Small Power Production and Cogeneration schedule.

MINIMUM CHARGE

The monthly minimum charge shall be the basic facilities charge plus the demand charge, if any, as stated in the applicable rate.

DEFINITIONS

1. Customer-Generator means the owner, operator, lessee, or customer-generator lessee of an electric energy generation unit which:

   (A) generates electricity from a Renewable Energy Resource;
   (B) has an electrical generating system with a capacity of:
      (i) not more than the lesser of one thousand kilowatts (1,000 kW AC) or one hundred percent (100%) of contract demand if a non-residential customer; or
      (ii) not more than twenty kilowatts (20 kW AC) if a residential customer;
   (C) is located on a single premises owned, operated, leased, or otherwise controlled by the customer;
   (D) is interconnected and operates in parallel phase and synchronization with an electrical utility and complies with the applicable interconnection standards;
   (E) is intended primarily to offset part or all of the customer-generator's own electrical energy requirements; and
   (F) meets all applicable safety, performance, interconnection, and reliability standards established by the commission, the National Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, Underwriters Laboratories, the federal Energy Regulatory Commission, and any local governing authorities.

2. Renewable Energy Resource means solar photovoltaic and solar thermal resources, wind resources, hydroelectric resources, geothermal resources, tidal and wave energy resources, recycling resources, hydrogen fuel derived from renewable resources, combined heat and power derived from renewable resources, and biomass resources.

3. Retail Electric Service Rates shall mean Rates 1, 2, 3, 5, 6, 7, 8, 9 (metered), 11, 12, 13, 14, 16, 20, 21, 21A, 22, 23, 24, and 28.

4. Excess energy delivered to the Company shall be defined as energy produced by the customer's renewable energy generating facility that exceeds the energy delivered by the Company during a given time period. This excess energy shall be used to reduce energy delivered and billed by the Company during the current or a future month, as provided in the Rate Per Month section above.

5. The On-Peak and Off-Peak periods shall be defined in the applicable time-of-use rate schedules.

GENERAL PROVISIONS

1. To qualify for this rider, the customer must first qualify for and be served on one of the rate schedules as described in the availability section above. The customer must also meet all other qualifications as outlined in the availability section above.

2. All provisions of the applicable rate schedules described above including, but not limited to Billing Demand, Determination of On- and Off-Peak Hours, Adjustment for Fuel Costs, Demand Side Management Component, Pension Costs Component, Storm Damage Component, Sales and Franchise Tax, Payment Terms, and Special Provisions will apply to service supplied under this rider.

3. Customers electing service under this NEM Rider are eligible to remain on the Rider until December 31, 2025, or until such time as the customer elects to terminate service under the Rider, whichever occurs first. The rates set forth here are subject to Commission Order No. 2015-194 in Docket No. 2014-246-E entered under the terms of S.C. Code § 58-40-20(F)(4). Eligibility for this rate will terminate as set forth in Order No. 2015-194. The value of distributed energy resource generation shall be computed using the methodology contained in Commission Order No. 2015-194 in Docket No. 2014-246-E and updated annually coincident in time with the Company's filing in the fuel clause. The value for the period May 2016 – April 2017 is $0.04126 per kWh.

4. Service on this NEM Rider will be closed to new participants as of January 1, 2021, or after statutory caps described in S.C. Code Ann. § 58-39-130 have been reached, whichever occurs first.

5. When no contract demand level is available for a non-residential customer, connected load as determined by the Company shall be used as a proxy for contract demand when determining the capacity of the electrical generating system.

6. Customers who elect NEM service after January 1, 2021, will receive service in accordance with the NEM tariff in effect at the time at which the customer requests NEM service.

7. Customers served under this rider are not eligible for the Company's Small Power Production, Cogeneration Rate PR-1.

8. The customer must execute an application to interconnect generation and an interconnection agreement prior to receiving service under this rider.

9. The Company will retain ownership of Renewable Energy Credits ("RECs").

10. In the event the Company determines that it is necessary to increase the capacity of facilities beyond those required to serve the Customer's electrical requirement or to install a dedicated transformer or other equipment to protect the safety and adequacy of electric service provided to other customers, the Customer shall pay the estimated cost of the required transformer or other equipment above the estimated cost which Company would otherwise have normally incurred to serve the Customer's electrical requirement, in advance of receiving service under this Rider.

SPECIAL PROVISIONS

The Company will furnish service in accordance with its standard specifications. Non-standard service will be furnished only when the customer pays the difference in costs between non-standard service and standard service or pays to the Company its normal monthly facility charge based on such difference in costs.

METERING REQUIREMENTS

Customer must furnish, install, own, and maintain a meter socket to measure 100% of the Customer's generator output and that is connected on the Customer's side of the delivery point. Company will furnish, install, own, and maintain a generation meter. Company will also furnish, install, own and maintain a bi-directional billing meter to measure the kWh delivered from Company to Customer and to measure kWh received from Customer by Company. The billing meter will be configured for demand and/or time-of-use measurement as required by the applicable rate. All metering shall be at a location that is approved by the Company. At Company's sole option, the generator meter requirement may be waived for customers served under a net metering rider on or before December 31, 2015.

TERM OF CONTRACT

Contracts shall be for a period not to exceed the term of the contract under which the customer currently receives electric service. There shall be a separate contract for each meter at each location.

GENERAL TERMS AND CONDITIONS

The Company's General Terms and Conditions are incorporated by reference and are part of this rider.

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY, AND DISTRIBUTED ENERGY RESOURCE COSTS

APPLICABILITY

This adjustment is applicable to and is part of the Utility's South Carolina retail electric rate schedules.

The fuel, variable environmental & avoided capacity, and DER avoided costs, to be recovered in an amount rounded to the nearest one-thousandth of a cent per kilowatt-hour, will be determined by the following formulas:

$$F_C = \frac{E_F}{S} + \frac{G_F}{S_1}$$

$$F_{EC} = \frac{E_{EC} + G_{EC}}{S_2}$$

$$F_{AC} = \frac{E_{AC} + G_{AC}}{S_2}$$

Total Fuel Rate

$$\textbf{per kWh} = F_C + F_{EC} + F_{AC}$$

Where:

F_C = Fuel cost per kilowatt-hour included in base rate, rounded to the nearest one-thousandth of a cent.

E_F = Total projected system fuel costs:

(A) Fuel consumed in the Utility's own plants and the Utility's share of fuel consumed in jointly owned or leased plants. The cost of fossil fuel shall include no items other than those listed in Account 151 of the Commission's Uniform System of Accounts for Public Utilities and Licensees. The cost of nuclear fuel shall be that as shown in Account 518 excluding rental payments on leased nuclear fuel and except that, if Account 518 also contains any expense for fossil fuel which has already been included in the cost of fossil fuel, it shall be deducted from this account.

PLUS

(B) Fuel costs related to purchased power such as those incurred in unit power and limited term power purchases where the fossil fuel costs associated with energy purchased are identifiable and are identified in the billing statement, and also including avoided energy costs incurred by the Utility. Also, the cost of "firm generation capacity purchases," which are defined as purchases made to cure a capacity deficiency or to maintain adequate reserve levels. Costs of "firm generation capacity purchases" includes the total delivered costs of firm generation capacity purchased and excludes generation capacity reservation charges, generation capacity option charges and any other capacity charges.

PLUS

(C) Fuel costs related to purchased power (including transmission charges), such as short term, economy and other such purchases, where the energy is purchased on an economic dispatch basis, including the total delivered cost of economy purchases of electric power defined as purchases made to displace higher cost generation at a cost which is less than the purchasing Utility's avoided variable costs for the generation of an equivalent quantity of electric power.

Energy receipts that do not involve money payments such as diversity energy and payback of storage energy are not defined as purchased or interchange power relative to this fuel calculation.

MINUS

(D) The cost of fuel recovered through intersystem sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

Energy deliveries that do not involve billing transactions such as diversity energy and payback of storage energy are not defined as sales relative to this fuel calculation.

S = Projected system kilowatt-hour sales excluding any intersystem sales.

G_F = Cumulative difference between jurisdictional fuel revenues billed and fuel expenses at the end of the month preceding the projected period utilized in E_F and S.

S_1 = Projected jurisdictional kilowatt-hour sales, for the period covered by the fuel costs included in E_F.

F_{EC} = Customer class variable environmental and avoided capacity costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY, AND DISTRIBUTED ENERGY RESOURCE COSTS

E_{EC} = The projected variable environmental costs including: a) the cost of ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions, plus b) the cost of emission allowances, as used, including allowances for SO2, NOx, mercury and particulates minus net proceeds of sales of emission allowances, and c) as approved by the Commission, all other variable environmental costs incurred in relation to the consumption of fuel and air emissions caused thereby, including but not limited to environmental reagents, other environmental allowances, and emission related taxes. Any environmental related costs recovered through intersystem sales would be subtracted from the totals produced by subparts a), b), and c). This component also includes avoided capacity costs incurred by the Utility.

These environmental and avoided capacity costs will be allocated to retail customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{EC} = Cumulative difference between jurisdictional customer class environmental fuel revenues billed and jurisdictional customer class environmental costs at the end of the month preceding the projected period utilized in E_{EC} and S_2.

F_{AC} = Customer class DER avoided costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

E_{AC} = The projected DER avoided costs paid to distributed generators as most recently determined by the Public Service Commission of South Carolina. These avoided costs will be allocated to retail electric customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{AC} = Cumulative difference between jurisdictional customer class avoided cost revenues billed and jurisdictional customer class avoided costs at the end of the month preceding the projected period utilized in E_{AC} and S_2.

S_2 = The projected jurisdictional customer class kilowatt-hour sales.

The appropriate revenue-related tax factor is to be included in these calculations.

FUEL RATES PER KWH BY CLASS

The total fuel costs in cents per kilowatt-hour by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2016 through April, 2017:

Customer Class	F_C Rate	+	F_{EC} Rate	+	F_{AC} Rate	=	Total Fuel Rate
Residential	2.445		0.032		0.015		2.492
Small General Service	2.445		0.026		0.012		2.483
Medium General Service	2.445		0.024		0.011		2.480
Large General Service	2.445		0.017		0.007		2.469
Lighting	2.445		0.000		0.000		2.445

The incremental costs associated with SCE&G's Distributed Energy Resource Programs, to be recovered in an amount rounded to the nearest cent per account, will be determined by the following formulas:

Total Fuel Rate per Account

$$F_{IC} = \frac{E_{DC} + G_{DC}}{C}$$

Where:

F_{IC} = Fuel cost per account included in base rate, rounded to the nearest cent, not to exceed \$12 for residential customers, \$120 for small/medium general service customers, and \$1,200 for large general service customers.

E_{DC} = The projected incremental costs associated with SCE&G's Distributed Energy Resource Program as determined by the Public Service Commission of South Carolina

G_{DC} = Cumulative difference between jurisdictional customer class distributed energy component revenues billed and jurisdictional customer class incremental costs associated with SCE&G's Distribued Energy Resource Program at the end of the month preceding the projected period utilized in E_{DC} and C.

C = The jurisdictional customer class account totals.

FUEL RATES PER ACCOUNT PER MONTH BY CLASS

The total fuel costs in dollars per account by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2016 through April, 2017:

Customer Class		F_{IC} Rate
Residential	$	0.34
Small & Medium General Service	$	1.27
Large General Service	$	100.00

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2017-2-E

March 30, 2017

IN RE: Annual Review of Base Rates for Fuel Costs for South Carolina Electric & Gas Company	)))	**SETTLEMENT AGREEMENT**

This Settlement Agreement is made among the South Carolina Office of Regulatory Staff ("ORS"), South Carolina Energy Users Committee, and South Carolina Electric & Gas Company ("SCE&G" or "Company") (collectively referred to as the "Settling Parties" or sometimes individually as a "Settling Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the procedure established in S.C. Code Ann. § 58-27-865 (2015), and the Settling Parties to this Settlement Agreement are parties of record in the above-captioned docket;

WHEREAS, the Settling Parties have varying legal positions regarding the issues in this proceeding;

WHEREAS, the Settling Parties have engaged in discussions to determine if a settlement would be in their best interest;

WHEREAS, following these discussions the Settling Parties have each determined that their interests and the public interest would be best served by settling matters in the above-captioned case under the terms and conditions set forth below:

A. STIPULATION OF SETTLEMENT AGREEMENT, TESTIMONY, AND WAIVER OF CROSS EXAMINATION

A.1. The Settling Parties agree to stipulate into the record before the Commission this Settlement Agreement.

A.2. The Settling Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

a. SCE&G witnesses:

i. George A. Lippard, III

ii. Keith C. Coffer, Jr.

iii. Michael D. Shinn

iv. Henry E. Delk, Jr.

v. Joseph M. Lynch

vi. Allen W. Rooks

vii. John H. Raftery

viii. John S. Beier

b. ORS witnesses:

i. Willie J. Morgan

ii. Robert A. Lawyer

iii. Gaby Smith

iv. Brian Horri

The Settling Parties further agree to stipulate into the record before the Commission the rebuttal testimony of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

c. SCE&G witnesses:

   i. Joseph M. Lynch

   ii. John H. Raftery

The Settling Parties reserve the right to engage in redirect of witnesses as may be necessary to respond to issues raised by the examination of their witnesses, if any, by non-parties or parties that are not signatories to this Settlement Agreement.

A.3. The Settling Parties agree that no other evidence will be offered in this proceeding by them other than the Stipulated Testimony and Exhibits, and this Settlement Agreement, unless such evidence is required to respond to an issue raised by a non-settling party.

B. SETTLEMENT TERMS

B.1. As a compromise, the Settling Parties agree to the proposal set out immediately below, and this proposal is hereby adopted, accepted, and acknowledged as the agreement of the Settling Parties.

Avoided Costs, Net Energy Metering, and Distributed Energy Resources

B.2. As a compromise and without constraining, inhibiting, or impairing their arguments or positions in future proceedings, the Settling Parties agree to resolve the matters at issue in this proceeding by agreeing as follows:

a. The methodologies used by SCE&G to calculate its avoided energy and avoided capacity costs under the Public Utility Regulatory Policies Act of 1978 ("PURPA") as described in the testimony of SCE&G witness Lynch are reasonable and prudent.

b. Rate Schedules PR-1 and PR-2, attached hereto as Attachments A and B, including the rates, credits, charges, and underlying methodologies, and the terms and conditions of service, are lawful, just, and reasonable. If approved by the Commission, Rate Schedules PR-1 and PR-2 shall become effective for the period beginning with the first billing cycle for May 2017.

c. The updated components of value for Net Energy Metering ("NEM") Distributed Energy Resources ("DER") as shown in Table 6 on page 15 in the testimony of SCE&G witness Lynch and listed below are reasonable and prudent, comply with the NEM methodology approved in Commission Order No. 2015-194, properly evaluate and/or quantify all categories of potential costs or benefits to SCE&G's system, and satisfy the requirements of S.C. Code Ann. § 58-40-10, *et seq.* (2015).

	Current Period ($/kWh)	**IRP Planning Horizon (15-Year Levelized) ($/kWh)**	**Components**
1	$0.03273	$0.03199	Avoided Energy Costs
2	$0	$0.00172	Avoided Capacity Costs
3	$0	$0	Ancillary Services
4	$0	$0	T & D Capacity
5	$0.00004	$0.00004	Avoided Criteria Pollutants
6	$0	$0	Avoided CO_2 Emission Cost
7	$0	$0	Fuel Hedge
8	$0	$0	Utility Integration & Interconnection Costs
9	$0	$0	Utility Administration Costs
10	$0	$0	Environmental Costs
11	$0.03277	$0.03376	Subtotal
12	$0.00268	$0.00276	Line Losses @ 0.9245
13	$0.03545	$0.03651	**Total Value of NEM Distributed Energy Resources**

d. SCE&G's proposed revisions to its "Rider to Retail Rates – Net Energy Metering for Renewable Energy Facilities" tariff sheet, attached hereto as Attachment C, including the rates, terms, and conditions, are lawful, just, and reasonable, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2017.

e. SCE&G's calculation and method of accounting for avoided and incremental costs for NEM during the review period of January 1, 2016, through December 31, 2016 ("Actual Period"), were reasonable and prudent, were consistent with methodology approved in Commission Order No. 2015-194, and complied with S.C. Code Ann. § 58-40-10, *et seq.* (2015).

f. During the Actual Period SCE&G offered DER programs and took steps to fulfill its DER goals approved in Commission Order No. 2015-194. The programs and steps were reasonable, prudent, complied with Commission Order Nos. 2015-194 and 2015-512, and were designed to meet SCE&G's statutorily designated goals as prescribed by S.C. Code Ann. § 58-39-130 (2015).

g. The cumulative balances of SCE&G's DER program costs as of December 31, 2016, totaled an over-collected balance of $1,709,006 in avoided costs and an under-collected balance of ($698,707) in incremental costs, which are reasonable and prudent.

h. SCE&G reasonably projected its DER program costs for the period January 1, 2017, through April 30, 2018, which are accurately reflected in Exhibit No. ___ (AWR-7) and Exhibit No. ___ (AW-R-9) attached to the direct testimony of Allen W. Rooks.

i. SCE&G's proposed DER Avoided Cost Component by class, as set forth below, are reasonable and prudent, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2017.

Class	DER Avoided Cost Component (¢/kWh)
Residential	0.015
Small General Service	0.013
Medium General Service	0.011
Large General Service	0.007

j. SCE&G's proposed monthly per account DER Incremental Cost Components by class, as set forth below, properly allocate SCE&G's DER program incremental costs, are reasonable and prudent, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2017.

Class	Monthly Per Account DER Incremental Cost Component
Residential	$ 0.91
Small & Medium Gen. Svc.	$ 3.29
Large General Service	$ 100.00

k. The tariff sheet entitled, "Adjustment for Fuel, Variable Environmental, & Avoided Capacity, and Distributed Energy Resource Program Costs," attached hereto as Attachment D, including the rates, terms, and conditions, is lawful, just, and reasonable, and, if approved by the Commission, shall become effective for the period beginning with the first billing cycle for May 2017.

<u>Fuel Expenses and Power Plant Operations</u>

B.3. ORS's review of SCE&G's operation of its generating facilities resulted in ORS concluding that SCE&G made reasonable efforts to maximize unit availability and minimize fuel costs. Additionally, ORS determined that SCE&G took appropriate corrective action with respect to outages that occurred during the Actual Period. Further, ORS concluded that, subject to any adjustments set forth in ORS's pre-filed direct testimony, SCE&G's accounting practices are in compliance with S.C. Code Ann. § 58-27-865 (2015).

B.4 The Settling Parties agree to accept all recommendations, if any, in ORS witnesses Smith's and Morgan's testimonies and exhibits pertaining to SCE&G's fuel expenses and power plant operations for the Actual Period, and January 1, 2017, through April 30, 2017 ("Estimated Period"), as well as forecasted expenses for the period May 1, 2017 through April 30, 2018 ("Forecasted Period"). Accordingly, SCE&G's net cumulative over-collected balance of total base fuel, variable environmental, and avoided capacity costs for the periods ending December 2016, and estimated through April 2017, are \$56,504,223 and \$31,505,037, respectively. As of December 2016, the net cumulative over-collected balance of \$56,504,223 consists of cumulative over-collected base fuel costs of \$52,599,284 and cumulative over-collected environmental and avoided capacity costs of \$3,904,939. As of April 2017, the estimated net cumulative over-collected balance of \$31,505,037 consists of cumulative over-collected base fuel costs of \$29,465,939 and cumulative over-collected environmental and avoided capacity costs of \$2,039,098.

Fuel Factors

B.5. The Settling Parties agree that the appropriate fuel factors for SCE&G to charge pursuant to this Settlement Agreement for the period beginning with the first billing cycle for May 2017 and extending through the last billing cycle for April 2018 are listed below and set forth in Attachment D.

Class	Base Fuel Cost Component (¢/kWh)	DER Avoided Cost Component (¢/kWh)	Environmental Fuel & Avoided Capacity Component (¢/kWh)	Total Fuel Costs Factor (¢/kWh)
Residential	2.451	0.015	0.047	2.513
Small General Service	2.451	0.013	0.039	2.503
Medium General Service	2.451	0.011	0.033	2.495
Large General Service	2.451	0.007	0.020	2.478
Lighting	2.451	0.000	0.000	2.451

B.6. The Settling Parties agree that the base fuel cost component set forth in Paragraph B.5 above is projected to create an under-collected cumulative balance of base fuel costs as of April 30, 2018, of approximately ($61,000,000).

B.7. The Settling Parties agree that the Company be allowed carrying costs for base fuel cost component under-collected balances, as they occur, and if approved, be based on the 3-year U.S. Government Treasury Note rate plus 65 basis points.

B.8. If approved by the Commission, the proposed rates would increase the average monthly bill for a residential customer on Rate 8 using 1,000 kWh from $147.53 to approximately $148.31, or by $0.78. The net effect on a Rate 8 Residential Bill using 1,000 kWh per month including the Company's Annual DSM Review (Docket No. 2017-35-E), if approved by the Commission, and its recently approved Pension Rider Adjustment (Docket No. 2017-56-E) would be $0.00 or 0.00%.

B.9. The Settling Parties agree the fuel factors set forth above are consistent with S.C. Code Ann. § 58-27-865 (2015). The Settling Parties further agree that, except as provided in Paragraph B.2 and B.10 herein, any and all challenges to SCE&G's historical fuel costs recovery for the period ending December 2016, are not subject to further review; however, the projected fuel costs for the period beginning January 1, 2017, and thereafter, shall be an open issue in future fuel costs proceedings held under the procedure and criteria established in S.C. Code Ann. § 58-27-865 (2015).

Other

B.10. With regards to plant outages not completed as of December 31, 2016, if any, and outages where final reports of SCE&G, contractors, governmental entities or others are not available, if any, the Settling Parties agree that ORS retains the right to review the reasonableness of the plant outage(s) and associated costs in the review period during which the outage is completed or when the report(s) on such outage(s) become available.

B.11. Upon written request, SCE&G will provide the following to the Settling Parties:

a. Copies of the monthly fuel recovery reports currently filed with the Commission and ORS; and,

b. Quarterly forecasts beginning with the quarter ending June 30, 2017, of the expected fuel factors to be set at SCE&G's next annual fuel proceeding and SCE&G's historical over (under)-collected balance to date. SCE&G agrees it will put forth reasonable efforts to forecast the expected fuel factors to be set at its next annual fuel proceeding; however, the Settling Parties agree that these quarterly forecasts will not be admitted into evidence in any future SCE&G proceeding.

B.12. The Settling Parties support the Company's effort to use Internal Revenue Code Section 174 deduction claims to reduce the variable environmental and avoided capacity cost component of the total fuel cost factor and agree to the implementation of the benefit from the deferred tax liability in the manner outlined by SCE&G witness Coffer is reasonable.

B.13. The Settling Parties agree that the Company's request to suspend the BCA program indefinitely due to high response from customers and in the manner the Company proposed is reasonable.

B.14 The Settling Parties agree that the Company's requests to modify the existing Community Solar program by expanding the solar panel subscription offering to all eligible customers and for certain revisions to the Community Solar tariff to align with the First Amendment of their Credit Rate Agreement with Clean Energy Collective approved in Docket No. 2016-290-E, Order No. 2017-151, are reasonable.

C. REMAINING SETTLEMENT TERMS AND CONDITIONS

C.1 The Settling Parties agree this Settlement Agreement is reasonable, in the public interest, and in accordance with law and regulatory policy. This Settlement Agreement in no way constitutes a waiver or acceptance of the position of any Settling Party concerning the requirements of S.C. Code Ann. § 58-27-865 (2015) in any future proceeding.

C.2. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B) (2015). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

> "…'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;
> (2) Economic development and job attraction and retention in South Carolina; and
> (3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

C.3. The Settling Parties agree to cooperate in good faith with one another in recommending to the Commission that this Settlement Agreement be accepted and approved by the Commission as a fair, reasonable, and full resolution in the above-captioned proceeding. The Settling Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Settlement Agreement and the terms and conditions contained herein.

C.4. This written Settlement Agreement contains the complete agreement of the Settling Parties. There are no other terms and conditions to which the Settling Parties have agreed. This Settlement Agreement integrates all discussions among the Settling Parties into the terms of this written document. The Settling Parties agree that this Settlement Agreement will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will this Settlement Agreement or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve this Settlement Agreement in its entirety, then any Settling Party desiring to do so may withdraw from this Settlement Agreement without penalty.

C.5. This Settlement Agreement shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Settling Parties hereto. Therefore, each Settling Party acknowledges its consent and agreement to this Settlement Agreement by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any Settling Party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Settlement Agreement.

RATE PR-1 — **SMALL POWER PRODUCTION, COGENERATION**

AVAILABILITY

Available to Small Power Producers and Cogenerators that are a Qualifying Facility as defined by the Federal Energy Regulatory Commission (FERC) Order No. 70 under Docket No. RM 79-54. This schedule is not available for Qualifying Facilities that have power production capacity greater than 100 KW.

CHARACTER OF SERVICE

Energy supplied by the Qualifying Facility must be at 60 hertz and voltage, phase and power factor approved by the Company.

Energy supplied by the Qualifying Facility must be at a voltage level compatible with the voltage level of the Company's system at the point of delivery.

MONTHLY RATE
(Seller Charges & Credits)

For Qualifying Facilities, Company will pay Seller a monthly credit equal to the Energy Credit and the Capacity Credit reduced by the Seller Charge.

I. Energy Credit:

Company shall pay Seller the following rates per KWH for energy delivered by the Seller to Company's system.

		Summer (June -September)	Winter (October-May)
1.	On-Peak	\$0.03590	\$0.03801
2.	Off-Peak	\$0.03079	\$0.03549

The South Carolina Power Excise Tax of \$.0005 per KWH is included in the energy credits above.

DETERMINATION OF ON-PEAK AND OFF-PEAK HOURS FOR ENERGY CREDITS

A. On-Peak Hours:

Summer Months of June - September:

The on-peak Summer hours are defined to be 10:00 a.m.-10:00 p.m. Monday-Friday.

Winter Months of October – May:

1. November through April: The on-peak hours are defined as those hours between 6:00 a.m.-1:00 p.m. and 5:00 p.m.-10:00 p.m., Monday-Friday.
2. October and May: The on-peak hours are defined as those hours between 10:00 a.m.-10:00p.m., Monday-Friday.

B. Off-Peak Hours:

The off-peak hours in any month are defined as all hours not specified as on-peak hours.

II. Capacity Credit:

In addition to the energy credit, the Company shall pay the Seller \$0.02079 per kWh for energy delivered by the Seller to the Company's system during critical peak Summer hours. The Company shall pay the Seller \$0.00715 per kWh for energy delivered by the Seller to the Company's system during critical peak Winter hours.

DETERMINATION OF CRITICAL PEAK HOURS FOR CAPACITY CREDITS

A. Critical Peak Hours:

Summer Months of June - August:

The critical peak Summer hours are defined to be 2:00 p.m. - 6:00 p.m. Monday-Friday.

Winter Months of December - February:

The critical peak Winter hours are defined to be 6:00 a.m. - 9:00 a.m. Monday-Friday.

III. Seller Charge:

Seller shall pay the following Seller Charge each monthly billing period \$ 4.50

BILLING MONTH

A Billing Month is defined in this schedule as the time period between successive meter readings for the purpose of monthly billing. Readings are taken approximately once each month.

MONTHLY RATE DETERMINATION

The Seller will be liable to the Company each billing month for the Seller Charge regardless of the amount of energy delivered by the Seller to the Company.

The Company will be liable to the Seller each billing month an amount determined as the total kWh delivered to the Company's system times the cost per kWh as specified herein.

PAYMENT TERMS

Payments due the Seller under this schedule shall be payable to the Seller within fifteen (15) days of the billing date.

Payment due the Company under this schedule is due and payable to the Company within fifteen (15) days of the billing date.

LIMITING PROVISIONS

Company shall not be liable for purchase of electricity from Qualifying Facility until such facility and Company have executed an Agreement for Purchase of Power from Small Power Production facility or Cogeneration Facility.

AVAILABILITY

Available to Small Power Producers and Cogenerators that are a Qualifying Facility as defined by the Federal Energy Regulatory Commission (FERC) Order No. 70 under Docket No. RM 79-54 that have power production capacity greater than 100 kW and less than or equal to 80 MW, and entering into a power purchase agreement ("Seller") with South Carolina Electric & Gas Company. This schedule is not available for Qualifying Facilities that have power production capacity greater than 80 MW or equal to or less than 100 KW.

CHARACTER OF SERVICE

Energy supplied by the Qualifying Facility must be at 60 hertz and voltage, phase and power factor approved by the Company.

Energy supplied by the Qualifying Facility must be at a voltage level compatible with the voltage level of the Company's system at the point of delivery.

MONTHLY RATES

For a Qualifying Facility as described in the Availability section above, the Company will pay Seller an amount equal to the Energy Payment and the Capacity Payment reduced by the Seller Charge. The Company will pay this amount monthly.

I. Energy Payment:

Company shall pay the Seller the following rates per kWh for energy delivered by the Seller to Company's system:

A. For the period 2017 - 2021:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.03384	$ 0.03483	$ 0.03384	$ 0.03483
2.	Off-Peak	$ 0.02845	$ 0.03170	$ 0.02845	$ 0.03170

B. For the period 2022 - 2026:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.03648	$ 0.03200	$ 0.03648	$ 0.03200
2.	Off-Peak	$ 0.02679	$ 0.02726	$ 0.02679	$ 0.02726

C. For the period 2027 - 2031:

		For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
		Summer (Jun. - Sep.)	Non-Summer (Oct. - May)	Summer (Jun. - Sep.)	Non-Summer (Oct. - May)
1.	On-Peak	$ 0.04070	$ 0.03587	$ 0.04070	$ 0.03587
2.	Off-Peak	$ 0.03040	$ 0.02935	$ 0.03040	$ 0.02935

The South Carolina Power Excise Tax of $.0005 per kWh is included in the energy payments above.

Transmission Level is defined as voltages equal to or greater than 33 kV. Distribution Level is defined as voltages less than 33 kV.

DETERMINATION OF ON-PEAK AND OFF-PEAK HOURS FOR ENERGY PAYMENTS

A. On-Peak Hours:

Summer Months of June - September:

The on-peak Summer hours are defined to be 10:00 a.m. - 10:00 p.m. Monday-Friday.

Non-Summer Months of October - May:

1. November through April: The on-peak hours are defined as those hours between 6:00 a.m. - 1:00 p.m. and 5:00 p.m. - 10:00 p.m., Monday-Friday.
2. October and May: The on-peak hours are defined as those hours between 10:00 a.m. - 10:00p.m., Monday - Friday.

B. Off-Peak Hours:

The off-peak hours in any month are defined as all hours not specified as on-peak hours.

II. Capacity Payment:

In addition to the energy payment, the Company shall pay the Seller the following capacity payment per kWh for energy delivered by the Seller to the Company's system during Critical Peak hours.

For Energy Supplied at Transmission Level		For Energy Supplied at Distribution Level	
Summer (Jun. - Aug.)	Winter (Dec. - Feb.)	Summer (Jun. - Aug.)	Winter (Dec. - Feb.)
$ 0.01965	$ 0.00675	$ 0.01965	$ 0.00675

Transmission Level is defined as voltages equal to or greater than 33 kV. Distribution Level is defined as voltages less than 33 kV.

DETERMINATION OF CRITICAL PEAK HOURS FOR CAPACITY PAYMENTS

A. Critical Peak Hours:

Summer Months of June - August:

The critical peak Summer hours are defined to be 2:00 p.m. - 6:00 p.m. Monday-Friday.

Winter Months of December - February:

The critical peak Winter hours are defined to be 6:00 a.m. - 9:00 a.m. Monday-Friday.

III. Seller Charge:

Seller shall pay the following Seller Charge each monthly billing period: $ 45.00

BILLING MONTH

A Billing Month is defined in this schedule as the time period between successive meter readings for the purpose of monthly billing. Readings are taken approximately once each month.

MONTHLY RATE DETERMINATION

The Seller will be liable to the Company each billing month for the Seller Charge regardless of the amount of energy delivered by the Seller to the Company.

The Company will be liable to the Seller each billing month for an amount determined as the total kWh delivered to the Company's system times the cost per kWh as specified herein.

PAYMENT TERMS

Payments due the Seller under this schedule shall be payable to the Seller within fifteen (15) days of the billing date.

Payment due the Company under this schedule is due and payable to the Company within fifteen (15) days of the billing date.

LIMITING PROVISIONS

Company shall not be liable for purchase of electricity from a Qualifying Facility until such facility and Company have executed a power purchase agreement.

RIDER TO RETAIL RATES

NET ENERGY METERING FOR RENEWABLE ENERGY FACILITIES ("NEM")
(Page 1 of 4)

AVAILABILITY

This rider is available in conjunction with the Company's Retail Electric Service Rates, for a Customer-Generator. The customer's generating system must be manufactured, installed and operated in accordance with governmental and industry standards and must fully conform with the Company's current interconnection standards as approved by the Public Service Commission of South Carolina.

This rider is available on a first come, first serve basis until the total nameplate generating capacity of net energy metering systems equals 2% of the previous five-year average of the Company's South Carolina retail electric peak demand.

CHARACTER OF SERVICE

The applicable character of service is specific to the rate schedule that the customer receives service under.

RATE PER MONTH

The applicable rate per month shall be from the appropriate rate schedule as referenced in the availability section above. The monthly bill shall be determined as follows:

For electric service under a time-of-use rate schedule:

1. The basic facilities charge shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

2. Any demand charges shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

3. If a customer-generator's energy consumption exceeds the electricity provided by the customer-generator during a monthly billing period, the customer-generator shall be billed in kWh for the net electricity supplied by the Utility.

   If a customer-generator's energy generation exceeds the electricity provided by the Utility during a monthly billing period, the customer-generator shall be credited for the excess kWh generated during that billing period.

   Energy charges (or credits) shall be based on the rates in the applicable rate schedules as described in the availability section above. For on-peak energy, the customer's monthly usage amount in kilowatt-hours shall be reduced by the total of (a) any on-peak excess energy delivered to the Company in the current month plus (b) any accumulated on-peak excess energy balance remaining from prior months. Total on-peak energy in kilowatt-hours billed to customers shall never be less than zero. For off-peak energy, the customer's monthly usage shall be reduced by the total of (a) any off-peak excess energy delivered to the Company in the current month plus (b) any accumulated off-peak excess energy balance remaining from prior months plus (c) any accumulated on-peak excess energy balance from the current month or prior months that was not used to reduce on-peak usage. Total off-peak energy in kilowatt-hours billed to customers shall also never be less than zero. For any billing month during which excess energy exceeds the customer's usage in total, producing a net credit, the respective energy charges for the billing month shall be zero. Any excess energy credits shall carry forward on the following month's bill by first applying excess on-peak kWh against on-peak kWh charges and excess off-peak kWh against off-peak kWh charges, then applying any remaining on-peak kWh against any remaining off-peak kWh charges. Credits shall not offset the basic facilities charge or the demand charge for the applicable rate schedule.

4. Excess energy not used in the current billing month to reduce billed kWh usage shall be accumulated and used to reduce usage in future months. For all affected billing statements rendered during November billing cycles, any accumulated excess energy not used to reduce billed kWh usage shall be paid to the customer-generator at the Company's avoided cost, zeroing out the customer generator's account of excess energy. The avoided cost is the off-peak winter energy credit as approved in the Company's Rate PR-1, Small Power Production and Cogeneration schedule.

For electric service under a standard, non time-of-use rate schedule:

1. The basic facilities charge shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

2. Any demand charges shall be determined and billed as set forth in the applicable rate schedule as described in the Availability section above.

3. If a customer-generator's energy consumption exceeds the electricity provided by the customer-generator during a monthly billing period, the customer-generator shall be billed in kWh for the net electricity supplied by the Utility.

   If a customer-generator's energy generation exceeds the electricity provided by the Utility during a monthly billing period, the customer-generator shall be credited for the excess kWh generated during that billing period.

   Energy charges (or credits) shall be based on the rates in the applicable rate schedules as described in the availability section above. For purposes of calculating monthly energy, the customer's usage shall be reduced by the total of (a) any excess energy delivered to the Company in the current month plus (b) any accumulated excess energy balance remaining from prior months. Total energy in kilowatt-hours billed to customers shall never be less than zero. For any billing month during which excess energy exceeds the customer's usage in total, producing a net credit, the respective energy charges for the billing month shall be zero. Credits shall not offset the basic facilities charge or the demand charge for the applicable rate schedule.

4. Excess energy not used in the current billing month to reduce billed kWh usage shall be accumulated and used to reduce usage in future months. For all affected billing statements rendered during November billing cycles, any accumulated excess energy not used to reduce billed kWh usage shall be paid to the customer-generator at the Company's avoided cost, zeroing out the customer generator's account of excess energy. The avoided cost is the off-peak winter energy credit as approved in the Company's Rate PR-1, Small Power Production and Cogeneration schedule.

MINIMUM CHARGE

The monthly minimum charge shall be the basic facilities charge plus the demand charge, if any, as stated in the applicable rate.

DEFINITIONS

1. Customer-Generator means the owner, operator, lessee, or customer-generator lessee of an electric energy generation unit which:

   (A) generates electricity from a Renewable Energy Resource;
   (B) has an electrical generating system with a capacity of:
      (i) not more than the lesser of one thousand kilowatts (1,000 kW AC) or one hundred percent (100%) of contract demand if a non-residential customer; or
      (ii) not more than twenty kilowatts (20 kW AC) if a residential customer;
   (C) is located on a single premises owned, operated, leased, or otherwise controlled by the customer;
   (D) is interconnected and operates in parallel phase and synchronization with an electrical utility and complies with the applicable interconnection standards;
   (E) is intended primarily to offset part or all of the customer-generator's own electrical energy requirements; and
   (F) meets all applicable safety, performance, interconnection, and reliability standards established by the commission, the National Electrical Code, the National Electrical Safety Code, the Institute of Electrical and Electronics Engineers, Underwriters Laboratories, the federal Energy Regulatory Commission, and any local governing authorities.

2. Renewable Energy Resource means solar photovoltaic and solar thermal resources, wind resources, hydroelectric resources, geothermal resources, tidal and wave energy resources, recycling resources, hydrogen fuel derived from renewable resources, combined heat and power derived from renewable resources, and biomass resources.

3. Retail Electric Service Rates shall mean Rates 1, 2, 3, 5, 6, 7, 8, 9 (metered), 11, 12, 13, 14, 16, 20, 21, 21A, 22, 23, 24, and 28.

4. Excess energy delivered to the Company shall be defined as energy produced by the customer's renewable energy generating facility that exceeds the energy delivered by the Company during a given time period. This excess energy shall be used to reduce energy delivered and billed by the Company during the current or a future month, as provided in the Rate Per Month section above.

5. The On-Peak and Off-Peak periods shall be defined in the applicable time-of-use rate schedules.

GENERAL PROVISIONS

1. To qualify for this rider, the customer must first qualify for and be served on one of the rate schedules as described in the availability section above. The customer must also meet all other qualifications as outlined in the availability section above.

2. All provisions of the applicable rate schedules described above including, but not limited to Billing Demand, Determination of On- and Off-Peak Hours, Adjustment for Fuel Costs, Demand Side Management Component, Pension Costs Component, Storm Damage Component, Sales and Franchise Tax, Payment Terms, and Special Provisions will apply to service supplied under this rider.

3. Customers electing service under this NEM Rider are eligible to remain on the Rider until December 31, 2025, or until such time as the customer elects to terminate service under the Rider, whichever occurs first. The rates set forth here are subject to Commission Order No. 2015-194 in Docket No. 2014-246-E entered under the terms of S.C. Code § 58-40-20(F)(4). Eligibility for this rate will terminate as set forth in Order No. 2015-194. The value of distributed energy resource generation shall be computed using the methodology contained in Commission Order No. 2015-194 in Docket No. 2014-246-E and updated annually coincident in time with the Company's filing in the fuel clause. The value for the period May 2017 – April 2018 is $0.03651 per kWh.

4. Service on this NEM Rider will be closed to new participants as of January 1, 2021, or after statutory caps described in S.C. Code Ann. § 58-39-130 have been reached, whichever occurs first.

5. When no contract demand level is available for a non-residential customer, connected load as determined by the Company shall be used as a proxy for contract demand when determining the capacity of the electrical generating system.

6. Customers who elect NEM service after January 1, 2021, will receive service in accordance with the NEM tariff in effect at the time at which the customer requests NEM service.

7. Customers served under this rider are not eligible for the Company's Small Power Production, Cogeneration Rate PR-1.

8. The customer must execute an application to interconnect generation and an interconnection agreement prior to receiving service under this rider.

9. The Company will retain ownership of Renewable Energy Credits ("RECs").

10. In the event the Company determines that it is necessary to increase the capacity of facilities beyond those required to serve the Customer's electrical requirement or to install a dedicated transformer or other equipment to protect the safety and adequacy of electric service provided to other customers, the Customer shall pay the estimated cost of the required transformer or other equipment above the estimated cost which Company would otherwise have normally incurred to serve the Customer's electrical requirement, in advance of receiving service under this Rider.

RIDER TO RETAIL RATES

NET ENERGY METERING FOR RENEWABLE ENERGY FACILITIES ("NEM")
(Page 4 of 4)

SPECIAL PROVISIONS

The Company will furnish service in accordance with its standard specifications. Non-standard service will be furnished only when the customer pays the difference in costs between non-standard service and standard service or pays to the Company its normal monthly facility charge based on such difference in costs.

METERING REQUIREMENTS

Customer must furnish, install, own, and maintain a meter socket to measure 100% of the Customer's generator output and that is connected on the Customer's side of the delivery point. Company will furnish, install, own, and maintain a generation meter. Company will also furnish, install, own and maintain a bi-directional billing meter to measure the kWh delivered from Company to Customer and to measure kWh received from Customer by Company. The billing meter will be configured for demand and/or time-of-use measurement as required by the applicable rate. All metering shall be at a location that is approved by the Company. At Company's sole option, the generator meter requirement may be waived for customers served under a net metering rider on or before December 31, 2015.

TERM OF CONTRACT

Contracts shall be for a period not to exceed the term of the contract under which the customer currently receives electric service. There shall be a separate contract for each meter at each location.

GENERAL TERMS AND CONDITIONS

The Company's General Terms and Conditions are incorporated by reference and are part of this rider.

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY, AND DISTRIBUTED ENERGY RESOURCE COSTS

APPLICABILITY

This adjustment is applicable to and is part of the Utility's South Carolina retail electric rate schedules.

The fuel, variable environmental & avoided capacity, and DER avoided costs, to be recovered in an amount rounded to the nearest one-thousandth of a cent per kilowatt-hour, will be determined by the following formulas:

$$F_C = \frac{E_F}{S} + \frac{G_F}{S_1}$$

$$F_{EC} = \frac{E_{EC} + G_{EC}}{S_2}$$

$$F_{AC} = \frac{E_{AC} + G_{AC}}{S_2}$$

Total Fuel Rate
per kWh $= F_C + F_{EC} + F_{AC}$

Where:

F_C = Fuel cost per kilowatt-hour included in base rate, rounded to the nearest one-thousandth of a cent.

E_F = Total projected system fuel costs:

(A) Fuel consumed in the Utility's own plants and the Utility's share of fuel consumed in jointly owned or leased plants. The cost of fossil fuel shall include no items other than those listed in Account 151 of the Commission's Uniform System of Accounts for Public Utilities and Licensees. The cost of nuclear fuel shall be that as shown in Account 518 excluding rental payments on leased nuclear fuel and except that, if Account 518 also contains any expense for fossil fuel which has already been included in the cost of fossil fuel, it shall be deducted from this account.

PLUS

(B) Fuel costs related to purchased power such as those incurred in unit power and limited term power purchases where the fossil fuel costs associated with energy purchased are identifiable and are identified in the billing statement, and also including avoided energy costs incurred by the Utility. Also, the cost of "firm generation capacity purchases," which are defined as purchases made to cure a capacity deficiency or to maintain adequate reserve levels. Costs of "firm generation capacity purchases" includes the total delivered costs of firm generation capacity purchased and excludes generation capacity reservation charges, generation capacity option charges and any other capacity charges.

PLUS

(C) Fuel costs related to purchased power (including transmission charges), such as short term, economy and other such purchases, where the energy is purchased on an economic dispatch basis, including the total delivered cost of economy purchases of electric power defined as purchases made to displace higher cost generation at a cost which is less than the purchasing Utility's avoided variable costs for the generation of an equivalent quantity of electric power.

Energy receipts that do not involve money payments such as diversity energy and payback of storage energy are not defined as purchased or interchange power relative to this fuel calculation.

MINUS

(D) The cost of fuel recovered through intersystem sales including the fuel costs related to economy energy sales and other energy sold on an economic dispatch basis.

Energy deliveries that do not involve billing transactions such as diversity energy and payback of storage energy are not defined as sales relative to this fuel calculation.

S = Projected system kilowatt-hour sales excluding any intersystem sales.

G_F = Cumulative difference between jurisdictional fuel revenues billed and fuel expenses at the end of the month preceding the projected period utilized in E_F and S.

S_1 = Projected jurisdictional kilowatt-hour sales, for the period covered by the fuel costs included in E_F.

F_{EC} = Customer class variable environmental and avoided capacity costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

ADJUSTMENT FOR FUEL, VARIABLE ENVIRONMENTAL & AVOIDED CAPACITY, AND DISTRIBUTED ENERGY RESOURCE COSTS

E_{EC} = The projected variable environmental costs including: a) the cost of ammonia, lime, limestone, urea, dibasic acid, and catalysts consumed in reducing or treating emissions, plus b) the cost of emission allowances, as used, including allowances for SO2, NOx, mercury and particulates minus net proceeds of sales of emission allowances, and c) as approved by the Commission, all other variable environmental costs incurred in relation to the consumption of fuel and air emissions caused thereby, including but not limited to environmental reagents, other environmental allowances, and emission related taxes. Any environmental related costs recovered through intersystem sales would be subtracted from the totals produced by subparts a), b), and c). This component also includes avoided capacity costs incurred by the Utility.

These environmental and avoided capacity costs will be allocated to retail customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{EC} = Cumulative difference between jurisdictional customer class environmental fuel revenues billed and jurisdictional customer class environmental costs at the end of the month preceding the projected period utilized in E_{EC} and S_2.

F_{AC} = Customer class DER avoided costs per kilowatt-hour included in base rates, rounded to the nearest one-thousandth of a cent.

E_{AC} = The projected DER avoided costs paid to distributed generators as most recently determined by the Public Service Commission of South Carolina. These avoided costs will be allocated to retail electric customer classes based upon the customer class firm peak demand allocation from the prior year.

G_{AC} = Cumulative difference between jurisdictional customer class avoided cost revenues billed and jurisdictional customer class avoided costs at the end of the month preceding the projected period utilized in E_{AC} and S_2.

S_2 = The projected jurisdictional customer class kilowatt-hour sales.

The appropriate revenue-related tax factor is to be included in these calculations.

FUEL RATES PER KWH BY CLASS

The total fuel costs in cents per kilowatt-hour by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2017 through April, 2018:

Customer Class	F_C Rate	+	F_{EC} Rate	+	F_{AC} Rate	=	Total Fuel Rate
Residential	**2.451**		**0.047**		**0.015**		**2.513**
Small General Service	**2.451**		**0.039**		**0.013**		**2.503**
Medium General Service	**2.451**		**0.033**		**0.011**		**2.495**
Large General Service	**2.451**		**0.020**		**0.007**		**2.478**
Lighting	**2.451**		**0.000**		**0.000**		**2.451**

The incremental costs associated with SCE&G's Distributed Energy Resource Programs, to be recovered in an amount rounded to the nearest cent per account, will be determined by the following formulas:

Total Fuel Rate per Account

$$F_{IC} = \frac{E_{DC} + G_{DC}}{C}$$

Where:

F_{IC} = Fuel cost per account included in base rate, rounded to the nearest cent, not to exceed $12 for residential customers, $120 for small/medium general service customers, and $1,200 for large general service customers.

E_{DC} = The projected incremental costs associated with SCE&G's Distributed Energy Resource Program as determined by the Public Service Commission of South Carolina

G_{DC} = Cumulative difference between jurisdictional customer class distributed energy component revenues billed and jurisdictional customer class incremental costs associated with SCE&G's Distribued Energy Resource Program at the end of the month preceding the projected period utilized in E_{DC} and C.

C = The jurisdictional customer class account totals.

FUEL RATES PER ACCOUNT PER MONTH BY CLASS

The total fuel costs in dollars per account by customer class as determined by the Public Service Commission of South Carolina in Order No. ____-___ are as follows for the period May, 2017 through April, 2018:

Customer Class		F_{IC} Rate
Residential	**$**	**0.91**
Small & Medium General Service	**$**	**3.29**
Large General Service	**$**	**100.00**

BEFORE

THE PUBLIC SERVICE COMMISSION OF

SOUTH CAROLINA

DOCKET NO. 2017-221-E

IN RE:

Application of South Carolina Electric & Gas Company for a Certificate of Environmental Compatibility and Public Convenience and Necessity for the Construction and Operation of the Graniteville-South Augusta 230 kV Tie Line and Urquhart-Graniteville #2 230 kV Line and Associated Facilities	)	**STIPULATION**

This Stipulation is made by and between the South Carolina Office of Regulatory Staff ("ORS") and South Carolina Electric & Gas Company ("SCE&G") (collectively referred to as the "Parties" or sometimes individually as a "Party").

WHEREAS, the above-captioned proceeding has been established by the Public Service Commission of South Carolina ("Commission") pursuant to the provisions in S.C. Code Ann. § 58-33-10 *et seq*. (2015) ("the Siting Act") and 10 S.C. Code Ann. Regs. 103-304 (2012) at the request of SCE&G, which filed an Application for a Certificate of Environmental Compatibility and Public Convenience and Necessity for the Construction and Operation of the Graniteville-South Augusta 230 kV Tie Line and Urquhart-Graniteville #2 230 kV Line and Associated Facilities ("Application");

WHEREAS, in the Application, as modified in SCE&G's direct testimony, SCE&G seeks a Certificate of Environmental Compatibility and Public Convenience and Necessity ("Certificate") for the construction and operation of two 230 kilovolt ("kV") transmission lines.

The first is a new single circuit 230 kV tie line connecting the SCE&G and Southern Company electrical transmission systems originating at the Southern Company's South Augusta Substation and running to SCE&G's existing Graniteville No. 2 Substation. The second line will originate at SCE&G's existing Urquhart 230 kV Substation adjacent to the Urquhart Generating Station and run to SCE&G's existing Graniteville No. 1 Substation. SCE&G states that these facilities are needed to prevent excessive electrical loading on a critical Southern Company-SCE&G interconnecting 230 kV Line;

WHEREAS, the Parties to this Stipulation are parties of record in the above-captioned docket;

WHEREAS, in accordance with the provisions of S.C. Code Ann. § 58-33-140 (2015) the South Carolina Department of Health and Environmental Control ("DHEC"), the South Carolina Department of Natural Resources, and the South Carolina Department of Parks, Recreation, and Tourism, are also parties to this proceeding (collectively, the "Other Parties of Record"). The Other Parties of Record have all made filings with the Commission indicating that they have no issues or concerns with SCE&G's Application. DHEC has, however, specifically provided that its consent here does not waive any comments or concerns which it may have in future proceedings before the Commission or in reviewing any relevant applications for DHEC permits or approvals on this project;

WHEREAS, the Parties have engaged in discussions to determine if a Stipulation would be in their best interest; and

WHEREAS, following these discussions the Parties have determined that their interests, and those of the public, would be best served by reaching an agreement on matters set forth in SCE&G's Application in the above-captioned case under the terms and conditions set forth below:

1. The Parties agree to stipulate into the record before the Commission the direct testimony and exhibits of the following witnesses without objection, change, amendment or cross-examination with the exception of changes comparable to that which would be presented via an errata sheet or through a witness noting a correction.

A. SCE&G witnesses: Joseph Wade Richards and Nathan V. Bass.
B. ORS witness: Michael L. Seaman-Huynh.

2. As a compromise, the following is adopted, accepted, and acknowledged as the agreement of the Parties:

A. ORS will recommend that the Commission approve SCE&G's Application, as modified in SCE&G's direct testimony, and grant SCE&G a Certificate for the Graniteville #2-South Augusta 230 kV Tie Line and Urquhart-Graniteville 230 kV Line and Associated Facilities, as requested in the Application in this Docket;

B. SCE&G agrees to follow all South Carolina, Commission and local government regulations and laws arising from matters set forth in the Application; and

C. SCE&G will notify ORS and the Commission when the facilities begin commercial operation and of any changes to the planned commercial operation dates.

3. The Parties agree this Stipulation is reasonable, in the public interest and in accordance with law and regulatory policy.

4. Further, ORS is charged with the duty to represent the public interest of South Carolina pursuant to S.C. Code Ann. § 58-4-10(B) (2015). S.C. Code Ann. § 58-4-10(B)(1) through (3) reads in part as follows:

> "...'public interest' means a balancing of the following:
>
> (1) Concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;

(2) Economic development and job attraction and retention in South Carolina; and

(3) Preservation of the financial integrity of the State's public utilities and continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services."

5. The Parties agree to cooperate in good faith with one another in recommending to the Commission that this Stipulation be accepted and approved by the Commission as a fair, reasonable and full resolution in the above-captioned proceeding. The Parties agree to use reasonable efforts to defend and support any Commission order issued approving this Stipulation and the terms and conditions contained herein.

6. This written Stipulation contains the complete agreement of the Parties. There are no other terms and conditions to which the Parties have agreed. The Parties agree that this Stipulation will not constrain, inhibit or impair their arguments or positions held in future proceedings, nor will the Stipulation or any of the matters agreed to in it be used as evidence or precedent in any future proceeding. If the Commission should decline to approve the Stipulation in its entirety, then any Party desiring to do so may withdraw from the Stipulation without penalty.

7. This Stipulation shall be interpreted according to South Carolina law. The above terms and conditions fully represent the agreement of the Parties hereto. Therefore, each Party acknowledges its consent and agreement to this Stipulation by authorizing its counsel to affix his or her signature to this document where indicated below. Counsel's signature represents his or her representation that his or her client has authorized the execution of the agreement. Facsimile signatures and e-mail signatures shall be as effective as original signatures to bind any party. This document may be signed in counterparts, with the various signature pages combined with the body of the document constituting an original and provable copy of this Stipulation.

STATE OF SOUTH CAROLINA)
) **RELEASE**
COUNTY OF BEAUFORT)

KNOW ALL MEN BY THESE PRESENTS, that I, **Christopher Shane Blevins**, for and in consideration of the sum of Eight Hundred Thousand and 00/100 ($800,000.00) Dollars, receipt of which is hereby acknowledged, do hereby release and forever discharge, SCANA, The South Carolina Electric and Gas Company ("SCE&G"), their agents, servants, employees, successors and assigns, and any and all other persons, firms or corporations from any and all actions, causes of action, demands and/or claims of any nature whatsoever which I may have against them for injuries and damages resulting from an accident that occurred on or about August 13, 2013, when Christopher Shane Blevins was injured in an incident involving a junction box on Bray's Island near Beaufort South Carolina. The consideration expressed herein constitutes payment in full to me for all damages, losses and/or injuries to persons or property or both, whether known or unknown, developed or undeveloped, which have resulted or may result from the incident aforesaid, including all claims which were or could have been asserted in the lawsuit filed in the Beaufort Court of Common Pleas captioned <u>Christopher Shane Blevins vs. The South Carolina Electric and Gas Company and Thomas & Betts Corporation</u>, civil action no. 2016-CP-07-01707.

I hereby declare and represent that the injuries sustained may be permanent and/or progressive and that recovery therefrom is uncertain and indefinite, and that in making this Release, it is understood and agreed that I rely wholly on my own judgment, belief, and knowledge of the nature and extent and consequences of said injuries and no representation or statement regarding the said injuries or regarding any other matter made by any of the persons, firms, or corporations who are hereby released, or by any person or persons representing them or employed by them have influenced me to any extent in making this Release.

I further agree and expressly warrant that I shall be solely responsible for the payment of any and all medical expenses, and any other expenses incurred by me as a result of the accident. I expressly agree that I shall be solely responsible for the payment of any claims, which might be asserted by any insurance carrier, or other entity which made the payments on medical bills or expenses for or on behalf of Christopher Shane Blevins and which assert any lien against the proceed of this settlement. The undersigned expressly agrees that this is his responsibility and he expressly agrees to hold harmless and indemnify the entities to whom he gives this release listed above for the payment of such sums.

It is further understood and agreed that the payment of the above amount is not to be construed as an admission of liability on the part of the person or persons being released, liability by them being expressly denied.

All agreements and understandings between the parties hereto are embodied and expressed herein and the terms of this Release are contractual and not a mere recital.

I have read the foregoing Release and understand it to be a full, final and binding agreement.

IN WITNESS WHEREOF, I have hereunto set my hand and seals this 25 day of October, 2017.

WITNESSES:

Sherri Garrett

Jan Parker

(SEAL)

Christopher Shane Blevins

FULL AND COMPLETE RELEASE

KNOW ALL MEN BY THESE PRESENTS, that I, Matthew M. Breen, for and in consideration of the payment of the sum of Two Hundred Dollars ($200.00) from SCANA Services, Inc. the receipt and sufficiency of which is hereby acknowledged, for me and my heirs, beneficiaries, representatives, personal representatives, successors and assigns, do hereby release, acquit and forever discharge SCANA Services, Inc. as well as South Carolina Electric and Gas Company and all other SCANA Corporation subsidiaries and their respective heirs, beneficiaries, representatives, personal representatives, successors, assigns, insurers, attorneys, and all other persons, firms, or companies who can or may be liable, of and from any and all actions, causes of action, claims, demands, damages, costs, expenses and compensation, on account of, or in any way growing out of, any and all known and unknown injuries and damages of whatsoever nature, whether past, present or future, and the results of such injuries and damages, arising from or related to what was alleged, or could have been alleged, in the civil action captioned: *Matthew M. Breen. v. South Carolina Electric and Gas Company and SCANA Services, Inc*, Case No: 2015CV1010600989, pending in the Charleston County Small Claims Court ("the Lawsuit").

I hereby acknowledge full satisfaction and settlement of all such claims and causes of action and fully understand that neither I nor my heirs, beneficiaries, representatives, personal representatives, successors, or assigns can make any further claim against the persons, firms or companies who are hereby released. It is further understood that this release shall not be subject to any claim of mistake of fact, and regardless of the adequacy or inadequacy of the amount paid, it is intended to be final and complete.

I further represent and warrant that I have not heretofore assigned to any other person or entity all or any portion of any claim whatsoever which I may have or may have had or may claim in the future to have against the persons, firms or companies hereby released, and represent and warrant that I am the sole proper party to receive the proceeds of the settlement of the aforementioned lawsuit.

It is further understood and agreed that this settlement is a compromise of doubtful and disputed claims, and that the payment of sums herein mentioned is not to be construed as an admission of liability on the part of the persons, firms and companies who are hereby released, by whom liability is expressly denied.

It is further agreed that I, as well as my heirs, beneficiaries, representatives, personal representatives, successors and assigns, will forever hold harmless, indemnify and defend SCANA Services, Inc. as well as South Carolina Electric and Gas Company and all other SCANA Corporation subsidiaries and their respective heirs their respective heirs, beneficiaries, representatives, personal representatives, successors, assigns, insurers, and attorneys, against loss from any further claims, demands, or actions that may hereafter be initiated by any governmental agency or entity, company, or person pursuant to any lien, assignment, letter of protection or right of subrogation in connection with medical bills or other expenses or benefits paid on my behalf in connection with the above-referenced accident.

I hereby declare and represent that I am of legal age, that in making this release I relied wholly upon my own judgment, belief and knowledge of the nature, extent and duration of said injuries and damages, and that I have not been influenced to any extent whatever in making this release by any representations or statements regarding said injuries or damages, or regarding any other matters, made by the persons, firms or companies who are hereby released, or by any person or persons representing them or any of them.

It is further understood and agreed that there is no promise or agreement on the part of the persons, firms and companies who are hereby released to do or omit to do any act or thing not herein mentioned, that this release contains the entire agreement between the parties hereto, and that the terms of this release are contractual and not a mere recital. This Release shall be interpreted and enforced according to the laws of the State of South Carolina.

I further state that I have either read the foregoing release or have had it read to me, understand the contents thereof, and sign the same as my own free act.

WITNESS my hand and seal this 29 day of January, 20/6.

Matthew M. Breen

STATE OF SOUTH CAROLINA)
COUNTY OF CHARLESTON)

On this 29 day of January, 20/6, before me personally appeared Gail Wright to me known to be the person described in and who executed the foregoing release, and acknowledged that they executed the same as their free act and deed.

Notary Public for South Carolina
My commission expires: 1-2[illegible]-2025

CONFIDENTIAL FULL AND FINAL SETTLEMENT AGREEMENT AND RELEASE OF ALL CLAIMS

This Confidential Full and Final Settlement Agreement and Release of all Claims ("this Agreement") is made and entered into by Ms. Hedwig Wilson and South Carolina Electric and Gas Company ("SCE&G"), its present or former parent, subsidiaries, affiliates, agents, servants, employees, representatives, attorneys and insurers, both singularly and collectively, and any other persons or entities in privity with same, whether named or not.

This Agreement is a result of alleged damages incurred on or about February 2016 as a result of right-of-way maintenance by SCE&G at Ms. Wilson's residence at 6130 Gill Greek Road in Columbia, South Carolina, as more fully alleged in the Complaint filed with the Public Service Commission of South Carolina on or about May 31, 2016, by Mr. Robert Wilson, as Representative for Hedwig Wilson, in Docket No. 2016-226-E ("Incident").

Now, therefore, I, Hedwig Wilson, covenant and agree as follows:

I have the right to consult with an attorney before signing this Agreement.

As consideration for the promises, releases and covenants, the dismissal of my claim against SCE&G and other good and valuable consideration, SCE&G agrees to pay the sum of two thousand seven hundred dollars ($2,700) to Ms. Hedwig Wilson contemporaneously with the execution of this Agreement. I acknowledge that there is a risk that, subsequent to the execution of this Agreement, I may discover, incur or suffer from claims, damages or injuries that are unknown or unanticipated at the time this Agreement is executed, including without limitation, unknown or unanticipated claims, damages or injuries that allegedly arise from, are based upon or are related to the Incident, which, if known by me on the date this Agreement was executed, may have materially affected my decision to execute this Agreement. I acknowledge that I am assuming the risk of such unknown or unanticipated claims, damages or injuries and agree that this Agreement applies thereto. The provisions of any local, state or federal law, statute or judicial decision providing in substance that releases shall not extend to such unknown or anticipated claims, damages or injuries are hereby expressly waived. For the sole consideration of $2,700.00, I release and forever discharge SCE&G, its present or former parent, subsidiaries, affiliates, agents, servants, employees, representatives, attorneys and insurers, both singularly and collectively, and any other persons or entities in privity with same, whether named or not from any and all claims, demands, damages, actions, causes of action or suits of any kind or nature whatsoever, and particularly on account of all injuries, known and unknown, both to person and property, which have resulted or may in the future develop from the Incident.

I agree that the terms of this Agreement, including, but not limited to, the terms of the settlement agreed to herein, shall be kept strictly confidential and that I will not disclose to anyone either the fact that this Agreement has been entered into or its terms, other than as may be required by law, or as may be mutually consented to in writing.

IT IS SO AGREED.

Mrs. Hedwig S. Wilson

Ms. Hedwig Wilson

STATE OF SOUTH CAROLINA)
)
COUNTY OF RICHLAND)

PERSONALLY APPEARED BEFORE ME Adger Rice, who made oath that (s)he saw Hedwig Wilson sign the foregoing Agreement and that (s)he with ________, witnessed the execution thereof.

Mrs Hedwig S. Wilson

SWORN to before me this 18 day of July, 2016.
