Comment # 1: There are blocks in this application that were submitted with our FPR filing. We wanted to update ORS that we are currently building into these areas we committed to serve and will be finished ahead of the 6/30/23 commitment date. We would request that these blocks not be funded to overbuild our new fiber facilities currently being installed. Please refer to our FPR filing for a list of blocks.

Comment # 2: In response to comment # 1: If revisions to the application are allowed that affect cost, then this creates a fairness concern since cost data for all applications has been made public.
