10. Application Comments

Comcast has determined this application contains a scrivener's error in Section 1.7 (Project Service Area Information), Section 2.2 (Funding Details), and Section 4.1 (Summary Narrative). Specifically, Comcast submitted the Estimated Percentage Underground and Aerial as a total of miles instead of percentages and inadvertently reversed the dollar amounts between the South Carolina ARPA Broadband Grant Program Funds Requested ("Subsidy") and Applicant-Provided Funding ("Capital") rows and the percentages between the Percentage of Funds Requested from SC Broadband Office and Percentage of Funds from Applicant Match rows.

The application should be revised to show the Estimated Percentage of Underground to be 30% and the Estimated Percentage of Aerial to be 70%. Additionally, the application should be revised to request a Subsidy of \$12,832,488.00 (60%) with a Capital investment of \$8,624,744.67 (40%). The final sentence of the Summary Narrative at the beginning of Section 4.1 with the same information should also be revised to read: "In support of this Project, Comcast will wholly invest \$8,624,744.67 in private capital against a requested match of \$12,832,488.00 from the State – for a percentage split of [40% – Comcast] and [60% – State]."
