Nanette S. Edwards, *Executive Director*

## Approval of Eligibility Map Challenges

The South Carolina Office of Regulatory Staff, Office of Broadband Coordinator is pleased to announce successful map challenges as part of the March 31, 2022 eligibility map have been published to SCDigitalDrive.org and posted to the ORS Citrix ShareFile site for download.

All approved challenges have been aggregated into a new GIS data layer titled "Approved March 31, 2022 Eligibility Map Challenges." This data is to be used in conjunction with the March 31, 2022 Broadband Eligibility Map. Census blocks in the Approved Map Challenges layer supersede the corresponding census blocks in the March 31, 2022 Broadband Eligibility Map.

At this time, Internet Service Providers (ISPs) should not consider census blocks that were successfully challenged as available for grant funding. ISPs and Stakeholders that have filled out the Data Access Request Form have been granted access to download the data through the ORS Citrix ShareFile site or through SCDigitalDrive.org.

The Data Access Request Form can be found here: https://arcg.is/1fiq1j.

Data can also be viewed through the Eligibility Web Mapping Application available here: https://arcg.is/TGL0X.

Please email broadband@ors.sc.gov for questions around accessing GIS data for download.
